INSTANT WINNER – SMALL WONDER.

How can the world's first subcompact premium SUV-style vehicle deliver a sport sedan-like driving experience with enough space to comfortably fit up to five? Simple: it's a product of BMW engineering magic. After conquering the rest of the world, the BMW X1 SAV® is garnering rave reviews in America for combining many of BMW's strongest features in one dynamic vehicle.

Don't let its lean stance fool you. The X1 formula offers a banquet of desirable traits, such as potent, fuel-efficient engine options. Bespoke styling. Plenty of legroom and headroom, as well as ample cargo space. BMW's latest driving and connectivity technologies. And with available xDrive intelligent all-wheel drive, no road is too challenging. The X1 SAV: injecting substance into the subcompact SUV category.

X FACTOR, REDEFINED.

► The X1's combination of sporty design, versatile power, modern aesthetics and groundbreaking technology is winning hearts and gracing driveways worldwide.

A refined approach is the key to the X1's appeal. With its lean body, dynamic styling, light weight and aggressive handling, BMW's smallest X vehicle shows off a considerable flair for track-inspired performance. No matter which model you choose – including two all-wheel-drive versions and BMW's first rear-wheel-drive X vehicle – the BMW X1 proves it's all about personality.

►► I Dynamic, eye-catching and immediately identifiable, the X1 shows off at every turn. From the muscular front end to BMW signature L-shape taillights, the X1 attracts followers from all walks of life.

DESIGNED TO X-CEL.

Vibrant, muscular, full of energy: the X1, though a part of the celebrated BMW X family, shows itself to be a unique vehicle in its own right. Seen from the front, the X1 delivers a great sense of confidence. Wide wheel arches, a bold seven-slat twin kidney grille, and a three-dimensional surround across the headlights immediately signal the X1's rugged BMW DNA. In fact, looking directly at the front end, you can make out a subtle but powerful "X" shape, formed in the body and panel work. But make no mistake, this is no boxy, utilitarian design; a sweeping hood, long wheelbase and set-back passenger compartments suggest the X1's integration of a more refined driving experience. Additional cues, such as a chrome accent strip atop the twin Corona headlight-rings, as well as an LED accent light, enhance the X1's elegant presence.

BMW designers took great care in crafting a suitable exterior "personality" for the X1: spontaneous, performance-driven and, most of all, fun. From the 18-inch alloy wheels to its sporty roof rails available in three different finishes, the X1 is a vehicle that says, Where do you want to go today? Whatever your answer, it's game.

► Unique among the competition and even BMW, the X1 design language boasts distinctive lines, contours and accents that make it stand out from the pack.

Seen from the side, the X1 boasts three bold lines that create a sense of power and confidence. The top contour line rises sharply to the rear, interacting with the lower sill line to create a dynamic wedge shape, while a distinctive middle character line adds a dynamic touch. Another BMW signature, the Hofmeister kink, appears in conjunction with the character line and special window graphics. Surfaces and contours are bold, distinct and crisp; the flowing front end, sides and rear create a symphonic connection between the various elements. Body components are finished with an exacting degree of sophistication, including the painted front bumpers, side sills and a trim bar that separates the lower air intakes with a horizontal line. Even the underfloor protection plate is finished in a striking silver color, which can be matched with a Satin Aluminum roof rail. This versatile vehicle shows how flair is a great match with functionality.

X1 TO GO – HOWEVER YOU'RE GOING.

►► Settle in and take the wheel – you're in for a thrilling drive. Whether pushing the engine to its limits, or putting xDrive intelligent all-wheel drive to the test, you'll find there's nothing the X1 can't handle.

Tackling the tarmac, the X1 can open up virtually any driving experience. Are you the sporty, adventurous type who demands as much from your vehicle as you do from yourself? The X1 xDrive35i – available only in the U.S. – has power and traction at the ready, courtesy of a potent TwinPower Turbo six-cylinder engine and xDrive, BMW's intelligent all-wheel drive. Seeking rear-wheel-drive handling and a potent, efficient powerplant? The X1 sDrive28i delivers the goods with a stunningly responsive TwinPower Turbo four-cylinder engine. Or split the difference with the X1 xDrive28i's lean, efficient four-cylinder TwinPower Turbo dynamo and optimized traction of xDrive all-wheel drive. All three models can be upgraded with the M Sport for over-the-top, race-inspired styling and performance.

TAKE CONTROL.
FURTHER.

What is it about pure adventure that we find so exhilarating? Whatever your next challenge may be, the X1 can help you overcome it. The power starts with award-winning BMW TwinPower Turbo engines that incorporate high-pressure direct fuel injection, Valvetronic and Double-VANOS – true engineering marvels and purveyors of peak BMW performance.

A whopping 300 hp and 300 lb-ft of torque in the X1 xDrive35i give you the muscle you need to climb virtually any hill or carve any turn. Yet this is not just about pure power. Thanks to BMW EfficientDynamics engineering principles, this engine is also a paradigm of efficiency and reduced emissions, so your footprint in the wild isn't marked by much more than tire tracks.

The four-cylinder X1 xDrive28i and X1 sDrive28i propel you in a similarly exciting way. Their engine produces a dynamic and impressive 240 hp and 260 lb-ft of torque. And it does so with an incredible amount of zip and efficiency, with the help of advanced engine technologies.

Both the X1 xDrive28i and X1 xDrive35i have an innovative feature in common: xDrive, BMW's intelligent all-wheel-drive system that provides optimized traction in even the most extreme conditions, and helps keep the X1 on course and ready for action. Also available: the cutting-edge Performance Control feature, which works in tandem with the xDrive system to add another level of responsive, sporty handling. Performance Control automatically alters engine and braking parameters during turning maneuvers, driving the outer wheels faster than the inner wheels. The net result: dynamic road feel that's more reminiscent of a roadster than an all-wheel-drive vehicle.

On the other hand, not all driving situations require the massive traction of xDrive. The X1 sDrive28i delivers crisp rear-wheel-drive handling with a level of power and torque that pins you to your seat. You can also add steering wheel-mounted paddle shifters to pursue your race-inspired driving dreams.

The X1 is just as sporting as you are. Chase after adventure and you're sure to find it, from mountain peaks to muddy passageways.

Tilted subtly in the driver's direction, the cockpit of the X1 gives functionality a new look - one that's as luxurious as it is convenient.

AT ONE WITH THE ROAD - AND THE WORLD.

There's an air of limitless energy about the BMW X1, and the vibe continues once you step inside and take the wheel. The semi-command seating position is the perfect vantage point from which to pilot this Sports Activity Vehicle.® In fact, the driver-centric dash serves to enhance driver confidence.

The X1 cabin is designed to enhance driver control. All vehicle operation instrumentation, as well as climate and audio system controls, is driver-oriented, while a practical center console separates the driver and front-seat-passenger areas.

The instrument panel itself is divided by horizontal lines; together with the door panel design, this emphasizes the generous space inside the vehicle. This airy feeling continues in the "greenhouse" - the area surrounded by windows - which is optimized for excellent visibility in virtually all directions. Added touches of elegance hint at the X1's luxurious heritage: gorgeous silvertone trim surrounds the gear shift lever and center console cupholders; air vents are finished in high-gloss black; and the trim bar, in a contrasting color, flows from the lower section of the dash, guiding all sightlines back toward the road.

The iDrive Controller sits within quick reach on the center console, surrounded by an assortment of direct-selection shortcut buttons. Above it, the attractive 8.8-inch Control Display harmoniously

blends into the dashboard. Opt for the on-board Navigation system and enjoy access to voice entry commands and a Bluetooth® interface, allowing you to use your smartphone to maximum effect.

BMW ConnectedDrive® a suite of integrated communication features, operates as a virtual Mobile Office, allowing you to keep in touch with your contacts easily and efficiently. When you're not busy mapping out your next adventure, iDrive lets you dial in an impressive sound system complete with built-in CD player and auxiliary input for connecting other media devices, including smartphones, MP3 players, tablets and more. Upgrade to the Harman Kardon® Surround Sound System for peerless audio, providing the ideal soundtrack to any trip.

The X1 also caters to track lovers. Select M Sport and grip the multi-function leather-wrapped M sport steering wheel, with paddle shifters right at your fingertips. Sport seats with adjustable bolstering provide firm support for taking sharp turns. A range of stunning M interior elements, such as the Anthracite headliner and exclusive trim choice, is just one more way for the X1 to get your heart racing.

Although technically the smallest and leanest of BMW's X vehicles, the X1 never feels cramped or uncomfortable. The interior has been optimized for excellent legroom and headroom, both in front and back. This "wide-open" feeling is reflected in the rest of the cabin's layout – including the oversize Panoramic moonroof that provides amazing views of the world outside.

The rear section of the X1 can be quickly configured to maximize comfort and/or hauling flexibility. The 40/20/40 split-folding rear seat backrests can be angled 31 degrees for increased passenger comfort. When propped vertically, also known as Cargo position – storage capacity increases to 25 cubic feet. Fold the rear seats down completely for a generous 56 cubic feet of cargo space.

The rear window opens separately for quickly stowing smaller items. The large tailgate makes loading cargo a snap; thanks to the wide cargo opening and low loading sill, clearance is no problem.

GEARED TOWARD GEAR.

From high-gloss roof rails to a spacious trunk flexibly designed to haul bikes, tents, coolers and sports gear, the X1 has enough versatility to make short work of big fun, so outdoor types feel right at home.

Normal position:

With the rear seats set in Normal position, you enjoy 25 cubic feet of space.

Cargo position:

In Cargo position (rear seats folded down flat), the area expands to 56 cubic feet.

2 + 1:

Thanks to 40/20/40 split rear seats, an entire rear seat remains usable even when the luggage compartment is loaded, allowing three people to fit comfortably in the rear of the car.

Natural: xLine

The xLine represents the quintessential BMW X DNA: versatile, powerful, confident. From subtle trims to classic paint choices, each accent is meticulously sculpted to enhance the X1 as a whole.

Every seat, every vantage point, every view from the BMW X1 is an inspiring experience. After all, the X1 is heir to the same premium heritage as every other BMW model. Small wonder, then, that the X1's appointments display a modern sophistication that catch and reward the eye.

It starts with a choice of upholstery, paired to a wide variety of trims, such as Light Finition Wood, High-Gloss Copper or Dark Crosshatch Aluminum, making each interior a customized work of art.

Occupants can relax in perfect comfort, thanks to the intelligently and ergonomically designed cabin. A variety of cupholders, trays and large door compartments means there's no shortage of storage for personal items. Heated front seats are a boon on chilly mornings; for the driver, the heated steering wheel keeps cold hands from being uncomfortable. On the dashboard, the climate and radio controls offer quick and easy selections for near-instant gratification.

A HIGH-PERFORMANCE PERSONAL STATEMENT

There's far more than just one way to experience the dynamic exhilaration of the BMW X1. With a kaleidoscope of paint, upholstery and trim combinations, no two are alike.

Despite its compact size, the X1 goes to great lengths for comfort; the back-seat area provides ample space for up to three passengers.

The X1 is also big on personality – and the level of personalizing you can do with it is simply icing on the cake. There are three “Lines” to choose from: the xLine, the Sport Line, and M Sport. Each Line highlights specific X1 characteristics, with exclusive interior and exterior options, such as contrasting seat piping and wheel styles.

With the xLine, you'll discover striking Y Spoke 18-inch alloy wheels, High-Gloss Dark Copper or Finition Bay Matte Wood interior trim, and a range of xLine-specific upholstery

colors and designs. The Sport Line adds a generous helping of track-inspired visual cues. Signal your sporting intentions with 18-inch Double Spoke light-alloy wheels and black side-mirror caps; inside, enjoy the added driving support of sport seats, as well as your choice of High-Gloss Black or Aluminum trim, along with unique color schemes, including several contrast-stitching offerings.

Bump up the customized cool factor with M Sport. Choose between 18-inch or 19-inch M light alloy wheels with run-flat¹ all-season² or performance tires.³ A custom-tuned sport suspension and track-inspired Aerodynamic kit put a finer point on the X1's handling.

Shadowline exterior trim and high-gloss roof rails complete the exterior; inside, sport seats, an Anthracite headliner and a choice of M leather-wrapped steering wheels with or without paddle shifters set the performance note.

For the very first time, BMW offers the Ultimate Package: a combination of three separate packages – Driver Assistance Package, Premium Package and Technology Package – grouped together for maximum confidence, convenience and comfort.

¹ Run-flat tires do not come equipped with a spare tire and wheel.
² Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.
³ Performance tires are not recommended for driving in ice and snow conditions.

Wheel and tire specifications are subject to change. Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”

Dynamic: Sport Line and M Sport

Inspired by BMW's track heritage, the Sport Line and M Sport reveal the X1's racier side, turbocharging its look and attitude. M Sport adds serious performance enhancements for an even more dynamic driving experience.

Of course, enjoying greater convenience should never mean sacrificing safety, but adding to it. The X1’s extensive arsenal of active and passive safety features include Automatic high beams, a feature that optimally illuminates dark streets and automatically dims high-beam lights in the presence of oncoming traffic. Should the unforeseeable happen, you can feel at ease knowing that your vehicle’s BMW Assist eCall™ system has automatically initiated a call to the BMW Assist™ center. Advanced sensors in the vehicle can detect the location and severity of the impact and the possibility of injuries. It then relays this information directly to the BMW Assist response specialists, who dispatch appropriate rescue services.

This and other BMW ConnectedDrive features add to the X1’s safety quotient and help you arrive at your destination more relaxed on every trip.

BMW CONNECTED DRIVE® SERVICES AND APPS: EVERYTHING YOU NEED, INTELLIGENTLY NETWORKED.

Want to find the quickest route around a traffic jam? Not a problem – if you have the BMW Navigation system with Real Time Traffic Information. Tired of the same old playlist? Let the AUPEO! Personal Radio app introduce you to a new world of music. How about finding a French restaurant in a strange city? Let Concierge Services locate it, make a reservation for you, and send the address and phone number directly to your BMW's Navigation system. **BMW ConnectedDrive** services and apps bring a whole new level of convenience and pleasure to your drive wherever you are.

BMW APPS.
Access Social Networks, on-demand music and location sharing through your iPhone,® and see them on the Display screen.¹ Tune in to Web radio and search for stations from around the globe by name, location or genre. You can also store your favorite stations, find similar stations, display station information, and change the quality of the audio. Your favorite entries are on your iPhone, so you can take them from one vehicle to another.

¹ Requires BMW Apps option and a compatible phone. Please note:

- A broadband data link is required. The costs for this (e.g., data roaming) are regulated by the customer agreement with the mobile phone service provider.
- Not all features available while vehicle is in motion; see dealer for details.
- Web radio audio quality depends on the bit rate of the station, and data reception depends on your cell service. Data transfer comes over the mobile device.

REAL TIME TRAFFIC INFORMATION (RTTI).
This feature makes you aware of traffic congestion in most large cities before you encounter it. RTTI displays and describes current local traffic information on your Control Display. In case of delays greater than five minutes, it suggests alternate routes.

For those times, innovative **BMW ConnectedDrive** driver assistance features make every moment behind the wheel as effortless and enjoyable as possible.

PARK DISTANCE CONTROL.
This feature uses ultrasonic sensors in the front and rear bumpers to help you judge the distance to other cars and unseen objects when parking. The beeping becomes faster as your bumper approaches the object, turning into a constant tone when the distance is less than 12 inches.

REAR-VIEW CAMERA.
Engaging the reverse gear activates the Rear-view Camera. The area behind your vehicle is then shown on the Control Display. Working together with Park Distance Control, the system superimposes interactive guidelines on the image, indicating if a parking space can accommodate your vehicle, and displaying parking trajectories and turn angles.

CONCIERGE SERVICES.
Wherever you travel, friendly Concierge Services representatives assist you with local restaurant and hotel recommendations, movie times and ticket information, flight arrival and departure gates and times, fuel prices and availability, and much more. BMW EfficientDynamics

Less emissions. More driving pleasure.

BMW was one of the first automotive manufacturers to pursue the goal of efficient driving technologies, as part of a multi-award-winning sustainability strategy. BMW EfficientDynamics represents an acclaimed standard package of innovative technologies that reduce fuel consumption and emissions, while simultaneously enhancing dynamic performance. Since 1995 BMW has been able to reduce the CO₂ emissions of its entire fleet by approximately 30 percent and intends to achieve a further 25 percent reduction by 2020.

BMW EFFICIENT DYNAMICS: MAKING A LITTLE GO A LONG WAY.

Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the goal of emissions-free driving in the long term.

Eco-friendly technology. The development of more efficient vehicles powered by conventional gasoline and diesel engines are continuing challenges. A comprehensive technology directive enables the reduction of fuel consumption and emissions, while at the same time increasing power output and driving enjoyment. These advances are based on innovations such as BMW TwinPower Turbo technology, Brake Energy Regeneration, Air Curtain front apron design, and many others.

BMW ActiveHybrid. With the BMW ActiveHybrid 7, BMW ActiveHybrid 5 and BMW ActiveHybrid 3, BMW has impressive hybrid production models in its line. All combine outstanding efficiency with superlative dynamic ability.

BMW i. The all-new BMW i brand is launching two completely new vehicle concepts for sustainable mobility in an urban environment; both are an important part of BMW EfficientDynamics technologies. Key features of the BMW i3 and BMW i8 include the use of lightweight materials such as carbon-fiber-reinforced plastic (CFRP), electric drive systems, powerful battery technology and eco-friendly production methods.

THE BMW X1'S EFFICIENT DYNAMICS INITIATIVE AT A GLANCE.

Auto Start-Stop function.

Even when idling, such as at a stop sign, an engine burns fuel. BMW's Auto Start-Stop function enhances fuel efficiency by switching off the engine. (The intelligent electronics system first checks the battery charge level and calculates if other electric systems, like the heated rear window, need more energy.) Once the brake pedal is released, the engine starts up again almost instantly. A Start-Stop signal in the Display indicates the function is active.

BMW TwinPower Turbo technology.

This innovative twin-scroll turbocharging technology efficiently reclaims the energy contained in exhaust gases, using a twin-scroll charger with a double-flow exhaust system.

Brake Energy Regeneration.

To supply a battery with electrical energy, the generator (alternator) is usually driven using engine power, which requires fuel. With Brake Energy Regeneration, the alternator generates electricity only when you take your foot off the accelerator. Kinetic energy that was previously unharnessed is transformed into electrical energy, which is then fed into the battery. In this way, electricity is generated without consuming fuel.

Electric power steering.

Unlike conventional, hydraulic steering systems, electric power steering draws power only during actual steering movements. When the steering wheel position is constant, the electric motor is inactive.

ECO PRO mode.

Driving in ECO PRO mode helps customers achieve fuel savings of up to 20 percent, depending on their individual style of driving. This mode optimizes accelerator and transmission response as well as shift points, and intelligently adapts the heating/air conditioning strategy. ECO PRO tips help the driver drive even more efficiently. The bonus range shown by the on-board computer indicates how many additional miles the driver has gained thanks to the increased efficiency in ECO PRO mode since the last fill-up.

Lightweight construction.

Our engineers use lightweight aluminum throughout our vehicles – in the front section, for example, or for the suspension. BMW's four- and six-cylinder TwinPower Turbo engine blocks are all-aluminum. Taken together, these weight savings lead to lower fuel consumption and better axle load distribution for more agility, especially in curves.

High Precision Direct Injection.

In this latest-generation direct fuel injection system, the piezo injectors are positioned very close to the spark plugs. They inject fuel at high pressure, with extreme precision, for very efficient combustion.

Not all BMW EfficientDynamics features are available on all models.
Please see your authorized BMW center for details.

BMW ENGINE TECHNOLOGY: A HERITAGE OF INNOVATION. A FUTURE OF SUSTAINABLE EXHILARATION.

From its inception almost a century ago as a manufacturer of aircraft engines, Bavarian Motor Works has been a world leader in engine design. In fact, the innovations shown below were so ahead of their time, BMW engineers still incorporate this technology into today's award-winning powerplants. Over the decades, BMW engines have led to countless wins at the racetrack. Even more important, their smooth, powerful and efficient performance has won over generations of driving enthusiasts. Today, adhering to the EfficientDynamics philosophy, BMW engineers are setting even higher goals: creating an engine template that can be scaled in size and adapted to new fuel sources – all while maintaining legendary BMW performance and efficiency. It's a revolutionary concept that is now becoming reality. Welcome to the exciting future of BMW power.

ALUMINUM/MAGNESIUM COMPOSITE ENGINE BLOCK.
Technology from 1970s BMW racecar engines, this combines the strength to withstand high-revving performance with efficiency-enhancing light weight.

2007

TWIN POWER TURBO ENGINES.
BMW twin-scroll turbocharging calls on high-precision direct injection and a host of other innovations for increased power and efficiency – without turbo lag.

2008

BMW ADVANCED DIESEL WITH BLUE PERFORMANCE TECHNOLOGY.
BMW introduces America to a new form of diesel with amazing torque and power, quiet running, lower emissions and greater efficiency than ever before.

TODAY: THE BMW TWIN POWER TURBO ENGINE.
Introduced in 2007, TwinPower Turbo technology is incorporated into every new BMW engine, whether gasoline-, diesel- or hybrid-powered. Utilizing BMW high-precision direct injection, Double-VANOS continuously variable camshaft timing, and Valvetronic individual intake valve control, TwinPower Turbo technology delivers vastly increased power, torque and efficiency when compared to normally aspirated engines of the same size.

BMW GASOLINE-POWERED ENGINES.
Whether configured with four, six, eight or 12 cylinders, the latest BMW gasoline-combustion engines are designed to generate the highest ratio of power and thrilling performance to fuel consumption and emissions.

BMW ADVANCED DIESEL.
Powerful, fast, quiet and fuel-efficient: these are the traits of BMW Advanced Diesel engines. Thanks to BluePerformance Technology, BMW diesel engines meet emissions standards in all 50 states. Managed by a high-performance electronic engine control unit, the turbocharger develops boost and extra power in immediate response to the smallest tap of the accelerator pedal, and stays strong throughout the rev range where you do most of your driving.

BMW ACTIVE HYBRID.
BMW ActiveHybrid vehicles blend a TwinPower Turbo engine with an electric motor and high-performance lithium-ion battery. When compared to non-hybrid versions, BMW ActiveHybrid vehicles deliver greater fuel efficiency, fewer emissions and breathtaking acceleration.

BMW i: BORN ELECTRIC.
BMW i makes its debut with the i3. Powered by an electric motor combined with an innovative lithium-ion battery, the i3 accelerates from 0–60 in approximately 7 seconds. The BMW i8, a plug-in hybrid electric vehicle, races from 0–60 mph in 4.4 seconds. Its 131-hp electric motor powers the front wheels, while a 231-hp three-cylinder gasoline engine turns the rear wheels. Capable of 22 miles of all-electric driving using its lithium-ion battery, it achieves a total average fuel consumption of 94 mpg and a top speed of 75 mph.

Pure driving dynamics – it's a quality embodied by every single BMW without exception. And the technical basis for this thrilling driving experience lies in the suspension. It ensures optimal contact with the road surface and ideal roadholding in every situation – the result of near-perfect 50/50 weight distribution and an array of seamlessly combined innovative components. BMW engineers are continually reinventing and refining those classic BMW driving dynamics to ensure that every BMW chassis puts the driver in direct contact with the vehicle and inspires a passion for sporty driving – while also providing the highest levels of safety and comfort.

THE FEELING OF DRIVING THE BMW X1 IS SIMPLY INCREDIBLE. LIKE THE TECHNOLOGY BEHIND IT.

The BMW X1 can be equipped with a whole host of innovative technologies to help you get the most out of each drive. Many of these systems are intelligently networked with each other, maximizing your active safety quotient – and your driving pleasure.

Electric power steering. Unlike conventional, hydraulic steering systems, electric power steering only draws power during actual steering movements. While driving on major highways where a minimal amount of steering movement is required, the electric motor remains inactive.

Servotronic vehicle-speed-sensitive power steering adjusts the amount of steering support based on your current speed – not engine speed. It offers more assistance at lower speeds, such as when parking, and decreases assistance at higher speeds for more stability and control.

BMW sDrive rear-wheel drive. BMW's renowned driving technology provides inspired vehicle agility and maneuverability. Rear-wheel drive enables an ideal distribution of weight over the entire chassis suspension, delivering power and traction more precisely onto the pavement.

BMW xDrive intelligent all-wheel drive. BMW designed xDrive with a rear-wheel bias for surefooted grip on slick roads without sacrificing rear-wheel-drive road feel. Within milliseconds of sensing wheelslip, the xDrive all-wheel-drive system can send power to the wheels with the greatest grip, offering maximum available traction and superior handling on all surfaces.

8-speed STEPTRONIC automatic transmission. The finely graded gear shifts of the 8-speed STEPTRONIC automatic transmission produce greater engine efficiency at every speed. This helps to reduce fuel consumption and ensures more comfortable gear changes.

Sport suspension. This suspension, which is achieved without lowering the chassis, features more firmly tuned springs and dampers, which improves the BMW's roadholding further and enables an even more dynamic driving style.

Performance Control. This system works together with xDrive intelligent all-wheel drive to improve handling in turns by dynamically intervening in specific engine and braking processes. Performance Control optimizes the management of engine power during turns by applying the brake slightly to the inside wheel while simultaneously increasing power to the outside wheel.

HIGH-TECH BODYGUARDS: ACTIVE AND PASSIVE SAFETY.

The X1 is designed with BMW's full range of standard state-of-the-art active and passive safety technologies. Active safety features, such as Xenon Adaptive Headlights, powerful engines and large brakes, help you see and respond to potentially dangerous situations. Should an accident prove unavoidable, passive safety features, such as airbags, are designed to help protect you and your passengers. After a severe impact, a host of features spring into action: the doors automatically unlock, headlights and taillights flash, the starter cable is disconnected from the battery and the fuel supply is cut off. In vehicles with BMW Assist eCall,TM should any airbags deploy, response specialists are automatically alerted and notified of your location.

Adaptive Headlights with LED Corona headlight-rings automatically swivel to follow the curves of the road, enhancing visibility when driving at night. The system uses data from on-board sensors and the steering wheel angle to determine the vehicle's direction. The outer headlights then swivel accordingly, up to 15 degrees left or right. An auto-leveling feature adjusts the headlight beam's trajectory for varying passenger and cargo loads.

Dynamic Stability Control (DSC). This system provides remarkable tenacity on slippery road surfaces. If it senses over- or understeer, it modulates engine power and can apply brakes individually to help keep the vehicle under control and going in the intended direction. Start-off Assistant, a feature of DSC, prevents the vehicle from rolling backward on a hill for approximately 2 seconds after taking your foot off the brake. The system also includes Brake Fade Compensation, which lets you use the same amount of pedal force, even when the brakes are heated; Brake Stand-by, which pre-tenses the brakes for quicker action if you suddenly remove your foot from the accelerator pedal; and Brake Drying, which periodically brings the brake pads into contact with the rotors to eliminate accumulated moisture when it rains.

Performance Control, in BMW X1 models equipped with xDrive intelligent all-wheel drive, creates an even more agile and dynamic driving experience by controlling each wheel individually in a curve. It can vary engine power and, if necessary, apply braking force to give the outer wheels greater drive power than the inner wheels, resulting in maximum traction, precision and stability.

Cornering Brake Control (CBC) increases your vehicle's stability by proportioning the braking force while turning. When you brake in a turn, pressure comes off the rear wheels, which causes your vehicle to swerve inward (oversteer) (1). Cornering Brake Control counteracts this action by asymmetrically adjusting brake pressure (2), creating stabilizing counter-torque (3) independently of the ABS system.

Hill Descent Control (HDC), included in the X1 xDrive28i and the X1 xDrive35i, helps the vehicle drive down steep hills without having to "ride the brake." By pressing the HDC button, the system keeps the vehicle's speed under control automatically.

Airbags, designed to deploy only as needed in the event of a collision, are an integral part of the passive safety system in the BMW X1. Six airbags are installed for occupant protection: one front- and side-impact airbag each for the driver and front passenger, and continuous Head Protection System (HPS) airbags at the sides of the front and rear cabin to help protect all occupants.

Please note: These pictures of airbags are for illustrative purposes only. Depending upon the type of accident, none, some or all may deploy.

Compressible "crush tubes" and impact-absorbing bumpers front and rear help absorb the force of impact in collisions up to 9 mph, helping to minimize damage to the vehicle's body and simplifying repairs. Only at higher impact speeds do structural supports begin to deform, dissipating impact energy to help protect occupants.

Run-flat tires. Thanks to reinforced sidewalls, run-flat tires maintain their shape and rim position even after suffering a complete loss of tire pressure. They allow you to continue driving at a reduced speed until you reach a safe area to change a tire or wait for Roadside Assistance. The Tire Pressure Monitor alerts you when there is a drop in tire pressure; if the loss is severe, an acoustic warning is triggered.

Please see Owner's Manual for more information detailing allotted miles to travel and load weight rules for run-flat tires.

Equipment features and options.

Xenon low- and high-beam headlights illuminate the road ahead and to the side with brilliant clarity. An auto-leveling feature adjusts for varying passenger and cargo loads. LED **Corona headlight-rings** that circle both headlights and high beams also act separately as Daytime Running Lights and parking lights. **Xenon Adaptive Headlights** optimize road illumination when entering a turn or corner, helping to enhance visibility when driving at night. Sensors continuously monitor the angle of the steering wheel to determine the direction in which your vehicle is heading. The outer headlights swivel accordingly, up to 15 degrees left or right.

Power-adjustable, folding exterior side-view mirrors in body color feature integrated LED turn indicators. Automatic anti-glare function dims mirrors when reflecting bright lights, helping to eliminate glare when driving at night.

Taillight cluster with taillight, brakelight and turn-signal indicators incorporate LED technology for greater visibility. **Adaptive Brakelights** warn following vehicles by increasing in brightness when the intensity of your braking action is increased.

Halogen free-form foglights, built into the front air dam, enhance your margin of safety in poor visibility. Ellipsoid free-form technology provides for even light distribution on the road.

Automatic high beams switch between high and low beams according to oncoming traffic, traffic ahead and the level of street lighting.

Rain sensor uses infrared light to measure the amount of rain. When the wipers are in the "intermittent" mode, the rain sensor automatically adjusts the windshield-wiping interval as needed.

Black roof rails, cleanly integrated into the BMW X1 design, provide the foundation for BMW's (accessory) modular roof rack system, which allows the convenient, secure transport of luggage, bicycles, surfboards, etc.

Satin Aluminum roof rails give the X1 an elegant appearance – especially when equipped with the xLine.

High-gloss roof rails, included with the M Sport, underscore the dynamic look of shadowline trim.

Panoramic moonroof features extra-large dual-glass panels to let the sun and stars shine in, whether it is open or closed. Easy-to-use features include a power slide and lift control, a comfort opening/closing function, and a power sunshade to shield passengers from excessive glare and heat. **Anthracy headliner** complements the black moonroof trim and roof handles.

Chrome-line exterior trim adds the perfect finishing touch, enhancing the window recess finishers at the B-pillar panel, the rear window guide panel and specific mirror features.

Shadowline trim, included with M Sport, covers the B-pillar trims, the window guide, the window recess finishers, the mirror base and mirror frame in high-gloss black.

Door lighting helps provide safe vehicle access in the dark, with lights in the door handles that radiate downward 20 seconds after unlocking doors.

GOING BEYOND ENGINEERING: THE HIGH-PERFORMANCE BMW OWNERSHIP EXPERIENCE.

BMW Maintenance Program is one of the most comprehensive maintenance programs in its class. We cover all factory-recommended maintenance for up to the first four years or 50,000 miles, whichever comes first. This includes scheduled oil services and inspections. Also covered is the replacement of items that are subject to normal wear and tear, such as brake pads, wiper blade inserts and engine drive belts.² And, thanks to BMW's advanced engineering, most owners enjoy a well-balanced maintenance schedule, with flexible routine service intervals that can save you time. When your vehicle requires attention, your authorized BMW center ensures that it receives only genuine BMW parts – your assurance of exacting quality standards.

For more details on BMW Ultimate Service and the BMW Maintenance Program, visit your authorized BMW center or log on to bmwusa.com/ultimateservice.

BMW Assist eCall,³ a safety feature of BMW ConnectedDrive, lets you enjoy peace of mind knowing that a friendly response specialist is there to help you, 24/7, at just the push of a button. This includes Emergency Request (SOS button), Automatic Collision Notification, and Customer Relations. **BMW TeleService**³ continually monitors specific vehicle parts that are subject to wear and tear, as well as services that require attention at regular intervals, such as vehicle service inspections. This data is automatically transmitted to your authorized BMW center, which informs a BMW Service Advisor to call and schedule a convenient service appointment. You don't have to keep track of when your vehicle requires routine maintenance. An added benefit: any needed maintenance service parts will already be on hand, so your BMW is serviced and returned to you as quickly as possible. And because they use only Original BMW Parts, you can rely on expert fit and long-lasting BMW quality.

BMW Roadside Assistance is provided free of charge for the first four years – with no mileage limit. Call **1-800-332-4BMW (4269)** for friendly on-the-road help, 24/7, anywhere in the United States, Canada and Puerto Rico. This includes everything from flat-tire changes, emergency gasoline and lock-out service, to towing, alternative transportation and even trip-interruption benefits. This service also provides valuable trip-routing advice.

BMW Online⁴ provides up-to-date web information: business and stock reports, as well as weather updates. BMW Online also includes **MyInfo**, which allows you to send business locations and street addresses with their associated phone numbers from the Google Maps™ website directly to your BMW. The destination can be sent to your Navigation system for turn-by-turn directions.

Enhanced USB and Bluetooth® with Smartphone Integration offers an array of Mobile Office⁶ functions. With the BMW Navigation system and your mobile phone linked via Bluetooth technology, Mobile

Office transfers text messages and emails to your iDrive Display screen and then reads them aloud to you. While en route, a calendar and to-do list can also appear on your Display screen. Running late? Click on the phone number in the calendar to call your appointment. For a list of tested mobile phones, visit bmwusa.com/bluetooth.

Remote Services³ includes Remote Door Unlock, Stolen Vehicle Recovery, and access to the My BMW Remote app, which allows you to control your BMW from your mobile device.

For the ultimate in coverage, add the optional **Concierge Services**.⁵ You'll enjoy unlimited access to personalized Directions and services for restaurant and hotel recommendations, with the destination address and phone number not only sent right to your BMW, but also transferred to your Navigation system for route guidance. Another useful Concierge feature: **Critical Calling**. This lets you make up to four operator-assisted calls per year, up to five minutes per call, if your mobile phone is not available, or if its battery is discharged.

ON-BOARD SERVICE ALERTS.

We monitor your BMW's needs – so you don't have to. Tackling mountain switchbacks, the last thing you should be thinking about is the state of your brake pads. Thanks to BMW's integrated on-board diagnostics system, you'll always know exactly when the next service is due, and what work will be required. Condition Based Service (CBS) measures the condition of key parts that are subject to wear and tear. It also tracks fluid levels and monitors your BMW's time- and mileage-dependent service requirements. Using this data, the Info Display in the cockpit automatically alerts you in advance whenever any part of your vehicle will require servicing – so there are no surprises ahead.

The Ultimate
Driving Machine®

BMW and the environment.

BMW is a strong proponent of the environment and social responsibility. We launched BMW EfficientDynamics back in 2000 – the philosophy of providing greater power with increased efficiency and fewer emissions. This has resulted in significant benefits today – for our customers, the climate and the environment.

That year, ecological sustainability was also declared one of BMW's core strategic principles; it is now firmly anchored in our entire production chain. It starts with the development of fuel-saving and alternative vehicle concepts, continues with environmentally friendly production processes, and ends with innovative recycling methods. This effort has been recognized worldwide; in 1999, BMW AG – the parent company of BMW of North America and BMW Manufacturing Co. in Spartanburg, SC – was the first automotive company to be represented on the Dow Jones Sustainability Group Index. It has remained on the Index ever since; moreover, since 2005, BMW has been voted the world's most sustainable automobile manufacturer. At BMW, we strive for and achieve high performance in all we do.
