A PLACE TO RECHARGE

A spacious interior equips you with modern yet rugged design and leading technology. The standard 8.4-inch Uconnect® 4C NAV displays hybrid details, like charge percentage and remaining range, while a dash-mounted indicator shows status during charging sessions.

The 4xe system is paired with the 2.0L I-4 DOHC direct-injection Turbo Plug-In Hybrid Electric Vehicle (PHEV) engine to bring out the best in the already tested and proven Jeep® 4x4 hardware: full-time Selec-Trac® 4WD system standard on Sahara® Unlimited, and Rock-Trac® 4WD system standard on Rubicon® Unlimited. A 17-kWh lithium-ion battery pack, regenerative brake booster and 8-speed PHEV automatic transmission work in concert to send impressive amounts of power and torque to each wheel — maximizing the capability of every component.

YOU'RE IN E-CONTROL

You choose how and when to optimize the hybrid drivetrain. Select Hybrid for the best of both worlds, Electric to only use battery power or E-Save to reserve battery power for later — like for low-emission zones in cities or on the trail for near-silent exploring with maximum torque and horsepower.

CHARGING MADE EASY

Getting powered up faster is as simple as parking in your own driveway with an available, simple-to-use smart-enabled Jeep® Brand Level II EV Home Charging Station installed at your home.⁵ The Level II charging unit can charge up to six times faster than typical Level I charging options.⁶ You can utilize Qmerit, our approved collaborator, for installation.

2.0L TURBO I-4 ENGINE WITH ENGINE STOP/START (ESS) TECHNOLOGY

Delivers impressive performance, yet sips fuel as an I-4 should. This remarkable engine offers smart energy-generating functions, including available ESS, electric power assist, extended fuel shutoff, transmission shift management, intelligent battery charging and regenerative braking. Direct injection boosts power while respecting emissions, and eTorque technology provides a smooth ESS experience, along with electric torque assistance. With its standard match to the 8-speed transmission, you'll enjoy strong takeoffs and smooth highway coasting. Available.

3.6L PENTASTAR® V6 ENGINE

Load up, set your waypoint and go, enjoying a powerful pull with welcome economy. This proven road star's performance employs friction-reducing applications that ensure its smooth operation. Improved fuel efficiencies compared to the previous Pentastar® engine generation add even more value, helped by the addition of ESS. It's matched to a sturdy 6-speed manual transmission or automatic transmission. Or, choose the 3.6L Pentastar engine equipped with mild-hybrid eTorque technology, paired with an 8-speed automatic transmission. Both versions deliver equally powerful horsepower and torque. 3.0L ECODIESEL V6 ENGINE

Turbocharged to deliver exceptional responsiveness, the 3.0L EcoDiesel produces strong takeoffs with the confidence to pull loads up to 3,500 lb, when properly equipped. The engine's water-cooled turbocharger with Variable Geometry Turbine (VGT) and low-friction bearing adds to its economies, and high-pressure direct-injection nozzles and a low-pressure circulation system minimize turbocharger energy losses. And, because diesel fuel converts to a greater amount of usable energy compared to gasoline, it helps deliver an EPA-estimated 22 city/29 hwy mpg⁹ and an impressive driving range of up to 530 highway miles per tank.⁹ Available.

8-SPEED AUTOMATIC TRANSMISSION

The launch ratios for all eight gears have been optimized, tuning this 8-speed transmission to the exact structure, size and weight of your Jeep® Wrangler. Advanced software adjusts performance on the fly, based on variables such as temperature, cornering, hill grades, 4WD gears and towing. Smooth and virtually seamless shifts, both up and down, deliver a consistently smooth ride. Available.

6-SPEED MANUAL TRANSMISSION

For those who prefer to really put themselves into every shift, this one's for you. It hands you low 1st and Reverse gears, which are great for off-roading. It comes standard, matched to either a Command-Trac® 4WD system on Sport and Sahara® or paired with the Rock-Trac® 4WD system on the Rubicon® model.

THE GUTS TO GET YOU THERE

WHEN THE GOING GETS TOUGH, JEEP® WRANGLER GETS YOU WHERE YOU NEED TO GO. YOU'RE SUPPORTED WITH A FULL LINEUP OF FEATURES THAT HELP YOU MANAGE YOUR PROGRESS AND PROTECT YOUR VITAL PARTS WHILE KEEPING YOU INFORMED OF VEHICLE PERFORMANCE ALL ALONG THE WAY.

SELEC-SPEED® CONTROL Manages vehicle speeds of 0.6 – 5 mph in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake. This helps the driver focus on steering the vehicle, letting Wrangler put the right amount of power or braking onto the ground. Available. Included with 8-speed automatic transmission.

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC) Hill Start Assist works to prevent Wrangler from rolling when starting on an uphill gradient. Standard. Hill Descent Control is packaged with the 8-speed automatic transmission, helping Wrangler navigate steep declines at a steady speed. Available.

STEEL BUMPERS Built with ultra-strong steel to take the punishment of the trails. The front bumper can accept a winch, features integrated LED fog lamps and has removable end caps to help maneuver through tight spots. Available on Rubicon® models.

SKID PLATES The underbelly of your beast is protected, giving you peace of mind when you're climbing over huge boulders and navigating rough terrain. Every Wrangler gets skid plates covering the fuel tank, transfer case and transmission, so you can move forward with confidence on every road and trail. Standard.

TOW HOOKS You're given important tools to play the hero when need be. Every Wrangler gets two tow hooks up front and one in back. On Rubicon models, they're painted Red to stand out among the crowd.

OFF-ROAD PAGES Access real-time performance data like suspension travel or keep an eye on your tilt and-pitch. In-depth vehicle diagnostics, including wheel turn, articulation and transmission temperature, all help to provide an optimized experience. Available.

INTEGRATED OFF-ROAD CAMERA¹⁰ Mounted within the grille, provides an up-close view of the trail directly in front of your vehicle, helping you navigate over and around obstacles. Available.

LOCKED IN YET FLEXIBLE

TRU-LOK® DIFFERENTIALS

Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4WD traction. An instrument panel-mounted rocker switch can lock either the rear or both axles. Paired with Rock-Trac® 4WD system on Rubicon® models.

OFF-ROAD+

When engaged, it automatically deciphers the type of terrain Jeep® Wrangler is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock-crawling maneuvers. Standard only on Rubicon models.

FRONT SWAY BAR DISCONNECT SYSTEM

Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 18 mph. Standard only on Rubicon models.
