BORN AS A PURPOSE-BUILT 4x4 FOR THE FRONT LINES OF WWII IN 1941, JEEP® 4x4s SOON TRANSITIONED FROM THE BATTLEFIELDS TO THE FARM FIELDS AND BACKROADS OF AMERICA, WHERE THEY KEPT UP WITH HARD DAILY USE IN INDUSTRY AND RECREATION ALIKE. THROUGH 80 YEARS AND ALL MANNER OF TERRAIN AND WEATHER, A GROWING LINEUP OF JEEP® 4x4s HAS CONSISTENTLY MOVED THE BAR WITH STRONG DRIVETRAINS, INNOVATIVE ENGINEERING AND QUALITY COMPONENTS THAT STAND OUT FROM ALL OTHER 4x4 SUVs.

A white Jeep Wrangler Rubicon Unlimited is shown from a low angle, driving through a rocky canyon. The vehicle is positioned in the lower right quadrant of the frame, angled towards the left. It is navigating a path of large, reddish-brown rocks. Above the vehicle, a large, natural rock arch frames a clear blue sky. The lighting is bright, suggesting a sunny day, and the overall scene conveys a sense of adventure and off-road capability.

proven off-road capability starts with 80 years of innovation

IN 1941, THE JEEP® BRAND OPENED THE DOOR TO AUTHENTIC CAPABILITY BY DEVELOPING THE FIRST 4WD SYSTEM, AND EVER SINCE, IT'S BEEN MOVING THE WORLD FORWARD WITH INDUSTRY-CHANGING ENGINEERING INNOVATIONS THAT GIVE YOU PERMISSION TO GO ANYWHERE, DO ANYTHING.®

Sahara® Unlimited
in Black

COMMAND-TRAC® 4x4 SYSTEM This part-time, shift-on-the-fly system divides torque 50/50 between front and rear axles, shifts smoothly at speeds up to 45 mph and has a 2.72:1 low-range gear ratio. Standard on Sport and Sahara.®

SELEC-TRAC® FULL-TIME 4x4 SYSTEM This proven system, with its active 4WD transfer case, does all the thinking so you can enjoy the drive. It sends torque to the wheels with the most grip, providing continuous, optimum traction for all types of conditions. The Smart Lock feature keeps the system engaged during off-roading or inclement road conditions. Available.

ROCK-TRAC® 4x4 SYSTEM (shown) Rubicon® rides with this extreme 4WD system. Its 4:1 low-gear ratio allows Wrangler Rubicon to crawl at a low speed for greater control and increases the amount of torque available at the wheels. Standard on Rubicon.

ROCK-TRAC FULL-TIME 4x4 SYSTEM This system offers the tried-and-true capability of Rock-Trac® with the added convenience of a full-time, active transfer case that can provide optimal traction over changing road conditions. Available on Rubicon.

the fortitude to get you there

SELEC-SPEED® CONTROL Manages vehicle speeds of 0.6 mph to 5 mph in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake, allowing the driver to focus on steering the vehicle in off-road situations. Available. Included with 8-speed automatic transmission.

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL HSA works to prevent Wrangler from rolling when starting on an uphill gradient. Standard. Hill Descent Control is packaged with the 8-speed automatic transmission, helping Wrangler navigate steep declines at a steady speed. Available.

SELECTABLE TIRE-FILL ALERT When airing down tires for off-road situations, the system will chirp the horn when a pre-selected pressure is reached. When adding air back, it chirps the horn upon reaching the recommended on-road pressure. Available.

WHERE OTHERS TURN BACK, JEEP® WRANGLER IS FORTIFIED WITH THE STRENGTH TO GET UP, OVER AND AROUND THE TOUGHEST CONDITIONS OUT THERE. ADVANCED TECHNOLOGY PLAYS A BIG ROLE, TOO, ENSURING THAT YOU REMAIN ON TRACK. WRANGLER STAYS THE COURSE AND NEVER BACKS DOWN.

OFF-ROAD PAGES Access real-time performance data like suspension travel or keep an eye on your tilt-and-pitch. In-depth vehicle diagnostics, including wheel turn, articulation and transmission temperature, all help to provide an optimized experience. Available.

STEEL BUMPERS Built with ultra-strong steel to take the punishment of the trails. The front bumper can accept a winch, features integrated LED fog lamps and has removable¹ end caps to help maneuver through tight spots. Available on Rubicon® models.

SKID PLATES Every Wrangler gets skid plates for the fuel tank, transfer case and transmission.

TOW HOOKS Every Wrangler gets two up front and one in back. Rubicon model receives painted Red hooks.

NEW — FORWARD-FACING OFF-ROAD TRAILCAM² Mounted within the grille, provides an up-close view of the trail directly in front of your vehicle, helping you navigate over and around obstacles. Available.

locked-in

1. TRU-LOK® DIFFERENTIALS Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4WD traction. An instrument-panel-mounted rocker switch can lock either the rear or both axles. Paired with Rock-Trac® 4WD system on Rubicon® models.

2. OFF-ROAD+ When engaged, it automatically deciphers the type of terrain Jeep® Wrangler is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock crawling. Standard only on Rubicon models.

3. FRONT SWAY BAR DISCONNECT SYSTEM Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 18 mph. Standard only on Rubicon models.
