

2007 **MAGNUM**

After more than thirty years, HEMI® power is unleashed to the streets in the new 2007 Dodge Magnum.

With its innovative styling, performance and utility, you'll see that there's nothing else like it.

Check out the bold look and powerful performance of Magnum

POWER

Magnum R/T's 5.7-liter HEMI® V8 engine with the Multiple-Displacement System (MDS) is a pure stroke of genius. By switching from eight cylinders to four during cruising and light acceleration.

Magnum gives you a choice of three awe-inspiring engines: Magnum SE's 2.7-liter V6, Magnum SXT's high-output 3.5-liter V6, and, for the Magnum R/T, a 5.7-liter HEMI® V8 with the Multiple-Displacement System (MDS). With horsepower and torque ratings that most vehicles envy, all three deliver heart-stopping acceleration.

ELECTRONIC STABILITY PROGRAM

The available electronic stability program (ESP)* helps maintain stability by monitoring such factors as steering angle, turning rate, and lateral acceleration to determine vehicle behavior. Once the system determines that vehicle behavior differs from the driver's intended course, ESP will do whatever can be done, within the limits of available traction, to keep the car on course. The brake assist feature can detect a driver's intended panic stop, and apply optimum brake pressure to help achieve minimum stopping distances.

** Always drive carefully, consistent with conditions. Always wear your seat belt and obey traffic laws.*

SUSPENSION

A short- and long-arm (SLA) front suspension and five-link independent rear suspension system maintain independent control of each wheel

for excellent handling. An advanced suspension mounting system dramatically reduces road noise inside the passenger compartment. What this means to you is a smooth ride that is also quiet.

ALL-WHEEL DRIVE

Introducing a new spin on performance with less spin at the wheels. Magnum SXT and R/T feature an available all-wheel-drive system that greatly improves traction. A front differential and transfer case added to the standard rear-wheel drive layout deliver a 38/62 percent torque split between the front and rear wheels for the performance of rear-wheel-drive handling with the security of all-wheel-drive traction.

ALL-SPEED TRACTION

The available all-speed traction control operates both the brakes and the electronic throttle control (ETC), enhancing mobility and directional stability while preventing excessive wheel slip when accelerating on slippery surfaces.

TOWING

Magnum R/T, when equipped with the Trailer Tow Group, can tow trailers up to 3,800 pounds. Without the Trailer Tow Group, Magnum delivers up to 2,000 pounds of towing capacity when powered by the 3.5- or 5.7-liter engine. Magnum SE's 2.7-liter engine can tow up to 1,000 lbs. Maintaining a proper ride height is critical while towing or carrying heavy loads. R/T models with the Trailer Tow Group feature a self-leveling rear suspension that adjusts automatically to ensure a constant ride height, no matter what kind of load you're carrying. (Also available on SXT rear-wheel- and all-wheel-drive models.)

REAR-WHEEL DRIVE

Rear-wheel drive gives better traction for acceleration with high-performance engines, a near-50/50 weight distribution enhances vehicle balance, and a longer wheelbase means a smoother ride with even more interior room.

VERSATILE PERFORMER

For too many years you've had to choose between performance and versatility. If you needed a vehicle that could haul the kids to practice or haul lumber from the home improvement store, you had to give up on real, aggressive power. But with the 2007 Dodge Magnum you can kiss that compromise goodbye. In addition to great power, performance, and handling, Magnum is also versatile enough to handle everyday tasks.

Magnum lets you carry passengers and cargo—a whole lot of cargo. There's 27.2 cubic feet of cargo space behind the rear seats, which turns into 71.6 cubic feet with the rear seats folded down. This gives you the versatility to handle both workday projects and weekend fun.

The bilevel cargo floor includes a removable trifold upper divider and lower load floor to organize, store, and hide valuables. The lower load floor is also hinged for easy access to the spare tire, jack, and battery.

INSTRUMENT CLUSTER

From the black-on-white gauge display in the daytime to the comfortable blue-green glow of the digits in the evening, the engaging gauges on Magnum are easy to read any time of the day or night.

The available electronic vehicle information center (EVIC) is designed to provide valuable information to get you down the road. The available steering wheel—mounted controls will let you navigate through such features as the UConnect® hands-free communication system screen, the navigation system's turn-by-turn route guidance, trip computer, outside temperature, compass, and audio settings.

LIFTGATE

The unique forward-hinging liftgate opens up and away from you, allowing access to the rear cargo area without making you back out of the way. In fact, Magnum's unique rear cargo area enables you to load and unload large objects with ease.

** Properly secure all cargo.*

NAVIGATION SYSTEM

The available integrated DVD-based global positioning satellite system (GPS) with color display provides precise detail on where you are and where you're going. In fact, it will give you turn by turn instructions so you'll never have to stop to ask for directions.

UCONNECT®

The available Uconnect hands-free communication system is cool and convenient. All you need to do is set up any compatible Bluetooth™ hands-free wireless phone in Magnum, and the UConnect system automatically lowers the audio system volume and broadcasts the incoming call. A microphone in the rearview mirror takes your voice commands while you keep your hands on the wheel and your eyes on the road.

PASSENGER PROTECTION

Even the most careful driver occasionally gets into unavoidable situations. When that happens, it's nice to know that the advanced multistage airbags front air bags standard on all models of Dodge Magnum will inflate according to the severity of the impact.†

And the supplemental air bag† available on all models offer additional side-impact protection to both front- and rear-seat passengers.

† Always wear a seat belt. Remember, a back seat is the safest place for children 12 and under.

FABRIC & TRIM

Standard on SE and SXT: A) Ellington Cloth in Medium Slate Gray (interior shown upper left) or B) Ellington Cloth in Dark Slate Gray (interior shown upper right)

Optional on SXT and Standard on R/T: C) Royale Leather Trim in Light Slate Gray or D) Royal Leather Trim in Light Graystone (interior shown middle left)

Standard on Magnum R/T with Road/Track Performance Group: E) Caprice Vinyl in Dark Slate Gray (interior shown middle right) with F) with Perforated Preferred Suede® Microfiber in Dark Slate Gray

Standard on Magnum SRT8: G) Royale Leather Trim in Dark Slate Gray (interior shown lower left) with H) Studs Pattern Embossed Suede in Medium Slate Gray

TRAILER TOW PREP GROUP — Includes Severe Duty Engine Cooling and load-leveling rear suspension with height control			O		

* = Included. P = Available within package noted. O = Optional.

⁽¹⁾Always sit properly in the seat with the seat belt fastened. Children 12 and under should always be in a backseat correctly using an infant or child restraint system, or the seat belt positioned correctly for the child's age and weight. ⁽²⁾No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.
