PORTFOLIO PACK

XK PORTFOLIO PACK MAKES ITS DEBUT

The new XK Portfolio Pack. Luxury and individuality in a performance car. The exhilaration of effortless power. Sports car performance and precise handling without sacrificing comfort or style. The new XK Portfolio Pack offers the finest materials and premium luxury. Available in two exclusive new interior color combinations. The new XK Portfolio Pack exterior features a selection of six striking colors, including exclusive Celestial Black. Available on XK and XKR and in both Coupe and Convertible bodystyles.

LUXURY AND INDIVIDUALITY

The luxury Grand Tourer. Tailored to the passenger as much as it is the driver. It offers exclusive choices, bespoke materials and unique finishes that are only available on the XK Portfolio Pack.

INNER THOUGHTS

Quality and individuality. Fine materials and contemporary design. A deliberate juxtaposition between tonal combinations outside and inside of the car to create harmony and accentuate the beauty and luxury of the interior. There are two interior color themes, Navy and Truffle, each offering the choice of Shadow Walnut or Dark Figured Aluminum veneers and chosen to evoke a sense of refinement in accord with the XK Portfolio Pack's unique identity. The interior is upholstered in soft grain leathers with a twin-needle contrast stitch. On Coupe models the headlining is available, for the first time on an XK, in either Jet or Canvas colored Poltrona Frau® leather: a modern, high-grade leather renowned for its use on the finest furnishings. This is your personal space.

CRAFTSMANSHIP AND DETAIL

Every interior is crafted with meticulous attention to detail, with components designed to be as rewarding to touch as they are to look at. The steering wheel, for example, is covered with 2.7 square feet of leather and uses approximately 50 feet of thread. The leather rim is stitched together by hand.

TECHNOLOGY AND PRECISION

The aluminum bodyshell is constructed using aerospace technology and advanced laser-guided robotics. The precisely engineered components are joined by self-piercing rivets, then bonded using high-adhesion, heat-cured specialist adhesives. The light, strong and exceptionally rigid monocoque structure that results is fundamental to the car's performance. The acceleration is breathtaking. The handling is agile and precise.

ACTIVE, REACTIVE AND INTELLIGENT

Lightweight aluminum technology, powerful and refined engines and Jaguar's rapid sequential shift system deliver thrilling performance and instant response. An array of intelligent systems, including JaguarDrive Control™, Adaptive Dynamics and Active Differential (XKR only), work together to complement the driver's skills and tailor the driving experience to suit his or her preferences.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO 14040, the international standard for vehicle 'whole life cycle' assessment. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through its driven life time, to final disposal. But that's not all. Every new Jaguar vehicle is designed to be 85% recyclable and reusable, in addition 95% recoverable and reusable with 10% for energy generation.

The XJ and XK's innovative use of lightweight aluminum, which incorporates up to 50% recycled material from the manufacturing process of the body structures, provides considerable performance benefits. This includes improved fuel consumption and less CO₂ emissions associated with lighter structures as well as the dynamic performance inherent in its weight saving design.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste. Already the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is offset. For every tonne of CO₂ emitted in the assembly process, Jaguar invests in carbon reduction projects that reduce an equivalent tonne of CO₂ elsewhere.

Offsetting allows Jaguar to take action now, to reduce its impact on the environment, as part of an integrated carbon management plan. This company plan includes targets to reduce operating CO₂ emissions and waste to landfill by 25% by 2012, water consumption by 10% by 2012 and fleet average exhaust CO₂ emissions by 25% by 2015, based on 2007 levels.

But it doesn't stop there. World class manufacturing facilities certified to ISO 14001 since 1998, transport miles have been cut from delivery routes and new ways are being introduced to produce energy from food waste at our Gaydon site in the UK.

That's Environmental Innovation at Jaguar.
