

The FIAT® 500X is a thrilling mix of beauty, brains, brawn and endless spontaneity. It's love at first drive.

European Yacht Club Capri edition shown. North American model may differ. Available Spring 2022.

A young couple stands in front of a vibrant blue Fiat 500X. The woman, with long, wavy brown hair, wears a white long-sleeved top with a red and black V-neck collar and has her arms crossed. The man, partially visible behind her, wears a white shirt with a dark collar. They are on a terrace with white columns and a railing in the background. The car's front end, including the headlights and side mirror, is visible on the left.

A SPECIAL CONNECTION

With a history that spans more than a century, FIAT® is a brand that knows how to keep a commitment — to its Italian design philosophy, its racing legacy, and, most of all, to its drivers. The FIAT 500X embodies all those things, with the added attraction of All-Wheel Drive (AWD) capability and ample room for five ... because FIAT knows the secret to producing great cars starts with building strong bonds.

Properly secure all cargo.

In 1957, the iconic FIAT® 500 introduced the world to accessible high design in a nimble and city-friendly car. Its distinct rounded lines and exterior colors made it unmistakable; its friendly “whiskers and logo” face made it irresistible. You’ll find all those elements — and so much more — in 500X.

al fresco

Newly available on every FIAT® 500X is the Al Fresco roof: a soft top option that makes open-air driving a breeze. Shown here in Blue cloth, a color exclusive to the new Yacht Club Capri. Black, Red and Gray cloth are also available on all other trim levels.

X = AWD

All-Wheel Drive (AWD) comes standard, giving FIAT® 500X class-exclusive status¹ and the wherewithal to navigate most any path you choose.

Standard All-Wheel Drive (AWD) will give you the confidence to stay the course through your journey's twists and turns. It provides excellent traction and responsive performance on slippery surfaces and during aggressive starts. FIAT® 500X AWD also works with the Electronic Stability Control (ESC)³ system to improve dynamic handling.

AWD

Getting optimum AWD performance requires no driver input when in Auto Mode — FIAT 500X knows when to fully engage on its own. The secret is a disconnecting rear axle that automatically selects Front-Wheel Drive (FWD) or AWD based on various inputs. All actions are intelligently and seamlessly engaged based on conditions and driving style, and have the added benefit of maximizing fuel efficiency.

DRIVING À LA MODE

The FIAT® Dynamic Selector Traction Control System puts three customized driving modes at your fingertips:

AUTO MODE is designed for the everyday, routine stuff — it'll smooth things out to help optimize fuel efficiency, ride quality and comfort.

SPORT MODE is for those who'd prefer spirited performance and a little more road feel. With it, the Electronic Stability Control (ESC)³ and steering calibrations are tuned for a more direct and quick steering response. Additionally, the system adjusts the transmission shift points for a more aggressive and accessible feedback.

WINTER MODE is the low-speed version — the system's designed to help keep you in control of all-wheel drive in slippery conditions. At high speeds, the system's designed to help you respond quickly to changing road conditions.

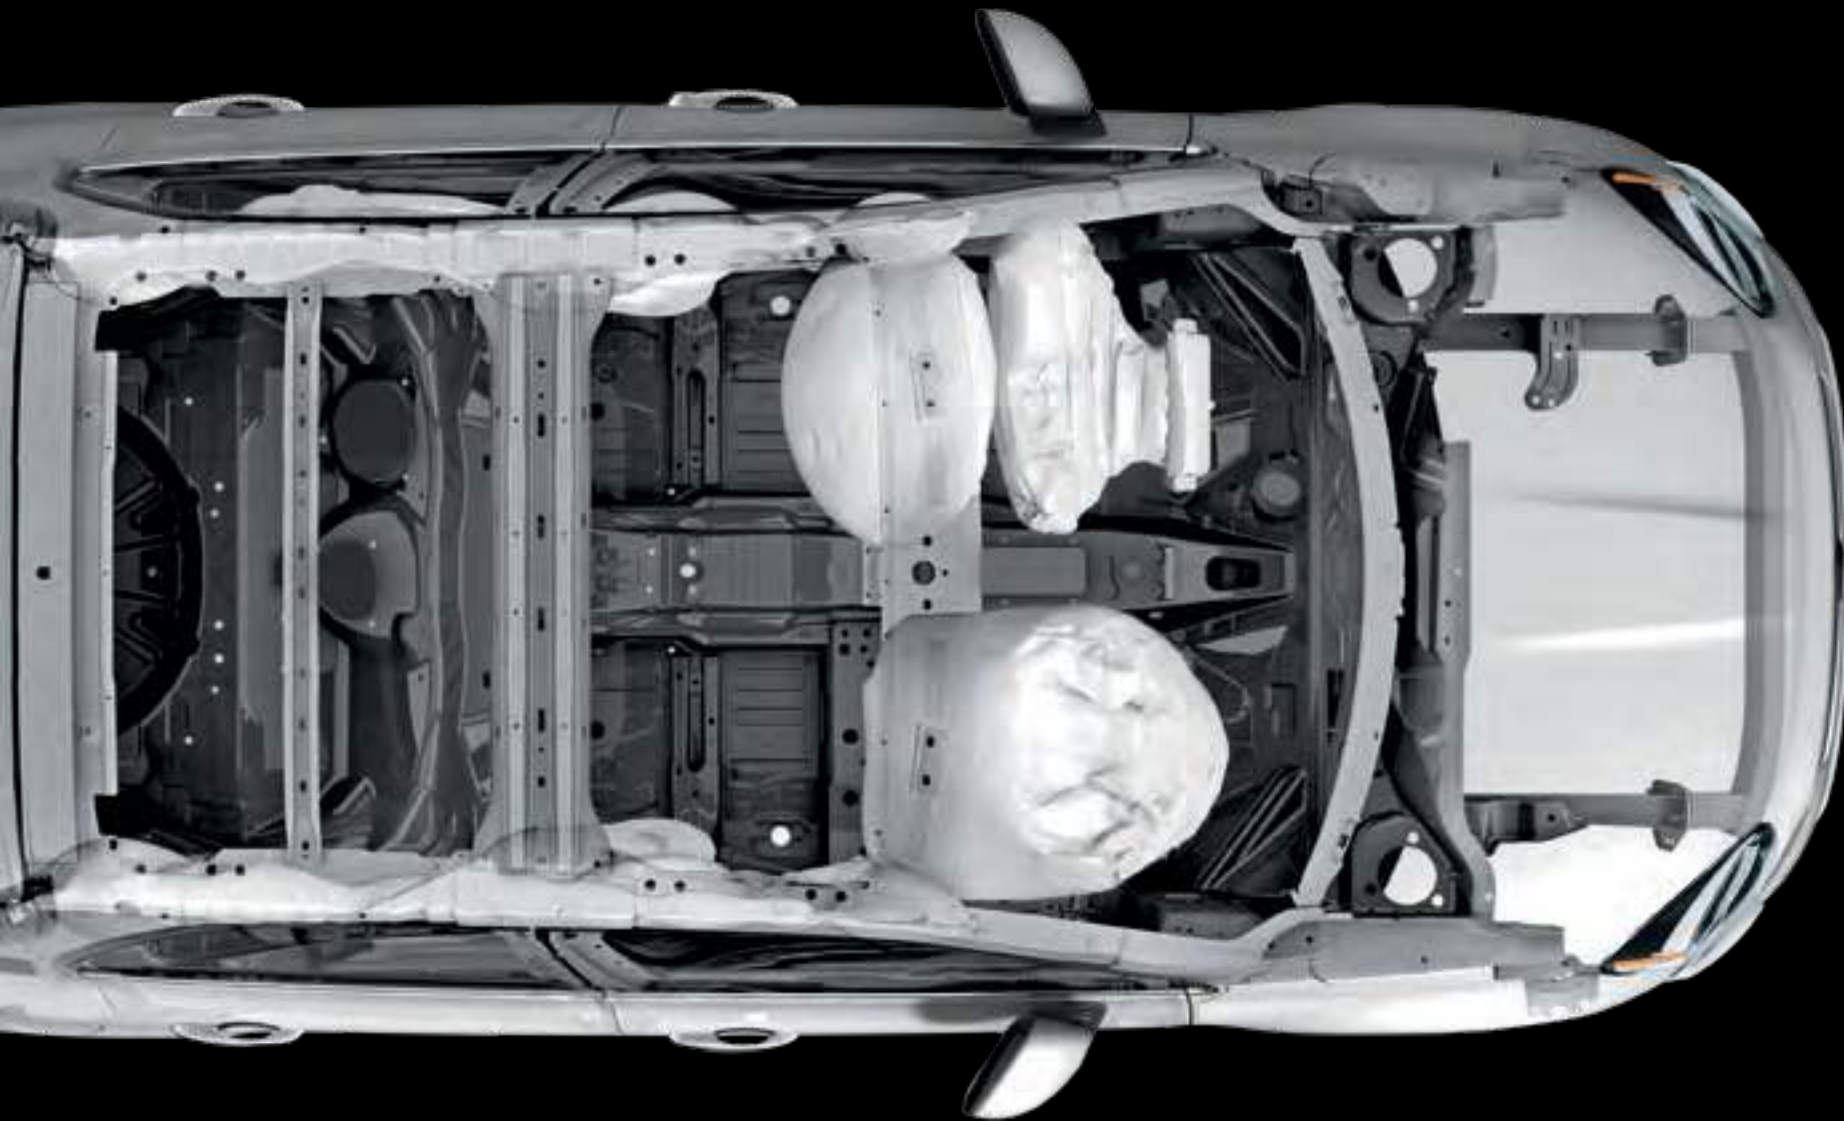

BRAVO, WELL-HANDLED

The FIAT® 500X also features KONI® Frequency Selective Damping (FSD) front and rear shock absorber technology to deliver impressive roadholding and handling characteristics. The KONI FSD system actively filters out inputs from uneven road surfaces and adjusts for comfort and smoothness while maintaining excellent ride control.

STREETWISE

FULL-SPEED FORWARD COLLISION WARNING WITH ACTIVE BRAKING⁵

This system uses radar sensors to detect when you may be approaching another vehicle too rapidly. It readies the brakes and alerts you with visual and audible warnings when it senses a potential frontal impact. If you do not respond, the brakes can bring the vehicle to a full stop. Available.

LANESENSE[®] LANE DEPARTURE WARNING WITH LANE KEEP ASSIST⁶

Tracks the vehicle's lane position via a mounted camera, alerting the driver with a visual warning if the vehicle is drifting outside the marked lane. Also provides corrective steering input to encourage the driver to keep within lane boundaries. Available.

BLIND SPOT MONITORING⁷ AND REAR CROSS-PATH DETECTION SYSTEMS⁸

These features use sensors to constantly monitor the space between you and other vehicles, assisting you when changing lanes. They alert you to traffic in your vehicle's blind-spot zones with an illuminated icon in the corresponding exterior mirror. In parking lot situations, they warn drivers who are backing out of parking spaces with visual and audible alerts of lateral traffic. Available.

PARKSENSE® REAR PARK ASSIST SYSTEM⁹

When the vehicle is in Reverse, this system uses sensors to provide audible and visual warnings to help detect nearby objects in the rear pathway. Assists with maneuvering in tight spaces at parking speeds. Available.

PARKSENSE FRONT PARK ASSIST SYSTEM⁹

This system alerts the driver with audible and visual warnings when objects come in close proximity to the front of the vehicle. Available.

PARKVIEW® REAR BACK-UP CAMERA⁸

Provides a wide-angle view with dynamic grid lines on a color touchscreen, aiding the driver when the vehicle is in Reverse. Standard.

HILL START ASSIST Maintains brake pressure when the driver lifts the foot off the brake during uphill stop/start moments, helping to prevent rollback and smoothing out starts. Standard.

ELECTRONIC STABILITY CONTROL (ESC)³

This feature assists the driver in maintaining control of the vehicle during extreme steering maneuvers. Standard.

GOES THE DISTANCE

Adaptive Cruise Control¹⁰ automatically adjusts highway cruising speed to maintain a preset distance between you and the vehicle ahead. Available.

FIAT® 500X: A VERSATILE PLAYROOM

FIAT® 500X boasts an ingenious layout that is the very definition of accommodating. You'll find a fold-forward front-passenger seat, 60/40 split-folding rear seats, a large rear cargo area and available height-adjustable rear cargo floor. It's the kind of shape-shifting that encourages you to take advantage of life's most spontaneous moments.

A photograph of a car's interior from the passenger side, looking towards the driver's seat. The focus is on the roof area, which features a large, dual-pane power sunroof. The front pane is a sliding glass panel that is currently open, revealing a clear blue sky. The sunroof is framed by a light-colored interior trim. Below the sunroof, the rearview mirror is visible, mounted on the windshield. The heads of two black leather seats are visible in the foreground. The overall lighting is bright, suggesting a sunny day.
