V6 305 hp and an EPA-estimated rating of 31 mpg hwy.¹ Mustang V6 is the first car in its class to take you there. GO

Hard and fast. Every Mustang features AdvanceTrac® electronic stability control to help turn horsepower into forward motion.¹ For regular street use, you can leave the system fully engaged. For track-style driving, select the Sport Mode.² For even more driver control, you can turn traction control off and disable AdvanceTrac completely.

TURN

Like a pro. Our team of expert drivers conducted extensive suspension testing at racetracks around the country during model development. Components were carefully selected and dialed-in for each model. The result: Every Mustang in the stable delivers a balance of handling, steering and cornering ability you'll have to experience to believe.

STOP

On a dime. For optimal braking performance, an Anti-Lock Brake System (ABS) with vented 4-wheel discs comes standard. V6 and GT each get unique brakes and rotors. The Brembo™ Brake Package steps it up with 14" vented front rotors and 4-piston calipers. Shelby® GT500® gets Brembo 15" front rotors and 6-piston calipers for extra bite.

¹Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions.
