Technical Journal 37181.1.0

SERVICE:

Do not replace any parts. The hardware is *usually* not at fault.

First perform an adaptation test drive as follows:

1. Erase the DTC and reset the adaptations for the lambda sensor according to attachment TJ_37181_1.pdf.
2. Check if the vehicle software is the latest version. If not, please perform a Total Upgrade of the vehicle software according to TJ 31543.
3. Perform a test drive with the engine at varying loads for approximately 30 minutes in at speeds ranging between 50-100 km/h (30-60 mph).
4. Perform a new VIDA readout and check if DTC has returned.

If the DTC doesn't re-occur, the car can be released to the customer

If the DTC re-occurs, pressure test the fresh air side and the exhaust system for air leaks and repair as needed according to VIDA instructions.

If the above measures have no effect, please see instructions under Vehicle Report below.

Warranty claim info:

To get a warranty claim accepted for a job described in this TJ, use the corresponding VST OP number stated in this TJ.

Note that the TJ number must be stated in the repair order text.

VST Operation Number

VST Operation Number	Description
36001-2	Test drive according to Technical Journal 4JV
36004-2	Software control module downloading
36001-2	Diagnostic trouble codes read/ reset

VEHICLE REPORT:

Yes, please submit a Vehicle Report if the service solution described in this TJ has no effect. Use concern area "Vehicle Report" and sub concern area "Support needed", use function group 2544.

To view TJ attachments continue to next page. This TJ has one attachment.

TJ 37166

The screenshot displays the Volvo VIDA (Vehicle Information Diagnostic Access) software interface. The top navigation bar includes 'Home', 'ACM (18-1)', and a dropdown menu. Below this, the 'Planning & Diagnostics' tab is active. The central area shows a vehicle selection screen with a sidebar on the left containing 'Lists' and 'Planning' sections. The 'Planning' section includes 'Customer Symptom Codes', 'Claim Types', 'Technical Journals', 'Service Programs', 'Operations and Packages', 'Parts', 'Software', and 'Diagnostics'. The 'Diagnostics' section is highlighted with a red circle 2. The central area displays a table of components with columns 'ID' and 'Name'. The 'Engine Control Module (ECM)' component is highlighted with a red circle 4. The right-hand panel shows 'Diagnostic Sequences' with a list of tasks. The 'Readout' button is highlighted with a red circle 5.

ID	Name
5/1	Driver Information Module (DIM)
4/197	Electronic Gear Selector Module (ESM)
4/46	Engine Control Module (ECM)
4/286	Exterior Sound Module (ESM)
4/318	Forward-Looking Camera 2 (FLC2)
4/291	Forward-Looking Radar (FLR)

Diagnostic Sequences:

- Engine knock overview
- Resetting adaptations for the gasoline particulate filter
- Resetting adaptations for the throttle unit
- Resetting of adaptation values for the flywheel
- Resetting of adaptation values for the lambda probe, front
- Resetting of adaptation values for the lambda probe, middle
- Resetting of adaptation values for the lambda probe, rear
- Reading out permanent diagnostic trouble codes (USA/CDN)
- Readout of Readiness
