CJ-5/CJ-7 • Pickup • Cherokee • Wagoneer

Jeep® The Legend Continues

From its proud heritage on the battlefields of World War II to its unprecedented postwar use in taming new territory, the most incredible feature of our original multi-purpose military vehicle and our numerous Jeep vehicle descendants has been their amazing versatility and durability. On the field of duty, the rugged 1/4 Ton predecessor of the Jeep CJ carried men and supplies, mounted weapons, towed trailers and proved its versatility in countless ways. After the war, Jeep vehicles saw action of a different nature and were adapted with special equipment like plows, post hole diggers and trenchers to help build a country on the move. But all the time, that special wartime bond between driver and machine matured and whether owners used their Jeep vehicles for pure work or pure fun, the chemistry of which legends are made was cast.

Jeep vehicles have been at the forefront around the globe when new areas had to be explored — both literally and technologically. Jeep Corporation, a wholly

owned subsidiary of American Motors Corporation, is the most experienced producer of 4-wheel drive vehicles in the world today. And, in a time when energy conservation is one of our nation's most serious concerns, the 1980 Jeep vehicles have once again responded to the challenge. We take pride in the fact that we wrote the book on 4-wheel drive, and for 1980, our newest edition is full of best-sellers. CJ models, Pickup, Cherokee and Wagoneer have all been engineered to improve fuel economy and increase their famous dependability.

Throughout the Jeep line, transmissions are more efficient and lighter weight. Transfer cases are lighter and smoother operating. Free wheeling front hubs are standard on most models. Axle ratios have been improved for highway operation and off-road performance. A new, more efficient driveline design has been employed. A feisty 4-cylinder engine is standard on CJ models. And, we've even improve Quadra-Trac®, our exclusive

full-time 4WD system, by replacing cone clutches with viscous drive for smoother, quieter, more economical operation.

In addition to engineering and performance changes, there have been other improvements and additions in the appearance and convenience area. Excitement abounds for 1980, from the ultimate Wagoneer Limited with its discriminating luxury to the dramatic new Top-Of-The-Line Laredo Package available on Cherokee, Pickup and both CJ-5 and CJ-7 models. Of course, ever-popular models, like the CJ Renegade, Honcho Pickup and Cherokee Chief are back and refined for 1980, too.

All in all, there's never been a more versatile, more efficiently engineered or better looking group of Jeep vehicles for you to choose from. But then, being the acknowledged leader in 4-wheel drive, we at Jeep Corporation have a legend to live up to.

MILITARY MODEL MB (WWII ERA)

WAGONEER LIMITED

CHEROKEE LAREDO, J-10 PICKUP LAREDO, CJ-7 LAREDO

Jeep CJ-5/CJ-7

The 1980 Jeep CJ. Unmistakable styling, legendary durability and unmatched off-road performance. What better way to get into all the excitement and action of 4-wheel drive? And this year the classic Jeep CJ's are packed with more value and economy than ever before. And built into every Jeep CJ is the kind of experience and refinement that after nearly 40 years makes the Jeep CJ the standard by which all others are judged.

For 1980, the CJ's come with a new standard 151 CID (2.5 liter) 4 cylinder engine that's Jeep tough in the tradition of its famous forebearers. Add this

tough new powerplant to our new standard lightweight fully synchronized close ratio 4-speed transmission, standard hydraulically actuated clutch, lighter, tougher chassis and standard free wheeling front hubs, and you'll be able to take on the toughest roads and save on fuel, too!

Select the CJ that best fills your requirements. Both the CJ-5 with its 83.5" wheelbase and the CJ-7 with its 93.5" wheelbase have plenty to offer! The CJ-7 has an optional automatic transmission for a smoother ride under any conditions. Both CJ's come with a full com-

plement of exciting standard features like a roll bar, folding front windshield, front disc brakes and solid state electronic ignition. The CJ-5 can be outfitted with a vinyl or denim soft-top, while CJ-7 offers the same soft tops or a molded hard top. And, new for 1980 is a soft top with steel doors and roll up windows.

Want to dress up your CJ? More options are available than ever before! Bolster your CJ-5 or CJ-7 with a 258 CID 6 cylinder or 304 CID V-8 engine. Plus, a new lighter weight automatic transmission with part-time 4-wheel drive system and free wheeling front hubs is available

on the CJ-7. You can select the fabulous new Laredo on either CJ. It includes specially trimmed high back bucket seats, chrome grille and accents, unique striping, Wrangler radial tires and more. And of course, the popular Renegade and the Golden Eagle appearance/performance packages, are available, too. But no matter how you dress it up outside, underneath it all, you'll still have that rough and ready "go anywhere" Jeep CJ. And after all, you know you always wanted one!

CJ-7 LAREDO (SHOWN WITH CIBIE® DEALER INSTALLED DRIVING LIGHTS)

Jeep Pickup

Presenting the Pickup truck that's anything but conventional — for the person who won't settle for the conventional — Jeep Pickup. Why? Because Jeep Pickup's designed from the ground up for a multitude of uses — on the road or off! It's rugged, durable with the versatility of part-time or the convenience of full-time four-wheel drive. The 1980 Jeep Pickup delivers the right combination of good looks, excellent performance and unsurpassed traction.

For 1980, Jeep Pickup has a new lighter weight, high efficiency drivetrain, free wheeling front hubs, front

stabilizer bar and high density blow molded fuel tank, all aimed at getting you to Jeep country and back with greater ease than ever before. Other standard features include a 258 CID 6 cylinder engine on the J-10, (360 V-8 on J-20), electronic ignition, front disc brakes and double wall box construction. And for 1980, there's a whole truckload of new options available, including power windows and electronic digital clock.

Jeep Pickup for 1980 has more configurations than ever before too. Choose from 118.7" or 130.7" wheelbases, (6200 GVW on J-10 and 6800 to 8400 GVW

on J-20) and a number of appearance/performance combinations. The Custom, Honcho, all new Laredo, and sure-to-be-a-classic Sportside.

The short-wheelbase Sportside is also available in an optional highline version which includes the great Honcho graphics, special wooden cargo box rails and uniquely styled contoured roll bar.

And this year, you've got the choice of part-time 4-wheel drive with either the standard 4-speed manual transmission or automatic transmission. Or select Quadra-Trac® with automatic transmission. Last year we

demonstrated Quadra-Trac® as the best full-time 4-wheel drive system on or off the road, and this year, we've improved it! With redesigned transfer cases, viscous drive and a straight-through driveline design.

No matter how good your Jeep Pickup looks, keep in mind that it's built for tough work. And because it's a Jeep vehicle it's going to work harder and play harder than anything else on or off the road. The 1980 Jeep Pickup. The best just got better!

J-10 HONCHO (SHOWN WITH DEALER INSTALLED CIBIE® DRIVING LIGHTS)

Jeep Cherokee

Jeep Cherokee's a family sized wagon with big advantages — the security, performance and efficiency of part-time or the convenience of full-time four-wheel drive. Cherokee's rugged construction and ample room and comfort for six makes it the perfect transportation for people who use to associate interior room only with larger 2WD station wagons. Get behind the wheel of a Cherokee and you'll be ready for cross-country or cross-town trips regardless of weather or road conditions. Best of all, Cherokee's a Jeep vehicle. And that means reliable family transportation for years to come.

For 1980, Cherokee comes with the kind of features you'd expect from one of the best wagon values on the road. Like a 258-2V Six, close ratio fully synchronized four-speed transmission, free wheeling front hubs and front stabilizer bar — all standard!! And whether you choose the handsome two-door, practical four-door or the sporty wide wheel two-door, you'll be getting great passenger and cargo room plus excellent ground clearance and visibility. And, Cherokee features a new refined drivetrain for smoother operation. There are plenty of ways to dress up Cherokee, too.

Like the optional High-Style "S" trim — the perfect replacement for the conventional family station wagon. For the wide wheel 2-door, in addition to the "S", you can choose the aggressively styled Chief, the eye-catching Golden Eagle or the bold, all new Laredo with subtle striping, chrome accents, Wrangler radial tires, special bucket seats and unique interior trim. And if you want to personalize your Cherokee even more, choose from a long list of unique options like a Moon Roof, air conditioning, and power seats, power windows and power door locks. For additional power requirements,

move up to the optional 360 2V 8-cylinder engine teamed with automatic/part-time 4-wheel drive, or our exclusive full-time Quadra-Trac®, proven the best traction of any automatic 4-wheel drive in 1979.

There's no question that getting behind the wheel of a Jeep Cherokee is one of the best ways to experience the all weather, all-road condition security, sure handling and comfort of 4-wheel drive at its best. And there's never been a better time to be behind the wheel of a Cherokee than right now!

CHEROKEE "S" 4-DOOR

Cherokee Option Packages

- CHEROKEE "S" includes (4) 15 x 7 Chrome Styled Wheels (2-DR. & 4-DR. only), Bodyside and Tailgate Tape Stripe, Flipper Quarter Window (2-DR. & Wide Wheel only), "S" Medallion, Chrome Plated Grille with Gray and Black Accent Paint, (5) 10-15 Tracker A/T OWL Tires on Styled Steel Wheels (Wide Wheel), Print Strip Vinyl Bucket Seats, Driver Folding Seat Back, Engine Turned Instrument Cluster Overlay, New Hi-line Door and Rear Quarter Trim Panels, Color-Keyed Carpeting, Carpeted Wheelhouse Covers, Armrest Overlays with

Brushed Insert, 2 Rear Seat Ash Trays, Instrument Panel Medallion, Sports Steering Wheel, Folding Center Armrest, Passenger Assist Handle.

- CHEROKEE CHIEF includes all of the "S" Features plus; Unique Upper Body Two-tone Paint, lower Body Blackout with "Cherokee Chief" Name, Tailgate Stripe with "Cherokee Chief" Name, Black and Chrome Grille, Color-Keyed Carpeting.
- CHEROKEE GOLDEN EAGLE includes all of the "S" Features plus; Special Tape Stripe Package, Tubular

- Steel Grille Guard, (5) 15 x 8 Styled Wheels-Painted Gold with Black Stripe, Black and Chrome Grille, Bronze Tone Glass (Rear Quarter Windows), "S" Level Interior, Beige Denim Cloth Bucket Seats with Armrest, Carpets, Hood Insulation.
- CHEROKEE LAREDO includes all of the "S" Features plus; Bright Drip Molding, Special Painted Hub Covers, (5) 15 x 8 Chrome Styled Wheels, (5) 10R15 Goodyear Wrangler Radial Tires, Black and Chrome Grille, Chrome Left and Right Remote Exterior Mirrors, Full Carpeting

Floor and Cargo Area up to the Belt, Special Bucket Seats with Folding Seat Backs (Driver & Passenger), Special Door Trim Panels, Door Pull Straps, Leather Wrapped Steering Wheel, Center Armrest, Instrument Panel and Glove Box Striping, Extra Quiet Insulation, Convenience Group, Luggage Rack, Light Group, Bumper Guards, Front Sway Bar, Nerf Strips and Visibility Group.

Jeep Wagoneer

When you want to let them know you've arrived, arrive in the most incredible 4-wheel drive vehicle ever built. Jeep Wagoneer! Whether you're cruising a highway in quiet luxury or exploring backwoods trails, Jeep Wagoneer will take you there and bring you back in unprecedented comfort. Because it's the Ultimate 4-wheel drive vehicle and the only family wagon that offers the traction and security of the exclusive Quadra-Trac® full time 4-wheel drive as standard fare.

Like all Jeep vehicles for 1980, the prestigious Wagoneer has wholly new drivetrain componentry for improved performance and driveability. With a 360 CID 2V 8 cylinder engine coupled with a new smoother, lighter weight automatic transmission, standard power steering and a front stabilizer bar, driving the Wagoneer is better than ever. And you can select the 258 2V Six and part-time 4WD with a 4-speed manual floor shift or automatic transmission and free wheeling front hubs.

And for those who appreciate the absolute finest, select the unparalleled Wagoneer Limited. This elegant replacement for the conventional family wagon has so many standard features, like power windows, power door locks, digital clock, forged aluminum wheels and rich leather accented upholstery in tan or russet that we invite you to drive one to fully appreciate it.

There isn't a 4-wheel drive vehicle in the industry with a higher level of standard trim and functional com-

ponents than the Wagoneer Limited. We're sure that you'll be as proud to own a Wagoneer as we are to build them.

Only Jeep could create a vehicle that's rugged enough to tackle any kind of country and that's as luxurious and distinctive as anything on the road.

Jeep Wagoneer for 1980. The Ultimate 4-wheel drive vehicle is waiting for you now.

rear	GAWR: 3200 lbs.
Brakes	Power disc front (12" rotor); rear drum (11" x 2")
Fuel tank capacity	20.3 gallons (w/skid plate)
4WD system	Part-time with manual free-wheeling front hubs. Available with automatic transmission. Quadra-Trac optional.
Transfer case	2-speed Part-Time standard with 2.6 low range gear reduction
Glass Area	4438 sq. in. (2-dr.); 5142 sq. in. (4-dr.)
Gross vehicle weight	6200 lbs.
Springs, front	5 leaf 215 lbs./in. rate std.
rear	5 leaf 165 lbs./in. rate std.
Steering	Recirculating ball standard 24:1 ratio; variable ratio power steering standard on Wide-wheel, optional other models.

Transmission

Fully synchronized 4-speed manual floor shift standard; column mounted automatic transmission optional

Tires

Five H78-15 black side wall polyester (unbelted) Cruiser 78; L18-15 Town and Country radials for Wide-wheel model. (See tire options, page 22)

Wheels

Five 15 x 6 six-bolt, 5.5" circle standard; 15 x 8 six-bolt, 5.5" circle white painted spoked steel wheels for Wide-wheel model

Cherokee Engine Availability

Engine	Carb.	Comp. Ratio	Bore & Stroke	Avail.
258 CID Six	2-bbl.	8.0:1	3.75" x 3.90"	std.
360 CID V-8	2-bbl.	8.25:1	4.08" x 3.44"	opt.*

* Only engine available for Jeep Cherokees sold in California. Power steering required.

Jeep engines utilize overhead valve configuration, lightweight, compact engine block castings and ambient air intake system for improved engine performance, greater durability and longer life.

4-Wheel Drive Systems

Jeep 4WD Systems

Jeep Corporation offers a full line of 4WD vehicles and a wide range of engine/powertrain combinations to satisfy just about any fun-loving, free-wheeling spirit. From the legendary CJ to the elegant Wagoneer Limited, all Jeep models are designed to bring out the fun in you. With Jeep you can take your 4-wheeling three ways: Exclusive Jeep Quadra-Trac® full-time 4WD system, the new part-time system with lockable free wheeling hubs teamed with a new fully synchronized 4-speed manual transmission or new part-time with optional automatic transmission. Only Jeep offers a full line of 4WD vehicles for a full measure of fun and excitement.

Quadra-Trac® full-time system with automatic transmission. Unsurpassed 4WD traction.

Quadra-Trac® is Jeep's exclusive full-time 4WD system that helps make highway driving uncommonly effortless, and off-road tracking uncannily sure-footed. The system's unique controlled slip third differential located in the transfer case distinguishes it from all other so-called "full time" 4WD systems. If one wheel loses traction Jeep Quadra-Trac's controlled slip differential automatically delivers torque to the axle with the most traction, helping to pull or push you out of trouble.

This controlled slippage process works instantly on any road or surface. The overall result is excellent control, handling, stability and traction at all times — wherever you drive and in all weather. It's the kind of security that's nice to have. Because, sometimes you need 4WD when you least expect it.

For 1980, Quadra-Trac® provides even quieter and smoother operation thanks to a new viscous drive and straight through high efficiency drivetrain design. And, of course, Quadra-Trac® remains completely automatic. You select the driving range you need depending on conditions; four wheel high for normal operation, Low Lock for extra pulling power or Hi Lock for an extra measure of Jeep muscle in sticky situations. And you never have to leave your vehicle to lock wheel hubs.

Quadra-Trac® is standard on Wagoneer models and available for Jeep Cherokee and Pickup.

Jeep part-time system (manual or automatic transmission)
Unparalleled 4WD fun and economy.

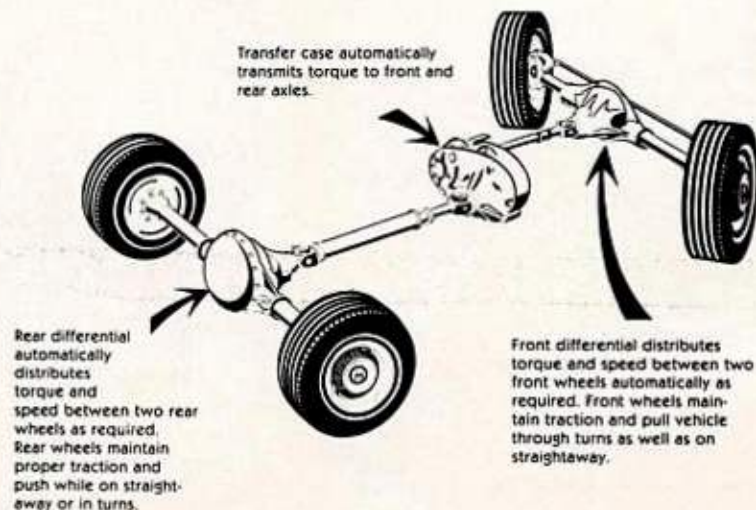

For many purists, Jeep part-time 4WD system with lockable free-wheeling hubs will be the only way to go. Whether they select the new standard 4-speed manual, or optional automatic transmission. Either way is Jeep tough, to be sure, but they're lighter and more efficient than some other 4WD systems.

For highway driving, you simply put the conveniently positioned transfer case shift-lever in the 2-wheel mode and unlock the front hubs. This disengages the front propeller shaft, front differential and front driving axles, eliminating friction and noise and optimizing fuel consumption.

For off-road use, you simply lock the front hubs, place the transfer case shift lever in the 4-wheel mode and you're ready for the rugged, dependable brand of 4WD action that's made Jeep famous for nearly 40 years.

The part-time 4WD system with 4-speed fully synchronized manual transmission is standard on all Jeep models except Wagoneer. (J-20 Pickup has a 4-speed with a creeper first gear as standard). The part-time 4WD system with optional automatic transmission is available on all models except CJ-5.

Quadra-Trac® full-time system with automatic transmission

4-Wheel Drive Activities

Jeep vehicles from American Motors are the most widely recognized sports/utility vehicles in the world. Jeep is also synonymous with "Go Anywhere" capabilities. And that's why you will find Jeep vehicles where others fail to venture.

When the fabled "Darien Gap" — 250 all but impassable steaming, teeming, miles of Central American jungle and swamp — was conquered during the 20,000 mile "Expedicion de las Americas", Jeep vehicles were there.

At the Baja 1000, the Mint 400, the Mexicali 250 and every other sanctioned professional off-road event, Jeep vehicles were there as the choice of many top professional drivers.

At countless organized off-road events, rallies and jamborees (many of them sponsored by member clubs of the United Four Wheel Drive Associations) and conducted in mud, sand, snow, gravel, ice or what have you, Jeep vehicles were there as the favorite of the majority of amateur four-wheeling enthusiasts.

We take such an active role in the world of 4-wheeling for many good reasons: to prove the rugged dependability of Jeep vehicles; to learn how to improve chassis, engine, suspension and 4WD system components so we can make them more efficient and make 4-wheeling safer and more enjoyable; to encourage the responsible use of 4-wheel-drive vehicles by individuals; and to promote positive actions by Four Wheelers in areas of conservation assistance and search and rescue activities.

We at Jeep Corporation will continue to be involved in just about all aspects of 4-wheel drive activities because we want to insure that Jeep Country will remain Jeep Country for future generations of Four Wheelers.

This folder does not constitute an offer or commitment to sell. In order that product improvements may be made at any time, specifications and other data are subject to change without notice. Jeep vehicles meet or exceed all applicable Federal Motor Vehicle Safety Standards at time of manufacture. Some of the Jeep vehicles shown and described in this brochure have optional equipment. In Canada, American Motors (Canada) Limited is a licensed user. ® Reg. TM.

In California, a 151 CID 2-bbl. Four Cylinder engine and 4-speed floor mounted transmission are standard on CJ. An optional 258 CID 2-bbl. Six Cylinder or 304 2-bbl. V-8 engine with 4-speed floor mounted transmission is also available. An automatic transmission and Part-time 4WD is available on CJ-7 models only with either engine. On Cherokee, Wagoneer and Pickup models sold in California the only power train available is a 360 CID 2-bbl. V-8 engine with automatic transmission and Part-time 4WD or Quadra-Trac® Full-time 4WD.
