CUSTOMER SATISFACTION CAMPAIGN

DTC P2201/P20EE CALIBRATION UPDATE – REPROGRAM DEF CONTROL UNIT (DCU) (V2306)

AFFECTED VEHICLES

- 2021MY F-Series Vehicles

This campaign bulletin supersedes service bulletin SB23-L-002. Please disregard previous service bulletin SB23-L-002.

INFORMATION

CONDITION

In some 2021MY Isuzu F-Series vehicles, operators may experience an illuminated Check Engine Malfunction Indicator Lamp (MIL) with Diagnostic Trouble Code (DTC) P2201 NOx Sensor Circuit Performance Sensor 1 and/or DTC P20EE Diesel Exhaust Fluid (DEF) System NOx Trap Low Efficiency set in the DEF Control Unit (DCU). We have determined a DCU calibration error is causing this DTC to set. Therefore, this DTC may be resolved by reprogramming the DCU with a revised calibration.

CORRECTION

Isuzu dealers will reprogram the DCU with a corrected service calibration. This service will be provided **free of charge**.

VEHICLES INVOLVED

Involved are certain 2021MY Isuzu F-Series vehicles.

NOTE: Dealers are to confirm vehicle eligibility prior to beginning repairs by using the Isuzu Vehicle Information System (IVIS).

For dealers with involved vehicles, a report of involved vehicles containing the complete vehicle identification number has been or will be provided. Dealers will not have a report available if they have no involved vehicles currently assigned.

SERVICE PROCEDURE

1. Look up the VIN in the Isuzu Vehicle Information System (IVIS) and confirm the vehicle is affected by this campaign.
2. Using the Isuzu Diagnostic Service System (IDSS) version 15.0.9 or later, check the DCU calibration part number. **If** the calibration part number does **NOT** match the calibration number listed in the table below, reprogram the DCU.

MY	Vehicle	Engine	Calibration #
2021	F-Series	5.2L	55214580

DEALER RESPONSIBILITY

All vehicles in dealers' possession and subject to this customer satisfaction campaign must be held and repaired per the service procedure of this campaign bulletin before customers take possession of these vehicles.

Customers who have recently purchased vehicles sold from your vehicle inventory, and for which there is no customer information indicated on the dealer listing, are to be contacted by the dealer. Arrangements are to be made to make the required correction according to the instructions contained in this bulletin. A copy of the customer letter is provided in this bulletin for your use in contacting customers. Program follow-up cards should not be used for this purpose, since the customer may not as yet have received the notification letter.

In summary, whenever a vehicle subject to this customer satisfaction campaign enters your vehicle inventory, or is in your dealership, you must take the steps necessary to be sure the recall correction has been made before selling or releasing the vehicle.
