

THE SPIRIT OF AMERICAN STYLE

It is flair without flamboyance. Art without artifice. Luxury without apology.

It's the flash of sun off a curve of chrome. The shine of paint that looks

a foot deep. The glow of fine leather. It is the calm of a quiet cabin.

And the thrill of a finely tuned engine at full song. It's physicality

informed by philosophy. The security of careful engineering and assembly.

The satisfaction of well-thought details. The idea of elegance with intelligence.

The Spirit of American Style is the ethos of legendary designer Harley Earl

beautifully interpreted for a new age. It is the heritage and the heart

of Buick. Now come see how that spirit is offered in the 2004 Rainier.

Studio still life / Rainier 2004

A word about this brochure: Some features shown throughout this brochure are available at extra cost.

Dense forest / study in perspective

A BEAUTIFUL STRENGTH OF CHARACTER.

The introduction of Rainier represents an important landmark in the history of Buick. It is the first full-frame Buick

SUV. And, like the majestic peak from which it takes its name, Rainier has a character all its own. Rainier is strong.

If engineering incantations like hydroformed side rails and full ladder frames bore you, know this: Rainier is no SUV

wannabe. It's the genuine article. Fully capable of vanquishing pretenders. Rainier is powerful. It brings the swagger of

a big V8 back to Buick, in the form of an available 290-horsepower Vortec engine that goes and tows with impunity.

Rainier is peaceful. As you hustle down the highway at full interstate speeds, the cabin will stay amazingly quiet. You can

thank Rainier's exclusive QuietTuning™ for the calm. Rainier is a Buick. So you'll nestle into leather-appointed seats. You'll

ride on a smooth-gliding rear air suspension. Chrome will sparkle. Sensuously curved bodywork will shine. And perhaps

you'll glow with the satisfaction of driving something special. Peaceful. Powerful. Rainier. It's a brand-new Buick.

Near Narada Falls / Mt. Rainier National Park

Whether you're hauling or towing, Rainier has a lot to offer. With the second-row seats folded down, the cargo capacity

goes up to 80.1 cu. ft., and a two-wheel drive V8 Rainier has a trailering capacity of up to 6,700 lbs.

Cargo and load capacity limited by weight and distribution. Maximum trailer weight ratings are calculated assuming a base vehicle, except for any options necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your dealer for additional details.

Near Ricksecker Point / Mt. Rainier National Park

Pack Forest Trail / Mt. Rainier foothills

Mt. Shuksan / Washington

A. Integrated turn signals on the side mirrors are designed to help enhance safety during lane changes.

B. XM® Satellite Radio. Enjoy 100 digital channels in tune in all 48 coast-to-coast states.

Activation and service fees extra. Visit gm.xmradio.com for details.

C. OnStar® Safety and security at the touch of a button 24/7/365.

OnStar services require vehicle electrical system and analog wireless service to be available and operating for features to function properly. Visit onstar.com for system information and details.

D. The dealer-installed ski rack will look great in the Cascades, the Rockies or the Appalachians.

E. A dealer-installed rear cargo organizer can keep things just where you want them.

F. Details, details, details. Even Rainier's doorsill plates are beautifully executed.

G. GPS/DVD navigation system. Like having the auto club right in your dash.

H. With heated seats, you can warm the seat, the seatback or both.

Features described are available on some models. Refer to specifications in the back for availability.

I. The automatic dual-zone climate control lets you dial in a difference of up to 25°F between driver and front passenger.

Rainier. Century. LeSabre. Rendezvous. Park Avenue. Regal. Each with its own personality, yet each embodying Buick's mission to bring you a beautifully designed, carefully assembled vehicle that will deliver exceptional satisfaction with every mile you drive. The Spirit of American Style is alive and well — and at your Buick dealer now.

Tiger Woods

Buick is the Official Car of the PGA TOUR. Buick has been involved in the game of golf for nearly 50 years.

That's why we're so proud to be partnered with the man pictured above. You see, we have a long history of

supporting the game with style and elegance — and he's making history by playing the game in the very same way.

INTERIOR FEATURES	CXL	CXL Plus Package
S Standard A Available P Included in Option Package — Not available		
Air bags — driver and front passenger, frontal dual-stage inflation	S	S
— driver and front passenger, seat-mounted side-impact dual-stage inflation	A	A
Air conditioning — dual-zone automatic climate control	S	S
Audio systems		
— ETR AM/FM stereo with seek/scan, digital clock, RDS display, Theftlock,® CD, cassette, auto tone control, speed-compensated volume and six speakers	S	—
— ETR AM/FM stereo with seek/scan, digital clock, RDS display, Theftlock, in-dash six-disc CD, auto tone control, speed-compensated volume and six speakers	—	P
— ETR AM/FM stereo with seek/scan, digital clock, RDS display, Theftlock, navigation system, CD, auto tone control, speed-compensated volume and six speakers (requires Bose premium audio system)	A	A
— Bose six-speaker 275-watt premium audio system	A	P
— XM® Satellite Radio (activation and service fees extra; not available in Alaska or Hawaii)	A	P
— rear seat audio controls, includes two headphone jacks, separate volume controls, source selection, volume and radio preset buttons	S	S
Auxiliary power outlets — two located in the instrument panel and one in the center console	S	S
Cargo storage system — rear compartment cargo organizer	A	A
Cargo storage well — located in the floor of cargo area	S	S
Carpet savers — front and rear	S	S
Center console — includes covered storage with padded armrest, transmission shift lever and two cup holders	S	S
Convenience Package — includes cargo net, reversible rear cargo mat and security shade	A	A
Child seat anchors — upper and lower LATCH system for compatible child safety seats on outboard rear-passenger positions	S	S
Child security door locks — rear doors	S	S
Cruise control	S	S
Driver Information Center — monitors 13 different systems, includes trip computer	S	S
DVD entertainment system — overhead mounted, includes two headphones (not available with power sunroof)	A	A
Inside rearview mirror — includes integrated compass	S	S
Instrumentation — full analog cluster with fuel, temperature, tachometer and speedometer	S	S
Lights — front and rear reading/courtesy and cargo area, includes theater dimming feature	S	S
OnStar® — includes one-year Safe & Sound service agreement*	S	S
Overhead console — includes storage for sunglasses, garage door remote and TravelNote digital voice recorder	S	S
PASSLock® — passive theft-deterrent system	S	S
Power pedals — accelerator and brake pedal fore and aft adjustment	A	A

INTERIOR FEATURES (continued)	CXL	CXL Plus Package
Power door locks — include lockout protection, delayed locking and memory feature	S	S
Power windows — include driver and front express-down and passenger lockout feature	S	S
Rear window defogger — electric	S	S
Remote keyless entry — includes instant alarm, perimeter lighting and security feedback	S	S
Retained accessory power — allows accessories to be operated for 10 minutes or until a door is opened	S	S
Safety belts — lap and shoulder belts for all seating positions	S	S
Seats — leather-appointed reclining front bucket seats with perforated inserts, includes adjustable head restraints and rear 60/40 split-folding bench seat	S	S
— power seat adjuster, 8-way power driver and front passenger with 2-way lumbar	S	S
— heated front seats with separate controls for seat bottom and cushion	A	A
— memory seat and mirrors; includes two programmable settings for driver seat and outside rearview mirrors	S	S
Steering wheel — leather appointed with controls for audio, temperature and Driver Information Center, includes tilt feature	S	S
Sun and Satellite Package — includes CD audio system with navigation, XM Satellite Radio and power sunroof	A	A
Theft-deterrent system — includes alarm, starter interrupt and central unlocking feature	S	S
Universal transmitter — programmable three-button function remote for garage door and more	S	S
Visors — covered with driver and passenger lighted vanity mirrors, includes extendable sunshade	S	S

EXTERIOR FEATURES		
Assist steps — chrome accented	A	A
Deep-tinted glass — rear-side and tailgate	S	S
Fog lamps	S	S
Headlamps — include daytime running lamps with Twilight Sentinel® and cornering lamps	S	S
Mirrors — dual power heated fold-away with integrated turn signal indicator	S	S
Power sunroof — includes sunshade, wind deflector and express open feature (not available with DVD entertainment system)	A	A
QuietTuning™ — acoustic laminated windshield and front side glass, quiet-tread tires and added sound-absorbing insulation	S	S
Roof rack — black side rails	S	S
— cross bows	A	A
Tires — P245/65R17 all-season blackwall steel-belted radial (P255/60R17 with AWD), includes full-size spare	S	S
Wheels — 17" eight-spoke brushed aluminum	S	S
Windshield wipers — two-speed with variable delay	S	S
— rear wiper with washer	S	S

MECHANICAL FEATURES	CXL	CXL Plus Package
Alternator — 150 amps	S	S
Battery — Delco® Freedom II with rundown protection	S	S
Brakes — four-wheel anti-lock disc	S	S
Differential — rear heavy-duty locking	S	S
Drive type — rear-wheel drive	S	S
— all-wheel drive, fully automatic on-demand system	A	A
Engine — Vortec 4200 L6	S	S
— Vortec 5300 V8	A	A
Engine block heater	A	A
Rear axle — 3.73 ratio	S	S
— 4.10 ratio (Vortec 4200 engine only)	A	A
Steering — power assisted rack-and-pinion	S	S
Suspension — front short/long arm independent	S	S
— rear load-leveling electronically controlled air suspension with five-link solid axle	S	S
Traction assist system — rear-wheel drive models only	S	S
Transmission — four-speed electronically controlled automatic with overdrive	S	S
Trailer Towing Package — includes class III hitch receiver and seven-lead wire harness. Does not include draw bar, hitch pin and retainer clip, hitch ball, nut and cover. (These items may be ordered through your dealer.)	S	S

*OnStar services require vehicle electrical system and analog wireless service to be available and operating for features to function properly. OnStar uses existing emergency service providers as well as analog wireless and satellite technologies and is subject to their limitations. The U.S. Federal Communications Commission (FCC) ruled that wireless carriers will no longer be required to support the analog wireless network after February 16, 2008. After that time, if the carriers for OnStar elect to only provide digital service, OnStar service will only be available through dual-mode hardware, which may require the purchase of a system upgrade. Call 1-888-4ONSTAR (1-888-466-7827), see your OnStar Owner's Guide, or visit onstar.com for system information and details.

ENGINE	
Type	4.2-liter Vortec 4200 L6

— Headroom	40.2/39.6
— Shoulder room	58.5/58.5
— Hip room	55.5/58.1

A NOTE ABOUT CHILD SAFETY. Always use safety belts and proper child restraints, even in vehicles equipped with air bags. Children are safer when properly secured in a rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. See your vehicle Owner's Manual and child safety seat instructions for more information.

GM is proud to be the only car company that can help you save for college with Upromise — for you, your children, your grandchildren, or any child you care about. GM has teamed up with Upromise, a free service that can help you turn your everyday spending into college savings. Once you join Upromise, every time you use your credit card, make a long distance phone call, shop online, buy gas, dine out — even buy an eligible new GM car or truck — you can get a portion of your purchase back for college. Learn more and join for free at upromise.com/gmcatalog.

ENHANCE YOUR OWNERSHIP EXPERIENCE. The Owner Center at My GMLink is a free online service that helps you make the most of your vehicle ownership.

- Sign up for e-mail reminders about service visits
- Keep an online history of services performed
- Read your Owner's Manual, warranty, and more, online
- Receive only the recall notices that apply to your vehicle
- Watch do-it-yourself videos and much more

Register today at MYGMLink.com!

IMPORTANT WORDS ABOUT THIS BROCHURE.

We have tried to make this brochure comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models, and availability. Since some information may have been updated since the time of printing, please check with your Buick dealer for complete details. Buick reserves the right to lengthen or shorten the model year for any product for any reason, or to start and end model years at different times.

New Vehicle Limited Warranty. This warranty is for GM vehicles registered in the USA. See your Buick dealer for terms and conditions. Covered for 3 years/36,000 miles (whichever comes first): The complete vehicle • Tires • Towing to your nearest Buick dealership • Cosmetic corrosion resulting from defects • Repairs made to correct any vehicle defect • No charge for most warranty repairs. Covered for 6 years/100,000 miles (whichever comes first): Rust-through corrosion

Corrosion Protection. Buick vehicles are designed and built to resist corrosion. All body and sheet metal components are warranted against rust-through corrosion for six years or 100,000 miles, whichever comes first. Application of additional rust-inhibiting materials is not required under the corrosion coverage and none is recommended. See your Buick dealer for terms of this limited warranty.

An Important Note About Alterations and Warranties. Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials, or workmanship of any alterations by such suppliers.

Updated Service Information. Buick dealers receive useful service bulletins about Buick products. You may purchase them from Helm Incorporated by calling 1-800-551-4123 or by visiting www.helminc.com.

Assembly. Buick vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Buick vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

Engines. Buicks are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

5.3L V8 ENGINE A masterwork of modern engineering, Rainier's V8 engine is filled with innovations. Its large displacement cast aluminum block and cylinder heads save weight while they also help provide the strength to generate class-leading power. *290 hp and 325 lb-ft torque:* That kind of power and torque gives you the freedom to haul or tow heavy loads and still have enough power in reserve to pass and maneuver with confidence. *Electronic throttle control:* Often seen on premium automobiles but new to SUVs, electronic throttle control is the stuff of the future. There is no cable link between the accelerator and the engine. A sensor at the gas pedal measures pedal angle and sends a signal to the engine control computer to deliver fuel at the correct rate. The result is quick, precise throttle response and improved reliability.

UNIQUE PAN-AXLE OIL PAN All-wheel drive vehicles require an extra differential to transmit power to the front wheels. This can force designers to mount the engine higher than they would prefer, resulting in compromised sight-lines and a higher center of gravity. The all-wheel drive Rainier has a pan-axle oil pan. The front axle runs right through this unique oil pan, allowing our engineers and designers to keep the engine mounted low in the chassis. That allows better sightlines from the driver seat. It also lowers Rainier's center of gravity and aids in increased stability on the road.

4.2L L6 ENGINE Rainier's standard power comes from a state-of-the-art engine that incorporates advanced design and technology virtually everywhere you look.

24 VALVES, DUAL OVERHEAD CAMS The more intake and exhaust valves an engine has, the easier it can breathe. That is to say, the easier it can draw the fuel/air mixture into the combustion chambers, and the easier it can expel the spent gases of combustion. With dual overhead cams controlling four valves per cylinder and variable exhaust valve timing, this engine breathes very well indeed. All of which results in better efficiency, better fuel economy and more power.

275 HP/275 LB-FT TORQUE – IT OUTPERFORMS MANY V8s See what deep breathing can do? It gives our 4.2L L6 the kind of power and torque many V8s will envy. But as important as having power is, it's even more important to have that power over a broad range of engine speeds and driving scenarios.

NATURAL BALANCE Of all the wonders of Rainier's remarkable 4.2L engine, this is a quality you'll probably appreciate every single day. This inline six-cylinder engine has a natural balance that virtually eliminates shaking and roughness at idle or any speed. This is one very smooth operator.

BROAD TORQUE CURVE = POWER WHEN YOU NEED IT Sometimes you need power coming off a stoplight. Or when you need to make a low-speed pass. Or while making a high-speed pass. The fact is, there are lots of times, and lots of speeds, when you need all the power your engine can muster. An engine with an extended torque curve addresses those needs. And with 90% of its torque available between 1,600 and 5,600 rpm, and peak torque at 3,600 rpm, Rainier's 4.2L L6 can deliver the power to make you feel confident in virtually any driving situation.

ALL-WHEEL DRIVE MODE

REAR-WHEEL DRIVE MODE

ALL-WHEEL DRIVE WITH LOCKING DIFFERENTIAL Rainier's on-demand all-wheel drive system is intuitive. Thanks to its technological sophistication, the driver doesn't have to think about pushing buttons or pulling levers. The system is constantly monitoring road conditions. If it senses wheel spin, it reacts in 1/4 of a second and sends the right amount of power to the wheel or wheels with the most traction. Under normal conditions, when the vehicle is moving at less than 20 mph, Rainier's active all-wheel drive system sends 100% of the power to the rear wheels. Above 20 mph, a small amount (about 15%) of the power is sent to the front wheels, even when no slippage is detected. This speed-sensitive system allows for up to 100% of torque to be transferred to the front axles during a slip condition, maximizing available wheel traction. When slippage is no longer detected, the system returns to its predominantly rear-wheel drive mode. It's a fully automatic system drivers will love.

TRACTION ASSIST AND LOCKING REAR DIFFERENTIAL Rear-wheel drive models have wheel-speed sensors that are constantly monitoring each drive wheel for signs of slipping. If they detect a slip event, they instantly send a signal to the power control computer which reduces the amount of fuel going to the engine. That slows the engine, reducing power to the slipping wheel until it gains traction once again. At lower speeds, the differential notices the slippage and locks the rear axle, sending power to both rear wheels. Together, these technologies can help the driver maintain control and regain traction through ice and snow.

REAR DIFFERENTIAL UNLOCKED

REAR DIFFERENTIAL LOCKED

Features described are available on some models. Refer to specifications in the back for availability.

AIR SUSPENSION UNLOADED

AIR SUSPENSION LOADED

FULL LADDER FRAME

ELECTRONICALLY CONTROLLED AIR SUSPENSION Rainier's independent front suspension incorporates a coil spring over Bilstein® shock absorber design with a double-A arm configuration for both four-wheel and two-wheel drive systems. So you get touring car precision with SUV toughness. But Rainier's rear suspension is so sophisticated it'll literally have you riding on air. This electronically controlled air suspension features air springs that are continually monitored by sensors that feed data to a compressor/control unit. The compressor inflates or deflates the air springs whenever necessary to give you three important benefits: load leveling – the system works to continually maintain the proper trim height of Rainier as it's loaded or unloaded for stability and smoothness over the full load range; impressive damping – the air spring is continually tuned to give you an improved ride, even over rough or broken concrete surfaces; improved isolation – the air springs are made of rubber, which naturally retards noise travel from the axle up into the frame and into the cabin.

FULL LADDER FRAME WITH HYDROFORMED SIDE RAILS Some SUVs have unitized body construction – where the body itself must provide much of the strength of the vehicle. Our engineers think that's fine for some SUV applications, but not for this new Buick. So Rainier has a tough body-on-frame structure – a body firmly mounted to a full frame. Rainier gives its drivers world-class ride and handling and high standards in noise isolation. Rainier's chassis design also incorporates fully hydroformed side rails along the entire length of the frame. Hydroforming uses the power of pressurized fluid sealed in a hollow round steel frame rail to help precisely form the shape of the rail for consistent steel wall thickness and dimensional control.

RAINIER'S EXCLUSIVE QUIETTUNING™ From its inception, Rainier was designed to achieve impressive levels of interior quietness. But our relentless engineers wanted more. So they developed QuietTuning. It's an exclusive process using acoustic materials, treatments and products that transform Rainier's cabin into a sanctuary from the outside world.

As you might expect, a lot of noise can get into any vehicle's interior through the windows. So Buick experimented with a variety of treatments for Rainier and found one that made a real difference. An *acoustic laminate windshield* is utilized as part of QuietTuning. Essentially two layers of glass with a thin film of plastic laminated in between, it is this layered construction, as well as glass layers of different thicknesses, that helps block sound from entering the passenger compartment. *Laminated front side-door glass* is installed for the same reason, particularly because the front side-door glass is in such close proximity to the driver and front-seat passenger's ears.

Tires rolling over pavement can create a lot of noise, so Buick specifies special *quiet-tread tires*. These tires have a unique tread pattern designed not only to provide good grip, but also to produce very little tread noise.

Additionally, increased attention is also given to the exhaust systems of both the six- and eight-cylinder engines to reduce the amount of noise generated.

Finally, the body and doors are treated with over *26 strategically positioned acoustic absorbers and seals* to help block outside noise from ever reaching the cabin.

QuietTuning brings a peaceful calm to the brand-new Rainier. You'll be amazed by what you don't hear.

LAMINATE GLASS

QUIET TREAD

MODULAR COCKPIT Rainier's entire cockpit is delivered to the vehicle production facility as a fully assembled unit. The instrument panel is completely assembled on a magnesium/steel composite frame, including the instrument cluster, radio, pedals, steering column, steering wheel, brake booster, master cylinder, wiring harness and most of the heating, ventilation and air conditioning components. The entire assembly is loaded through the door for final installation. This modular, pre-build process helps assure build quality and reliability while it also virtually eliminates instrument panel squeaks and rattles.

TUNING COMPONENTS SO THEY DON'T MAKE A SOUND A violin is designed to vibrate harmoniously when it's played. A finely tuned Rainier is designed not to. Each part of any vehicle vibrates at a specific frequency when excited by external forces, like inputs from the road. The instrument panel, chassis and idling engine all do it. Our engineers separated the specific vibration frequencies of each of these major components, so when one of them responds to an input, it doesn't trigger a series of sympathetic vibration reactions in any of the other components. Using modal hammers and oscilloscopes, noise and vibration specialists measured each component's response to make sure the proper frequency separations were achieved. The result of finely tuning each of these components is a vehicle that is uncommonly quiet. Sounds rather nice doesn't it?

ONSTAR® A pioneering technology in the area of advanced in-vehicle safety and security, OnStar uses global positioning satellites to locate a vehicle, and a hands-free wireless phone to provide a communications link and seamless integration into Rainier's electrical system. Professionally trained OnStar Advisors can provide a number of safety, security and convenience services twenty-four hours a day, every day of the year. These services can include: directing roadside assistance to you should your car become disabled or run out of gas; sending a signal to your Rainier to unlock your doors if you lock your keys inside; assisting police in locating your vehicle if it's been stolen; and directing emergency service providers to your exact location if you require help when your air bags have been activated. OnStar, with a one-year Safe and Sound service agreement, is standard on every Rainier.

OnStar services require vehicle electrical system and analog wireless service to be available and operating for features to function properly. OnStar uses existing emergency service providers as well as analog wireless and satellite technologies and is subject to their limitations. Visit onstar.com for system information and details.

GPS/DVD NAVIGATION SYSTEM Imagine your Rainier reading the signals coming from at least three global positioning satellites in high earth orbit, and using those signals to compute your exact position on the planet, give or take a few feet. Now imagine that data being fed into a sophisticated DVD-based navigation program that can show you exactly where you are on a virtual map sent to a screen on the instrument panel, and watch your position on the map move as you move down the road. That's what Rainier's GPS/DVD navigation program can do. The system can also suggest best routes to your destination, as well as the locations of gas stations, restaurants and points of interest along the way.

GPS/DVD navigation system is available. Refer to specifications in the back for details.

XM SATELLITE RADIO

XM® SATELLITE RADIO Two satellites (one named "Rock," the other "Roll") hover in geosynchronous earth orbit beaming down CD-quality digital sound into your Rainier. Terrestrial repeaters fill in the signal whenever the line of sight with a satellite is lost. The digital signal delivers 100 different music/news/sports/talk/comedy formats. And you can receive the signal in all 48 coast-to-coast states. That's the attraction of XM. Activation and service fees extra. Visit gm.xmradio.com for details.

BOSE SPEAKER LOCATIONS

BOSE® PREMIUM SOUND SYSTEM This Bose system is probably a better stereo than you'll find in most homes. Six Bose speakers are driven by six Bose amplifiers that have been equalized and optimized especially for the acoustic environment found in Rainier's interior. The amps deliver a total of 275 watts. There's a six-disc CD changer integrated into the instrument panel. Pop-out controls. Multi-media capability. You can even select optimum performance for the driver, optimum performance for the rear-seat passengers, or balanced performance for all passengers.

DVD ENTERTAINMENT SYSTEM Mounted in the headliner between the first and second row of seats, this DVD entertainment system has the capability of playing studio quality audio/video in both CD-audio and DVD formats. There's a flip-down 7-inch screen utilizing a color active-matrix liquid-crystal display; two wireless infrared headphones and an infrared remote control for rear-seat activation; video and audio RCA jacks for camcorder playback; ports for complete gaming capability; and even a parental switch on the front of the unit for stopping play and muting sound. Use it occasionally just to make sure the kids are still capable of human conversation.

Features described are available on some models. Refer to specifications in the back for availability.
