

DODGE CHARGER

A high-contrast, black and white close-up of a panther's face. The panther's eyes are glowing red, and the Dodge logo (two slanted parallel lines) is visible within the right eye. The fur is detailed with fine hairs, and the background is dark.

THIS IS BOLD PERFORMANCE

The Dodge Brand was born to deliver muscle to the masses. Almost 50 years later, this Brand has never taken its foot off the gas—power, performance and muscle still reign supreme. But that formula isn't just calculated by intense horsepower and torque. Our performance is also measured by the way advanced safety and security features help protect passengers. The

onboard technology that helps keep occupants connected to the people, places and entertainment that matter most is another gauge of power. Muscle can be tracked by the ability to tow hefty loads, seat up to seven passengers and bring efficiencies to engines. Every vehicle in the 2023 lineup is designed to live up to the pillars that support the Dodge Brand.

JOIN THE REBELLION

THIS IS WHAT FOUR-DOOR, FIVE-PERSON AMERICAN MUSCLE LOOKS LIKE. WITH A BRILLIANT COMBINATION OF POWER, PERFORMANCE AND CONTROL, EVERY CHARGER IN THE 2023 LINEUP HAS STAYED TRUE TO ITS PERFORMANCE-CAR ROOTS. WHETHER YOU BRING HOME AN EFFICIENT, RESPONSIVE CHARGER SXT, THE SUPERCHARGED AUTHORITY OF AN SRT HELLCAT® REDEYE WIDEBODY OR ANYTHING IN BETWEEN, THERE'S A CHARGER WAITING FOR YOU.

///// Charger SRT Hellcat Jailbreak shown in Plum Crazy with available Silver dual stripes.

SRT HELLCAT® REDEYE //

Powered by a 797-horsepower, 707-lb-ft-of-torque Supercharged 6.2L high-output HEMI® V8 engine mated to a TorqueFlite® 8HP90 8-speed automatic transmission, the SRT Hellcat Redeye model can run a quarter-mile in 10.6 seconds at 129 mph, go from 0 – 60 in the mid-3-second range and hit a top speed of 203 mph. Standard Torque Reserve delivers up to 3.9 psi of boost at launch and up to 55 percent more engine torque. Both the steel prop shafts and the half-shafts allow the vehicle to handle the additional torque created with the help of the SRT Power Chiller® and After-Run Chiller. Essentially, this daily driver is a beast.

SRT HELLCAT //

Only slightly less raucous than its sibling, the Charger SRT Hellcat model throws down **serious performance** numbers of its own. Its 717-horsepower, 650-lb-ft-of-torque performance is also supplied by a Supercharged 6.2L HEMI SRT Hellcat V8 engine. Its **dominance** shows in 0 – 60 runs in 3.6 seconds and its impressive 10.96 quarter-mile elapsed time—even on street tires.

SRT® DRIVE MODES //

All SRT Hellcat trim levels feature Drive Modes specific to the vehicle. The standard SRT Performance Pages brings critical vehicle performance data to the driver's fingertips, while race options give the driver the ability to access Launch Control, Shift Light and Line Lock.

/// It's equal parts form and function. The Charger SRT Hellcat® Redeye model and SRT Hellcat Widebody models have looks as aggressive as their performance. The iconic-inspired design showcases scalloped bodysides, an imposing grille and an all-out aggressive look. A performance hood provides maximum air intake to the supercharged powerplant from the functional hood scoop to boost power. The mail-slot grille lets cool air travel into the radiator and maintain ideal operating temperatures even in the hottest conditions. Side sills connect the front and rear fascias to help amplify the integrated design. In the rear, a standard one-piece, body-color performance spoiler details the back design while adding downforce to help bring high-speed balance to the vehicle.

The Widebody model flares out an additional 3.5 inches from the overall width of the Charger for a more dominating, planted presence. The Charger SRT Hellcat Widebody model rides on 20 by 11-inch Carbon Black wheels and wider, stickier Pirelli® 305/35ZR20 tires (Three-Season tires are available). This combination teams with a competition suspension tuning with Bilstein® Three-Mode Adaptive Damping Suspension System to produce even more grip, delivering next-level performance on the street, strip and road course.

///// Charger Scat Pack Widebody shown in Go Mango with available Satin Black-painted hood, roof, decklid and spoiler, and Charger SRT Hellcat® Jailbreak shown in Frostbite with available Satin Black-painted hood and sunroof.

SCAT PACK /// ICONIC CREDENTIALS

Loaded with a legendary 392 HEMI® V8, the Charger Scat Pack and Scat Pack Widebody models unleash 485 horsepower and 475 lb-ft of torque. Big Brembo® brakes, Three-Mode Electronic Stability Control (ESC)² with Full-Off Mode, high-performance suspension with Bilstein® shocks and 20 by 9-inch aluminum wheels, and available cold-air induction help you use that power responsibly.

The unique, specially tuned Scat Pack Widebody suspension features Bilstein Three-Mode (Street (Auto), Sport and Track) Adaptive Damping Suspension System and 20 by 11-inch wheels. The result is radical levels of lateral grip, acceleration and braking that help deliver premium handling. Massive 15.4-inch Brembo two-piece brake rotors with 6-piston front calipers deliver tremendous stopping power, heat management and longevity, producing 60 – 0 stops in 107 feet. The numbers the Scat Pack Widebody model yields tell an impressive story: 0 – 60 mph in 4.3 seconds, quarter-mile in 12.4 seconds ET and 0.98 g lateral grip on the skid pad.

The Charger Scat Pack interior showcases standard race-inspired seats with an embroidered Scat Pack Bee logo (standard cloth or available Nappa leather trim with Alcantara® suede inserts). All Scat Pack models include Dodge SRT® Performance Pages that features Launch Control, g-force meter, drag-race timers and more. This real-time data can also be accessed on either the standard 7-inch configurable digital display or the standard 8.4-inch Uconnect® touchscreen. Customize steering feel, transmission shift points, throttle response, ESC² tuning and suspension firmness (if equipped with Adaptive Damping Suspension) via the standard SRT Drive Modes.

///// Charger Scat Pack Widebody shown in B5 Blue with available Carbon dual stripes.

CHARGER SRT HELLCAT® JAILBREAK // shown with real carbon fiber interior accents on the instrument panel and center console.

////// Charger SRT Hellcat® Redeye Jailbreak instrument cluster shown.

A standard, modern 7-inch configurable digital gauge cluster housed on a retro-inspired one-piece extruded aluminum instrument-panel bezel is the focal point of this unique interior. Buttons on the steering wheel let you scroll through hundreds of different vehicle configurations and customize what information you see and how you see it.

CHARGER SRT HELLCAT®
REDEYE JAILBREAK //
shown with Hammerhead Grey Laguna
leather-trimmed seating and is
exclusive to the SRT® Jailbreak models.

///// Charger Scat Pack Widebody shown in Sinamon Stick.

ICONIC HEMI® ORANGE // Pay tribute to the original Orange color of arguably the most iconic engine ever. Available exclusively on the Charger GT Rear-Wheel Drive (RWD) and Scat Pack Widebody trim levels, the available HEMI Orange Package brings race-inspired style to your vehicle. A sporty, offset Orange and Gunmetal stripe runs tip to tail for maximum impact. Orange brake calipers are visible through the spokes of the 20 by 11-inch Carbon Black Warp-Speed aluminum wheels on Scat Pack models or 20 by 9-inch Mid-Gloss Black aluminum wheels on GT models. The trim-level badging with pops of Orange does the rest of the talking.

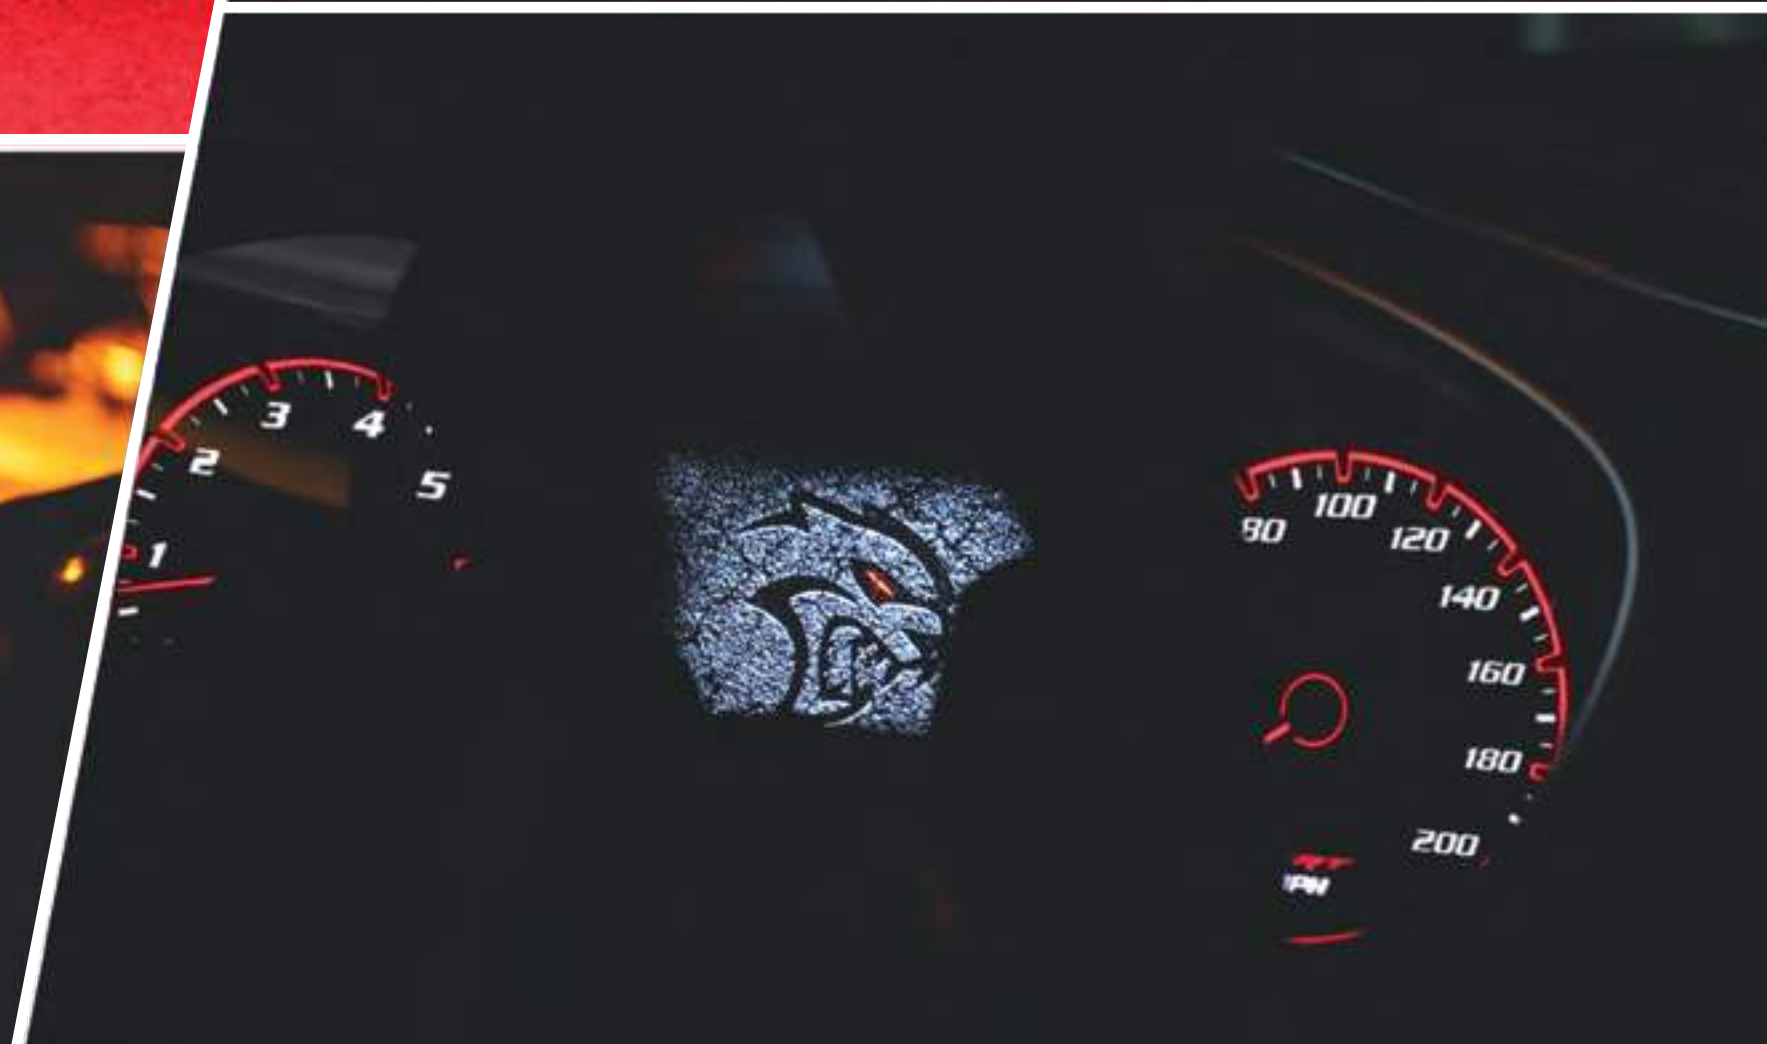

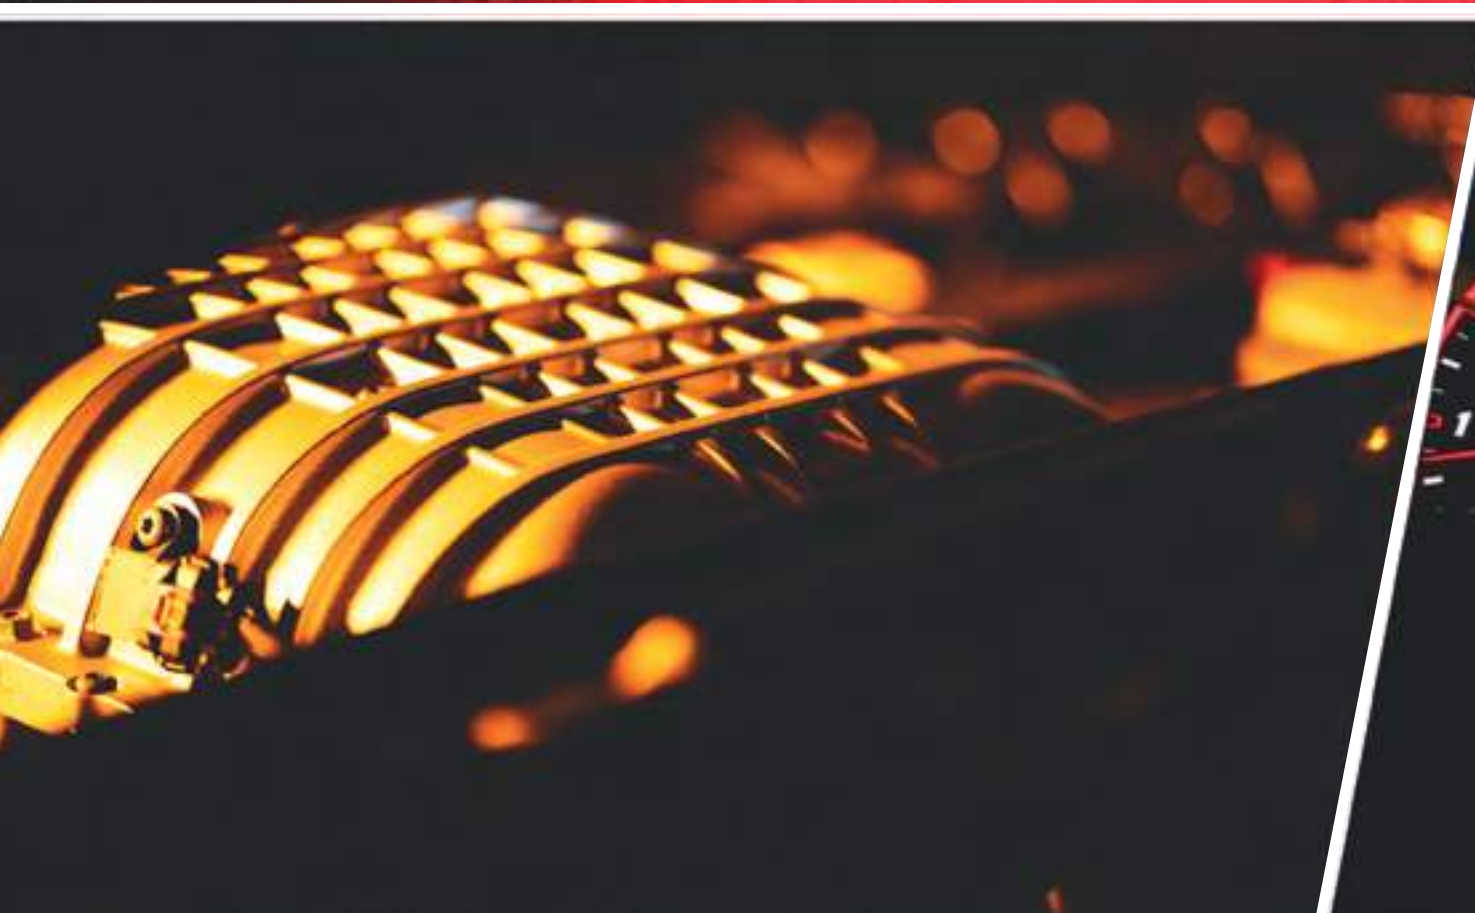

Inside, Desert Orange accent stitching gives a custom feel to the instrument panel (IP), steering wheel, shifter boot, seats and doors. K-Black and Gloss Black accents are found on the three steering wheel bezels, the cluster trim, HVAC rings and the shifter body. An Orange-accented "392" IP badge also sets this package apart.

AGILITY AND PRECISION

///// Charger SRT Hellcat® Jailbreak shown in Frostbite, and Charger Scat Pack Widebody shown in White Knuckle with available Satin Black-painted hood, roof, decklid and spoiler.

ICONS ARE FOREVER

///// Charger Scat Pack shown in Go Mango with available Carbon dual stripes.

READY TO RUMBLE

CHARGER SCAT PACK WIDEBODY //
shown in Sublime Green.

///// IT'S NOT SMOKE AND MIRRORS, this is what a real legend looks like. There's no denying that, from the beginning, Charger models have had a distinct silhouette. The sleek sheet metal on their long profile, door scallops and aggressive stance give them a muscular look. The seamless signature LED racetrack taillamp ensures you stand out as you zip past other drivers on the road. From available hood scoops and dual-heat extractors to exclusive Widebody fenders and bold wheel choices, Dodge Brand attitude is everywhere. The only smoke we blow is in the face of mediocrity.

///// Charger Scat Pack shown in TorRed with available Daytona Edition,
and Charger Scat Pack Widebody shown in Frostbite.

TRACK-PROVEN CHASSIS // Designed with the hardware necessary for demanding track conditions, Charger models are built on a high-performance tuned chassis.

SHOCK ABSORBERS // Monday through Friday, available precision-damped Bilstein® high-performance shock absorbers help provide a firm, confident, smooth ride for the commute. When the weekend hits, they're still capable for weekend track duty.

S U S P E N S I O N S

From sport-tuned to high-performance to drag-race-specific suspension, every Charger model is underpinned by a proven suspension. The independent five-link rear suspension is finely tuned to help provide excellent handling and ride comfort. A lower unsprung mass helps maintain optimum tire contact with the ground and minimize road noise.

Models equipped with a 392 HEMI® V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Bilstein® shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad.

A Bilstein Three-Mode Adaptive Damping Suspension System is available on Scat Pack and standard on all SRT Hellcat models. It offers different suspension firmness settings: Street Mode (sporty), Sport Mode (firm) and Track Mode (firmest max handling). The standard Scat Pack suspension delivers performance handling through an aggressive front- and rear-camber geometry. At -1.2 degrees in the front and -0.75 degrees in the rear, these models are set up for high-speed cornering, with their tires leaning inboard at the top relative to the body.

CHARGER SRT HELLCAT® JAILBREAK //

AWD

CHARGER GT AWD //
shown in White Knuckle with
available Blacktop Package.

ALL-WHEEL DRIVE

CONQUER THE CONDITIONS // Performance is a year-round commitment and Charger All-Wheel Drive (AWD) models are ready. Opt for on-demand AWD and front axle disconnect to seamlessly transition between Rear-Wheel Drive (RWD) and AWD without driver intervention. Under normal driving conditions, power to the front wheels is disengaged, and 100 percent of the engine's torque is directed to the rear wheels. When more traction is needed, the system automatically engages the front wheels and instantly transitions to AWD Mode. These systems work with the vehicle's Electronic Stability Control (ESC)² system to help deliver precise front-to-rear torque control while preserving unrelenting drive.

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA³ // This system displays the area directly behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard.

PARKSENSE® REAR PARK ASSIST SYSTEM³ // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Available.

BLIND SPOT MONITORING (BSM)⁴ AND REAR CROSS-PATH DETECTION³ SYSTEM // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminated icons in the sideview mirrors and by an audible chime. The system includes Rear Cross-Path Detection,³ which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of, for example, parking spots or driveways. Available.

ADAPTIVE CRUISE CONTROL (ACC)⁵ // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available.

FULL-SPEED FORWARD COLLISION WARNING (FCW)⁶ // Radar and camera technology combine to alert you when the system senses potential frontal impact. If you're not able to respond quickly enough, the system will transmit audible and visual warnings. Warning sensitivity can be adjusted to driver preference. Available.

ELECTRONIC STABILITY CONTROL (ESC)² // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC² senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard.

RAIN-SENSING WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC² pump to precharge the brake system in order to decrease the time required for full brake application. Standard.

RAIN BRAKE SUPPORT // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard.

DODGE AIR FILTRATION SYSTEM // This Air Filtration System filters 95 percent of air particulates while separating out pollen, allergens and bacteria, creating a more welcoming environment for passengers. Standard.

BRAKING AUTHORITY // Standard 4-wheel antilock disc brakes provide solid stopping power. Additional stopping power comes from the available Brembo® Performance Brake System, featuring vented two-piece front rotors and 4-piston front calipers for outstanding heat management and superior braking performance. For superb stopping capabilities, the SRT® engineered Brembo Performance Brake System, with 6-piston front and 4-piston rear calipers, results in improved performance braking when paired with wind-tunnel-designed brake ducts.

COLOR CRAZY —

YOU DON'T BUILD FAMILY SEDANS THAT PACK OVER 800 HORSEPOWER, COUPES THAT DOUBLE AS WEEKEND RACERS AND SUVs THAT IMPRESS THE NHRA MORE THAN THE PTA JUST TO GIVE THEM COLOR NAMES LIKE WHITE, BLUE, RED AND GRAY. FOR DECADES, DODGE VEHICLES HAVE BEEN COATED IN COLORS WITH NAMES AS FLASHY AS THE VEHICLES THEMSELVES. THE ROSTER HAS INCLUDED PANTHER PINK, HEMI® ORANGE, TOP BANANA, SASSY GRASS, GO MANGO AND PLUM CRAZY. THE REASON FOR THE BRASH NAMES IS SIMPLE—IT'S ABOUT ADDING ATTITUDE AND EDGE TO EVERYTHING WE DO.
