DESIGN

Land Rover LR4. Bold, flexible and luxurious. Instantly recognizable as a Land Rover, it features a progressive, contemporary exterior and an attitude that gives Land Rover LR4 a refined, modern presence off-road and on-road.

Award-winning Land Rover LR4 is consistently recognized the world-over by journalists and the motoring media for its exceptional capabilities. In fact, to date Land Rover LR4 and Land Rover LR3, together, have won more than 160 prestigious accolades globally.

Land Rover LR4. With its distinctive profile, it has always been iconic. Key design features, such as stunning jewel-like rear lamps, make it unquestionably sophisticated.

ALL PURPOSE

Whatever the surface, Land Rover LR4 helps take it on with confidence. Land Rover's patented Terrain Response® system, standard on all Land Rover LR4 models, gives access to over 60 years of Land Rover 4x4 expertise and state-of-the-art dynamic technology*.

Dynamic performance on-road. Land Rover LR4 features advanced technology that helps keep the driver connected with the road and provides an enhanced, more engaged and entertaining drive. It makes getting behind the wheel and heading for the open road pure pleasure.

-  GENERAL DRIVING
-  GRASS/GRAVEL/SNOW
-  MUD & RUTS
-  SAND
-  ROCK CRAWL

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Vehicle exterior shown in Indus Silver with optional Roof Rail accessories and 19 inch ten-spoke alloy wheels (above).

Vehicle exterior shown in Indus Silver with optional Roof Rail accessories and optional 20 inch five-spoke Gloss Black Diamond Turned alloy wheels (right).

Cruising on tarmac, driving over grass, gravel or snow, taking on mud and ruts, crossing sand and crawling over rocks. Terrain Response® is an off-road driving expert, helping Land Rover LR4 take on almost any surface with confidence. Simply turn the conveniently positioned Terrain Response dial and the engine, transmission, suspension, throttle and traction settings reconfigure for optimum driveability in all conditions*.

Gradient Acceleration Control takes Land Rover's helpful technology to a new level; enhancing the standard Hill Descent Control (HDC®). Gradient Acceleration Control helps reduce, and smooth out the effects of the sudden initial acceleration that can occur when the vehicle enters a steep gradient.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Vehicle exterior shown in Indus Silver (above). Vehicle exterior shown in Firenze Red (right). Vehicles shown with optional Roof Rail accessories.

Short front and rear overhangs. Exceptional ground clearance. Engine power and torque. They all make major contributions to the superior off-road capability of the Land Rover LR4 and help enable maximum maneuverability over some of the most difficult terrains.

PERFORMANCE

The engine of the Land Rover LR4 benefits from the latest e_TERRAIN TECHNOLOGIES, specifically engineered to reduce CO₂ emissions and help improve efficiency. The Intelligent Power System Management includes Smart Regenerative Charging ensuring that the battery is charged when it's most economical to do so.

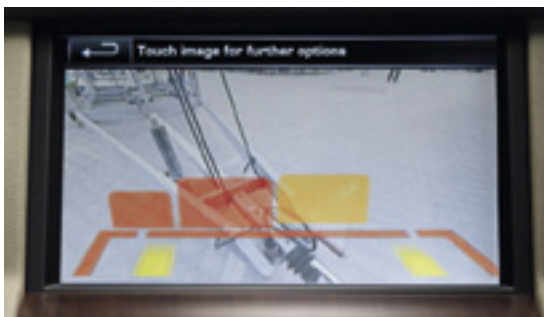

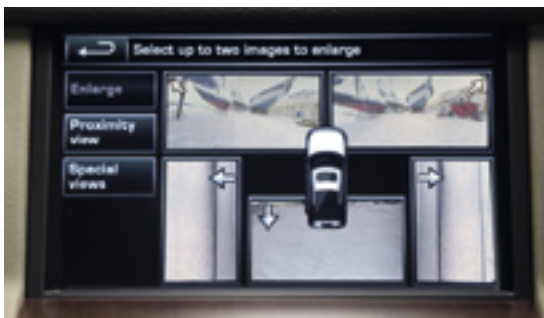

THE LAND ROVER LR4 ENGINE

The 375bhp Land Rover LR4 engine provides outstanding power, torque and refinement, harnessing the latest technology to deliver outstanding driveability and performance. With a torque-activated dual independent variable camshaft phasing system, it offers an immediate driver-focused reaction to throttle inputs and driving circumstances.

TOWING

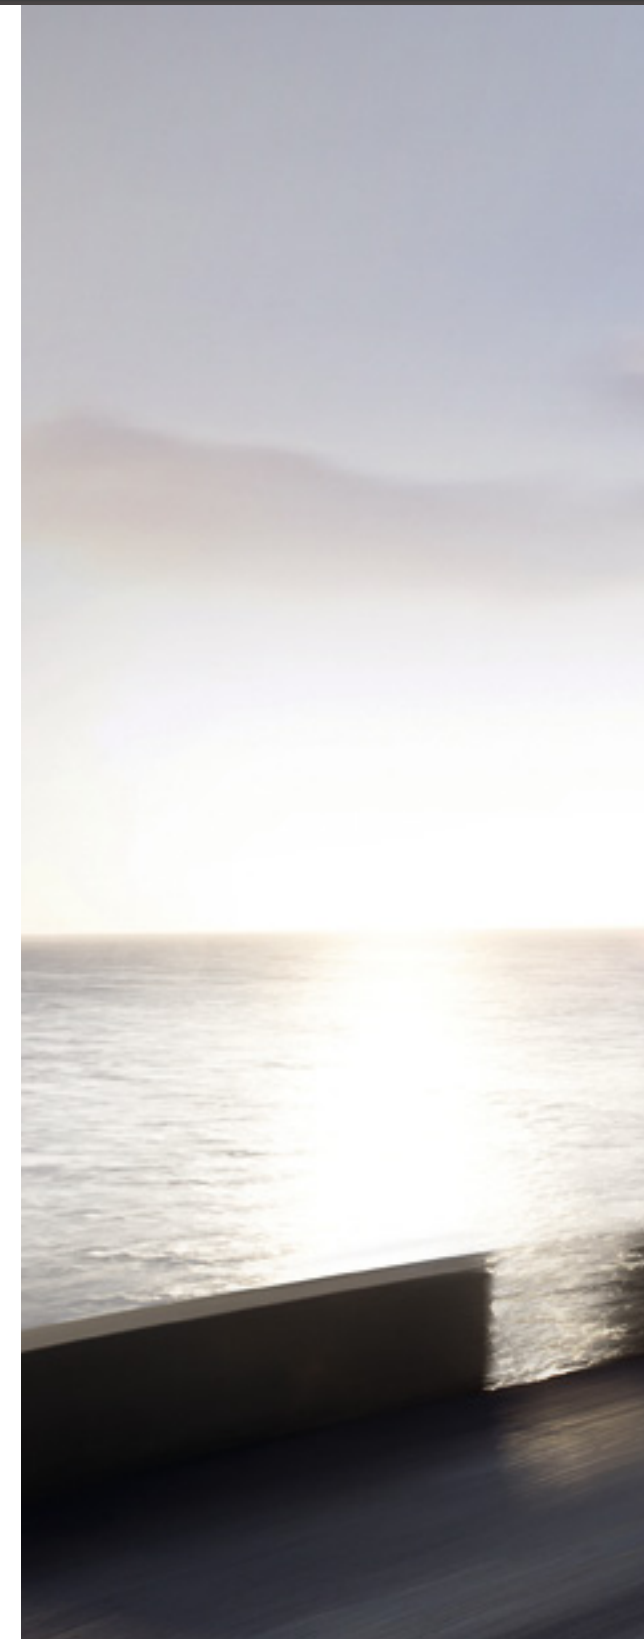

Optional Tow Assist, as part of the Surround Camera System, is a next-generation reversing aid that predicts the rearward trajectory of both vehicle and trailer. This helps the driver perform more accurate maneuvers and is selected from the Touch-screen menu. Wide-view cameras on the vehicle give a near 360 degree view, guidelines are superimposed over the resulting image to highlight the predicted reversing path for vehicle and trailer*.

Trailer Stability Assist** (TSA), standard on all Land Rover LR4 models, is designed to detect potentially dangerous trailer oscillations by monitoring vehicle behavior such as slight swings in response to trailer movements. It can initiate engine torque reduction and intervenes using the brakes to bring vehicle and trailer back under control. Optional Tow Hitch Assist helps hitching a trailer to the tow bar, by using on screen representation of views from the rear view camera, to show the driver the positions of the tow bar and trailer.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

**Only active when a tow bar and electrics are fitted.

Vehicles shown with optional accessories. Market availability varies.
Vehicle exterior shown in Indus Silver.

INTERIOR

COMMAND DRIVING POSITION

Land Rover LR4 features the legendary Land Rover Command Driving Position, which helps give better visibility over the traffic ahead for spotting hazards and helps parking and off-road driving. The Command Driving Position also brings a sense of control and reduces stress and fatigue as all key controls are close to hand and information is easy to read.

LUXURY FINISHES

The sumptuous, tactile interior of the Land Rover LR4 provides superb levels of craftsmanship and comfort. Meticulous attention to detail is without compromise. The seats, for example, provide outstanding support during long journeys. Windsor leather seats* include electrically adjustable seat bolsters providing the driver with added comfort and side support. Materials are truly premium, creating a superior ambience of quality. Fine touches, such as double stitching on the fascia, are unambiguous expressions of the vehicle's prestige.

*Only available on Land Rover LR4 HSE LUX.

Vehicle interior images show Ebony Windsor leather seating with Grand Black Lacquer fascia insert (above).
Vehicle interior image shows Almond Windsor leather seating with Straight Grain Walnut fascia insert (right).

STADIUM SEATING

First class accommodation for everyone and everything. Inside Land Rover LR4, no one travels second class. Making the passenger experience sublime. Thanks to the bold, innovative design and upright side profile the Land Rover LR4 has expansive head, shoulder and leg room. Stadium seating, with up to seven full-size adult seats*, ensures that all occupants share clear views of the surrounding landscape. A priority is given to refinement, including helping the reduction of noise intrusion and the inclusion of high-quality materials.

*Available on LR4, standard on HSE and LUX models.

Vehicle interior image shows Almond Windsor leather seating with Straight Grain Walnut fascia insert.

LOADSPACE

Land Rover LR4 is every vehicle you'll ever need, providing the ultimate in versatility and capability. It can transport driver, six passengers*, their luggage and a loaded trailer with total ease along highway and country lane.

The flexible, versatile seating layout provides multiple configurations to suit almost every conceivable use, and the second and third rows of seats* can be folded independently of each other.

Monday: Airport

Tuesday: Band practice

*Available on LR4, standard on HSE and LUX models.
Vehicle exterior shown in Indus Silver.

Wednesday: Car pool

Thursday: Rugby practice

Friday: Night out at the theater

It's the weekend...

INFOTAINMENT

Designed to make the driving experience effortless. The standard full color Touch-screen* provides all audio and navigation controls and is easy to use. It reduces the number of conventional controls required which adds to the premium ambience of the interior.

A choice of in-car entertainment options are available including **harman/kardon**® LOGIC7® Premium system incorporating 'theater-style' audio quality, HD Radio® and Sirius® Satellite Radio**.

The centerpiece of driver information is the instrument panel with its five inch Thin Film Transistor (TFT) display, showing vehicle information, Infotainment system feedback and navigation directions.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use devices with voice commands, when it is safe to do so.

**Subscriptions governed by Sirius Terms and Conditions available at sirius.com. Service available in the 48 contiguous United States and D.C. Sirius, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries.

harman/kardon® and LOGIC7® are registered trademarks of Harman International Industries, Incorporated.

Vehicle interior image shows Almond with Straight Grain Walnut fascia insert.

SOUND AND VISION

The Land Rover LR4 Infotainment system* features enhanced sound systems across the model range, the latest generation of electrical architecture that allows easier connection of external devices and WhiteFire® wireless technology, which works with the optional rear seat entertainment system.

Every model incorporates a system with a minimum of 11 speakers, a color display, Bluetooth®, and USB/iPod® connectivity. The standard **harman/kardon®** 380W system includes 11 speakers, color Touch-screen display and Bluetooth®. The **harman/kardon®** LOGIC7® Premium system now boasts 17 speakers including subwoofer and increases power to an astonishing 825W for pure surround sound audio entertainment on the move.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use devices with voice commands, when it is safe to do so.

iPod is a registered trademark of Apple Inc., registered in the US and other countries.

The Bluetooth® wordmark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under license.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under license.

Vehicle interior images show Almond Windsor leather with Straight Grain Walnut fascia insert.

To keep everyone on board amused, the optional rear seat entertainment system* includes two eight inch screens in the back of the front seat headrests as well as a remote control. The system allows a multitude of listening and viewing options: CD/Audio via wireless headphones supplied as part of the equipment; DVD on the rear screens; the connection of iPod®/MP3 and games consoles; video playback of DivX MP4 files stored on a USB memory device.

Vehicles equipped with a Navigation Hard Disc Drive include DVD Audio and MP3 DVD playback as well as a Virtual CD Auto Changer. The Virtual CD Auto Changer can save as many as ten albums in high-quality lossless format to the hard disc drive and provides track information for easy identification of CDs and tracks.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use devices with voice commands, when it is safe to do so.

SAFETY

Safety features include Anti-lock Braking System (ABS), Emergency Brake Assist (EBA), which is designed to supply extra brake pressure in an emergency, and Electronic Traction Control (ETC) which helps maintain optimum grip.

Tire Pressure Monitoring System (TPMS) is standard and is designed to warn you of low tire pressure. Dynamic Stability Control (DSC) and Roll Stability Control (RSC) work with the braking system and are designed to assist with cornering, over or understeer and to help maintain stability.

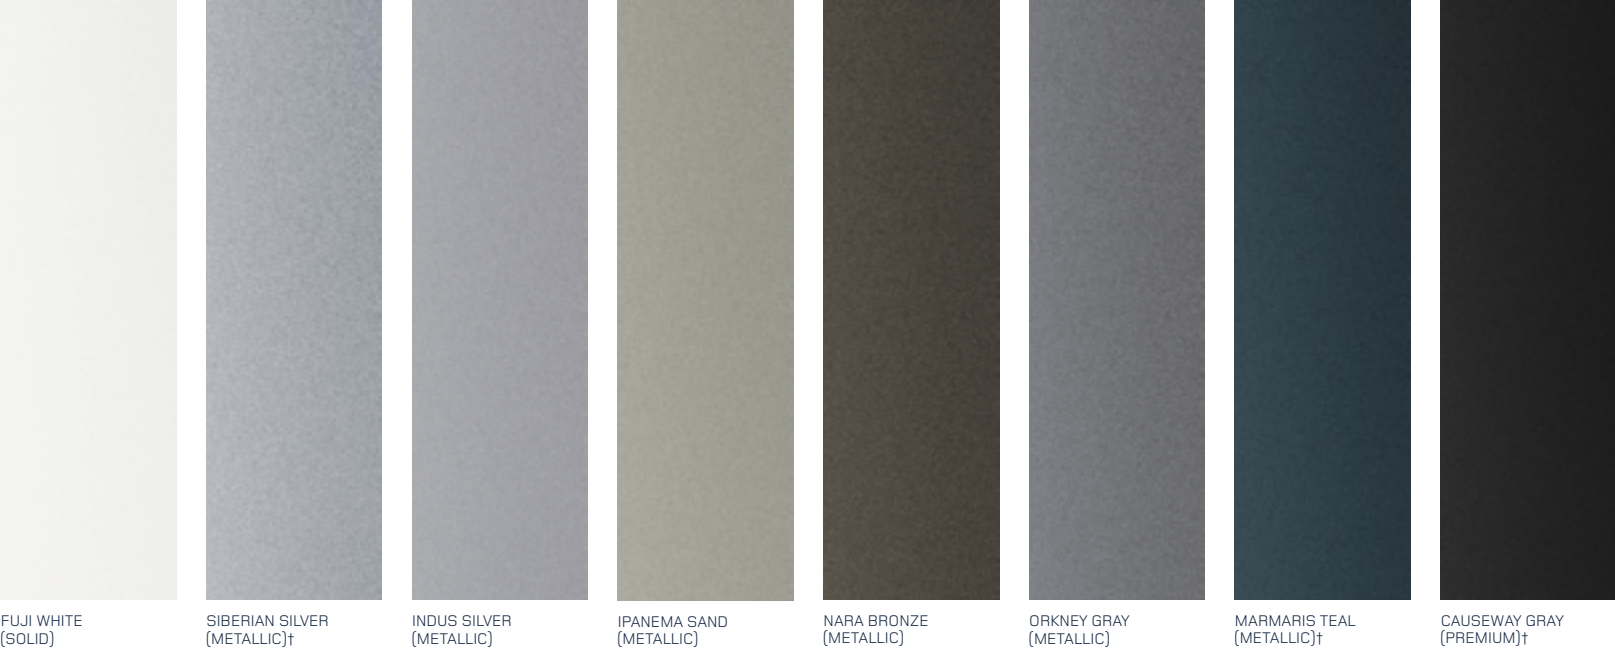

Up to eight airbags* are fitted: the front seats have both front and side airbags with each seat row having its own curtain airbags.

*Available on LR4. Standard on HSE and LUX models.

These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc.

Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

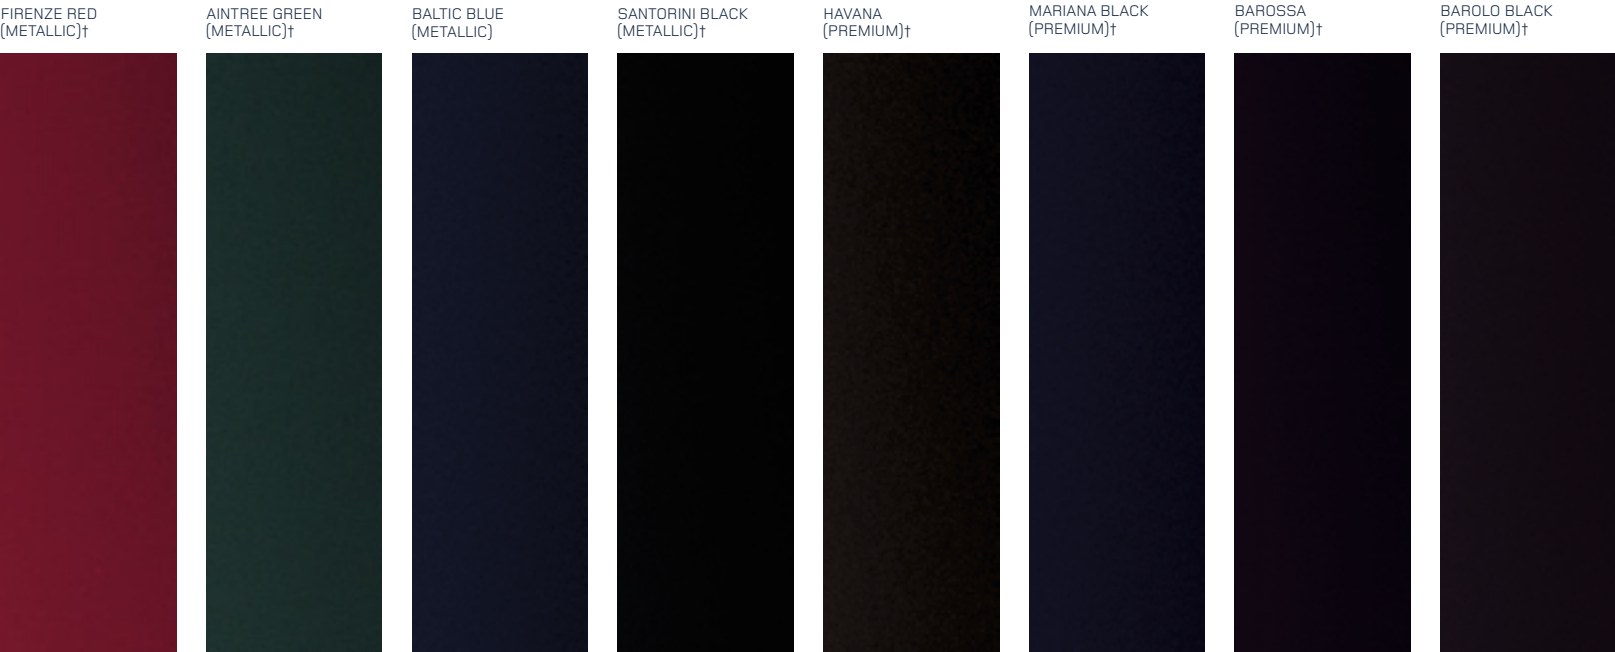

CHOICES

Make Land Rover LR4 your own with a wide spectrum of exterior color options, in Solid or Metallic finishes, as well as five distinctive Premium Metallic colors.

Land Rover ensures paint durability and resilient color richness with a five stage paint process that includes a three-coat electrostatic paint application and rigorous anti-corrosion wax protection.

Visit www.LandRoverUSA.com for more information.

†Additional charges apply. Please contact your authorized Land Rover Retailer for details.

LAND ROVER LR4

With enhanced handling and 19 inch alloy wheels, this model delivers versatility and practicality together with comfort and refinement.

LAND ROVER LR4 HSE

Increased comfort and intuitive technology make this impressive vehicle equally at home on urban street, highway or rutted track.

LAND ROVER LR4 HSE LUX

This model delivers superior luxury combined with stunning design to make sure every journey is relaxed and every arrival is in style.

LAND ROVER LR4

Town or country, Land Rover LR4 is the smart, practical complement to the modern lifestyle. Superb drivability plus true Land Rover capability and versatility. Sophisticated 19 inch seven split-spoke alloy wheels combine with Terrain Response® allowing smooth handling in tough conditions.

Terrain Response® system

Land Rover LR4 interior includes:

- Terrain Response® system
- Grained leather seats
- Straight Grain Walnut fascia insert
- Leather steering wheel
- Cruise control
- Seven inch full color Touch-screen
- Front footwell lamps
- **harman/kardon®** 380W Audio system with 11 speakers, subwoofer, radio, single slot CD player with MP3 player and auxiliary input
- iPod® and USB connectivity
- Rear parking aid
- Bluetooth® phone connection
- Bluetooth® audio streaming

Land Rover LR4 exterior includes:

- Electronic air suspension
- Body-colored wheel arches and rear bumper
- Oberon finish door handles
- Variable ride height
- 19 inch seven split-spoke alloy wheels
- Automatic halogen headlamps
- Electric Alpine sunroof
- Rain sensing windscreen wipers
- Headlamp powerwash
- Solid paint
- Front fog lamps
- Privacy glass

LAND ROVER LR4 BLACK DESIGN PACK

Land Rover LR4 Black Design Pack has its own, special character. The exterior sports a Narvik Black finish to the grill vanes, fender vents, mirror caps and door handles and satin Black extended roof rails. There is a choice of optional 19 inch seven split-spoke Black alloy wheels or 20 inch five-spoke Black alloy wheels.

Land Rover LR4 Black Design Pack includes:

- Grill vanes and side fender vents in Narvik Black
- Narvik Black door handles
- Narvik Black mirror caps
- Satin Black extended roof rails
- Land Rover hood and tailgate Land Rover LR4 badges in Black, with no engine or derivative badge
- Option of 19 inch seven split-spoke Black alloy wheels or 20 inch five-spoke Black alloy wheels
- Black wheel center cap featuring a Black and Silver Land Rover oval

Grill vanes in Narvik Black

Side fender vents in Narvik Black

19 inch seven split-spoke Black alloy wheel

20 inch five-spoke Black alloy wheel

TECHNICAL FEATURES AND SPECIFICATION

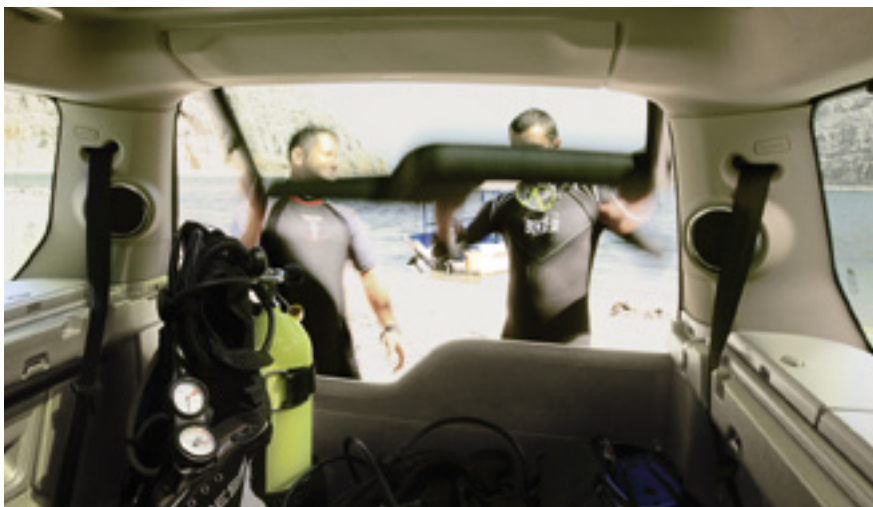

AUTOMATIC HEADLAMPS WITH HIGH BEAM ASSIST*. Detect vehicle headlamps/tail lights and dip the high beam until the light source is out of range. The system is able to distinguish between automotive and non-automotive light sources.

ADAPTIVE FRONT LIGHTING*. For more relaxed night-time driving, Adaptive Lighting varies the light cast ahead of the vehicle so that the beams follow the curve of the road.

*Optional on some derivatives.

DYNAMICS AND BRAKES. Driver-focused on-road dynamics. The result is car-like handling that does not compromise extreme axle articulation and, consequently, the off-road ability of the vehicle.

SPLIT TAILGATE. Make light work of difficult loads with Land Rover LR4's two-piece, asymmetric tailgate design. Both upper and lower tailgates are made from resilient lightweight aluminum. The tailgate gives impressive access to the rear of the vehicle and comes into its own when loading large, bulky or heavy objects. The asymmetric portion of the lower tailgate provides a reduced reach-in distance when open and a lower load height when closed.

TERRAIN RESPONSE® SYSTEM†. Standard on every Land Rover LR4 and optimizes the vehicle set-up for virtually all on-road or off-road driving situations, with five different settings to suit different terrains such as Grass/Gravel/Snow, Sand, Mud and Ruts and Rock Crawl.

GRADIENT RELEASE CONTROL†. Patented Land Rover system works with Hill Descent Control (HDC®), across terrains such as rock, gravel and sand, for more controlled, confident descents. Works in reverse and first gear.

PARKING AID – REAR VIEW CAMERA*†. Camera provides rearward view from the full color Touch-screen, works in conjunction with rear parking aid.

SURROUND CAMERA SYSTEM†.** Comprises five digital cameras to provide near 360 degree view† surrounding vehicle to aid low-speed maneuvering via the full color Touch-screen. Can be customized to provide a single camera view or multiple images. Functions include: Parking Aid – Rear View Camera, All Round Vision, Junction View. Also includes Tow Assist and Tow Hitch Assist.

*Not available on Land Rover LR4. Standard on Land Rover LR4 HSE and LR4 HSE LUX. ** Optional.

†These systems are not a substitute for driving safely with due care and attention and will not function under all circumstance, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgement in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. It remains the driver's responsibility to detect obstacles and estimate the vehicle's distance from them when reversing. Always be vigilant when reversing.

STEERING WHEEL CONTROLS. Steering wheel with ergonomically designed switch layout for driver information and remote audio controls. Cruise control and telephone are standard while heated steering wheel controls are optional depending on the vehicle derivative.

AIR SUSPENSION. Standard four-corner independent air suspension features variable ride height and electronic cross-linking for a constant level ride height irrespective of passenger load distribution. Ride height can be raised up to 2.2 inches/125mm to clear obstacles or lowered by 1.9 inches/50mm for easy access and loading.

ELECTRIC PARKING BRAKE (EPB). A lever is located next to the gear selector to electrically apply and release the parking brakes on the rear wheels. A simple pull of the lever applies the brake manually and a press releases it. The parking brake will also release automatically upon drive away.

INSTRUMENT PANEL. With five inch (12.7cm) TFT display for trip information, primary vehicle information and warnings.

'SAY WHAT YOU SEE' VOICE ACTIVATION*. This helps the driver to use and interact more easily with the advanced systems of the Land Rover LR4 by displaying voice commands on the Touch-screen. Displayed in a logical step-by-step format, these commands first show the different devices that can be controlled, for example phone, navigation or audio, and then a second stage shows the specific commands for the chosen device. Once the driver is familiar with the appropriate terms, both stages can be combined into a shortcut.

*The Voice System has been designed to recognize a number of languages. However, Land Rover cannot guarantee the system will be compatible with every accent group within those languages. Please speak to your Land Rover Retailer about testing the Voice System for compatibility with a particular accent group. Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use devices with voice commands, when it is safe to do so.

FULL COLOR TOUCH-SCREEN.** (Standard). Provides full control and functionality over integrated systems such as audio, 4x4 information and vehicle settings and when equipped, navigation and camera systems.

**Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use devices with voice commands, when it is safe to do so.

WHITEFIRE®. This technology is a wireless system, discreetly housed in a unit in the vehicle's headlining, which allows the convenient use of cordless headphones with the optional rear seat entertainment system.

CORDLESS HEADPHONES. These WhiteFire® cordless headphones use powerful wireless technology to deliver outstanding audio performance to passengers using the rear seat entertainment system.

Additional WhiteFire® cordless headphones LR02 8886.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under license.

THE PORTABLE AUDIO INTERFACE. Allows the connection to the in-car entertainment system of an iPod® with full track and search integration. An MP3 player or a mass storage device can also be connected via the USB port. Bluetooth® audio streaming is also available enabling music to be played through the in-car entertainment system via a Bluetooth® connection.

iPod is a registered trademark of Apple Inc., registered in the US and other countries. The Bluetooth® wordmark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under license.

PUSH BUTTON START. When the driver slides behind the wheel, with the key fob in his or her pocket, briefcase or purse, the car's system recognizes the presence of the fob – the driver needn't even remove it to wake up the engine. To start the motor depress the brake pedal and push a button on the control panel. Shutting off the engine is accomplished by merely pressing the Start/Stop button. The optional Passive Keyless Entry system provides even greater convenience. As long as the key fob is with the driver, the vehicle detects it and automatically unlocks the door when the door handle is pulled.

COMPACT SMART KEY. With its real metal trim and attractive 'pebble-like' appearance, the Compact Smart Key provides full functionality with a more modern, more premium look and feel.

REAR SEAT ENTERTAINMENT*. Eight inch screens in the back of the front seat headrests allow rear passengers to watch DVDs or play their own portable games console through the optional twin-screen entertainment system. This plays sound through individual WhiteFire® cordless headphones or from the optional **harman/kardon®** LOGIC7® Premium system incorporating premium 'theatre-style' audio quality.

Additional WhiteFire® cordless headphones (not shown) LR028886.

*Optional.

harman/kardon® and LOGIC7® are registered trademarks of Harman International Industries, Incorporated. WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under license.

HARD DISC DRIVE NAVIGATION (HDD)*. Prompt access speed, graphics and display. HDD stores up to 100GB of data and navigation mapping can be upgraded via a Land Rover Retailer download.

Additional features available on HDD-equipped vehicles are DVD Audio and MP3 DVD playback and Virtual CD Auto Changer which saves up to ten albums (in uncompressed format) to the HDD and provides track information for easy identification of CDs and tracks.

*Standard on HSE and HSE LUX.

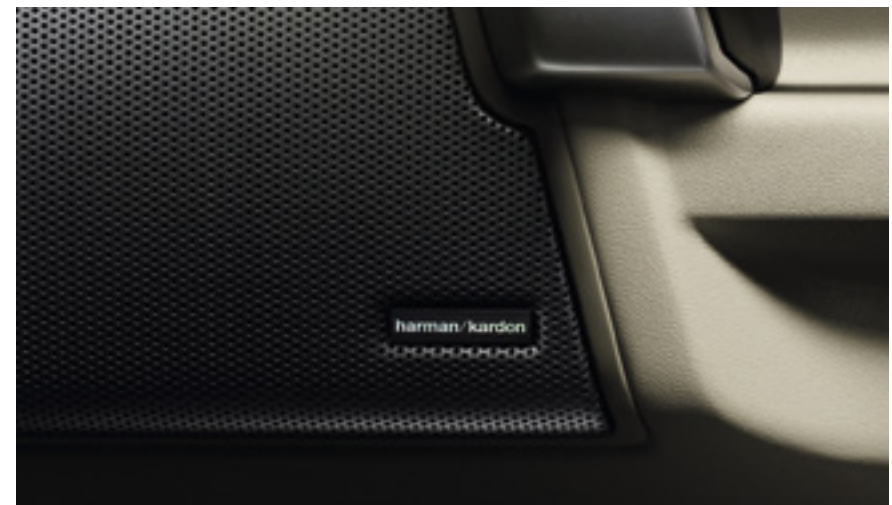

ALPINE ROOF. Even the rearmost passengers enjoy a glass roof in Land Rover LR4 with the standard Alpine roof. The combined reflective properties of the glass panel and interior sunblinds keep everyone cool and the cabin light and airy.

IN-CAR ENTERTAINMENT. Offering an electrifying audio experience are two in-car entertainment systems. The standard **harman/kardon®** audio system has 11 speakers and power output to 380W.

The **harman/kardon®** LOGIC7® Premium system boasts 17 speakers with power output boosted to an impressive 825W. The Touch-screen, offers full control and functionality over both audio systems.

harman/kardon® and LOGIC7® are registered trademarks of Harman International Industries, Incorporated.

LAND ROVER LR4 VEHICLE KIT

Land Rover LR4 is so capable and adaptable it can get straight to work across a huge variety of vastly differing terrains, conditions and roles. Even so, some owners want to add their own stamp of individuality by tailoring their Land Rover LR4 to their specific needs with a range of stylish, practical accessories. Accessories that are tough, versatile and bring an opportunity for personalization to Land Rover LR4. Importantly, these accessories can be added at any stage during the vehicle's life – not just when it's new. And remember, Land Rover LR4 Vehicle Kit is designed and manufactured to the same exacting standards as the original equipment fitted to your vehicle.

Visit www.LandRoverUSA.com for more information.
