Window windows, leather leather incorporating, shockproof reflector. The top is covered with walnut and has a fully lined interior which completely conceals the luggage.

The finest car of its class in the world

The Jaguar XK-140 is a direct descendant of the world-famous XK-120 and is now, more than ever, the yardstick by which the sports cars of the world are measured.

For luxurious appointments, comfort, brilliant performance, for sheer driving delight, the XK-140 is incomparable. It will be the car you'll be eager to drive for a trip for pleasure or a long jaunt over the highways.

Though the XK-140 engine is fierce and powerful when you want it to, the Jaguar's gentle tractability in traffic makes it a pleasure to drive under all conditions. Combine this with the car's superbly balanced suspension and light, precise rack and pinion steering . . . you'll find that driving becomes one of the greatest pleasures you've ever known.

The XK-140 is made in three body styles: the Sports Roadster (illustrated on the cover), the Convertible and the Hard Top Coupe. Overdrive is an optional extra on all three.

Modified cars are available at slight additional cost. This includes the "C" type cylinder head, raising the horse power from 100 to 125; special-crushed steel springs; wire wheels; dual exhaust and fog lamps. Drop-Warner automatic transmission is available on the Coupe and Convertible.

★ ★ ★
Roadster

Sealed body automatically adjusts for heat and cold in all weather. The top is made of metal material with retractable rear light—when folded, it is completely invisible behind seats. Detachable side screens stored in a tray in the front compartment. Interior—leather, incorporating complete dashboard. Front and all trunk lamps, back to include range for golf clubs, etc. Exposed parts in chrome.

The World-famous 3½ litre JAGUAR XK engine

This is the same phenomenal engine that has won Jaguar cars its countless victories in major competition on European and U. S. circuits. Its double overhead camshaft design is the most modern in the world and is capable of powering the XK-120 to speeds over 140 m.p.h. with ease. Yet, its extreme flexibility makes it docile and smooth in stop and go city traffic. The XK engine is built for great reliability and long life.
