

03 CROWN VICTORIA

no boundaries

INTRODUCTION

ALL-NEW FRONT SUSPENSION

SPECIFICATIONS

Crown Victoria LX shown in Spruce Green Metallic.

Today, it's rare to find "V8," "full-size" and "agile" in the same sentence, much less in the same luxurious car.

There are indications, however, that it is here before you.

Consider for a moment the rear-wheel-drive Crown Victoria's proven V8 power. And then, think: Never one to skimp on stretch-out comfort, Crown Victoria is a most accommodating host that understands completely the importance of 6-passenger spaciousness and user-friendly nuances. And agility? The new Crown Victoria answers with new front suspension and rack-and-pinion steering systems. In fact, the new Crown Victoria's performance and control are now so impressive you might be tempted to believe it's as nimble as some smaller cars. And you'd be right.

Crown Victoria LX shown in optional Medium Parchment Leather trim.

Crown Victoria LX shown in Silver Frost Metallic.

Can a newly designed suspension truly help you enjoy a worry-free scenic drive one day and handle the uncertainty of wet pavement the next?

Yes. With uncanny ability, Crown Victoria's new computer-designed suspension takes on that exact challenge. The all-new front suspension ① is combined with world-class monotube shocks and improvements in the rear suspension ② to help smooth imperfections in the road, while its speed-sensitive variable-assist power rack-and-pinion steering system ③ delivers precise control. Add to that new state-of-the-art hydroformed frame sections with a machined aluminum crossmember ④ and suddenly a supple, quiet and confident ride is much more responsive to your driving wishes. Rain or shine.

FEATURES/MODELS

STANDARD FEATURES

Safety/Security
