

2022 //
DODGE CHALLENGER

PERFORMANCE, POWER AND MUSCLE

Now and forever, Dodge is about performance, power and muscle. But that formula isn't simply calculated by the amount of **intense** horsepower and torque our vehicles produce. **Performance** is also measured by the way advanced safety and security features protect passengers. The onboard **technology** that helps keep occupants

connected to the people, places and entertainment that matter most is another gauge of power. **Muscle** can be tracked by the ability to tow hefty loads, seat up to seven passengers and bring **efficiencies** to engines. Every vehicle in the 2022 lineup is designed to live up to the pillars that support the **Dodge Brand**.

BROTHERHOOD OF MUSCLE

CHOOSE YOURS

EVERY CHALLENGER IN THE 2022 LINEUP HARNESSSES NOSTALGIC STYLING, AMERICAN MUSCLE, MODERN TECHNOLOGY AND AN ALL-OUT ATTITUDE THAT GIVE THIS LEGEND THE CHOPS TO UPHOLD THE WEIGHT OF ITS STORIED REPUTATION. WHETHER YOU'RE LOOKING FOR THE EFFICIENT SAVVINESS OF A CHALLENGER SXT, THE DRAG RACE PROWESS OF AN SRT® SUPER STOCK OR SOMETHING IN BETWEEN, THERE'S A CHALLENGER WAITING FOR YOU.

///// Challenger R/T shown in White Knuckle with available R/T Classic bodyside stripe.

SRT HELLCAT® // FAMILY OF LEGENDS

It's been said that there's no rest for the wicked – which is exactly why these vehicles were **born to run**.

Challenger SRT Hellcat, SRT Hellcat Redeye and SRT® Super Stock show up and show out with track-ready prowess and **jaw-dropping** quarter-mile times.

CHALLENGER SRT HELLCAT is powered by a **Supercharged** 6.2L HEMI® SRT V8 engine that delivers 717 horsepower and 656 lb-ft of torque. Two fully functional, air-sucking snorkels on the hood and the driver-side illuminated Air-Catcher® headlamp feed cold air to the engine to keep it **cool and efficient**. SRT Hellcat clocks the quarter-mile at 127 mph.

CHALLENGER SRT HELLCAT REDEYE houses a high-output version of the Supercharged 6.2L HEMI SRT V8 engine. Combined with 25 major component upgrades, the engine unleashes an unthinkable **797 horsepower and 707 lb-ft of torque**. Redeye reaches a top speed of 203 mph and runs a 10.8-second quarter-mile at 131 mph. A fully functional dual-snorkel hood provides maximum air intake to the powerplant. SRT Hellcat Redeye shows up race-ready with standard Torque Reserve, SRT Power Chiller® and After-Run Chiller, all grabbed from the SRT Demon archives. Two final drive ratios are offered: a standard 2.62:1 or available 3.09:1 for increased launch capability.

The standard SRT Performance Pages brings critical vehicle performance data to the driver's fingertips, while race options give the driver the ability to access Launch Control, Shift Light and Line Lock.

CHALLENGER SRT SUPER STOCK uses the same Supercharged 6.2L HEMI high-output V8 engine that powers the SRT Hellcat Redeye, but it takes its **ferocity** further with a revised powertrain and TorqueFlite® 8HP90 8-speed automatic transmission. The result is 807 horsepower (on pump gas), 3.25-second 0 – 60-mph acceleration, elapsed quarter-mile time of 10.5 seconds at 131 mph and a 168-mph top speed. Challenger SRT Super Stock is built on a standard Widebody and features a **competition suspension**, standard lightweight aluminum four-piston Brembo® brakes, and a wheel and drag radial combination designed to give customers better **grip off the line**.

ALL SRT TRIM LEVELS feature Drive Modes specific to the vehicle. The available SRT tuned Bilstein® Three-Mode Adaptive Damping Suspension System provides driver-selectable settings including Street (Auto) Mode = **sporty** but compliant ride; Sport Mode = **firm**, maximum handling; and Track Mode = firm, **maximum handling** plus performance shifting and a gear-holding feature to suit any driver's needs. The SRT Drive Modes, accessed via the Uconnect® touchscreen, offer selectable settings for Street (Auto), Sport and Track. A custom setting lets drivers tailor their experience by individually adjusting horsepower, transmission shift speeds, steering effort, paddle shifters, traction and suspension preferences.

FREAK IN THE STREETS

LOOKS THAT THRILL // It's the performance that curls your toes, but it's the heritage style that takes your senses to the redline. Menacing projector headlamps with quad-halo LED surrounds are a throwback to the famed '71 Challenger. The taillamps embody an old-school, seamless, split design, while the LEDs give it a contemporary twist. A standard performance hood, integrated dual bright exhaust tips and rear spoiler deliver intimidating vibes.

///// Challenger SRT Hellcat® shown in Octane Red with SRT® Black Package.

1320

It's named for the quarter-mile distance (1,320 feet), but if you're eying this trim level, you already knew that. While you can certainly drive this beast to work, what you're most excited to do is take it to the drag strip. Challenger R/T Scat Pack 1320 is the drag-oriented, street-legal muscle car for the grassroots drag racer. It's outfitted with everything needed to floor it on the last yellow: TransBrake, drag suspension, Adaptive Damping Suspension, 275/40R20 102Y Drag Radial tires and 20 by 9.5-inch Low-Gloss Black drag wheels with knurled

///// Challenger R/T Scat Pack shown in Pitch Black with available 1320.

bead seats. The unique fender badge lets everyone know you aren't messing around; the badge on the instrument panel reminds you that you're well-equipped for the run. Settle in, select Drag Mode to adjust the traction and stability control settings, grip the Alcantara® wrapped performance steering wheel, wait for double yellow lights, then engage the TransBrake, release when the Christmas tree goes green and move down the quarter-mile with the full force of the 6.4L HEMI® engine and its 485 horses and 475 lb-ft of torque.

A BOLDER SLICE OF STYLE // Outfit your Challenger in the new HEMI® Orange Package. Available exclusively on Challenger Scat Pack and GT trim levels, this package brings race-inspired style to your vehicle. A sporty, offset Orange and Gunmetal stripe runs tip to tail for maximum impact. Orange brake calipers are visible through the spokes of the 20 by 11-inch Carbon Black Warp-Speed aluminum wheels on Scat Pack or the 20 by 9-inch Mid-Gloss Black aluminum wheels on GT. The trim-level badging with pops of Orange does the rest of the talking.

Inside, Desert Orange accent stitching gives a custom feel to the instrument panel (IP), steering wheel, shifter boot, seats and doors. K-Black and Gloss Black accents are found on the three steering-wheel bezels, the cluster mask trim, HVAC rings and the shifter body (automatic transmission only). An Orange-accented "392" instrument panel (IP) badge also sets this package apart.

CHALLENGER SRT HELLCAT® REDEYE //
shown with available real carbon fiber interior
accents and stitched IP.

CHALLENGER SRT HELLCAT® REDEYE //
shown with Caramel perforated Laguna leather trim
interior with Redeye logo and Silver accent stitching.

DECEIVING BY DESIGN // Challenger SRT® Super Stock gets its name from the “Super Stock” class of vehicle in drag racing. The class is defined by vehicles purposely built to look like an ordinary passenger vehicle but are really highly modified race cars. What this powerhouse lacks in badging, it more than compensates for with the beast under the hood. The only tells are 18 by 11-inch wheels with a Low-Gloss Granite finish and Nitto® Drag Radials.

///// Challenger SRT Super Stock shown in Go Mango.

SHAKE IT UP

////// Challenger R/T Scat Pack shown in Hellraisin with Shaker Package.

///// **R/T SCAT PACK** gets its muscle from the legendary 392 HEMI® V8 engine. The numbers tell the rest of the story: 485 horsepower, 475 lb-ft of torque, 0 – 60 mph in the low-4-second range and a quarter-mile in the mid-12-second range. This power is underpinned by four-piston Brembo® brakes, Three-Mode Electronic Stability Control (ESC)™* with Full-Off Mode, high-performance suspension with Bilstein® shocks and 20 by 9-inch aluminum wheels.

///// **R/T SCAT PACK WIDEBODY** features a beefed-up stance and booming exhaust notes. The available Shaker Package supplies a bigger performance kick through a Mopar® Cold-Air Intake and full-floating, open-element Shaker hood scoop.

///// **ALL R/T SCAT PACK MODELS** include Dodge SRT® Performance Pages, a 7-inch reconfigurable digital display, and race-inspired seats featuring a Scat Pack Bee logo embroidered on either a standard high-performance premium cloth or available Nappa leather trim with Alcantara® suede inserts.

BORN TO BOLT // Challenger Widebody configurations bring a different dynamic of performance, boldness and power through a more aggressive stance. Available on R/T Scat Pack, SRT Hellcat® and SRT Hellcat Redeye and standard on SRT® Super Stock, fender flares are wider and add 3.5 inches to overall vehicle width.

The extra room makes way for track-ready 20 by 11-inch forged aluminum wheels riding on sticky 305/35ZR20 Pirelli® P ZERO™ tires on SRT Hellcat and Scat Pack models. SRT Super Stock receives 18 by 11-inch Low-Gloss Granite aluminum drag wheels and P315/40R20 102W Nitto® Street-Legal Drag Radials.

In addition to extra rubber on the road, R/T Scat Pack Widebody includes six-piston Brembo® front brakes and an Adaptive Damping Suspension. All other Widebody models employ a standard Widebody competition suspension.

///// Challenger SRT Scat Pack Widebody shown in Pitch Black.

**BE THE ONE
THAT GOT AWAY**

TRACK PROVEN TUNED CHASSIS // Intense track conditions require tightly engineered hardware. Challenger showcases a high-performance tuned chassis that's ready to go.

SHOCK ABSORBERS // Available Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the typical commute while still being capable for weekend track duty.

SUSPENSION // Every Challenger in the lineup is underpinned by a proven suspension. Depending on trim level, options range from sport-tuned to competition to drag-race-specific suspension.

///// Challenger R/T shown in White Knuckle.

GEOMETRY MAJOR

Movement and staying power come from a sophisticated suspension geometry and rear-wheel drive (RWD). The independent five-link rear suspension is finely tuned to help provide remarkable handling and ride comfort. A lower unsprung mass helps maintain optimum tire contact with the ground and minimize road noise.

Models equipped with a 392 HEMI® V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Bilstein® shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad.

A Bilstein Three-Mode Adaptive Damping Suspension System is available on R/T Scat Pack and standard on all SRT Hellcat® models. It offers different suspension firmness settings: Street Mode (sporty), Sport Mode (firm) and Track Mode (firmest max handling). The standard R/T Scat Pack suspension delivers performance handling through an aggressive front- and rear-camber geometry. Set at -1.2 degrees in the front and -0.75 degrees in the rear, Challenger is set up for high-speed cornering, with its tires leaning inboard at the top relative to the body.

///// Challenger GT AWD shown in Pitch Black with Blacktop Package.

ALL-WHEEL DRIVE

FOUR-SEASON ACTION // When Mother Nature gets sloppy, there's no need to park your ride. Challenger all-wheel drive (AWD) delivers reassuring control exactly when you need it. The advanced automatic front-axle disconnect technologically, intuitively and seamlessly transitions between rear-wheel drive (RWD) and AWD without driver intervention. Under normal driving conditions, the front axle is disengaged and 100 percent of the engine's torque is directed to the rear wheel. When sensors indicate more traction is needed, the system automatically engages the front axle and instantly transitions to AWD Mode. These systems work with the vehicle's Electronic Stability Control (ESC)¹ System to deliver precise front-to-rear torque control while preserving unrelenting drive.

CHALLENGER GT AWD //
shown in White Knuckle with available
Blacktop Package.

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA² // This system displays the area directly behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard.

PARKSENSE® REAR PARK ASSIST SYSTEM² // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Available.

BLIND SPOT MONITORING (BSM)³ AND REAR CROSS-PATH DETECTION² SYSTEM // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminated icons in the sideview mirrors and by an audible chime. The system includes Rear Cross-Path Detection², which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of, for example, parking spots or driveways. Available.

ADAPTIVE CRUISE CONTROL (ACC)⁴ // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available.

FULL-SPEED FORWARD COLLISION WARNING (FCW)⁵ // Radar and camera technology combine to alert you when the system senses a potential frontal impact. If you're not able to respond quickly enough, the system will transmit audible and visual warnings. Warning sensitivity can be adjusted to driver preference. Available.

ELECTRONIC STABILITY CONTROL (ESC)¹ // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC¹ senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard.

RAIN-SENSING WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC¹ pump to pre-charge the brake system in order to decrease the time required for full brake application. Standard.

RAIN BRAKE SUPPORT // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard.

DODGE AIR FILTRATION SYSTEM // We have enhanced the air filtration system in the Dodge Challenger to provide filtered air for you and your family. The new Dodge Air Filtration System filters 95 percent of air particulates while separating out pollen, allergens and bacteria, making it the cleanest cabin air ever in a Challenger. Standard.

IN TOUCH WHEREVER YOU GO

Uconnect® brings a wide range of interactive features to your vehicle and beyond through a highly intuitive communication experience. Trips are enhanced with informative and entertaining apps. Access them on your Uconnect touchscreen as well as your smartphone.

Listen to your favorite playlist from your connected device, then flip to SiriusXM® Radio⁶ and enjoy the best commercial-free music, plus every major sport and the biggest names in entertainment, news and comedy. You'll get over 150 channels, all at the press of a button. With the SiriusXM Platinum Plan⁶, you get every channel available on your satellite radio, and you can also listen wherever you go on your portable devices with the SiriusXM App⁶, which is included with your trial. Available.

Drive worry-free with SiriusXM Guardian™⁷ – a premium suite of safety and convenience services that can be accessed in-vehicle or through the Dodge App⁸. Includes a twelve-month trial. Available.

SRT® BRANDED BREMBO® 6-PISTON LIGHTWEIGHT CALIPERS //

HOLD YOUR HORSES // Solid stopping power comes from standard 4-wheel antilock disc brakes. Additional stopping power comes from the available Brembo Performance Brake System, featuring vented two-piece front rotors and four-piston front calipers for outstanding heat management and that provide superior braking performance. For superb stopping capabilities, the SRT engineered Brembo Performance Brake System, with six-piston front and four-piston rear calipers, results in improved performance braking when paired with wind-tunnel-designed brake ducts.

COLOR:CHOICES

COLOR CRAZY —

YOU DON'T BUILD FAMILY SEDANS THAT PACK 797 HORSEPOWER, COUPES THAT DOUBLE AS WEEKEND RACERS AND SUVs THAT IMPRESS THE NHRA MORE THAN THE PTA JUST TO GIVE THEM COLOR NAMES LIKE WHITE, BLUE, RED AND GREY. FOR DECADES, DODGE VEHICLES HAVE BEEN COATED IN COLORS WITH NAMES AS FLASHY AS THE VEHICLES THEMSELVES. THE ROSTER HAS INCLUDED PANTHER PINK, HEMI® ORANGE, TOP BANANA, SASSY GRASS, GO MANGO AND PLUM CRAZY. THE REASON FOR THE BRASH NAMES IS SIMPLE – IT'S ABOUT ADDING ATTITUDE AND EDGE TO EVERYTHING WE DO.
