

RANGE ROVER

2013

ABOVE AND BEYOND

Every generation of Range Rover sets a new benchmark; the fourth generation is a bold evolution of the iconic design.

Taut and structured, the new shape is more refined. The key lines and architectural shapes instantly tell you it's a Range Rover. The signature clamshell hood, floating roof, deep imposing grille and headlamp graphics have the familiar Range Rover presence. Yet the front of the new vehicle is subtly different. The optimized proportions and sleeker lines are a modern interpretation of traditional design cues. There's a definite, clear lineage – this is a vehicle with Land Rover DNA through and through.

Rome vehicle shown in Barolo Black with panoramic roof and privacy glass.

The all-new Range Rover builds on the marque's three classic lines. The lower accent graphic, roof line and continuous belt line that flows around the vehicle give it a unique sense of composure and unmistakable form.

Building on Range Rover's distinctive design, the silhouette is now gently tapered and more curved, while the use of near-flush glazing and gloss black pillars accentuates the floating roof effect. The vehicle is sleeker, more streamlined and more aerodynamic, but consistent elements like the side vent graphic and lower accent graphics give harmony and a reminder of the vehicle's heritage.

Vehicle shown left in Luxor with panoramic roof, privacy glass and 22 inch five split-spoke 'Style 6' alloy wheels.

The split tailgate is distinctly Range Rover and is now even more practical and versatile. The lower gate, useful as a viewing platform for social and sporting events, has been redesigned making it easier to reach in. And because the upper gate is now longer it helps give extra protection from the elements. For more convenience both gates are electronically operated via the key fob, fascia or within the loadspace.

Range Rover's legendary off-road performance has evolved; its capability is enhanced by the latest advances in design and engineering technology. A true Land Rover at heart, it delivers better off-road performance while retaining the design integrity the marque is known for. The rear now has an increased departure angle enabling steeper climb while the raised air intake and increased wading depth mean the vehicle can drive through 35.4 inches (900mm) of water with ease.

Step inside Range Rover and it feels like home. The refinement of the interior gives a sense of wellbeing: the broader, more refined center console puts essential controls within easy reach, while the clean, elegant surfaces with fine leathers and veneers give a feeling of serenity and calm. This quiet, relaxing environment is supremely comfortable and cossets all occupants from the outside world.

Interior shown left in Indus Silver with panoramic roof, privacy glass and 22 inch five split-spoke 'Style 6' alloy wheels.

The introduction of a new panoramic roof* brings a new aspect to Range Rover. It floods the interior with light, enhancing the feeling of space and being connected to the outside. It lets the world in yet the full-length power blind gives privacy at the touch of a button.

*Optional on Range Rover models. Standard on HSE, Supercharged and Autobiography models.
Interior shown left in Ivory Semi-Aniline leather with rear seat entertainment and panoramic roof.

Travelling in the back of a Range Rover is an indulgence; there's more knee and legroom and the rear seats have power recline*. For an even more comfortable journey, there's an independent rear climate control system as well.

The Rear Executive Class seats** give a new dimension to relaxing or working in the back. Seating two individual passengers, this configuration allows for even more space with the addition of a massage function as a comforting extra. For added convenience the elegant center console sweeps through to the rear, housing seat controls with USB and power connections, climate control and an optional cool box.

Upholstered in beautiful leathers and complemented by elegant veneers and metal finishing touches, the rear cabin is a pleasure to spend time in.

*Standard on Autobiography models. Optional on HSE and Supercharged models.

**Optional on Autobiography models only.

To enhance the feeling of relaxation and wellbeing, the interior lighting has been carefully considered. LED technology creates a subtle ambience inside the vehicle at night-time. The system is simple to operate and can be pre-set to suit personal taste with adjustable brightness and a palette of ten mood colors*. Also adding to the refinement of the experience is the exceptional sound quality of the latest Meridian™ audio technology.

*Standard on Autobiography models only.

Assured and confident, the Range Rover is built to take the miles in its stride. Its premium aluminum construction is light yet strong, enhancing performance, handling and stability.

Range Rover's engines include the latest technology and advanced eight-speed automatic transmission. They are designed to reduce fuel consumption and help lower CO₂ emissions without compromising power.

Capable of taking on tougher situations than ever before, the new four-corner air suspension system is designed to keep the Range Rover composed and stable no matter how rough the terrain. For unprecedented ride quality, it switches heights seamlessly when necessary.

Terrain Response® 2*† puts Range Rover's full capabilities at the driver's command. This next generation system monitors driving conditions and automatically optimizes the vehicle's settings to suit the terrain.

*Standard on Supercharged and Autobiography models.

†These features are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult owner's manual or your local authorized retailer for more details.

At motorway speeds the vehicle is completely assured. Dynamic Response*[†] uses the latest electronic two-channel control system to enable independent regulation of both front and rear suspension units. This dramatically reduces body lean during cornering and enhances control and stability. The system, available for the first time on Range Rover, is standard with the 5.0L V8 Supercharged engine.

From the most challenging off-road situations to the most demanding urban environments, Range Rover goes anywhere effortlessly. Adaptive Dynamics[†] makes the miles go by virtually unnoticed. Balancing ride and control by monitoring the vehicle's movements continuously, the system varies the dampers to suit driving conditions and the road surface – so driver and passengers will arrive at their destination refreshed and relaxed.

*Standard on Supercharged and Autobiography models.

[†]These features are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. The Range Rover interior is designed to give the driver effortless control. Exceptional attention to detail has been given to the fascia; it has a beautiful symmetry and balance, delivering an intuitive and uncluttered experience.

The minimalist design means there is little to distract the eye. Features become noticeable only when needed. Smartly designed storage compartments are virtually invisible until opened and clever spaces keep the cabin well ordered.

Vehicle shown left in Barolo Black with panoramic roof and privacy glass.

No matter how chaotic the traffic, Range Rover's legendary command driving position rises above it. The raised view of the road together with the visibility, light and space created by the optional panoramic roof give a feeling of control and confidence.

Along with beautiful simplicity of form, Range Rover integrates the latest driver technology to make every aspect of the journey convenient, simple and enjoyable. The Smart Key system, for keyless entry and start, as well as the optional soft-close doors* deliver a satisfying and relaxed experience.

*Standard on Autobiography models.
