Technical Background

On certain Model Year 2024 GLI and Tiguan an initial ODIS GFF scan may produce B135154 Lumbar support height adjustment motor no basic setting. These vehicles will only have the Forward/Back lumbar adjustment option and do not have the lumbar height adjustment option.

Service

If during the ODIS GFF scan if B135154 Lumbar support height adjustment motor no basic setting is logged, the fault can be ignored, and no diagnosis or repairs should be performed. The ODIS test plan for basic setting will display the following message as shown and does not affect basic settings or seat memory.
