

2003 Honda

ACCORD COUPE

**BENEATH THE POLISH IT HAS
THE SOUL OF A RACER**

Performance is part of Honda's DNA. It's who we are. And we have a big wall of Formula One and CART trophies to prove it. The all-new Accord Coupe is the latest beneficiary of that accumulated wisdom. It has the racy looks, power and handling response you'd expect from a car with close family members in the racing world. Luckily, performance fans don't need an all-access pass to take a new Accord Coupe home.

The new Accord Coupe has a **purity of design** often associated with purpose-built craft like jet fighters or space shuttles. As such, it's perfect for its habitat—the world of asphalt. The 3.0-liter V-6 engine for '03 now produces an impressive **240 hp**, while Accord's new 2.4-liter 4-cylinder yields 160 hp. There's an entirely new 5-speed automatic transmission, and the EX V-6 is now available with a **close-ratio 6-speed manual** gearbox.¹ And the Accord takes as well to the test track as it does the roads. For 16 of the past 20 years, it's been named by *Car and Driver* to their “**10 Best Cars**” list.

Accord EX V-6 6-speed Coupe¹ shown in Satin Silver Metallic.

Accord LX Coupe

- 160-hp, 2.4-liter, i-VTEC® 4-cylinder engine
- 4-wheel double wishbone suspension
- 5-speed manual transmission
- Available 5-speed automatic
- AM/FM/CD audio system with 6 speakers
- Air conditioning with air-filtration system

Accord EX Coupe

Adds to or replaces LX features:

- Power moonroof with tilt feature
- AM/FM/6-disc in-dash CD changer audio system
- 16-inch alloy wheels
- Available leather-trimmed interior

Accord LX V-6 Coupe

- 240-hp, 3.0-liter VTEC® V-6 engine
- 5-speed automatic transmission
- Front side airbags
- Traction Control System (TCS)
- Driver's seat with 8-way power adjustment
- Remote entry system

Accord EX V-6 Coupe

Adds to or replaces LX V-6 features:

- Leather-trimmed interior w/heated front seats
- Power moonroof with tilt feature
- Dual-zone automatic climate control
- 16-inch alloy wheels
- Side curtain airbags

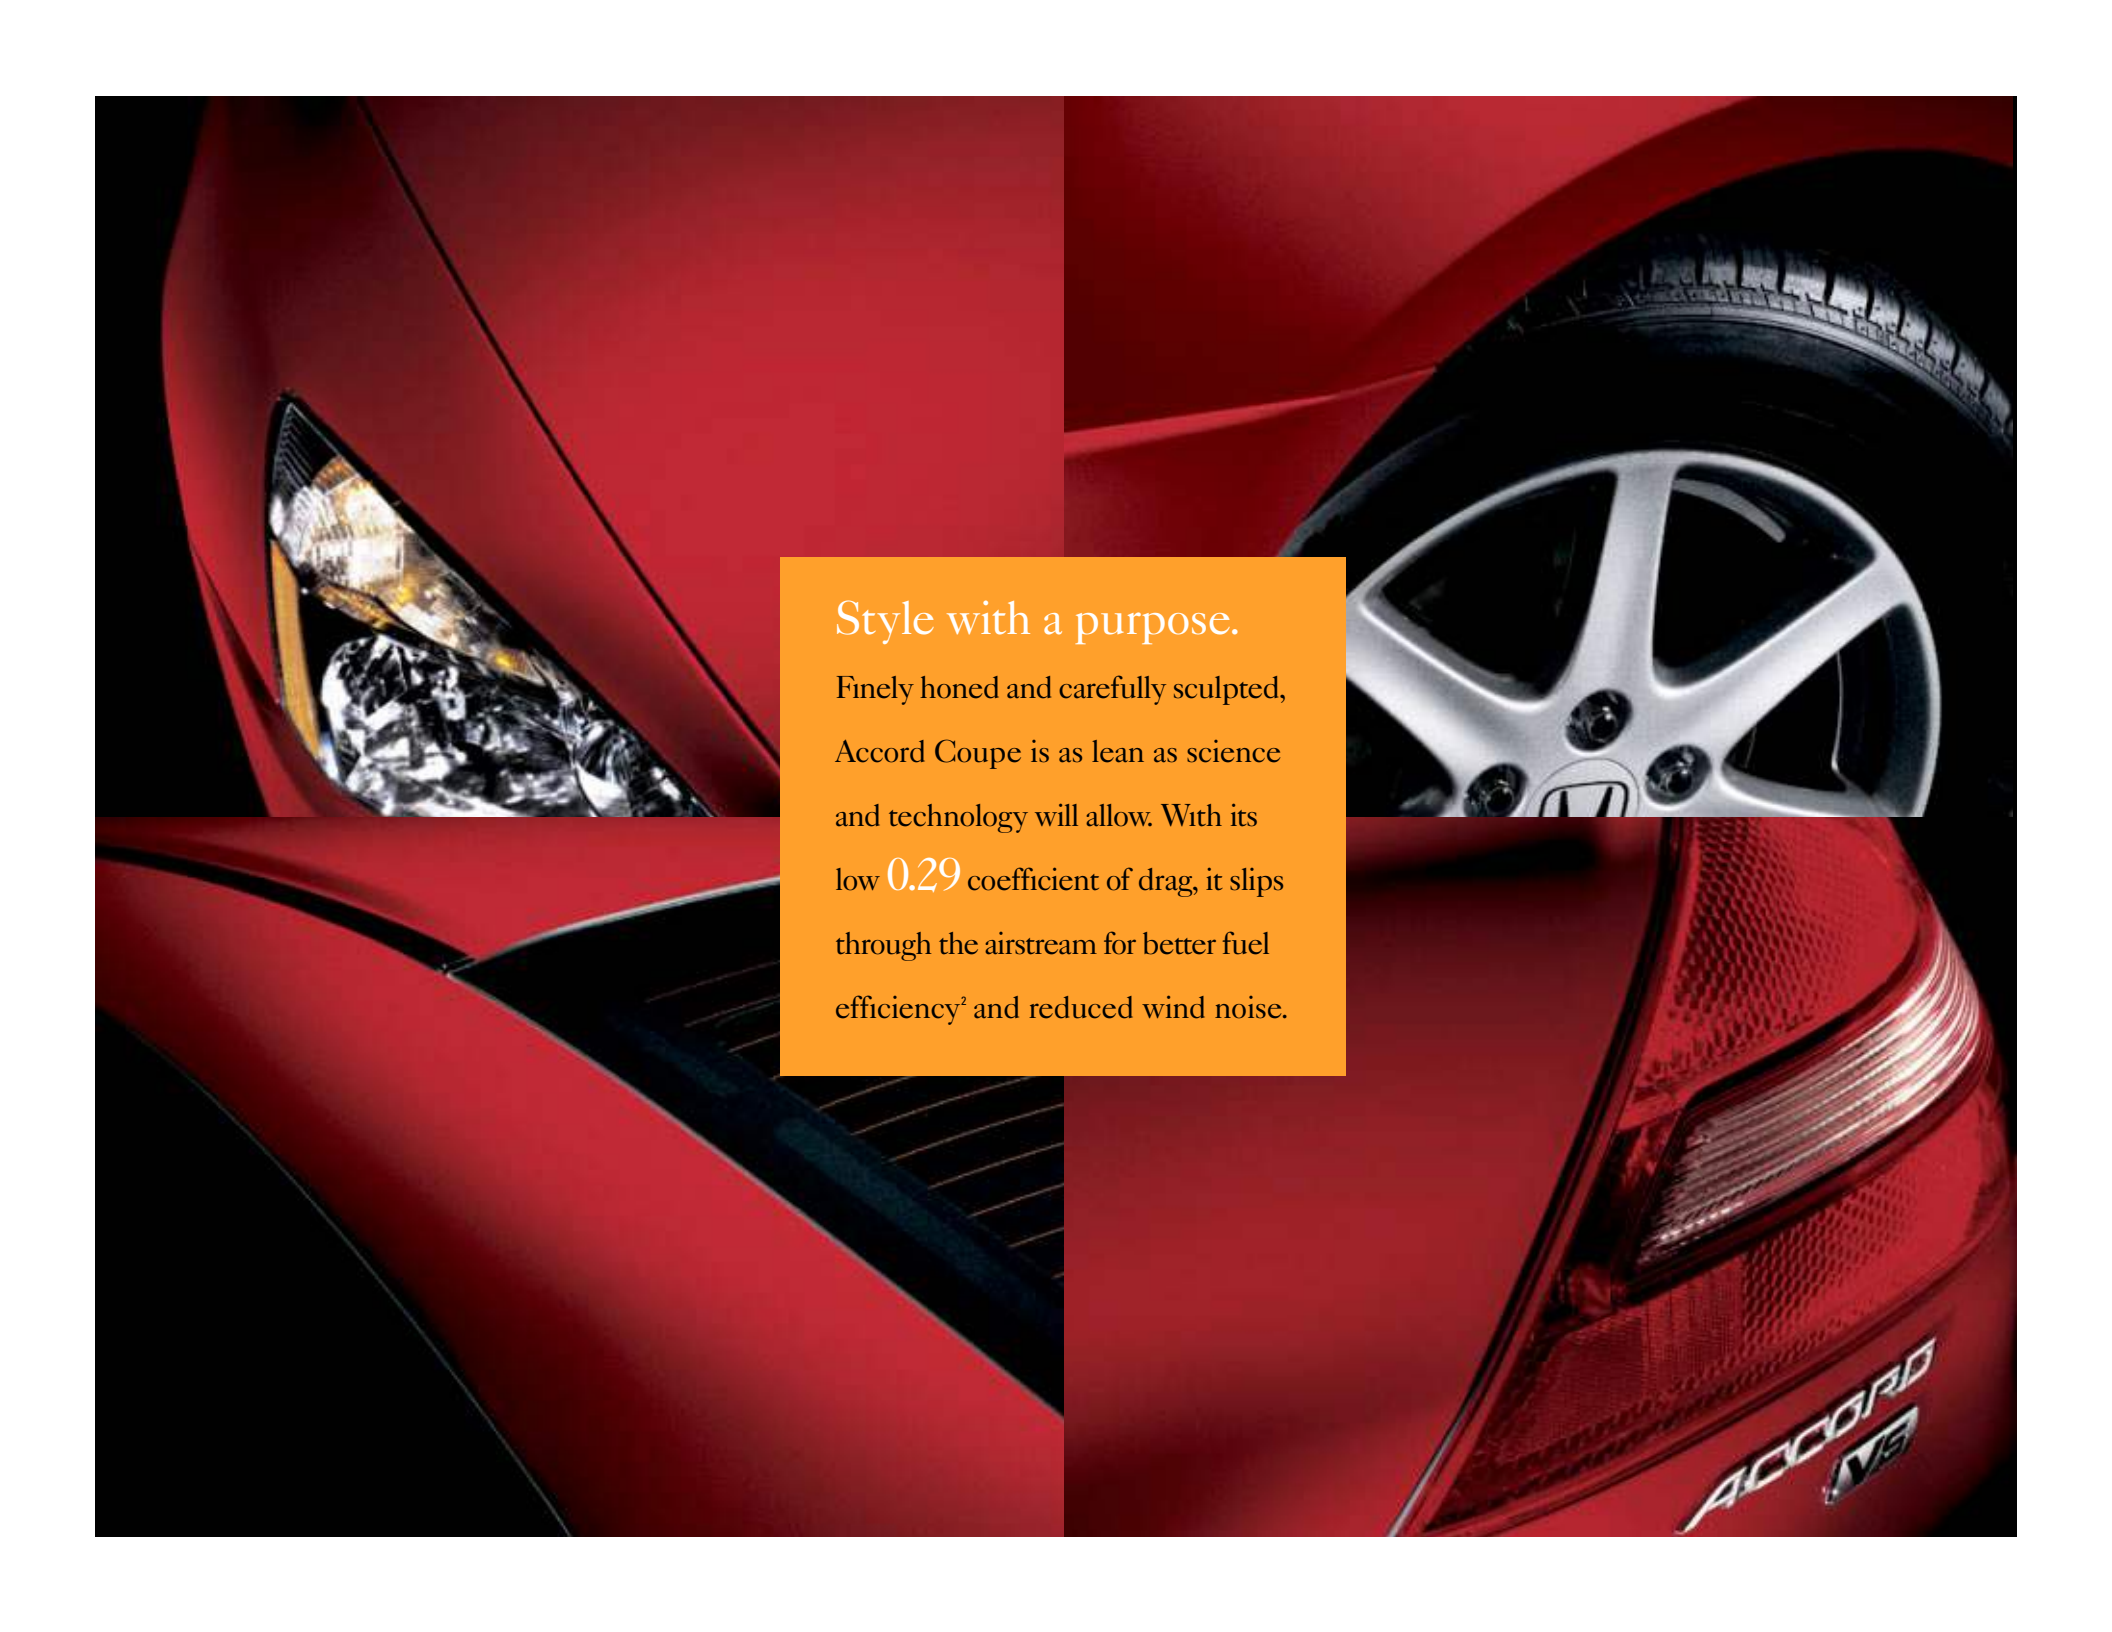

Accord EX V-6 6-Speed Coupe¹

Adds to or replaces EX V-6 features:

- Close-ratio 6-speed manual transmission
- Perforated leather-trimmed interior
- 17-inch alloy wheels
- Front shock tower brace
- Sport-tuned suspension

Accord EX V-6 Coupe shown in San Marino Red.

Style with a purpose.

Finely honed and carefully sculpted, Accord Coupe is as lean as science and technology will allow. With its low **0.29** coefficient of drag, it slips through the airstream for better fuel efficiency² and reduced wind noise.

Accord EX Coupe shown in San Marino Red.

BE CAREFUL WHERE YOU POINT IT

Accord EX V-6 6-speed Coupe shown in Satin Silver Metallic.

Balanced power. Accord's 160-hp, 2.4-liter 4-cylinder engine features a **balance shaft system**. This clever innovation cancels out roughness and enhances smooth revving, especially at higher engine speeds. To help ensure long-term durability, Accord engines all come with a **forged-steel crankshaft**.

PERFORMANCE IS ABOUT MORE THAN JUST SPEED. In over four decades of racing, we've learned there's more to winning than simply going fast. We've found that handling, dependability and even driver comfort are important as well. And Honda cars are direct beneficiaries of that **racing heritage**. Accord Coupe's 2.4-liter and 3.0-liter engines, for instance, offer more than just high power output for inspiring acceleration. They also provide enviable **durability and reliability**. Add the outstanding efficiency born of our innovative engineering, and you'll be doing a victory lap on every drive.

Breathe deeply. To enable the 4-cylinder and V-6 engines to inhale more air and fuel, every Accord powerplant comes equipped with **4-valve-per-cylinder heads**. When combined with tuned induction systems and VTEC, the 4-valve arrangement helps produce greater low-speed torque for quick response, as well as improved high-end horsepower for exhilarating acceleration through the gears.

Vary lift, boost power. Engineered to enhance low-end torque and high-end power, **variable valve timing and lift electronic control (VTEC)** can be found in both Accord Coupe engines. The 2.4-liter i-VTEC engine is further refined with a variable timing control (VTC) system for even greater precision.

Know your enemy. Weight is the enemy of performance. So every Accord Coupe uses **all-aluminum engine blocks, cylinder heads and pistons**. And complementing the Accord's responsiveness is the exceptional durability underscored by its remarkably long tune-up intervals—105,000 miles for the V-6, and 110,000 miles for the 4-cylinder.*

*Does not apply to fluid and filter changes.
See owner's manual for details.

Choose all six. Some people think that the only reason we offer the available **6-speed manual gearbox¹** to EX V-6 drivers is to give enthusiasts an excuse to use the slick shifter. That's only partially correct. The other reason is to provide a broader range of gear ratios to keep the revs in the middle of the powerband. But if you shift just for fun, we understand.

It's got the gear. The Accord Coupe 4-cylinder models feature a quick-shifting 5-speed manual transmission. Available is a silky-smooth **5-speed automatic transmission** that comes standard on V-6 models. This electronically controlled gearbox provides excellent acceleration as well as enhanced fuel economy;² thanks in large part to its myriad of gear ratios.

Accord EX Coupe shown in Sapphire Blue Pearl.

SPEED-READING THE PAVEMENT. The Accord Coupe's racing-inspired suspension feels like it's already read every road atlas. With its **4-wheel double wishbone** design, progressive-valve shocks and stabilizer bars front and rear, the suspension isn't just precise, agile and surefooted, it's also comfortable for long-distance touring. Even an ocean-to-ocean trip will be pleasurable, thanks to

the isolated subframe to block out noise and the new engine mounting system to reduce vibration. The 6-speed manual model has a standard front shock tower bar for greater precision. Rounding out handling stability and safety, Accord Coupe features an **anti-lock braking system** (ABS) on every model. While EX and V-6 models have an Electronic Brake Distribution system.

Accord EX V-6 Coupe interior shown in Black Leather with available Honda Satellite-Linked Navigation System.^{TM3}

YOU'RE FREE TO BE CONTROLLING. The Accord Coupe's cockpit is a control center, the nexus of every input and output necessary to keep the driver in complete charge. You'll find the intimacy of a sports car coupled with ample leg- and headroom and **plenty of space** for the things you need for everyday living. Like the remote entry keyfob that's integrated right into the ignition key itself. This system remotely unlocks the doors and can lower the

windows even before you reach the vehicle. This sense of control extends to every feature the driver touches. It's in the **ergonomic contours** of the steering wheel, the short reach to the shifter and the clearly visible and easy-to-read instruments. Other standards include power windows, mirrors and door locks, and a steering wheel that tilts and telescopes so it's exactly where you want it. You could call it custom-fitted. We say driver-focused.

A high-angle, close-up photograph of the front interior of a car. The focus is on the black leather-upholstered driver's seat, which features horizontal stitching and a small 'HONDA' logo on the side. The passenger seat is also visible. In the background, the center console with a gear shifter and handbrake, and the dashboard with a navigation screen are partially visible. The lighting is dramatic, highlighting the texture of the leather.

IT STARTS PERFORMING
BEFORE YOU EVEN TURN THE KEY

GRAB A SEAT. The Accord Coupe's interior is part of the performance package. The seats are deeply bolstered so you stay put during spirited driving, and the wheel is thick and padded. Care for luxury with your performance? The standard leather upholstery on EX V-6 models (available on EX) keeps you smiling while you pick off corners.

Accord EX V-6 6-speed Coupe¹ interior shown in Black Leather with available Honda Satellite-Linked Navigation System.³

IT'S A TOTAL EXPERIENCE. The Accord Coupe driver doesn't have to live on performance and handling alone. The **dual-zone climate control** on the EX with leather option and EX V-6 models will keep the driver and front passenger comfortable, even if they have different ideas about the ideal temperature. Progressive self-illuminating gauges activate when you open the door, brighten when you insert the ignition key and come to full illumination when you turn the key. There's also the standard AM/FM audio system with **CD player** and 6 speakers that everyone can appreciate, no matter where they're sitting. New cone material improves speaker sound and durability. And a 6-disc in-dash CD changer on all EX and V-6 models will keep you humming for hours on end.

Versatile console. The standard center console has a coin holder and a place for your cell phone† plus a **12V outlet** to help keep the phone charged. There's also ample storage with slots that can store 12 CDs, and a **sliding armrest** for comfort.

†Drive responsibly. State laws prohibit distracted driving.

TRAVEL BY SATELLITE. The intelligent new DVD-based Honda Satellite-Linked Navigation System³ (available in most EX models) is a technological marvel. It can map routes in just a few seconds, offers clear visual displays and has loads of data in its 8.0-gigabyte **DVD database**. It can guide you to just about anywhere in the continental U.S.* Plus, the system contains over **7,000,000 points of interest** such as airports, service stations, restaurants by cuisine and ATMs.

Step-by-step directions. By using the touch screen to input your destination, the system will direct you with a moving map display as well as clear **voice prompts**. The system's enhanced graphics can provide a simulated three-dimensional view of highway ramps for greater clarity. You can choose to travel the quickest route, or one that avoids highways. If you have to detour due to construction or traffic, the system can quickly plot a new route.

*Only major streets, roads and highways are mapped outside metropolitan areas. See the navigation system owner's manual for the current detailed coverage areas.

The master's voice. The available DVD-based Honda Satellite-Linked Navigation System³ is equipped with **Touch-by-Voice** control. Issue any one of 180 verbal commands and it obeys. Your spoken word can even adjust audio and climate-control settings. Other system features include a trip computer, a calculator and a **calendar** so you won't miss a thing.

ITS STRENGTH AND SMARTS MATCH ITS GOOD LOOKS

WE'RE RIGID ON SAFETY. When trouble is unavoidable, a critical means of defense is a sturdy body structure. To help ensure proper impact protection, Accord Coupe's body is designed using the very latest in finite element modeling and stress analysis software. These systems allow us to create a body with exceptional bending and **torsional rigidity**. They also yielded a passenger compartment that can withstand greater impact forces while helping to protect the occupants. And to make it as strong as possible, significant portions of the chassis are constructed of extremely tough **high-tensile steel**.

Crash test conducted by Honda.

The lab results are in. After computers crunch all the numbers, Honda engineers perform some real-world crunching of sheet metal. This serves to validate the effectiveness of the Accord Coupe's safety engineering. One resounding success of this testing program is the design of the **front and rear crush zones**, which help to absorb impact energy in a controlled manner.

Brakes appreciate good ventilation. The Accord Coupe's very powerful braking system offers impressive stopping ability. Thanks to the internally **ventilated front rotors**, the brakes remain highly resistant to fade. This system is enhanced with a standard anti-lock braking system (ABS) to help retain steering control during hard braking. And the EX and V-6 models feature an Electronic Brake Distribution system for braking stability.

Front airbags (SRS). These **dual-stage, dual-threshold front airbags**^{*} have been designed to deploy in a moderate-to-severe front impact at one of two rates and thresholds based on impact severity and seat-belt use.

^{*}Honda reminds you and your passengers to always buckle up.

Front side airbags. For added protection in a moderate-to-severe lateral impact, a side airbag system is standard on EX and all V-6 models and available on LX models. They team up with the **side-impact door beams**.

Side curtain airbags. Standard on the EX V-6 Coupe models is a side curtain airbag system. In a sufficient lateral impact, they will deploy from above to help provide **additional protection** for window-adjacent occupants.

Sturdy pillars. For enhanced protection in a rollover, the Accord Coupe is designed with sturdy A-, B- and C-pillars. They provide **good all-around visibility**, and yet are strong to help maintain the cabin's occupant space.

For decades, Honda has been a leader and an **innovator** in developing environmentally conscious technology. From the pioneering stratified-charge CVCC engines of the 1970s to our current designs, concern for the Earth has always been a top priority. So it's no surprise that for 2003, every Honda meets or surpasses the federal **LEV** (Low-Emission Vehicle) rules. And that even goes for the truly **inspiring** 240-hp Honda S2000 roadster. Select Accord models meet the tough SULEV (Super-Ultra-Low-Emission Vehicle) standard.⁴ But we don't stop there. Honda is the only automaker who currently has two gas-electric hybrid vehicles on the market in the U.S.
