QX55

Originality in Fullst Force

Originality does not mean standing out. It's tapping into your fullest capacity and expressing it unfiltered. As the original crossover coupe that boldly defines the genre INFINITI created, the QX55 was designed to empower those who prefer to carve their own path. With its daring fastback roofline and sport-inspired style that extends to the interior, the QX55 is a provocative statement. Stay present and purposeful with performance that adapts to you and technologies that can adapt to the traffic around you. Through nights out in the city and early starts on the highway, you can stay connected via INFINITI InTouch® with wireless Apple CarPlay® integration.¹ When the world expects you to conform to the commonplace, recenter and exude "you" in the INFINITI QX55.

Digital Piano Key Taillights

ACCELERATES YOUR DRIVE

The engine on the QX55 adapts to your driving style for performance as unique as your journey. The INFINITI world's first production variable compression turbo engine,² the INFINITI VC-Turbo® continuously transforms for optimal power and efficiency,³ whether you want

to sprint or cruise. Throttle response is sharp, steering quick and the overall experience can be dialed up or down on your whim, thanks to the Drive Mode Selector. Toggle between four different driving modes designed to cater to any driving situation or mood – from laid-back to sport.

PROVOKES A SECOND LOOK

Beyond first impressions from its low, fastback roofline, the sport-inspired details of the aggressive front splitter and angular fog light surrounds are undeniably QX55 – a theme that continues with standard 20" aluminum-alloy wheels to amplify a bold presence. You'll turn as many heads as you leave with signature Digital Piano Key Taillights that are designed so that each defined "key" lights up in a uniform glow.

ProPILOT Assist⁶

ADAPTS TO YOUR JOURNEY

Never let traffic interrupt your rhythm. Standard ProPILOT Assist⁶ is based on some of the same innovations that will make full autonomy possible in the future, easing your commute on the highway. When activated, ProPILOT Assist can automatically react to the flow of vehicles ahead by braking, coming to a complete stop and then accelerating again up to speed. The system can even assist steering to help keep you centered in your lane around gentle curves. Together with a standard suite of advanced technologies – like Predictive Forward Collision Warning,⁷ Rear Cross Traffic Alert⁸ and Blind Spot Intervention,⁹ which helps alert you to drivers in your blindspot area – the QX55 redefines the commute your way.
