

2023

SANTA CRUZ

The perfect partner for all you do.

There's nothing quite like Hyundai Santa Cruz. It's part people hauler, part truck – and totally game for your next adventure. Santa Cruz blends the comforts of a 4-door crossover vehicle with the cargo capacity of an open bed. Filled with functional innovations and available with potent turbocharged power, the 2023 Santa Cruz is ready to work and play as hard as you do.

It's big enough for your friends, family or cargo – but compact enough to fit into a garage or parallel parking space. And nimble enough to use its available HTRAC All Wheel Drive to snag a secluded campsite. Santa Cruz is also flush with technologies that keep you connected to your world, no matter where you roam. The abundance of innovations extends to advanced safety and driver-assist features that earned the 2022 Santa Cruz equipped with LED headlights a *2022 IIHS TOP SAFETY PICK* rating.¹

When it comes to style, Santa Cruz is anything but utilitarian. Check out the sophisticated effect of the LED Daytime Running Lights hidden within the parametric jewels of its grille. And the way its wide stance and available 20" alloy wheels project a bold attitude. See those horizontal T-shaped rear LED taillights? Embossed into their lamps are the words "Designed in California" – our tribute to a design group that saw the need for a new kind of utility vehicle.

Built at our U.S. plant in Alabama, Santa Cruz is one more reason why people who buy a Hyundai are likely to buy another. For 13 years in a row, Hyundai has ranked #1 in Customer Loyalty according to the global brand research consultancy Brand Keys.² A perfect partnership, indeed.

¹To qualify for 2022 TOP SAFETY PICK, a vehicle must earn good ratings in the driver-side and passenger-side small overlap front, moderate overlap front, side, roof strength and head restraint tests. It also must earn an advanced or superior rating for vehicle-to-vehicle and vehicle-to-pedestrian front crash prevention and an acceptable or good headlight rating. For details visit www.iihs.org. ²Based on Brand Keys 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021 and 2022 Customer Loyalty Engagement Index*.

Play serious pickup games.

Optional features shown

Combine a direct-injection 2.5L engine that delivers 191 horsepower with a smooth-shifting 8-speed automatic transmission, and the result is gratifying – quick acceleration coupled with excellent fuel economy. Want more power underfoot? Santa Cruz offers a turbocharged 281-horsepower engine with 311 lb-ft of torque and an 8-speed Wet Dual Clutch Transmission with paddle shifters. Together with the availability of HTRAC All Wheel Drive, the adventure starts where the road ends.

A tight turning radius makes Santa Cruz an urban warrior that's nimble in congested traffic and easy to park once you reach your destination. Got a load to haul? Self-leveling rear shocks give Santa Cruz the stability to carry heavy cargo in its bed. Got toys to tow? The 2.5L 4-cylinder engine is tow-rated at 3,500 pounds, while Turbo AWD Santa Cruz models boast a 5,000-pound towing capacity.¹

¹Maximum towing capacity with trailer brakes. ²Rear Cross-Traffic Collision-Avoidance Assist (RCCA) is designed to notify drivers of approaching cross-traffic behind their vehicle. When another vehicle is detected while your car is backing out of a parking spot, it provides audible and visual display warnings and applies braking if it senses a collision is imminent. RCCA is active when your car is in reverse gear and backing at a speed of less than 6 mph. It only engages during the first activation of reverse gear from park and may not detect all vehicles. Never rely exclusively on RCCA. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual for details and limitations. ³The Surround View Monitor (SVM) is a parking support system. SVM cannot completely eliminate blind spots, may not detect every object and does not warn of moving objects. Always check your surroundings before moving your vehicle. See Owner's Manual for details and limitations. ⁴Blind-Spot Collision-Avoidance Assist (BCA) warns the driver of other cars in the blind-spot region. If BCA detects an unsafe lane change being attempted, it applies braking on the opposite side of the attempted lane change to help avoid a collision. There are limitations to the function, range, detection and clarity of the system. It will not detect all vehicles or objects in the blind spot and may not operate if sensors are obscured. Do not rely exclusively on BCA. BCA is a supplemental system. It is the driver's responsibility to exercise caution when changing lanes. See Owner's Manual for details and limitations. ⁵The Blind-Spot View Monitor (BVM) assists the driver in changing lanes by providing a live view of the blind spots on either side of the vehicle and sounding an audible alert if another vehicle is detected. The turn signal must be activated, and other system limitations apply. Do not rely exclusively on BVM. It is the driver's responsibility to be aware of the surroundings and ensure it is clear before changing lanes or directions. See Owner's Manual for details and limitations. ⁶Highway Driving Assist (HDA) is for highway use only and helps keep your car centered in its lane while maintaining a safe distance from the vehicle ahead. Lane markings must be clearly visible on the road. HDA should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. HDA will not work under all circumstances and will not prevent loss of control. Driver remains responsible to slow or stop the car to avoid a collision. See Owner's Manual for details and limitations. ⁷Navigation-based Smart Cruise Control (NSCC) is not a collision-avoidance or warning device. NSCC can help adjust the vehicle's speed based on posted speed limits and upcoming curves in the road. NSCC is limited by the information in the vehicle's navigation system, and it cannot react to recently changed speed limits, construction zones and changes in road conditions not covered by navigation data. NSCC is for highway use only and should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. Driver remains responsible to slow or stop the vehicle to avoid a collision. NSCC initiates a full stop when the traffic ahead stops and reengages if the vehicle ahead moves forward within 3 seconds. See Owner's Manual for details and limitations. ⁸To qualify for 2022 TOP SAFETY PICK, a vehicle must earn good ratings in the driver-side and passenger-side small overlap front, moderate overlap front, side, roof strength and head restraint tests. It also must earn an advanced or superior rating for vehicle-to-vehicle and vehicle-to-pedestrian front crash prevention and an acceptable or good headlight rating. For details visit www.iihs.org.

It's always on guard duty.

Your Santa Cruz looks out for your safety in countless ways. Then again, some of the ways *can* be counted. Like the nine standard and four available advanced SmartSense safety features that use cameras, radar sensors and ultrasonic sensors to monitor your surroundings from nearly every angle.

Around town, Rear Cross-Traffic Collision-Avoidance Assist,² a Rear View Monitor with Parking Guidance and an available Surround View Monitor³ help you navigate challenging parking maneuvers. On the highway, Blind-Spot Collision-Avoidance Assist⁴ is enhanced by an available Blind-Spot View Monitor that displays live video in the instrument cluster from either side of your Santa Cruz.⁵

The innovation doesn't stop there. Santa Cruz Limited's Highway Driving Assist helps maintain a safe cruising distance from vehicles in front of you while also helping to keep you centered in your lane.⁶ Intelligent Speed Limit Assist and Navigation-based Smart Cruise Control with Curve Control team up to automatically adjust for changing speed limits and reduce your cruising speed as you approach curves in the road.⁷

SANTA CRUZ Limited in Black Leather

Open for business. And pleasure.

Open the door, any door – Santa Cruz has four – and you’ll step into an interior that is serious about having fun. Santa Cruz’s wraparound dual-cockpit design puts infotainment and connectivity features at your command. Its focal point is a center stack punctuated by an 8” touchscreen with wireless Apple CarPlay® and Android Auto™ smartphone integration.¹

Slip behind the wheel of Santa Cruz Limited, and a wide 10.25” touchscreen display puts control over the Bose® premium audio system at your fingertips. Dynamic Voice Recognition lets you switch SiriusXM channels using voice commands,² or plot your course with a high-resolution navigation system that includes subscription-free traffic flow and incident data.

But what makes Santa Cruz so unique is its cargo bed. The multi-functional rear bed creates exceptional versatility. For tall stuff. Valuable stuff. And dirty stuff. Put the tailgate down, and it becomes an extension of the bed. Stepping into the open bed is easy, thanks to integrated bumper steps wide enough for large boots.

An available lockable tonneau cover helps protect your gear. In the floor of the cargo bed, there’s also a compartment for dry storage. See that drain plug? It lets you fill the compartment with ice and use it as a cooler. An available 115-volt power outlet caters to electric coolers and other portable appliances, too. How cool is that?

Sheet molded composite bed with rail system, adjustable tie-down cleats and LED bed lighting

10.25” digital LCD instrument cluster

Rear seats with under-seat storage

Lockable under-bed storage compartment

Integrated multi-level rear bumper steps

Turns out the key to happiness isn't actually a key. It's an app.

What Hyundai offers to its owners goes beyond our award-winning vehicles. It includes Bluelink,[®] a range of innovative technologies that enable remarkable connectivity between you and your Santa Cruz.¹ With the MyHyundai app, you can use Bluelink to start your Santa Cruz remotely and adjust climate controls from your office or kitchen using your smartphone, Amazon Echo[®] or Google Home[™] virtual assistant.² You can also remotely activate available front seat heating or ventilation, or check to see if you've left a window open.³

Download the available Hyundai Digital Key, and you can use your compatible Android[™] smartphone to unlock the front doors and start the engine.⁴ Digital keys can be assigned to multiple drivers, who can instantly retrieve their own personalized radio presets, instrument cluster display preferences and more.³

Every Santa Cruz comes standard with wired or wireless Apple CarPlay[®] and Android Auto,[™] and you can now connect two phones to the audio system simultaneously via Bluetooth[®] streaming.⁵ Good to know you can easily keep your digital devices powered up, too. A wireless charging pad is available,⁶ and dual front USB charge ports are standard.

Automatic Emergency Assistance

Bluelink Connected Care offers 24/7 SOS Emergency Assistance as well as Automatic Collision Notification that calls for help if you're in an accident where your vehicle's airbags deploy.⁷

On-Demand Diagnostics

Run vehicle diagnostics from your MyHyundai mobile app, report issues at the press of a button and receive maintenance reminders or Monthly Vehicle Health Reports by email.

Driver Profile Management

You can save your navigation searches, radio presets and cluster display preferences to your Bluelink account, and they can be remotely updated and pushed to your Santa Cruz.³

Remote Vehicle Controls

Use your smartphone, smart speaker or wearable device to remotely start your Santa Cruz's engine, unlock the doors, set the temperature of the cabin, and much more.

Destination Send-to-Car

Use your smartphone to find restaurants or points of interest, then send the destination to Santa Cruz's available navigation system for driving directions before you start your journey.⁸

Remote Vehicle Status

Wondering how much fuel is left in your tank? If your Santa Cruz's doors are unlocked? Your MyHyundai app knows the answers to questions like these, and more.

¹Not available on Santa Cruz SE. The 2023 Santa Cruz includes three years of the Bluelink Connected Care, Remote and Guidance (factory-equipped navigation required) packages. All trials require an active Bluelink subscription agreement subject to the Connected Services Terms and Conditions. Three-year term starts from the new vehicle date-of-first-use, is available for new vehicle purchases and leases, and is transferable to subsequent owners subject to the Terms and Conditions. Only use Bluelink and corresponding devices when safe to do so. Cellular and GPS coverage is required. Features, specifications and fees are subject to change. For more on details and limitations, visit HyundaiUSA.com or your authorized Hyundai dealer. ²Requires active Bluelink subscription with Remote package. Amazon, Alexa and all related logos and motion marks are trademarks of Amazon.com, Inc. or its affiliates. Google Assistant and Google Home are trademarks of Google Inc. ³Requires active Bluelink subscription with Remote package. ⁴The Hyundai Near Field Communication Digital Key requires a compatible Android smartphone and appropriately equipped 2023 Santa Cruz. Not all Android devices are compatible. Vehicle must be equipped with a smart key with push button start, wireless device charging and Audio Video Navigation System 5.0 (or newer) or Display Audio 2.0. Lock/unlock functionality works on the front doors only. See your Owner's Manual or visit your local Hyundai dealer for details. ⁵Apple CarPlay is a registered trademark of Apple Inc. Android Auto[™] is compatible with Android[™] phones running Android 5.0 or higher. Android Auto may not be available on all devices and is not available in all countries or regions. Additional apps may be required. Android and Android Auto are trademarks of Google LLC. ⁶Qi wireless charging function is based on smartphone compatibility and/or specific accessory cases. ⁷Bluelink agents will contact existing emergency service providers. ⁸Requires active Bluelink subscription with Guidance package and vehicle equipped with navigation system.
