CHARMED

Born over one hundred years ago, the Alfa Romeo marque represents a passion for motoring unlike any other. With racetrack wins over the years at Mille Miglia, Targa Florio, 24 Hours of Le Mans and more, the Brand's impressive motorsport history lends an alluring aura to any vehicle it produces.

Furthermore, the very top Alfa Romeo performers are recognized with the distinctive Quadrifoglio (four-leaf clover) emblem. It's a good-luck tradition started in 1923 by the legendary Alfa Romeo factory driver, Ugo Sivocci, who wanted to break a string of second-place finishes. He created a good-luck symbol by hand-painting a clover over a white square on his Targa Florio racecar. It worked like a charm — Sivocci finally won a race. Weeks later, Sivocci drove a vehicle that was missing his magic cloverleaf. Tragically, he crashed and lost his life. From that point on, every Alfa Romeo performance car would bear the four-leaf clover on a white triangle instead of a square — with the missing corner symbolizing the loss of Sivocci.

Now, the Stelvio Quadrifoglio, with its history of record-breaking track results, wears it well. Alfa Romeo has always taken a unique and innovative approach to designing its automobiles — it is the point of convergence between a love for the most cutting-edge technology and a strong instinct to inspire emotions. In this latest chapter of Alfa Romeo history, once again, the driver is at the center of the design.

BODY

SOUL

has long leveraged race-track technology with street-smart design, to make its mark in Formula 1 racing and commuter lanes alike.

A driver wearing a red racing suit and a black helmet is seen from the side, driving an Alfa Romeo Stelvio on a racetrack. The driver's hands are on the steering wheel, and the car's interior, including the dashboard and center console, is visible. The background shows a blurred racetrack and greenery, indicating high speed.

DRIVING FORCES

INNOVATION CONTINUES WITH AWARD-WINNING ENGINE TECHNOLOGY BORN FROM THE MINDS OF MOTORING'S MOST PASSIONATE DESIGNERS.

Over one hundred years of motoring innovation are exemplified in the two powerplants offered by Stelvio. Both engines are built in Italy with state-of-the-art processes and methods, utilizing the very best of all-aluminum engine design technology — both are at the top of their class in terms of performance.

Stelvio Quadrifoglio houses the most powerful production engine ever created by Alfa Romeo: a highly innovative, all-aluminum 2.9L Twin-Turbocharged V6 engine that delivers an exceptional 505 horsepower and 443 lb-ft of torque. The Quadrifoglio launches from 0 to 60 mph in 3.6 seconds and reaches a top speed of 176 mph.

With the Stelvio and Ti, excursions turn into excitement, thanks to an all-aluminum 2.0L Turbocharged 4-cylinder engine that delivers 280 horsepower and 306 lb-ft of torque. Its innovative variable-valve-lift system manages combustion quality for improved performance, while a standard carbon fiber driveshaft demonstrates Alfa Romeo's commitment to performance and innovation by providing pronounced rigidity and response.

A LEGEND PREVAILS

MULTIPLE CHOICE

ALFA DNA DRIVE MODE SELECTORS Both the Alfa DNA Drive Mode Selector and Quadrifoglio's exclusive Alfa DNA Pro instantaneously adapt the behavior of the vehicle to the selected driving mode. The systems automatically reset to "Natural" at the vehicle start, while retaining the ability to change modes at any time.

RACE (only on Quadrifoglio with Alfa DNA Pro) activates the over-boost function, opens up the dual-mode exhaust system and turns off ESC,^{1*} increasing torque to maximize performance.

DYNAMIC opens the dual-mode exhaust (standard on Quadrifoglio for 2020) and delivers sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving.

NATURAL is a comfort setting for a perfect balance in daily driving, and is calibrated to be the default setting.

ADVANCED EFFICIENCY is engineered to deliver maximum fuel efficiency; on Quadrifoglio, it also changes the threshold for all of the safety systems.

Q4: ALFA ROMEO TAKES ON THE ELEMENTS

The available Q4 All-Wheel Drive (AWD) system offers the performance and driving pleasure of Rear-Wheel Drive (RWD), switching to AWD only when warranted. Under normal conditions, the Q4 AWD system (available with the 2.0L engine) sends 100% of the engine torque to the rear axle. When necessary, the system can automatically transfer up to 60% of the torque to the front axle, thanks to the Active Transfer Case (ATC). It continuously monitors road conditions to deliver ideal torque distribution, maximizing grip and performance.

CORE STRENGTH

PATENTED ALFA LINK™ SUSPENSION

Stelvio excels at high-lateral acceleration with its front double-wishbone suspension. Its semi-virtual steering axis delivers rapid, accurate steering. In the rear, a patented 4½-link system makes for optimum lateral grip and comfort on any surface.

INTEGRATED BRAKE SYSTEM (IBS) The innovative IBS combines stability control and other traditional brake system components into one unit, reining in all that Stelvio dishes out. Pedal-feel is acutely responsive, Antilock Brake System (ABS) vibration is minimized, and response-time is instantaneous for short braking distances.

CARBON FIBER DRIVESHAFT An ideal power-to-weight ratio is the outcome of Stelvio's lightweight, high-tech materials — including carbon fiber for the driveshaft. It works to enhance Stelvio's overall balance and response, providing exceptional handling even in extreme conditions.

DETAIL-ORIENTED

LINES THAT DRAW YOU IN

Curves keep things interesting on the highway — and on Stelvio. Drivers will appreciate the way it handles contours found both inside and out. With special attention paid to its fluid lines and muscular proportions, there is true strength in Stelvio's simplicity and craftsmanship.

ROOM FOR YOUR SENSES

TWO SIDES OF STELVIO. (THEY'RE BOTH GOOD.)

The Stelvio profile forecasts its dynamism with a sleek outline, wheels that take an aggressive stance, and a steeply raked, aerodynamic rear liftgate.

TIGHT

The available leather and Alcantara® wrapped, carbon fiber steering wheel with Red push-button start and steering-column-mounted aluminum paddle shifters maximizes Quadrifoglio's driving pedigree.

WELL-APPOINTED

At 56.5 cu ft (with rear seats folded), the spacious cargo area of Stelvio is enhanced with the available aluminum cargo compartment adjustable rail system, designed to securely transport your gear.

HORIZONS THAT INSPIRE

harman/kardon®

EPIC SOUND

Alfa Romeo Stelvio has audio system options that will be music to everyone's ears. Included as standard is a 180-watt system that surrounds occupants with an acoustically impressive performance, thanks to 8 speakers (4 tweeters and 4 woofers). An available premium audio system for Stelvio ramps things up even more, pumping out 400 watts with 10 speakers and a subwoofer.

For Ti models and above, Alfa Romeo has partnered with Harman Kardon® to make concert-like sound available for the ride. Its 900-watt, 12-channel class D amplifier and Logic 7® sound technology distribute clear sound through a system of 14 premium speakers with a subwoofer.

Brushed aluminum speaker surrounds add a visually pleasing note. All proof that Stelvio is as adept at carrying a tune as it is cargo.

VALUABLE CONNECTIONS

TAKE APPLE CARPLAY^{®2} ALONG FOR THE RIDE IN EVERY STELVIO.

APPLE CARPLAY² COMPATIBILITY This is smart iPhone[®] integration, so you will experience your favorite features through your dashboard. With Siri,^{®3} all you have to do is ask — catch up on calls and messages, get directions from Apple Maps or request a song through Apple Music. The system lets you browse music or discover nearby gas stations, parking, restaurants and more. Plus, Maps helps to predict where you're headed.

Apple CarPlay integration shown above.

ANDROID AUTO^{TM4} FOR STELVIO WILL RESPOND TO YOUR WISHES.

ANDROID AUTO⁴ INTEGRATION For those who know and love Android,TM Android Auto⁴ brings your favorite smartphone apps into one place, making it easy for drivers to access their favorite navigation, media and communication apps on the road while minimizing the distractions. Stay focused on the road while you plan your day with the Google Assistant, get voice-guided navigation with Google Maps and listen to your favorite songs on Google Play Music.

androidauto

ESSENTIAL INPUT

A WIDER VIEW Alfa Romeo's fabled racing history was built on communication among driver, crew and car. Today's Stelvio communicates instantly with an 8.8-inch integrated touchscreen Information and Entertainment System.

In Stelvio, a wealth of information is right at your fingertips. For example, explore the inner workings of the Alfa DNA Mode Selector settings with data pages that outline the functionality of its key performance features. Each mode has a unique page within the Drive Mode Explorer that highlights vehicle settings including steering, shift behavior, pedal mapping and more.

When you opt for the Navigation Package, you'll enjoy 3D navigation in the 8.8-inch touchscreen that presents a vertically maximized view. This three-dimensional map enhancement provides the driver with a display closer to reality and superior orientation. Signpost images are integrated into the format, providing a consistent place where drivers can reliably look for vital information like speed limits, exit numbers, road numbers and more.

Stelvio takes multitasking to a new level with brand new content that features a choice of interactive widgets that scroll horizontally. Swipe through music, phone, navigation, performance and settings widgets that put essential controls right at your fingertips.

BLIND SPOT MONITORING (BSM)⁵ This available system has dual ultra-wideband radar sensors that aid the driver when changing lanes and when trailing vehicles are in the blind spot, via an illuminated sideview mirror icon (standard on Quadrifoglio).

REAR CROSS-PATH DETECTION⁶ This available system is activated any time the vehicle is in Reverse. It lets the driver know there is an object in the rear pathway with illuminated icons on the sideview mirror and with an audible chime.

BACK-UP CAMERA⁶ WITH DYNAMIC GRID LINES AND REAR PARK SENSORS⁷ are standard on all Stelvio models.

DYNAMIC STEERING TORQUE (DST) Electronic Stability Control (ESC)¹ directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations — like when there is a different adherence for each wheel. Standard on all Stelvio models.

ALFA STEERING TORQUE (AST) The AST functionality integrates ESC¹ with electric steering in order to increase the safety level of the vehicle. Thanks to AST, in dangerous situations like braking on a surface with varying grip, ESC¹ will order the activation of additional torque on the steering wheel. Standard on all Stelvio models.

COOL AND COLLECTED

FULL-SPEED FORWARD COLLISION WARNING (FCW) PLUS⁸

This system provides both audible and visual warnings to the driver and is able to bring the vehicle to a full stop when a frontal collision may be imminent. Standard on all 2020 Stelvio models.

AIR BAG⁹ SYSTEM Stelvio features a standard comprehensive system that includes driver and front-passenger dual advanced air bags, supplemental front-seat-mounted side air bags (pelvic-thorax), front and rear side-curtain air bags, along with driver and front-passenger inflatable knee air bags.

ANTISLIP REGULATION (ASR) AND TRACTION CONTROL SYSTEM (TCS) The standard ASR limits the spin of the driving axle during a driver torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC)

These standard systems aid the driver during maneuvers when the vehicle is on a slope. HSA maintains and releases brake pressure during vehicle drive-off, while HDC maintains a constant speed by varying brake pressure, allowing a controlled vehicle descent.

ADAPTIVE CRUISE CONTROL WITH FULL STOP (ACC STOP)¹⁰

This available system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, can bring Stelvio to a full stop without driver intervention.

LANE DEPARTURE WARNING (LDW)¹¹ Drivers benefit from this available feature that emits an audio and dash-light visual warning of an inadvertent lane departure, reminding the driver to stay the course.

THE ACTIVE DRIVER ASSIST SYSTEMS

Alfa Romeo now offers Enhanced Driver Safety and Active Driver Assistance Systems (ADAS), packaged to various groups, that represent the latest steps toward a future of autonomous driving. With these available systems, drivers are complemented with advanced safety technology when behind the wheel.

LANE KEEP ASSIST¹¹ With a forward-looking camera system, this system actively helps keep the vehicle within the marked lane by changing the direction of the vehicle by applying brake drag or affecting the steering system. It helps reduce collision potential and road departures by providing a visual and audible warning should the vehicle drift outside of lane boundaries or if the driver removes their hands from the wheel.

ACTIVE BLIND SPOT / "SIDE ASSIST"¹² Change lanes confidently or stay right where you are with this warning system that detects approaching traffic from behind, along with its rate of travel. An LED signal in the corresponding exterior side mirror indicates a vehicle that's too close, while steering-wheel resistance adds another accident-avoidance action.

TRAFFIC SIGN RECOGNITION¹³ This system can detect posted speed-limit signs and, along with information in the navigation system's map database, recommend to the driver to adapt their set cruising speed accordingly.

DRIVER ATTENTION ALERT¹² The system monitors for and detects signs of drowsiness based on driver behavior, following up with a driver alert and recommendation for rest.

HIGHWAY ASSIST SYSTEM (HAS)¹⁴ HAS is an autonomous system designed to help with acceleration, braking and steering on highways, reducing driver workload and fatigue. While performing lane-centering steering, it requires drivers to remain engaged by keeping hands on the wheel.

TRAFFIC JAM ASSIST¹² When traffic is moving slowly on well-marked roads (up to 37 mph), this enhancement to Adaptive Cruise Control (ACC)¹⁰ assumes accelerator, brake and steering to keep the vehicle within its lane. Front radar sensors and a front camera help the system orient itself to lane markings, traffic and structures; when conditions reach the limits of the system's abilities, it alerts the supervising driver to take over.

Ti SPORT CARBON

The Stelvio Ti Sport Carbon wears its racing heart on its sleeve with: • carbon fiber V-Scudetto grille • carbon fiber mirror caps • Dark Miron badges • Dark exhaust tips • Dark Miron rear valance panel • Gloss Black roof rails • Gloss Black window surrounds • 20-inch Nero Diamante aluminum wheels • monochromatic wheel center caps • colored brake calipers

The interior continues the theme with: • Genuine Carbon Fiber interior trim • leather-wrapped dash and upper door panels • Sport leather-trimmed seats • Sport steering wheel • Black headliner • Alfa Romeo door projector lights

NERO EDIZIONE

The seductive and striking accents of Nero Edizione let you take a drive on the dark side. These unique appearance packages include:

- 20-inch Miron Black Sport aluminum wheels (Dark 5-hole on Quadrifoglio)
- monochromatic wheel center caps with Alfa Romeo logo
- Dark Miron V-Scudetto grille surround
- Dark Miron exterior mirror caps
- custom-painted brake calipers (Red/Black/Yellow)
- Dark exhaust tips
- Dark Miron rear valence panel
- Gloss Black roof rails
- Gloss Black window surrounds
- Dark Miron exterior badging
