CONDITION

BRAKE Warning Light Illuminated – DTC C1441

RECOMMENDATIONS

The above condition is currently under investigation. TMNA is currently collecting customer usage information to better understand when the condition occurs. Before contacting TAS, please obtain the following information from Techstream and the customer:

1. Confirm FFD available – DTC C1441 (attach FFD to case)
2. Verify and record vehicle speed
3. Check and Record Vehicle Control History for the following (attach if possible)
    a. Sudden Braking History
        i. Two most recent occurrences, mileage
    b. ABS Operation History
        i. Two most recent occurrences, mileage
    c. Accelerator Signal and Brake Signal Input Simultaneously
        i. Two most recent occurrences, mileage
4. Customer Habits
    a. Entering/Exiting
        i. Use brake to enter/exit (pedal used as leverage/support)
        ii. Use brake to reach in back (pedal used as leverage/support)
    b. Short Term Storage (24+ hours)
        i. Airport parking, Garage, etc
            1. How long was vehicle stored
        ii. Did BRAKE illuminate at first startup AFTER storage
