

2020 Hyundai

IONIQ

With so many alternatives, which is the best for you?

Just a few years ago, 'going green' required you to limit your choices to small cars that lacked comfort and style. Then, Hyundai changed the rules with Ioniq – a trio of truly compelling alternative fuel vehicles that are every bit as stylish as they are roomy and quiet.

Which is the best for you? For the way you drive, and the way you live? With its hybrid, plug-in hybrid and fully electric powertrains, Ioniq lets you choose the efficiency you want – and the engaging performance you need – for a remarkably fun driving experience. After all, what's more fun than driving past all of those gas stations?

No matter which mode of power you choose, your sense of style is never compromised. Inside and out, the design details of the 2020 Ioniq were refined for a look that's light years ahead of those odd-looking EVs. Outside, an aerodynamic silhouette has been enhanced with a new front grille, restyled wheels and redesigned LED headlights and taillights.

Step inside, and the upscale treatment is even more evident. Check out the stunning new dash and center console design, which includes a new digital instrument cluster display and ultra-modern touch-type climate controls. To take full advantage of standard Apple CarPlay® and Android Auto™ compatibility, the 2020 Ioniq also features an 8" high-resolution touchscreen audio display or an available 10.25" high-resolution navigation display.

Every Ioniq is also available with Blue Link®, our award-winning technology that forms a seamless digital connection between you and your car.¹ Is it any wonder Hyundai has been the automotive brand ranked #1 in customer loyalty for 10 consecutive years² and is among the Top 3 Brands in the J.D. Power 2019 U.S. Initial Quality Study for the second year in a row?³

J.D. POWER

Hyundai is among the Top 3 Brands in the J.D. Power
2019 U.S. Initial Quality Study
2 Years in a Row

¹2020 Hyundai Ioniq includes 3 years of the Blue Link Connected Care, Remote and Guidance (factory-equipped navigation required) packages. All trials require an active Blue Link subscription agreement subject to the Connected Services Terms and Conditions. Three-year term starts from the new vehicle date-of-first-use, is available for new vehicle purchases and leases, and is transferable to subsequent owners subject to the Terms and Conditions. Only use Blue Link and corresponding devices when safe to do so. Cellular and GPS coverage is required. Features, specifications, and fees are subject to change. For more on details and limitations, visit Hyundaiusa.com or your authorized Hyundai dealer. ²Based on 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018 and 2019 Brand Keys Customer Loyalty Engagement Index*. ³Hyundai is among the Top 3 Brands in the J.D. Power 2019 U.S. Initial Quality Study of new vehicle owners' experience with their own vehicle after 90 days of ownership. Visit jdpower.com/awards.

¹Most fuel-efficient non-plug-in car in America claim based on EPA-estimated combined MPG. Comparison excludes plug-in hybrid and electric vehicles. ²Claim based on comparison of Nissan LEAF standard battery specifications on manufacturer website. Up to 170-mile range based on a fully charged battery pack with 38.3 kWh capacity and 133 combined MPGe. Mileage may vary depending on driving conditions, driving habits, the vehicle's condition, the age/condition of the lithium-ion polymer battery, and other factors.

IONIQ Hybrid Limited in Scarlet Red Pearl

Blue has never been more green.

The future isn't some far off place. It's created from the choices each of us make every day. So when Hyundai created Ioniq, we designed it to be the world's first model to offer the choice of three electrified powertrains – hybrid, plug-in hybrid and electric.

Our Blue Drive® technology radically reduces pollution while delivering exceptional driving performance and mileage. Ioniq Hybrid Blue is rated the most fuel-efficient non-plug-in car in America – even eclipsing the Toyota Prius.¹ Ioniq Plug-in Hybrid features an estimated 630-mile total driving range, while the 2020 Ioniq Electric's higher-output battery system eclipses the Nissan LEAF with an estimated 170-mile range (an increase of 46 miles over last year).²

The new Ioniq Electric's upgraded electric motor is more powerful, too, with 134 HP and 218 lb-ft of torque delivering near-instantaneous thrust when accelerating from a stoplight. Every Ioniq includes Drive Mode Select, which features a SPORT Mode that adjusts engine, steering and shifting responsiveness for a more dynamic level of performance.

Speaking of dynamic, Ioniq Electric's 100 kW battery recharges quickly. Using a 7.2 kW charger in DC Fast Charge mode, it can recharge up to 80 percent in just under an hour. Regenerative braking helps extend your driving range – every time you brake, that energy is captured and used to recharge the battery. There's no stopping you now.

IONIQ HYBRID

IONIQ PLUG-IN HYBRID

IONIQ ELECTRIC

Giving The Battery A Brake

Control paddles on Ioniq's steering wheel let you increase the amount of energy captured during regenerative braking, as well as decrease the regenerative braking levels to create a smoother, more natural feel during deceleration and downhill coasting.

Hospitality this sweet is meant to be shared.

If you've been shopping for an economical alternative fuel vehicle, you've probably noticed something missing: Passenger room. That's where the Hyundai Ioniq is different – it doesn't ask you to compromise on space. We gave it more overall interior room than Toyota Prius, Chevrolet Bolt and Nissan LEAF.¹ After all, we imagined that Ioniq's innovative technology and modern design would be things you'd want to share.

Heated front seats,² dual automatic temperature controls and available luxuries like a power sunroof, a wireless charging pad and rear seat air vents reflect a cabin that's literally engineered for comfort and convenience front to back. Sleek piano key controls on the ergonomic center console are punctuated by a new 8" high-resolution touchscreen display that serves as command central for Ioniq's rearview camera, Apple CarPlay® and Android Auto.™ An available 10.25" high-resolution navigation display delivers real-time traffic flow and incident data without requiring a subscription fee.

The peace and quiet you'll enjoy on the road is the result of turbulence-taming features like wheel air curtains, an integrated rear spoiler and, on Ioniq Hybrid, active grille shutters. Ready to fill the silence with your soundtrack? An available 8-speaker Harman Kardon® Premium Audio system includes a center channel, subwoofer and Clari-Fi™ Music Restoration Technology that returns compressed audio files to the rich, full sound of a live performance.

When you test-drive Ioniq, be sure to run your hand across the armrest. That soft touch you feel is the result of an innovative process Hyundai pioneered that creates luxurious interior surfaces from bio-materials like recycled plastics, powdered wood, volcanic stone and sugarcane fibers. How sweet is that?

Power driver seat Integrated Memory System

60/40 split fold-down rear seats

¹ Claim based on comparison of specifications on manufacturer websites. ² Standard on Ioniq Plug-in Hybrid and Ioniq Electric, available on Ioniq Hybrid.

¹ Forward Collision-Avoidance Assist (FCA) with Pedestrian Detection helps detect pedestrians, but not in all conditions. FCA is designed to assist drivers to avoid, or reduce the severity of, collisions with cars that have slowed or stopped in front of them. It is a supplemental assist and does not replace the need for extreme care and attention by the driver. FCA may not stop the vehicle completely and will not avoid all collisions. See Owner's Manual for details. ² Lane Keeping Assist operates above approximately 44 mph and only when the lane markings are clearly visible on the road. It will not work under all circumstances and will not prevent loss of control. It is a supplemental assist, and does not replace the need for extreme care and attention by the driver. See Owner's Manual for details. ³ It is the driver's responsibility to remain alert at all times. Driver Attention Warning is only a warning to inform the driver of a potential lack of attention or drowsiness. It does not detect and provide an alert in every situation. See Owner's Manual for details. ⁴ Blind-Spot Collision-Avoidance Assist (BCA) warns the driver of other cars in the blind-spot region. If BCA detects an unsafe lane change being attempted, it applies braking on the opposite side of the attempted lane change to help avoid a collision. There are limitations to the function, range, detection and clarity of the system. It will not detect all vehicles or objects in the blind spot and may not operate if sensors are obscured in any way. Do not rely exclusively on BCA. BCA is a supplemental system, and it is the driver's responsibility to exercise caution when changing lanes. See Owner's Manual for details. ⁵ Rear Cross-Traffic Collision-Avoidance Assist (RCCA) is designed to notify drivers of approaching cross-traffic behind the vehicle. When another vehicle is detected while your vehicle is backing out of a parking spot, it provides audible and visual display warnings and applies braking if it senses a collision is imminent. RCCA is active when the vehicle is in reverse gear and backing at a speed less than 6 mph. It only engages during the first activation of reverse gear from park and may not detect all vehicles, depending on the size, angle, distance and speed of the other vehicle. Never rely exclusively on RCCA. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual for details. ⁶ Smart Cruise Control with Stop & Go (SCC) is not a collision-avoidance or warning device. SCC is for highway use only and should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. The driver remains responsible for slowing or stopping the vehicle to avoid a collision. SCC initiates a full stop when the traffic ahead stops and reengages if the vehicle ahead moves forward within 3 seconds. See Owner's Manual for details. ⁷ To qualify for a 2019 TOP SAFETY PICK, a vehicle must earn Good ratings in the driver-side small overlap front, moderate overlap front, side, roof strength and head restraint tests, as well as an Acceptable or Good rating in the passenger-side small overlap front test. It also must earn an Advanced or Superior rating for front crash prevention and an Acceptable or Good headlight rating. For details, visit iihs.org. ⁸ Standard and available safety features vary by model and trim level. See your Hyundai dealer or Hyundaiusa.com for details. ⁹ Lane Following Assist (LFA) can help keep the vehicle centered in its lane when the lane markings are clearly visible on the road. LFA will not work under all circumstances and will not prevent loss of control. LFA is a supplemental assist, and does not replace the need for extreme care and attention by the driver. See Owner's Manual for details. ¹⁰ Highway Driving Assist (HDA) is for highway use only and helps keep your vehicle centered in its lane while maintaining a safe distance from the vehicle ahead. Lane markings must be clearly visible on the road. HDA should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. HDA will not work under all circumstances and will not prevent loss of control. Driver remains responsible to slow or stop the vehicle to avoid a collision. See Owner's Manual for details and limitations.

The safety of Hyundai SmartSense is now even smarter.

Ioniq is all about finding smarter ways to get around. Enter Hyundai SmartSense, our comprehensive suite of advanced safety technologies. For 2020, Ioniq features even more of the safety innovations that have become a Hyundai hallmark. Forward Collision-Avoidance Assist,¹ Lane Keeping Assist,² Driver Attention Warning³ and High Beam Assist all come standard on every model. Along with available technologies like Blind-Spot Collision-Avoidance Assist,⁴ Rear Cross-Traffic Collision-Avoidance Assist⁵ and Smart Cruise Control with Stop & Go,⁶ these SmartSense safety systems can help you avoid accidents from all angles – front, side and rear.

Another reassuring fact: 2020 Ioniq models are equipped with more safety innovations than the 2019 Hybrid and Plug-in Hybrid models (built after July 2018) that both earned IIHS Top Safety Pick awards when equipped with available Automatic Emergency Braking and HID headlights.⁷

SmartSense Safety Features⁸

Safety Smarts

When using Smart Cruise Control or Lane Following Assist,⁹ a new feature called Highway Driving Assist automatically helps to keep you centered in your lane and traveling at a safe distance from the car ahead. It also uses GPS data to automatically adjust Ioniq's cruise control for changing speed limits.¹⁰ Road trip, anyone?

¹ Apple CarPlay works with iPhone 5s, iPhone 5c, iPhone 5 and later models running the latest version of iOS 7 and above. Apple is a registered trademark of Apple Inc. Android Auto works with smartphones running on Android 5.0 Lollipop and higher. Android, Android Auto, Google Play and other marks are trademarks of Google Inc. ² Requires Blue Link Remote package and active Blue Link subscription. ³ Requires Blue Link Remote package. Amazon, Alexa and all related logos and motion marks are trademarks of Amazon.com, Inc. or its affiliates. Google Assistant and Google Home are trademarks of Google Inc. ⁴ Requires Blue Link Remote package. For remote charging, vehicle needs to be plugged into a 120V or 240V electrical socket. See Owner's Manual for details. ⁵ Requires Blue Link Guidance package and vehicles equipped with available navigation system. ⁶ Blue Link agents will contact existing emergency service responders. ⁷ Requires Blue Link Connected Care package. ⁸ Not available on Ioniq SE and Blue trim levels. ⁹ Smartphone GPS location must be within a 1-mile radius of the vehicle's location to display searched location.

IONIQ Hybrid Limited in Scarlet Red Pearl

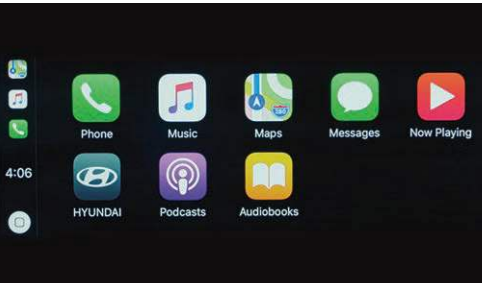

It's time you felt a truly special connection with your car.

We know how connected you are to your smartphone. Which is why every Ioniq model comes with Apple CarPlay® and Android Auto™ standard.¹ You can use Ioniq's large color display or voice commands to access your phone's maps and navigation, contact lists, texts, phone calls, music playlists and more.

With Hyundai's Blue Link® connected car features, your smartphone serves as a remote control for unlocking and starting your Ioniq before walking out the door.² With your Amazon Echo® or Google Home™ device, you can also use voice commands to set your car's cabin temperature from the comfort of your couch or kitchen.³ Remote Charge Management enables Ioniq Electric and Plug-in Hybrid owners to set charge schedules, check the status of a charge, turn on the climate controls and defroster, and more.⁴

Blue Link Guidance lets you search for addresses and points of interest on your smartphone, and download driving directions to your Ioniq's navigation system before slipping behind the wheel.⁵ Then there's Blue Link Connected Care. Like all Blue Link packages, it's complimentary for your first three years and offers exceptional peace of mind. If you're in an accident and the airbags deploy, your Ioniq will automatically call for help in a heartbeat.⁶ You can also push the SOS button on your rearview mirror for emergency assistance 24/7, 365 days a year.⁷

Your Blue Link app can even help law enforcement recover your vehicle if it's ever stolen. Visit hyundaibluelink.com for more information on the complete list of innovative features Blue Link puts at your fingertips.

Apple CarPlay®

Wireless device charging⁸

Automatic Emergency Assistance

Blue Link Connected Care offers 24/7 SOS Emergency Assistance and Automatic Collision Notification that calls for help if you're ever in an accident where the airbags deploy.

On-Demand Diagnostics

Run vehicle diagnostics from your Ioniq's touchscreen, report issues at the press of a button, and receive Monthly Vehicle Health Reports or maintenance reminders by email.

Vehicle Charging Dashboard

Find charging stations, control your Ioniq Electric or Plug-in Hybrid's charging remotely and schedule charging times at cheaper off-peak hours.⁴

Service Link

Conveniently schedule your vehicle for service from the driver's seat of your Ioniq or MyHyundai smartphone app.

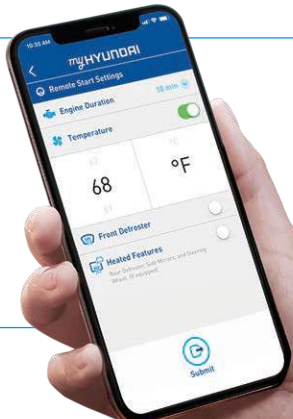

Car Finder

Our Car Finder smartphone app feature helps you navigate through crowded parking lots back to your Hyundai.⁹

Remote Controls

Use your smartphone, home assistant or wearable device to remotely start your Ioniq, unlock the doors, set the cabin temperature and more.
