

DODGE
GRAB LIFE BY THE HORNS

2005 **DURANGO**

Calling all competition: Durango is ready, willing, and able to take on any and all SUVs. Despite some pretty fierce opposition, Durango is winning awards and grabbing headlines like "Truck of the Year" and "Best in Class". And critics can't stop talking about its impressive size, power, capability, and overall value—a combination no other SUV can match.

Check out the bold look and powerful performance of Dodge Durango.

ENGINE

Horsepower. Once you get some, you always want more. That's why Durango features the 5.7-liter HEMI® V8 engine with a best-in-class 335 horsepower and 370 lb.-ft. of torque.

Other engines and features:

- 3.7-liter V6 provides 210 HP and 235 lb.-ft. of torque
- 4.7-liter V8 provides 235 HP and 300 lb.-ft. of torque
- Choice of four- or five-speed transmissions

SMOOTH RIDE

To get a really smooth ride out of most vehicles you need to pay more to get a better suspension system. With Durango, the smooth ride comes standard. That's because every Durango features a long wheelbase and wide track, a coil-sprung solid-axle rear suspension with a Watt's linkage to control lateral motion, rack-and-pinion steering, torsion bar independent front suspension, and a hydroformed box-section frame for added stiffness.

AIR BAGS

Durango features an advanced air bag system that includes multistage front air bags along with an occupant classification system (OCS)† for the passenger-side front air bag; in addition, an available side-curtain air bag system helps protect all three rows of seating. The OCS† measures the conditions for activation or deactivation of the passenger side air bag based upon the weight of the occupant. Finally, Durango features adjustable head restraints and shoulder belts in all seating positions.

† Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator lamp to determine if the OCS classification is appropriate. Children 12 and under should always be in a backseat correctly using an infant or child restraint system or with the seat belt positioned correctly for their age and weight.

TOWING AND HAULING

You can pack plenty inside Durango's 102.4 cubic feet of cargo volume and up to 1,750 pounds of payload. Want more? The optional HEMI® engine gives you best-in-class 8,850 pounds* of towing capability. Or opt for one of two other powerful engines:

- 3.7-liter V6 with 3,700 pounds maximum towing capacity
- 4.7-liter V8 with 7,400 pounds maximum towing capacity*

** When properly equipped. Based on Automotive News classification.*

DURANGO CONVENIENCES

SEATING

Are you one of those people who think SUVs are a dime a dozen? Odds are you've never been inside the one-of-a-kind Dodge Durango. If you had you'd know about its unique seven-passenger seating, and available folding 50-50 split third-row seat that makes room for longer items. Other features include:

- Available heated cloth - or leather-trimmed front bucket seats
- Generous overall head, leg, shoulder, and hip room
- Best-in-class* cargo room behind the second row of seats
- An enormous 102.4 cubic feet of maximum cargo capacity when the third-row seats are folded
- Reclining second-row seats (leather only)

* Based on Automotive News classification.

STORAGE

Moving companies won't have the same clout after seeing the Durango's 102.4 cubic feet of cargo space. The second and third rows of seating fold flat into the floor, creating a four-foot-wide rear opening and a maximum payload of up to 1,750 pounds.†

† When properly equipped.

Remember to properly secure all cargo.

VIDEO

Getting the show on the road has always been a production. Until now. An easy-to-use DVD rear entertainment system (also plays CDs and mp3s) with a clear, 7-inch active matrix screen is available on Limited and SLT "G" package.

AUDIO

Durango's sound system lineup features an AM/FM/six-disc integrated CD/mp3 changer (optional on ST, Adventurer, and SLT, standard on SXT and Limited) and a 368-watt eight-speaker Infinity® II sound system (optional on SLT "G" package, standard on Limited).

ALL-WHEEL DRIVE

Two available all-wheel-drive (AWD) electronic shift transfer cases—single speed and two speed—are engaged at all times and controlled by a switch on the instrument panel. Both provide traditional part-time four-wheel drive for maximum traction on slippery surfaces. Best of all, standard full-time AWD "set-it-and-forget-it" is always there when you need it.

COLORS

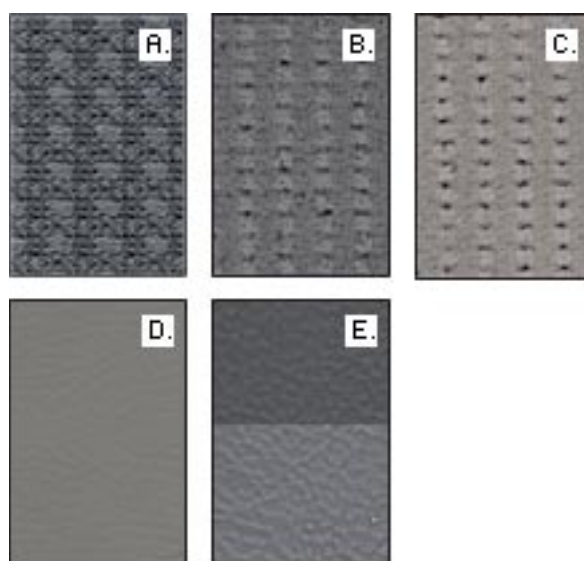

WHEELS

- A. 17-inch wheel covers are standard on ST and SLT
- B. 17-inch cast-aluminum wheels are standard on Limited and Adventurer, available on SLT
- C. 17-inch machine-faced cast-aluminum wheels are available on Adventurer
- D. 17-inch chrome-clad cast-aluminum wheels are available on Limited
