Revision Table

Instance Number	Published Date	Version Number	Reason For Update
2065041/1	10/29/21	69-21-01TT	Original publication.

The customer may have a concern of an airbag light ON in the instrument cluster -**KX2**- and fault code B1225F1 is stored.

Technical Background

The customer is stating that the airbag light is illuminated and when the vehicle is scanned, fault code B1225F1, "Seat occupied recognition sensor mat -**G128**- shield wire, open circuit", is found.

Service

Due to a hardware change in the seat harness and occupancy detection mat -**G128**-, as well as updated software in the PODS module -**J706**-, it is necessary to replace all three components when servicing the system. Due to these changes, components are not interchangeable or backwards compatible. After replacement, clear any remaining faults and perform the PODS basic settings as needed. Please reference ETKA for the most up to date parts information.
