¹ 240-volt charging time is measured from initial illumination of the low state-of-charge indicator, not from full depletion. ² ZEV (Zero-Emission Vehicle) models as certified by the California Air Resources Board (CARB) and states that have adopted California Zero-Emission Vehicle regulations. ³ 132/105/118 city/highway/combined miles per gallon of gasoline-equivalent (MPGe) rating; 82-mile combined (city/highway) driving range rating (adjusted). Ratings determined by EPA. Your MPGe and range will vary depending on driving conditions, how you drive and maintain your vehicle, battery age/condition, and other factors. For additional information about EPA ratings, visit <http://www.fueleconomy.gov/feg/label/learn-more-electric-label.shtml>. ⁴ For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. Please see your Honda dealer for details. ⁵ The Honda Satellite-Linked Navigation System is standard in the United States, Canada and Puerto Rico.
