

TTTTS

substance always wins the day

It takes more than hard work, dedication and vision to create the truly exceptional. It takes something intangible. Something you can't quite put your hands on. It's courage, guts, perseverance, passion and fierceness of focus all wrapped into one.

And it's this intangible characteristic that defines all of us at Audi. It's the driving force behind

every pencil line we draw, every calculation we make and every idea we deem not good enough.

It's why every inch and curve and angle has purpose. It's why we test our cars at the highest of speeds for hours on end so they can be driven on any surface and in any condition – rain, shine or white-out blizzard.

It's why substance always wins the day. It's why cutting a corner, even a weld seam in the trunk, would be sacrilegious. And it's why for us scrutiny is so deeply ingrained it's like the very act of breathing.

This is Truth in Engineering. And this is Audi.

a badge doesn't define you
it represents you

sleek

The progressive, award-winning design of the TT sets it apart from anything in its class. For years the TT has been widely acknowledged as a design icon, and this year, it looks even more assertive, thanks in part to the Audi xenon plus headlights. They now feature 24 piercing LED daytime running lights that signify Audi domination at the 24 Hours of Le Mans. The new look includes a High-Gloss Black Singleframe® grille and new foglight grilles, as well as air inlets with sharp edges that highlight the highly assertive look of the TT.

The unmistakable profile of the TT is complemented by the dramatic aluminum fuel filler cap that offers a distinctive accent to the flowing body. Below the automatic retractable rear spoiler, is the unique rear diffuser with dual exhaust that adds an aggressive look to the TT. Take the sport focus even further with the available S line® Package and the TT will be a perfect reflection of your desire to drive the most innovative sportscar in its class.

TT

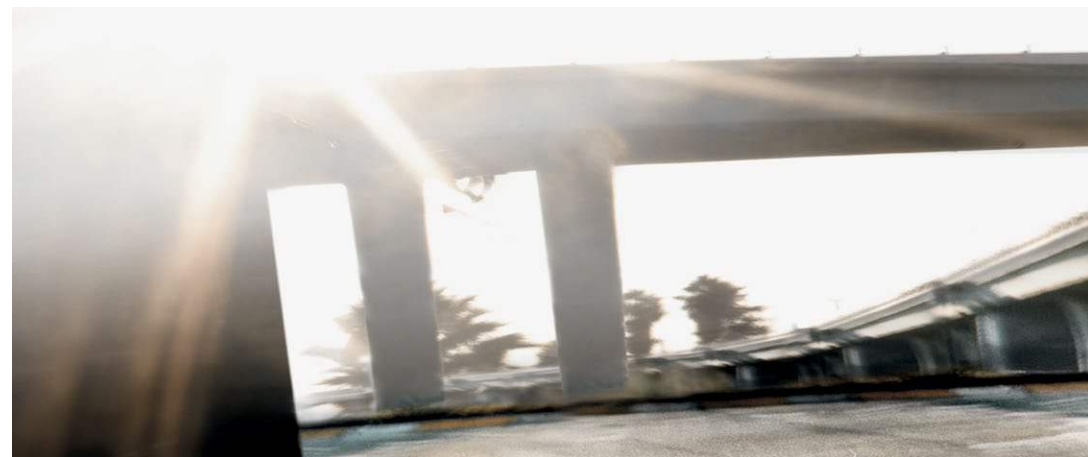

TT Coupe Prestige

TT Roadster Premium Plus

dynamic

Nothing delivers precision-handling and a high performance driving experience like the Audi TT. It's the only car in its class to offer quattro® all-wheel drive as standard. On virtually any road, the TT offers superior traction, creating a feeling of confidence. The TT front suspension features an advanced MacPherson strut design as well as a rear multi-link suspension with a number of aluminum components to keep the unsprung weight of the TT low. Available Audi magnetic ride further enhances handling by

offering two modes to personalize your driving experience. In Normal mode, the suspension strikes a balance between being agile and comfortable. In Sport mode, the system uses high damping forces to suppress body roll, creating a taut, connected feel to the road. The result is a well-balanced sportscar with confidence-inspiring, precise handling that is unlike any car in or out of its class.

surpass

TT Coupe Prestige

The heart of the TT lurks just beneath its sculpted hood, delivering instant and seemingly limitless power. The TT features a 2.0 TFSI® engine with Audi valvelift system that generates 211hp and 258 lb.-ft. of torque. For maximum

performance, it's mated to the lightning-fast S tronic® dual-clutch transmission that delivers shift times of just 0.2 seconds, while Audi launch control optimizes acceleration. But acceleration is just one part of the performance

equation. This remarkable group of technologies delivers optimal performance, making the TT suitable for the most demanding driver.

calculated

Progressive Audi design is evident everywhere in the driver-oriented cockpit. Beginning with the contrasting aluminum applications, the TT interior is meticulously designed throughout – echoing the Audi passion for performance and attention to detail.

Front and center for the driver is the race-inspired, multifunction, sport steering wheel. Leather-wrapped magnesium offers a solid feel, while the three-spoke design is contoured perfectly to your hands. Even the standard leather sport seats with Alcantara® inserts are race-inspired, keeping you firmly in place during spirited driving.

Interior convenience is also a top priority. With the power-folding top stored, the TT Roadster still offers nearly 9 cu. ft. of storage space for weekend getaways. The TT Coupe offers exclusive split folding rear seats with a class-leading 24.7 cu. ft. of storage. It is these thoughtful touches that make the TT a standout. A stunning beauty that is also practical and comfortable, the TT elevates the driving experience.

TT Roadster Prestige

launch

TTS

The 2011 TTS is the most thrilling TT model to ever reach the U.S. market. Bristling with power, its “push-you-into-your-seat” performance is just one reason the TTS is so highly acclaimed. A simple blip of the throttle and you’ll know

what the TTS is all about. With specially designed engine components and extensive modifications, the 2.0 TFSI® engine takes advantage of the significantly higher boost of 17.4 psi, generating 265hp and 258 lb-ft.

of torque. Mated to the rapid-fire S tronic® dual-clutch transmission with launch control, 0.2 second shift times help the TTS race from 0-60 MPH in a mere 4.9 seconds*. It’s pure performance in a pure sportscar package.

TTS Coupe Premium Plus

* TTS Coupe: 0-60 MPH in 4.9 seconds.

assertive

The Audi TTS design is unmistakable and its allure undeniable. Its muscular proportions, wide stance and dramatic lines are accentuated by a number of distinctive design elements.

At the front is the iconic S model Singleframe® grille with Aluminum Optic double-blade crossbars and a TTS badge. Setting off the standard Audi xenon plus headlights are the impressive LED daytime running lights, signifying Audi domination at the 24 Hours of Le Mans. The aggressive look of the TTS is enhanced by the unique bumper, prominent

rocker panels, striking Aluminum Optic mirror housings and aluminum fuel filler cap. Behind the unique 19" five-tri-spoke wheels are sport brake pads and special black TTS calipers with the front calipers featuring the TTS badge.

At the rear, the bold stance of the TTS is accentuated by the quad chrome exhaust, automatic retracting rear spoiler, rear diffuser and is capped off by the TTS badge on the rear deck. The Audi TTS offers both high performance and high design, making it the perfect car for those who refuse to compromise.

TTS Roadster Prestige

TTS Roadster Prestige

command

Reflecting the design ethos of Audi, the interior of the TT has always been revered. Enter the TTS. Its interior takes design and luxury to another level. The driver-oriented cockpit features luxurious standard Silk Nappa leather sport seats with contrast stitching that also offer prominent side bolsters. They function as the perfect complement to the performance intentions of the TTS, helping to hold you firmly

in place when you tap into the performance potential of the TTS. The magnesium, multifunction, sport steering wheel with TTS badging feels custom fitted to your hands, facilitating ideal hand positioning. Even the shift knob features chrome accents and a TTS designation. The TTS interior offers everything the serious driver needs to be in complete command of the road or track.

glued

To be considered a true performance car, handling is paramount to the driving experience. The Audi TTS with 19" five-tri-spoke wheels and summer performance tires* delivers like no other car. One reason the TTS offers superb handling is the revolutionary Audi Space Frame (ASF®).

With its lightweight properties, the mixed aluminum and steel ASF® offers exceptional rigidity, helps enable pinpoint handling and increased efficiency* while optimizing weight distribution. Lightweight aluminum is also

used in a number of suspension components to reduce the unsprung mass of the TTS. Other key differentiators of the TTS are the technologically advanced Audi magnetic ride and the legendary quattro® all-wheel drive. The Audi magnetic

ride continuously adapts to both your preferred driving style and the road conditions, while quattro all-wheel drive offers superior traction and handling. Naturally, braking is equally important to overall handling. To quickly slow

the TTS, front and rear ventilated rotors are employed. Unlike any other car in its class, the TTS utilizes the advanced technology of ASF, Audi magnetic ride and the traction of quattro to offer an unmatched driving experience.

* See page 52 for important safety information regarding summer performance tires. * EPA estimates for automatic transmission city/highway: 21/29 MPG. Your mileage will vary.

TTS Roadster Prestige

performance fueled by unconventional thinking

FSI®

Audi Fuel Stratified Injection, or FSI®, offers the benefits of increased performance and fuel efficiency. FSI direct injection delivers a precise amount of fuel directly into the engine cylinders as opposed to the engine intake runners. This advanced process helps ensure a more complete combustion, thereby diminishing waste and increasing power.

Additionally, the specially designed piston heads compress the fuel-air mixture in a spiraling motion, creating the most efficient combustion possible. Making the most of these technologies allows for greater efficiency in the combustion process.

By combining FSI and forced induction, such as a turbocharger, the 2.0T engine employs a variation of FSI called TFSI®. The principle and benefits are identical. TFSI equipped engines take advantage of significantly higher compression ratios and cylinder pressure, thus fully atomizing fuel and optimizing boost response. The compressor condenses the air flowing into the engine, allowing more air into the cylinder and therefore, more power from each ignition.

A forced-induction engine produces greater power than a similar engine without it, significantly improving the engine's power-to-weight ratio. Consequently, Audi is able to use smaller, more efficient engines and achieve similar power and performance results typically found in larger, less fuel-efficient engines.

The beauty of TFSI is that it works at any RPM, maximizing efficiency and generating responsive and optimal power during all driving conditions.

pulse

2.0 liter TFSI® engine with 1984 cc of displacement

Maximum 265hp @ 6000 RPM

Maximum 258 lb-ft. of torque @ 2500-5000 RPM

Specific power output of 132.5hp per liter of displacement

TFSI® direct injection with up to 120 bar of pressure

A compression ratio of 9.8:1

0-60 MPH Coupe: 4.9 seconds, Roadster: 5.1 seconds

Audi Valvelift System

Audi valvelift system helps elevate the performance characteristics of variable valve timing. The result is smooth power buildup, instantaneous throttle response and a reduction in fuel consumption.

Audi valvelift system intelligently varies the lift and duration of engine exhaust valves in response to engine load and power needs. Optimizing air management, Audi valvelift system helps create maximum torque across a broad range of RPM without sacrificing efficiency.

2.0 TFSI®

For the first time, the Audi TT is equipped with the 2.0T, 211hp motor. The Audi 2.0 liter turbocharged DOHC engine was named one of Ward's "10 Best Engines" for the fifth year in a row as well as "International Engine of the Year" for the fifth time.*

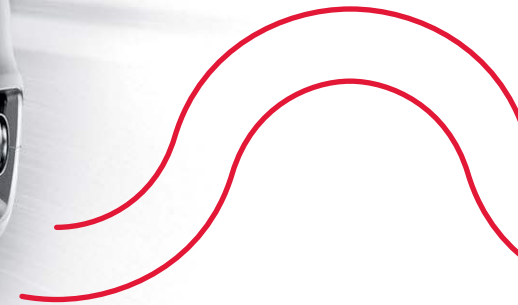

Years ahead of the competition, it combines Audi valvelift system, variable valve timing, TFSI® direct injection and turbocharging for more power and greater efficiency. The 2.0 TFSI was the first engine to combine gasoline direct injection with turbocharging in large-scale production. Producing 211hp and 258 lb-ft. of torque, it has been the engine of choice for more than 1.3 million Audi drivers worldwide.

2.0 TFSI

The Audi 2.0 TFSI engine in the Audi TTS delivers more than power, it delivers an unforgettable driving experience. The 2.0 TFSI engine features forged internal engine components to support the 17.4 lbs. of boost by the larger turbo. The result is an impressive 265hp and 258 lb-ft. of torque, leaving you with no shortage of power, regardless if you're passing on the highway or accelerating off-the-line.

* TT EPA estimate not available at time of printing. TTS EPA estimate: 21/29 city/highway MPG. Your mileage will vary.

† Based on 1.8 to 2.0 liter category.

get ready, this is where
it becomes visceral

awe

The concept is ingenious, the solution brilliant. Often imitated, nothing drives like quattro®, the world's most innovative all-wheel drive system. It's a technology that we've been developing for 30 years. And the competition? They're just now beginning to realize what we've known for three decades.

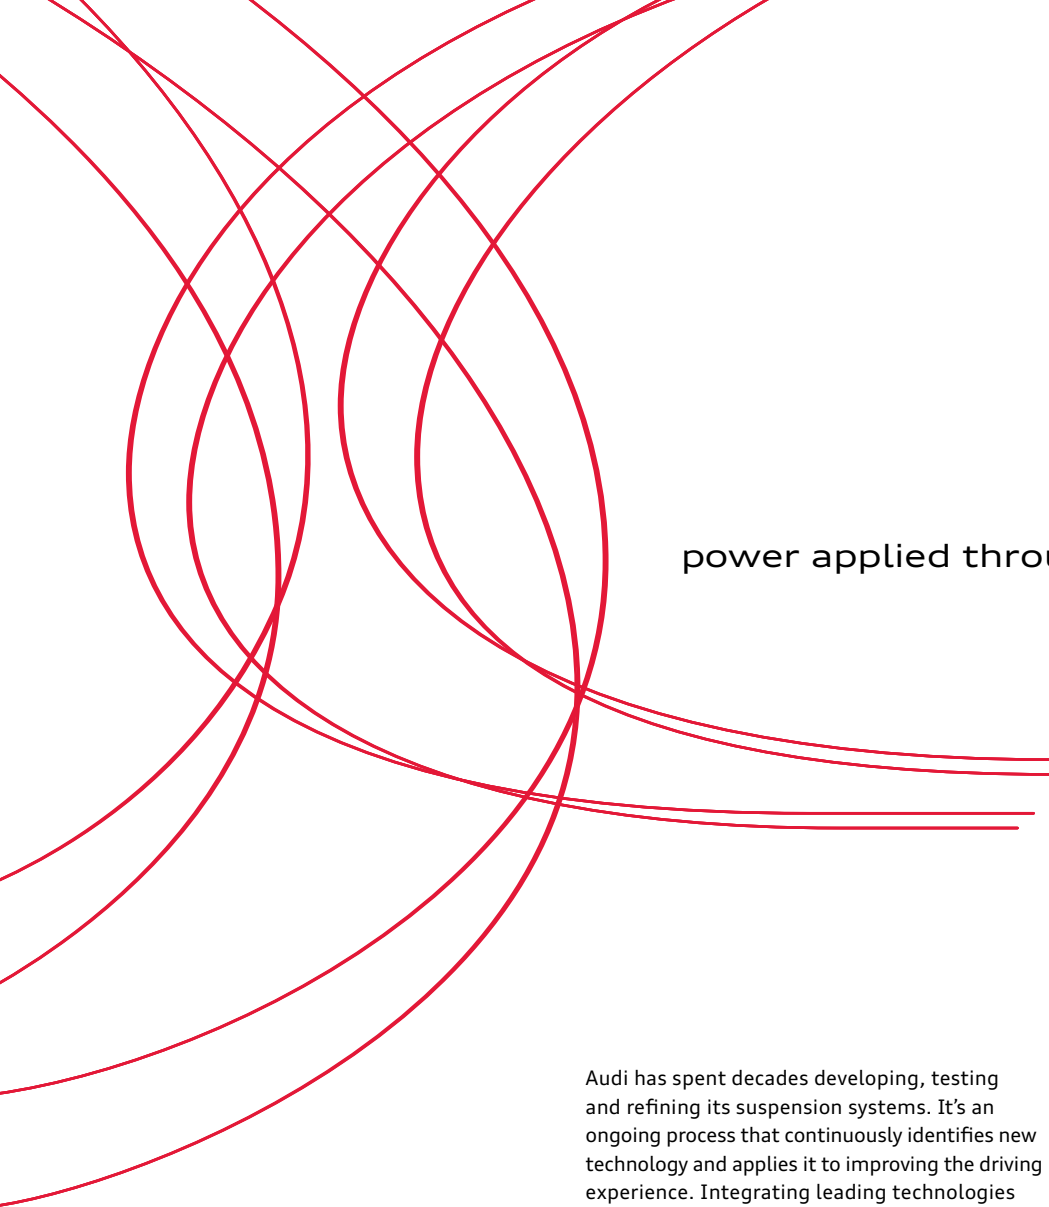

For you, quattro means unmatched traction and confidence in less-than-ideal driving conditions and unequalled performance at all other times.

Permanent all-wheel drive systems are not created equal. And they certainly don't perform that way either. The quattro all-wheel drive system in the Audi TT is a dynamic hydraulic system that progressively engages depending on anticipated wheel slippage, thanks to a number of electronic controls. For instance, if a loss of traction is imminent, the system will actively manage the vehicle's available power and torque, distributing power to the front and rear wheels to provide optimal traction.

In normal driving situations, quattro distributes the power between front and rear axles enhancing the driving dynamics while maintaining optimum control. quattro can also shift power 100 percent to the rear or front when conditions demand. Constantly assessing grip, quattro helps to ensure the best possible combination of traction and handling, regardless of the road conditions.

What you experience behind the wheel is confidence-inspiring handling. Curves are relished. Rain and snow are greeted with relative indifference. And every drive is an experience in performance bliss.

power applied through sophisticated engineering for legendary handling

planted

Audi has spent decades developing, testing and refining its suspension systems. It's an ongoing process that continuously identifies new technology and applies it to improving the driving experience. Integrating leading technologies such as Servotronic® speed-sensitive steering and quattro® all-wheel drive with finely tuned brakes and a rigid chassis results in the refined handling dynamics for which Audi is famous. The suspension system in an Audi consistently delivers precise steering feel, exceptional ride comfort and sharp handling.

Audi Magnetic Ride

Audi magnetic ride creates an unparalleled driving experience by offering extremely precise handling through sensing road conditions, body roll and driver inputs.

This is achieved through the advanced Audi technology of a continuously adaptive damping system. It dictates suspension response to provide a dynamic, adaptive driving experience that balances comfort and performance.

At the heart of this remarkable technology is the magnetized damper fluid. When sensors detect body roll, or other dynamic conditions, a variable voltage is applied that condenses the fluid, limiting damper movement.

This action takes place continuously at each wheel to ensure the correct amount of damping is occurring in every situation. The greater the energy applied, the stronger the magnetic field and, consequently, the greater the resistance and damping power.

The driver can select between two base characteristics. Normal mode makes the suspension more pliant. Sport mode creates a firmer, more responsive ride that offers increased handling, enhanced stability and a feeling of being connected to the road. With no mechanical components, the Audi magnetic ride response is virtually instantaneous.

MacPherson Front Suspension

The finely tuned MacPherson front suspension components increase ride quality by isolating road harshness and vibration from the cabin. The overall front suspension design saves weight by eliminating upper control arms with the MacPherson strut and utilizing an aluminum subframe. This helps reduce unsprung mass at each wheel, allowing the suspension to respond more rapidly. The net effect is a driving experience that is extremely responsive, smooth and predictable. It is handling that has become an Audi hallmark.

Rear Suspension

The four-link rear suspension provides an incomparable level of driving dynamics. This structure offers a high degree of stiffness that helps ensure precise handling, while the control arm components absorb a great deal of the force encountered by the wheels. The combination helps improve handling response while damping the abrupt impacts commonly encountered while driving. Additionally, the wheel guidance components are fixed to the subframe with both rubber and metal bushings to further isolate vibrations for a smoother driving experience.

Servotronic® Steering

Servotronic® is speed-dependent power steering in which the amount of power assist provided is dictated by road speed, providing even more comfort and convenience for the driver. The amount of power assist is greatest at low speeds, making it easier to maneuver the car. At higher speeds, an electronic-sensing system gradually reduces the level of power assist, creating a tighter, more dynamic steering feel.

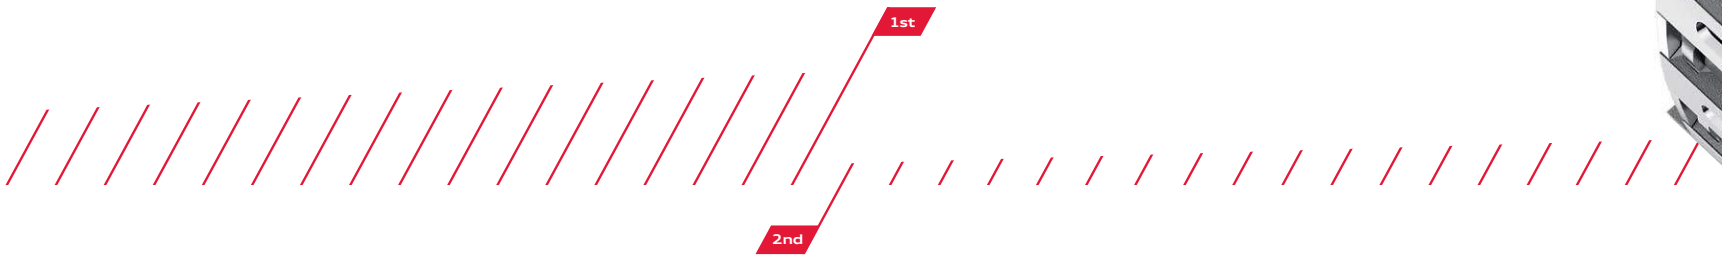

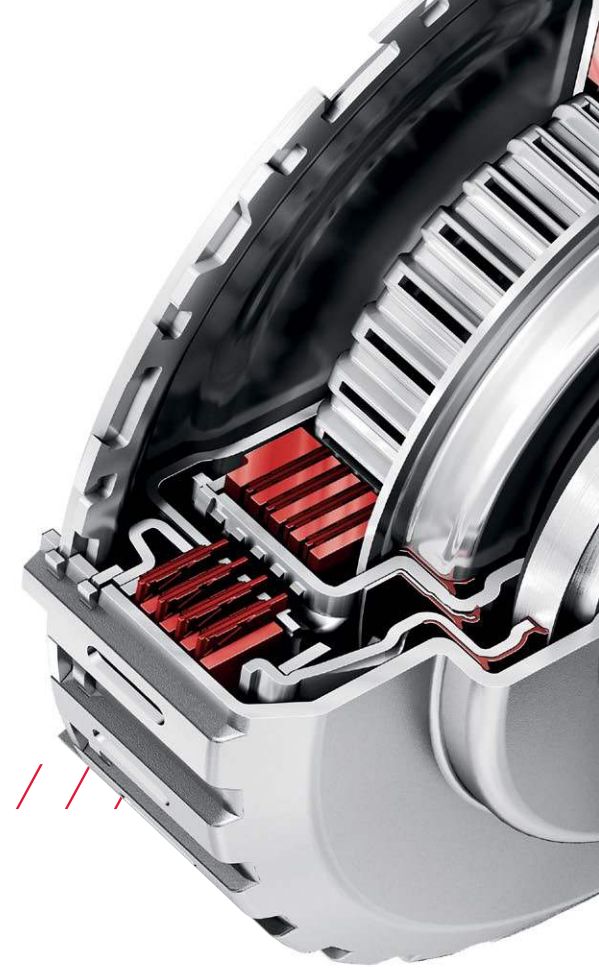

TTS Sport Suspension

Enhancing the overall performance of the TTS, the S sport suspension is specially tuned for dynamic handling. With a 10 mm lowered chassis, firmer springs and dampers provide direct and precise contact with the road while thicker anti-sway bars offer additional support, reducing overall body roll during hard cornering.

Thanks to the integration of lightweight aluminum materials throughout the suspension system, unsprung weight is reduced, allowing for rapid suspension response. The result is a performance-oriented, yet comfortable ride in nearly any driving scenario.

duality

one is good, two is breathtaking

Dual-Clutch

The concept behind one of the world's most advanced transmissions is simple to understand and thrilling to experience: near constant power through lightning-quick gearshifts. Utilizing two clutches, S tronic® helps ensure you're in the gear you select the instant you select it. There is no loss of momentum, and at a mere 0.2 seconds between shifts, no lag between gears.

The S tronic transmission utilizes two clutches that operate independently. One clutch controls the odd gears (first, third, fifth and reverse), while the other controls the even gears (second, fourth and sixth). When the first clutch is transmitting power, the second clutch is poised to engage the next preselected gear. When you shift, the first clutch is released and the second engages; the gearshift takes place in a quick 0.2 seconds. This innovative design allows gears to be changed without interrupting the power flow from the engine to the transmission. In addition, Audi launch control works with the dual-clutch to optimize launch rev speed and tire slippage. For you, it means lightning-fast gear changes, flawless acceleration and power where you want it – at the wheels.

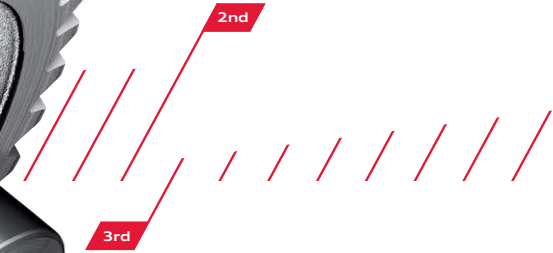

Dual-Mode

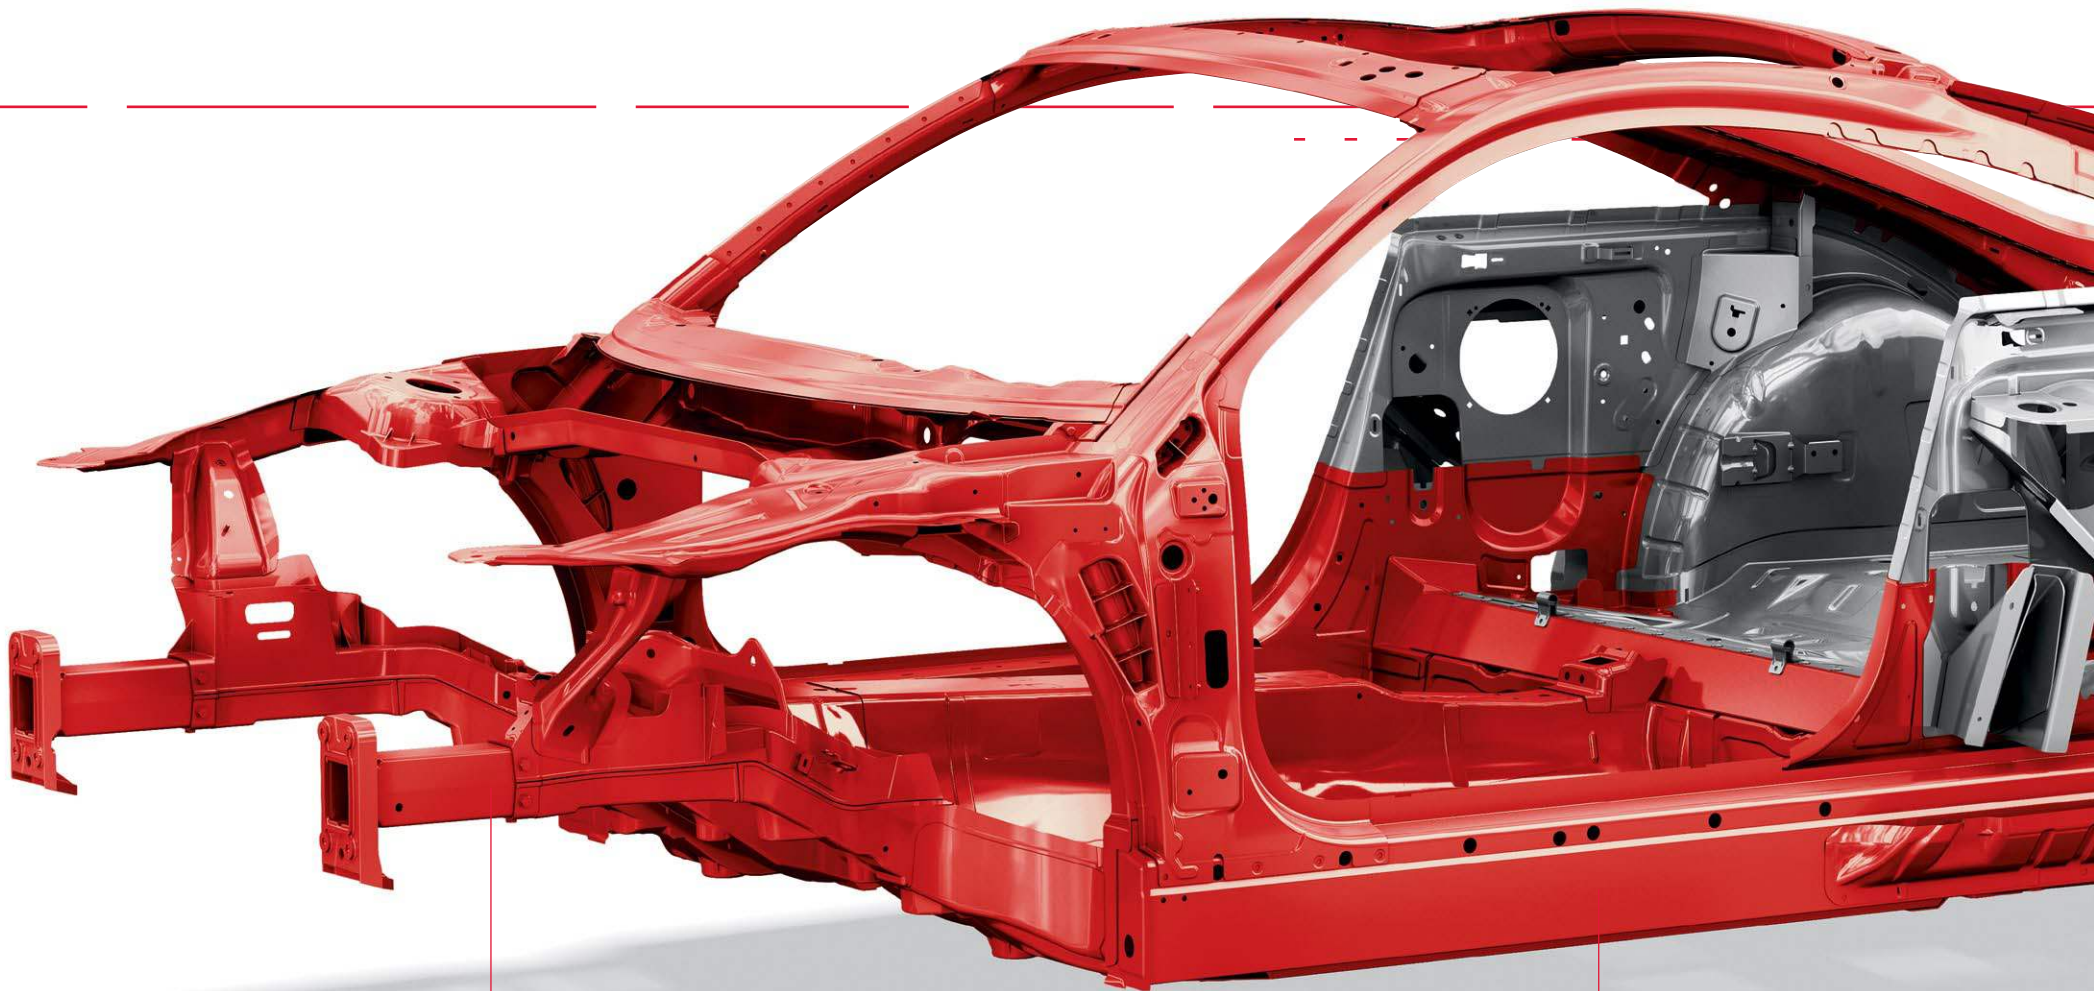

The S tronic transmission offers two settings: Normal and Sport. Normal allows for smooth shifts, while Sport allows the engine to rev higher and perform automatic downshifting. Drivers can select from full automatic or full manual shifts via the gear lever or steering wheel-mounted shift paddles.

Efficiency

The rapid-fire shifting of S tronic not only creates an exhilarating, performance-oriented driving experience, it also offers the benefit of increased fuel efficiency.* Because power flow from the engine to the transmission is not interrupted, fuel efficiency increases dramatically; the velocity of the car is constant, versus having to regain lost momentum during the gear change. The result is up to a 10 percent increase in fuel efficiency when compared to a conventional five-speed automatic.

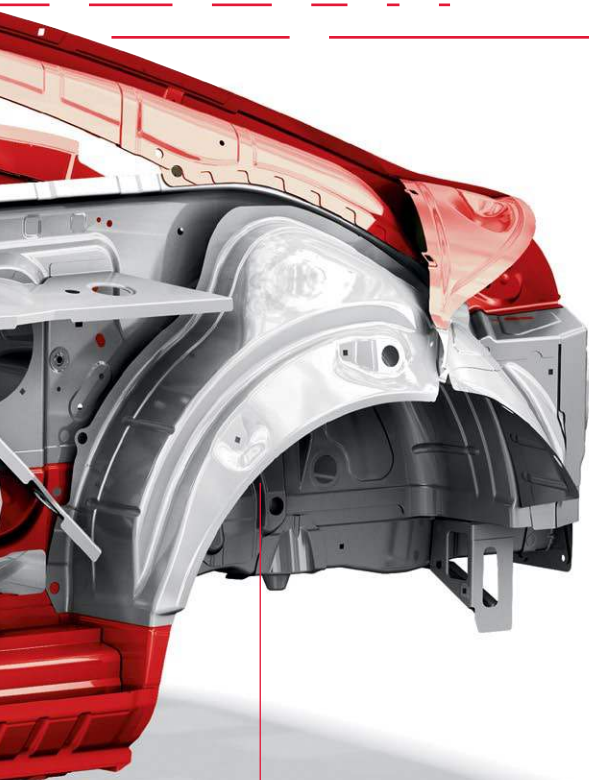

* TTS EPA estimate: 21/29 city/highway MPG. Your mileage will vary.

Passive Safety:

The Audi TT and TTS feature a number of strategically placed crumple zones. Each is designed to compress during a collision and absorb deformation energy from the impact.

Weight Distribution:

Steel used in rear for better weight distribution and handling.

Aluminum Frame:

Reduces weight, enhances body strength and increases handling.

perfection

reduced weight and stiffness
in perfect harmony

Audi Space Frame (ASF®)

The exclusive lightweight design of Audi Space Frame (ASF®) technology offers a number of significant advantages over the competition.

By utilizing a combination of aluminum and steel, hybrid ASF technology significantly reduces vehicle weight, enhances body strength and increases handling.

The weight savings of ASF offers a couple of distinct advantages. As a point of comparison, a conventional steel frame TT would weigh 48 percent more. Naturally, this weight savings translates into greater fuel efficiency* as the coupe is 69 percent aluminum and the Roadster is 58 percent aluminum. Additionally, aluminum in the front of the vehicle optimizes weight distribution. The result is better acceleration and braking, because less mass needs to be moved and stopped.

Passive safety is also enhanced through the use of the ASF. The doors of the TT are steel with the added protection of aluminum impact beams.

Thanks to the use of aluminum, the body is stiffer, resulting in higher torsional rigidity. This stiffness enhances handling by enabling the car to be more responsive, more precise and more stable.

* TT EPA estimate not available at time of printing. TTS EPA estimate: 21/29 city/highway MPG. Your mileage will vary.

TT Premium Plus

¹ **Leather-wrapped, flat-bottom, multifunction, sport steering wheel with shift paddles** | The race-inspired, lightweight, magnesium, three-spoke, leather-wrapped design has a performance look and feel that includes shift paddles for quick gear changes. The multifunction steering wheel provides easy access to Bluetooth®-enabled phone, audio volume and CD track selections.

² **Audi concert radio with SIRIUS® Satellite Radio** | This stereo system integrates 140 watts of power, MP3 capability, a CD player and auxiliary input for easy access to a variety of music devices. Aside from exceptional sound quality, the system also features the Radio Data System (RDS), which displays several types of FM radio information as well as the information from the standard SIRIUS® Satellite Radio.

³ **Power front seats with lumbar support** | The power front seats allow the driver and passenger to electronically adjust the seats' forward/backward position, height, angle of seat cushion and seat. Additionally, the seats allow for lumbar support adjustment.

⁴ **Retractable rear spoiler** | In order to improve vehicle downforce, the retractable rear spoiler automatically extends at 75 MPH and retracts at 50 MPH. This feature also includes a manual override mode for activation at any speed.

TT Premium Plus

1

2

TT Premium Plus

5 **Automatic climate control** | The climate control system allows the driver and passengers to enjoy an ideal level of heating or cooling via the center console.

6 **18" five-arm wheels with 245/40 all-season tires** | These sport-oriented 18" wheels are designed to complement overall performance and handling.

7 **Leather/Alcantara® sport seats** | The sport seats offer greater lateral support thanks to more prominent side bolsters. With integrated head restraints and standard leather and Alcantara® inserts, the TT sport seats add a distinctive performance-oriented look and feel.

8 **Bluetooth® mobile phone preparation** | The advanced technology of the Audi TT allows you to conveniently access your Bluetooth®-enabled phone's features, allowing for easy, intuitive hands-free communication. For specific compatibility and operation instructions, refer to audiusa.com/bluetooth or contact your local Audi dealer for the latest listing of compatible phones.

Features listed are standard on the Premium Plus model unless otherwise noted.

+ FEATURE NOT SHOWN

TT Premium Plus

TT Premium Plus

¹ **Auto-dimming interior mirror with compass** | The rearview mirror with automatic dimming recognizes glaringly bright beams behind the car and darkens the mirror automatically. An electronic control unit varies the darkening effect quickly and continuously according to actual ambient light conditions. Vehicle direction is displayed through a digital compass in the corner of the mirror.

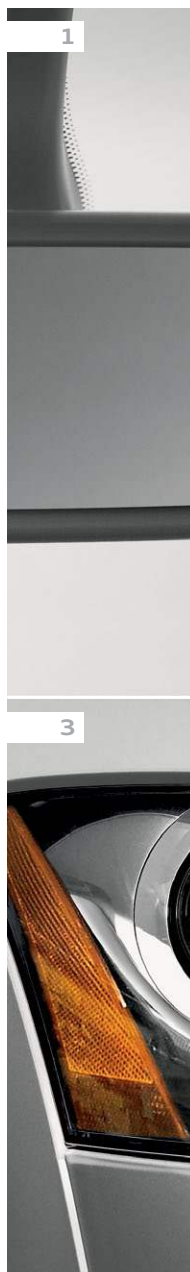

² **HomeLink®** | HomeLink® is integrated into the overhead controls and uses a simple three-button system to control garage doors, gates and even lights in your home.

³ **Audi xenon plus headlights with LED daytime running lights** | The signature LED daytime running lights and high-intensity headlights not only add a distinct look to the vehicle, they also improve visibility while using half of the energy of conventional bulbs.

TT Prestige

TT Premium Plus

TT Prestige

Audi parking system rear | Rear ultrasonic parking sensors measure the distance to the nearest object and audibly warn you when the distance becomes unsafe.

BOSE® Premium Sound System | The twelve-speaker, 255-watt sound system is individually tailored to the vehicle interior. It is further enhanced by the AudioPilot® noise compensation feature, which adjusts volume in response to unwanted road noise, enhancing the listening experience.

Fine Nappa leather sport seats | The sport seats offer greater lateral support thanks to more prominent side bolsters and extendable thigh support. With Fine Nappa leather, the TT sport seats add a distinctive performance-oriented look and feel.

Audi Navigation plus | The DVD-based Audi Navigation plus features real-time traffic, a full-color 6.5" LCD screen and MMI®-inspired control logic for AM/FM and satellite radio functions. Also included are two SD card slots for your MP3 music and the option of a six-CD changer or iPod® interface.

Heated front seats | With a convenient touch of a button, the multilevel seat heating system warms the entire surface of the seat.

Interior LED Lighting Package | The Interior LED Lighting Package features permanent vertical ambient illumination of select interior areas for a driving environment that exudes distinction and style.

TT Wheels

¹ **18" five-arm wheels with 245/40 summer performance tires*** | These sport-oriented 18" wheels are designed to complement overall performance and handling. [Available with all-season tires]

² **18" ten-spoke wheels with 245/40 summer performance* or all-season tires** | The 18" ten-spoke is a refined design that complements the sport-inspired style of the TT. Summer performance tires help to improve handling and driving dynamics, while all-season tires offer responsive handling on a variety of surfaces. [Optional on Premium Plus and Prestige]

³ **18" seven-arm wheels with 245/40 all-season tires** | The sport-oriented 18" wheels with all-season tires offer an assertive look while providing superior traction. [Optional on Premium Plus and Prestige]

⁴ **18" ten-spoke chrome wheels with 245/40 summer performance tires*** | The assertive, sport-look 18" wheels with summer performance tires help to improve handling and driving dynamics while enhancing looks. [Optional on Prestige only]

⁵ **19" seven, twin-spoke design wheels with 255/35 summer performance tires*** | This aggressive, sport-inspired wheel option complements the exterior of the TT from top to bottom. The wheels are equipped with summer performance tires, which help to improve handling and driving dynamics. [TT S line® only]

*Summer performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car or their equivalent. These summer performance tires also have a lower aspect ratio that aids performance and handling. However, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces, or upon encountering road debris or obstacles. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. For more information on all of these topics, please consult the owner's manual, your local dealer or call 1-800-FOR-AUDI.

The table above represents the standard equipment on the TT Premium Plus model and TTS Premium Plus model. Many popular options are combined and available on the Prestige models. Please see the package contents in this brochure for complete details.

* Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children in the rear, using restraint systems appropriate for their size and age.

† Your Audi vehicle is equipped with a phone preparation utilizing Bluetooth interface to enable hands-free functionality [compatible mobile phones sold separately]. You will need a Bluetooth-enabled mobile phone in order to utilize this function. Not all Bluetooth-enabled mobile phone models are compatible with Audi phone preparation. Visit audiusa.com/bluetooth, or contact your local Audi dealer for the latest listing of compatible phones. Audi recommends use of the Audi phone cradle [sold separately] with your mobile phone while operating this vehicle.

‡ Audi Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destination and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible; therefore, you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgement in determining whether or not to follow a suggested Audi Navigation plus route. Periodically, the mapping is updated, and a new DVD will be required in order to maintain the latest navigation information available to us. These will be available for purchase from time to time at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.

Infotainment Technology	TT	TTS
Bluetooth** mobile phone preparation	S	S
HomeLink® universal remote	S	S
