Engineered “luck”

It is a badge born over one hundred years ago that still stands for something totally original today: the Alfa Romeo marque represents a passion for motoring unlike any other. With racetrack wins at Mille Miglia, Targa Florio, 24 Hours of Le Mans and countless milestones along the way, a century-long motorsport history comes through loud and clear on any vehicle produced by this iconic Brand.

The very top Alfa Romeo performers are further distinguished by another historic emblem — *Quadrifoglio* — a four-leaf clover inlay within a white triangle. It's a good-luck tradition started by legendary Alfa Romeo factory driver Ugo Sivocci in 1923, whose original hand-painted clover within a square adorned his winning car at Targa Florio that year. Weeks later, Sivocci tragically lost his life in a vehicle that was missing his good luck charm. From that point on, every Alfa Romeo performance car would bear the four-leaf clover on a white triangle instead of a square — with the missing corner symbolizing the loss of Sivocci. Now, the Stelvio Quadrifoglio proudly carries on this tradition, completely redefining the meaning of SUV.

Alfa Romeo has always taken a unique and innovative approach to designing its automobiles; it is the point of convergence between a love for the most cutting-edge technology and a strong instinct to inspire emotions. Today, Alfa Romeo is writing a new chapter in its history, introducing a future where, once again, the driver is at the center of the design.

A Return to F1[®]

This is a Formula 1 comeback story that restores the standing of one of the greatest names in motorsport history. Now, the legendary Alfa Romeo Quadrifoglio badge will appear on a Sauber C37, as it has on the brand's top performance cars since 1923. The iconic four-leaf symbol returns to the highest level of racing to show the world the continuing strength and success of the Alfa Romeo philosophy. It demands the constant search for excellence; first applied to racing, then transferred in its entirety to the brand's production cars. Over one hundred years later, the legend continues.

INNOVATION CONTINUES WITH AWARD-WINNING ENGINE TECHNOLOGY BORN FROM THE MINDS OF MOTORING'S MOST PASSIONATE DESIGNERS

Over one hundred years of motoring innovation are exemplified in the two powerplants offered by Stelvio. Both engines are built in Italy with state-of-the-art processes and methods, utilizing the very best of all-aluminum engine design technology — both are at the top of their class in terms of performance.

Stelvio Quadrifoglio houses the most powerful production engine ever created by Alfa Romeo: a highly innovative, all-aluminum 2.9L Twin-Turbocharged V6 engine that delivers an exceptional 505 horsepower and 443 lb-ft of torque. The Quadrifoglio launches from 0 to 60 mph in 3.6 seconds and reaches a top speed of 176 mph.

With the Stelvio and Ti, excursions turn into excitement thanks to an all-aluminum 2.0L Turbocharged 4-cylinder engine that delivers 280 horsepower and 306 lb-ft of torque. Its innovative variable-valve-lift system manages combustion quality for improved performance. While a standard carbon fiber driveshaft demonstrates Alfa Romeo's commitment to performance and innovation, providing unmatched rigidity and response.

DNA

ALFA DNA DRIVE MODE SELECTOR Alfa DNA and Alfa DNA Pro Drive Mode Selector (exclusive to Quadrifoglio) instantaneously adapt the behavior of the vehicle to the selected driving mode:

- **RACE** deactivates traction control and stability control, while activating the overboost function for increased torque to maximize performance.
- **DYNAMIC** delivers sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving.
- **NATURAL** is a comfort setting for a perfect balance in daily driving.
- **ADVANCED EFFICIENCY** is engineered for maximum fuel efficiency. On Quadrifoglio, it includes cylinder deactivation.

The intrinsic value of AWD

Stelvio's available Q4 All-Wheel-Drive (AWD) system combines the advantages of AWD with the performance and driving pleasure of rear-wheel drive. During normal conditions, the Q4 AWD system sends 100% of the engine torque to the rear axle. When necessary, the system can automatically transfer up to 60% of the torque to the front axle thanks to the Active Transfer Case (ATC). It continuously monitors road conditions to deliver ideal torque distribution, maximizing grip and performance.

PATENTED ALFA LINK™ SUSPENSION

Stelvio excels at high-lateral acceleration with its front double-wishbone suspension. Its semi-virtual steering axis delivers rapid, accurate steering. In the rear, a patented 4 ½-link system makes for optimum lateral grip and comfort on any surface.

INTEGRATED BRAKE SYSTEM (IBS)

The innovative IBS combines stability control and other traditional brake system components into one unit, reining in all that Stelvio dishes out. Pedal-feel is acutely responsive, Antilock Braking System (ABS) vibration is minimized, and response-time is instantaneous for short braking distances.

CARBON FIBER DRIVESHAFT

The ideal power-to-weight ratio of Stelvio is the outcome of lightweight, high-tech materials — including carbon fiber for the driveshaft. It works to enhance Stelvio's overall balance, providing exceptional handling even in extreme conditions.

A VARIETY OF TRIM LEVELS FULFILL A
RANGE OF DRIVER PREFERENCES

STELVIO

This is a vehicle that starts out where most vehicles end up. From stem to stern, Stelvio is equipped to impress right from the get-go. It starts with the available Q4 AWD system which encourages adventure, while its 18-inch Bright 5-spoke aluminum wheels with 235/60R18 run-flat all-season tires garner glances from enthusiasts and admirers alike. Intelligent Bi-xenon headlamps with Adaptive Front Lighting offer advanced functions, while LED Daytime Running Lights (DRLs) and taillamps attract the right kind of attention. Stelvio reveals its racing DNA with accents like dual-chrome exhaust tips, brushed-aluminum window surrounds and brushed-aluminum roof rails. The sport-tuned suspension, standard with the Sport, brings driving to a whole new level. The Sport includes 19-inch Dark 5-hole aluminum wheels, Gloss Black window surrounds and roof rails. The interior adds a sport leather-wrapped steering wheel, steering-column-mounted aluminum paddle shifters and aluminum trim.

STELVIO Ti

The Ti takes Stelvio to a more expressive and personalized place, allowing drivers to opt for either performance or luxury amenities. Sharing all that the well-appointed Stelvio offers, Ti takes measures to assert its own personality, starting with 19-inch Y-spoke aluminum wheels with 235/55R19 all-season tires. The Ti indulges drivers with heated front seats and a heated steering wheel. The Ti Sport revs things up even more with 20-inch Sport aluminum wheels with 255/45R20 all-season performance tires, performance-enhancing sport seats, Gloss Black window surrounds and roof rails, and your choice of premium-painted brake calipers (Red/Black/Yellow). Alternatively, the Ti Lusso adds rare refinement with either genuine Dark Gray Oak Wood or Light Walnut Wood interior trim, a luxury leather-wrapped steering wheel, leather-wrapped dash and upper door trim, and 12-way power front seats, including 4-way lumbar support and luxury leather trim with Cannelloni design.

STELVIO QUADRIFOGLIO

Marked with the four-leaf clover badge reserved for Alfa Romeo's most powerful machines, Quadrifoglio boasts an impressive 505 horsepower. A checklist of high-performance features complements its power: 20-inch Bright 5-hole aluminum wheels with front 255/45ZR20 and rear 285/40ZR20 high-performance tires, Quadrifoglio front and rear fascias, and a dual-mode quad exhaust. Powerful control has never been more personal with the 4-mode Alfa DNA Pro Drive Mode Selector, featuring Race Mode. An independent adaptive damping suspension, the standard torque vectoring rear differential and the available carbon-ceramic Brembo® brakes are all designed and engineered for the track. Performance leather trim/Alcantara® sport seats with power bolsters and thigh support further enhance; a leather-wrapped dash and upper door trim panels with accent stitching, genuine carbon fiber interior trim and unique door sill scuff plates add finishing-line touches.

Nuances that satisfy every definition of performance

*Styling that
performs on
multiple levels*

Curves keep things interesting on the highway — and on Stelvio. Drivers will appreciate the way it handles contours found both inside and out. With special attention paid to its fluid lines and muscular proportion, there is true strength in Stelvio's simplicity and craftsmanship.

The Stelvio powerplants, including the 2.0L Turbocharged 4-cylinder and 2.9L Twin-Turbocharged V6, are built to generate jaw-dropping power ... while every Stelvio wheel puts a different spin on its persona.

Similar to celebrated architectural triumphs, the structure of Stelvio finds true balance: its signature V-Scudetto grille and unmistakable Alfa Romeo marque remind that Stelvio is a true Italian SUV.

The best arrivals begin with a great departure

The Stelvio profile forecasts its dynamism with a sleek outline, wheels that take an aggressive stance, and a steeply raked, aerodynamic rear liftgate.

Tight

The available leather-wrapped, carbon fiber steering wheel with Red push-button start and steering column-mounted aluminum paddle shifters maximize Quadrifoglio's driving pedigree.

*With rear seats folded. Properly secure all cargo.

The spacious cargo area of Stelvio is enhanced with the available aluminum cargo compartment adjustable rail system, designed to securely transport your gear.

harman/kardon®

900
watts

HARMAN KARDON® PREMIUM AUDIO SYSTEM

Designed to provide concert-like sound, the available 900-watt, 12-channel class-D amplifier and Logic 7® sound technology distribute clear sound through a system of 14 premium speakers with subwoofer — proof that Stelvio is built to carry tunes as well as cargo.

DON'T HOLD THE PHONE: KEEP ON GOING ABOUT YOUR DAY (OR NIGHT) WITH THE INTUITIVE AND INDISPENSABLE FEATURES OF APPLE CARPLAY® — IT ONLY ADDS TO THE PLEASURE OF DRIVING STELVIO

APPLE CARPLAY^{1*} COMPATIBILITY This is smarter iPhone® integration, so you will experience your favorite features through your dashboard. With Siri,² all you have to do is ask — catch up on calls and messages, get directions from Apple Maps or request a song through Apple Music. The system lets you browse music or discover nearby gas stations, parking, restaurants and more. Plus, Maps helps to predict where you're headed.

android
auto

IT USED TO BE THAT YOU DIDN'T WANT ANYONE TELLING YOU WHERE TO GO OR WHAT YOU COULD LISTEN TO ... BUT ANDROID AUTO™ WILL DEFINITELY MAKE YOU RETHINK ALL THAT

ANDROID AUTO³ INTEGRATION For those who know and love Android,TM GoogleTM goes with you thanks to navigation and "OK Google" voice detection. You'll hear your favorite Google Play music and get voice-guided navigation from Google Maps. Stay focused and productive while on the road with voice controls⁴ that allow you to make calendar appointments, set timers, reply to emails and messages — and more.

An extra measure of calm

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC)

These standard systems aid the driver during maneuvers when the vehicle is on a slope. HSA maintains and releases brake pressure during vehicle drive-off, while HDC maintains a constant speed by varying brake pressure, allowing a controlled vehicle descent.

LANE DEPARTURE WARNING (LDW)⁵ Drivers benefit from this available feature that emits an audio and dash-light visual warning of inadvertent lane departure, reminding the driver to stay the course.

DYNAMIC STEERING TORQUE (DST) Electronic Stability Control (ESC)⁶ directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations — like when there is a different adherence for each wheel.

FULL-SPEED FORWARD COLLISION WARNING (FCW) PLUS⁷

This available system provides autonomous braking and can bring the vehicle to a full stop when a frontal collision may be imminent.

ADAPTIVE CRUISE CONTROL WITH FULL STOP (ACC Stop)⁸

This available system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, can bring the Stelvio to a full stop without driver intervention.

ANTISLIP REGULATION (ASR) AND TRACTION CONTROL SYSTEM (TCS)

The standard ASR limits the spin of the driving axle during a driver torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

The image shows two red Alfa Romeo vehicles parked on a wet, reflective street at night. In the background, there is a building with a sign that reads 'TRAVEL ADVISOR'. The scene is illuminated by streetlights, creating a moody and sophisticated atmosphere. The car on the right is an Alfa Romeo Stelvio SUV, and the car on the left is an Alfa Romeo sedan. Both cars have their headlights on, and the wet pavement reflects the lights and the cars themselves. The building behind them has large windows and a classic architectural style with columns and arches. A dog statue is visible near the entrance of the building.

TRAVEL ADVISOR

BLIND SPOT MONITORING (BSM)⁹ This available system has dual ultra-wideband radar sensors that aid the driver when changing lanes, and when trailing vehicles are in the blind spot, via an illuminated sideview mirror icon.

REAR CROSS-PATH DETECTION¹⁰ This available system is activated any time the vehicle is in reverse. It lets the driver know with illuminated icons on the sideview mirror and with an audible chime.

BACK-UP CAMERA¹⁰ WITH DYNAMIC GRID LINES and REAR PARK SENSORS¹⁰ are standard on all Stelvio, Ti and Quadrifoglio models.

AIR BAG SYSTEM¹¹ Stelvio features a standard comprehensive system that includes driver and front-passenger dual advanced air bags, supplemental front-seat-mounted side air bags (pelvic-thorax), front and rear side-curtain, along with driver and front-passenger inflatable knee air bags.

ALFA STEERING TORQUE (AST) The AST functionality takes advantage of the integration with the Electronic Stability Control (ESC)⁶ system and electric steering in order to increase the safety level of the vehicle. Thanks to the AST system, in dangerous situations like braking on a surface with varying grip, the ESC⁶ system orders the activation of additional torque on the steering wheel.

Nero Edizione

Get a taste of what Stelvio has in store for you with seductive and striking accents that capture its dark side. This special edition Stelvio offers: 20-inch Miron Black Sport aluminum wheels (Dark 5-hole on Quadrifoglio) • Dark Miron V-Scudetto grille surround • Dark Miron exterior mirror caps • custom-painted brake calipers (Red/Black/Yellow) • Dark exhaust tips • Dark Miron rear fascia appliqué • Gloss Black roof rails • Gloss Black window surrounds • monochromatic wheel caps with Alfa Romeo logo • Dark Miron exterior badging
