

SSM 54359 2026 Transit - DTC B00DF:4A Stored In The RCM

Some 2026 Transit vehicles may exhibit a diagnostic trouble code (DTC) B00DF:4A stored in the restraints control module (RCM) when a diagnostic self-test is performed. If there are no observable vehicle symptoms, the DTC will clear using the "Self-Test" app within the Ford Diagnosis and Repair System (FDRS). Replacement and/or programming of the RCM is not needed to resolve this condition. If there is an observable vehicle symptom and/or the DTC will not clear, follow normal Workshop Manual diagnosis.
