Technical Service Bulletin

Transaction No.: **2080712/1**

20 Service Info: Fuel Rail/system pressure too low P008700

Release date: Mar 17, 2026

Condition

Model(s)	Year(s)	VIN Range	Vehicle Specific Equipment
A7 e quattro	2021	All	Not applicable

Customer states:

The customer complains that a drive system fault is shown. No fault can be diagnosed after working through GFF. According to GFF, all systems are OK.

Technical Background

Not applicable.

Production Solution

Not applicable.

Service

Try to reproduce the customer complaint (based on the description/ cause of the issue), so that it can be clearly assigned to this TSB. The following repair must only be carried out if all the criteria (model, model year and PR code) apply exactly. Otherwise, this solution will eliminate the problem and repeat repairs may be necessary.

Situation:

If memory entry P008700 with symptom number 15058 or 15059 is present, check that the suction-jet pump is attached correctly in the tank before performing Guided Fault Finding. The hose of the suction-jet pump may not be secured correctly, resulting in the event memory entry being logged.

Warranty

This TSB is informational only and not applicable to any Audi Warranty.

Additional Information

All part and service references provided in this TSB (**2080712**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
