MALIBU
2012

A man in a light-colored t-shirt is washing a red Chevrolet Malibu in a driveway. The car is parked in front of a house with a white gutter and a large green bush. The background is filled with tall, leafy trees. The car's reflection is visible on its side.

JOHN CAFARO DIRECTOR OF DESIGN

While he may get his inspiration from racing cars, John Cafaro also draws on his love of vintage warbird aircraft and a particular speedboat to keep his creative juices flowing. Here, Cafaro shares his passion, energy and design philosophy for a driver's car that also can't stop attracting attention:

"Malibu is exciting when you first come up on it because it's a clear design statement, long and sleek with flowing lines. It's uninterrupted. It sits well on its wheels. The architecture of Malibu enables us to be expressive with our design, our styling, our thinking, our sketching. It's an appealing canvas for the automotive designer.

"The stance of Malibu is uncompromised. Our designers were relentless in the pursuit of Malibu having the right stance. These elements are not only aesthetic enablers but ones that draw you into the showroom. They communicate a car that's poised, of the highest quality, with a performance attitude."

"You **BUY IT
OUT OF IMPULSE,
OUT OF PASSION,
BECAUSE YOU**
*just love the
way it looks."*

BODY *conscious*

Sleek describes Malibu in a word. Even parked, it seems to be moving forward. Every sweep and curve is purposeful and designed to break the air with ease. And the wedge, the shape created where these lines converge, gives Malibu its performance gesture—its athletic grace.

Fast lines in the wind tunnel have also translated into smooth surfaces, tight tolerances and perfectly aligned body panels. Everything flows, to the eyes and to the touch, as you run your hands across the car. This is fluid design that captures attention wherever it goes.

A familiar face
THAT STANDS OUT
in the crowd.

It's called a visual signature—how you know it's a Chevrolet from 300 yards down the road. One look at the **DUAL-PORT GRILLE** design and iconic bowtie and you know that Malibu is an important part of the Chevy family. Of course there are distinguishing characteristics for every family member. And for Malibu, it starts with **JEWEL-LIKE HEADLAMPS** that seamlessly flow into the exterior styling and tasteful chrome accents that catch the eye. **18-INCH TEN-SPOKE BRIGHT FINISH ALUMINUM WHEELS** and **LED CLEAR-LENS TAILLAMPS** set LTZ apart while adding an exclusive touch. This is a face you'll never forget.

Sometimes it's the little things that make the biggest difference. Adjust the torque here. Tweak the fuel management system there. Before you know it, you're cruising down the highway and getting up to **33 MILES PER GALLON¹**. The drive to efficiency starts with an innovative **ECOTEC® 2.4L DOHC 4-CYLINDER ENGINE** mated to an advanced **6-SPEED AUTOMATIC TRANSMISSION** that allows the

engine to shift at lower speeds. What's more, **VARIABLE VALVE TIMING** continually adjusts the opening and closing of valves by changing the position of the camshaft relative to the piston. The result? Greater low-end torque and enhanced fuel economy¹ for off-the-line performance you can feel good about. Proof that small refinements really add up.

¹ 2.4L 4-cylinder: EPA-estimated 22 MPG city/33 highway.

MIKE MUELLER

LEAD DEVELOPMENT ENGINEER

A self-professed gearhead, Lead Development Engineer Mike Mueller still has the Olds 4-4-2 he had as a teenager. Years of working on cars have turned a onetime hobby into a full-time obsession. So the next time you see a Malibu, think of Mike. His passion is all over it:

“Compared to the previous-generation Malibu, we raised the bar on the current model. We made a lot of refinements that were performance-related. It’s quieter. It’s easier to drive. It offers better fuel economy! A lot of those things make the Malibu different from the cars we’ve done in the past.”

WHAT ARE THE DIFFERENCES BETWEEN THE TWO ENGINES?

“So in the Malibu lineup, we have two engines. We have an ECOTEC 4-cylinder and a V6. The major differences between the two engines from a customer standpoint are displacement and power. The 4-cylinder’s displacement is smaller at 2.4 liters and the V6 has 3.6 liters. Both engines have technologically advanced parts like Variable Valve Timing to make them efficient. The V6 has more horsepower by virtue of it having a larger displacement. Because of that, the customer gets better acceleration and the ability to enjoy a more spirited driving experience.”

HOW DO YOU MAKE A CAR RIDE AS SMOOTHLY AS A MALIBU?

“Ride is a subjective thing. What I like versus what you like may be different. The thing that sets up ride and makes it work correctly is the car’s structure. Once we’ve got that in place, the next thing that happens is we talk to the development engineers to give them a ‘definition’ of the car’s character. Their whole task is to take all of the different parts of the suspension and chassis and tune them to match the character. So things like shock absorbers, front struts, springs, rubber bushings, are all tunable pieces that allow us to get the ride and handling a customer will experience.”

ON
TASK

If it's new, cool and a technological game-changer, you know about it. And you probably have it. Being connected means knowing what's going on—all the time. Chevy and OnStar® share that enthusiasm for innovation with services that help you move forward, even as you're focusing on what has to be done.

1. TWO APPS. Double the connectivity. Download the **ONSTAR REMOTELINK™** mobile app¹ to your smartphone and enjoy the conveniences of remotely locking and unlocking your vehicle, plus checking the fuel level, remaining oil life and tire pressure. But suppose you want to schedule a service appointment? Or create a reminder to help you remember where you parked your car? Malibu has an app called **MYCHEVROLET**.² Together with OnStar,³ standard for six months, you'll have all the power you want—in the palm of your hand.

2. VEHICLE DIAGNOSTICS.³ Receive monthly emails on the operating status of key vehicle systems. Learn when your car needs an oil change or when you should rotate your tires. Vehicle Diagnostics from OnStar, standard for six months, runs hundreds of checks in all and will show you what's going on with your car, using easy-to-understand language and images.

3. ONSTAR PEACE OF MIND.³ Experience the safe and simple way to stay connected on the road. **ONSTAR DIRECTIONS & CONNECTIONS**® is standard for six months. Push the blue OnStar button and get unlimited voice-guided and visual directions via **TURN-BY-TURN NAVIGATION**. Download directions from MapQuest® or Google Maps⁴ through eNav.™ Receive **STOLEN VEHICLE ASSISTANCE**®, including **REMOTE IGNITION BLOCK** and **STOLEN VEHICLE SLOWDOWN**®. Then there's the red **EMERGENCY BUTTON**. Push that and you'll connect to a specially trained Advisor, ready to take your call. Whether you're experiencing a medical emergency, spotting a fire or seeing someone in need, OnStar will alert the appropriate emergency services.

A safety philosophy that

RUNS DEEP

BEFORE

What's the best safety philosophy? Avoid a collision in the first place. It also helps to drive the car that the IIHS has recognized as a **TOP SAFETY PICK IN 2011**—Chevy Malibu: the one that includes the **STABILITRAK ELECTRONIC STABILITY CONTROL SYSTEM** with **TRACTION CONTROL**. On slippery surfaces, StabiliTrak helps you stay the course by detecting the difference between the path being steered and the direction the vehicle is actually going. It then uses the brakes and, if necessary, adjusts engine torque to help keep your Malibu on track.

What's more, **FOUR-WHEEL ANTILOCK DISC BRAKES** help maintain control and stability during hard braking by preventing wheel lockup and lessening the potential to skid. Other advancements you can count on include **DAYTIME RUNNING LAMPS** and a **TIRE PRESSURE MONITOR**,¹ just some of the forward-thinking ways we help you avoid trouble on the road.

DURING

Sometimes, however, trouble finds you. And if a moderate to severe collision does happen, Malibu is designed to respond quickly. Sensors throughout the vehicle determine how many of the **SIX STANDARD AIR BAGS**,² including head-curtain side-impact air bags,² deploy. Adding to this protection, the cabin is reinforced with **HIGH-STRENGTH STEEL** throughout. Specially designed front and rear “crush zones” compress in a controlled manner, helping absorb and channel energy away from the cabin. But our protective measures don't end there.

AFTER

Should a collision occur, crucial information can be instantly relayed to the OnStar command center via **ONSTAR AUTOMATIC CRASH RESPONSE**.³ There, trained OnStar Advisors utilize GPS technology to pinpoint your exact location and can request that assistance be sent right away—even if you're unable to respond. It's part of **ONSTAR DIRECTIONS & CONNECTIONS**³ which is standard for six months, because nothing is more important than your safety.

100,000-MILE/5-YEAR TRANSFERABLE POWERTRAIN LIMITED WARRANTY. Every 2012 Chevy passenger car, light-duty truck, SUV and crossover comes with a 100,000-mile/5-year (whichever comes first) transferable Powertrain Limited Warranty. Plus, you get 100,000 miles/5 years (whichever comes first) of the 24/7 Roadside Assistance Program, the Courtesy Transportation Program, and much more. See dealer for details.

NEW VEHICLE LIMITED WARRANTY. GM vehicles registered in the U.S.A. are covered for 36,000 miles/3 years (whichever comes first). The complete vehicle is covered, including tires, towing to your nearest Chevrolet dealership and cosmetic corrosion resulting from defects. Repairs will be made to correct any vehicle defect, and most warranty repairs will be made at no charge. In addition, rust-through corrosion will be covered for 100,000 miles/6 years (whichever comes first). See dealer for details.

ENGINES. Chevrolet products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

ASSEMBLY. Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

ONSTAR. OnStar services require vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. OnStar acts as a link to existing emergency service providers. Subscription Service Agreement required. Call 1-888-4ONSTAR (1-888-466-7827) or visit onstar.com for OnStar Terms and Conditions, Privacy Policy, details and system limitations.

A NOTE ON CHILD SAFETY. Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. IMPORTANT WORDS ABOUT THIS CATALOG. We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based upon design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet dealer for complete details. Chevrolet reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Mid-Car Sedan segment and latest available competitive information. Excludes other GM vehicles.

SPARE TIRE INFORMATION. There is no standard jack or spare tire in the 2012 Chevrolet Malibu LS. Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a one-quarter-inch puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 100 miles of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than one-quarter inch, or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.

FLEET ORDERS. Some standard content may be deleted on fleet orders. See dealer for details.
