Customer statement:

MIL light/ Exhaust emissions warning lamp on, high outside temperatures and start-stop journey, restarting problems, e.g. after longer idle speed phases with hot engine.

Workshop findings:

Event memory entry P310B is logged (low fuel pressure regulation, fuel pressure outside of tolerance) is stored in the ECM. The customer statement can be reproduced and assigned to the fuel pump:

Further conditions: Symptom code 6183 at outside temperatures above 50°C.

Technical Background

Not applicable.

Production Solution

Not applicable.

Service

Check the low-pressure fuel system (as specified in the Workshop Manual), delivery rate, delivery pressure, and fuel lines. If there are any issues, replace the fuel delivery unit. If you do not discover any faults, erase the event memory entry and do not replace the fuel delivery unit.
