## Embrace curves and devour straightaways.

Ford Taurus does. Our engineers tuned the suspension calibration of each Taurus model to deliver an engaging driving experience.

**Stay poised through the corners**, even when accelerating, with standard Torque Vectoring Control.<sup>1</sup> The system applies slight braking force to the inside front wheel as needed to help more torque reach the road and keep Taurus firmly planted.

**Keep on track through sharp turns** with standard Curve Control.<sup>1</sup> When it senses you're taking a curve too quickly, the system can slow the vehicle by as much as 10 mph in about a second to help maintain control. All-wheel drive (AWD)<sup>2</sup> balances torque between the front and rear wheels to enhance handling and maximize traction. Also equipped with AdvanceTrac<sup>®</sup> electronic stability control and vented front rotors (all rotors are vented for SHO), the 2016 Taurus is engineered for maximum agility.

**Taurus has an EPA-estimated rating of 29 hwy mpg<sup>3</sup>** with the 2.0L EcoBoost<sup>®</sup> engine.<sup>2</sup> This turbocharged, direct-injection powerplant supplies immediate straight-line acceleration, and is teamed with a 6-speed SelectShift<sup>®</sup> automatic transmission for impressive highway fuel efficiency. The 3.5L Ti-VCT V6 engine features twin independent variable camshaft timing, allowing for a robust 288 hp while also contributing to efficiency.<sup>4</sup>

<sup>1</sup>Available feature. Driving while distracted can result in loss of vehicle control. Only use SYNC/other devices, even with voice commands, when it is safe to do so. Some features may be locked out while the vehicle is in gear. Not all features are compatible with all phones. Message and data rates may apply. <sup>2</sup>SYNC AppLink is available on select models and compatible with select smartphone platforms. Commands may vary by phone and AppLink software. <sup>3</sup>The vehicle's electrical system (including the battery), the wireless service provider's signal and a connected mobile phone must all be available and operating for 911 Assist to function properly. These systems may become damaged in a crash. The paired mobile phone must be connected to SYNC, and the 911 Assist feature enabled, in order for 911 to be dialed. When the feature is ON, 911 Assist uses your paired and connected mobile phone to assist occupants to contact emergency services by dialing 911 if your airbag deploys or, on certain vehicles, if the emergency fuel pump shut-off is activated. Aftermarket on-board diagnostic devices may interfere with various vehicle systems including Vehicle Health Report and 911 Assist. To avoid interference, remove the device or contact the device maker for more information on compatibility. <sup>4</sup>Available feature. <sup>5</sup>You must have a Bluetooth-enabled phone paired to your SYNC system. <sup>6</sup>Optional Navigation System map updates cannot be received via Wi-Fi and require a separate update.

## Adapt to your surroundings.

Smart technology powers Taurus. Using ultrasonic sensors and radar, driver-assist technologies<sup>1</sup> can help you parallel park, avoid collisions and more.

**Make parallel parking easier** with active park assist.<sup>1</sup> This system not only helps you find a spot, it actually steers the vehicle into place while you control the gear shifter, and brake and accelerator pedals.

**Maintain your lane** with help from our Lane-Keeping System.<sup>1,2</sup> It can detect lane markings with a forward-facing camera and send vibration pulses to the steering wheel. If needed, it can apply steering torque to prompt you to steer back toward center.

**Stay alert to traffic detected in blind spots** as you drive forward, or traffic nearing either side of the vehicle as you slowly back up, thanks to BLIS® (Blind Spot Information System) with cross-traffic alert.<sup>1</sup> It helps warn you using lights embedded in the sideview mirrors.<sup>3</sup>

**Get a heads-up** from adaptive cruise control and collision warning with brake support.<sup>1</sup> This system helps maintain your choice of 4 preset gaps from the vehicle in front of you and can alert you to a potential collision. If one is detected, it flashes a warning on the windshield, sounds an alarm, and preps the braking system to help.

<sup>1</sup>Available feature. Driver-assist features are supplemental and do not replace the driver's attention, judgment and need to control the vehicle.

<sup>2</sup>Lane-Keeping System does not control steering. <sup>3</sup>BLIS replaces standard integrated blind spot mirrors.
