

SSM 53653 2024-2025 Nautilus - Temporary Diagnostic Trouble Code (DTC) U2404 After Programming The Gateway Module (GWM)

Some 2024-2025 Nautilus vehicles may exhibit a temporary U2404 DTC after programming the gateway module (GWM). This DTC will clear itself after 10 minutes of ignition off time. Additional programming or module replacement will not resolve the condition. If the DTC is still present after 10 minutes, diagnose using normal Workshop Manual (WSM) diagnostics.
