

LAND ROVER LR4

2016

ABOVE & BEYOND

ABOVE & BEYOND

Ever since the first Land Rover was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

The Land Rover LR4 is widely
recognized as the world's most
versatile and capable SUV.

SPECIFICATION

The design of the Land Rover LR4 has constantly evolved during its life and that is why it is always in its element, whether it's crossing town or taking everyone way beyond the city limits for the weekend.

Vehicle shown is HSE LUX in Aruba.

The design of Land Rover LR4 is accentuated by the use of jewel-like front lights giving the vehicle a contemporary look. While at the rear, the split tailgate has been designed for maximum reach and flexibility to make loading objects easier.

Escape the daily grind. The 3.0L V6 Supercharged Land Rover LR4 engine delivers in most demanding criteria, including fuel economy, power and performance. Heading away from the city towards the great outdoors should be a pleasure. That's why Land Rover LR4 features advanced technology to help the driver feel more connected to the road and deliver an engaged and responsive drive. Now, getting there can be as enjoyable as being there.

Stadium seating gives everybody unspoiled views, with head, leg and shoulder room that are among the best in class and full-size seats for up to seven adults. These are just some of the benefits of the bold design and upright side profile of Land Rover LR4. And with a range of infotainment and technologies to choose from, everyone will be entertained, relaxed and comfortable.

Vehicle shown above is HSE LUX in Aruba.
Interior shown left is HSE LUX in Almond/Arabica with optional Rear Seat Entertainment.

The Land Rover LR4 is complemented by a sophisticated and contemporary interior that customers will find exemplary – no matter which model they choose.

DOMINIC CHAMBERS
GLOBAL COMMUNICATIONS DIRECTOR – LAND ROVER

What Land Rover LR4 gains in practicality and space, it doesn't compromise in comfort and attention to detail. Its tactile interior is a contemporary and beautifully crafted environment. The seats are available in a variety of materials such as Windsor leather, which include electric adjustments and memory, giving the driver even greater support. Double-stitching on the fascia top is just one indication of the high-quality finish throughout the vehicle.

Land Rover has always had capability at its heart and the Terrain Response system®* proves it. This proprietary technology acts as an off-road expert enabling the driver to tackle almost every surface with confidence.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.
Vehicle shown above and left is HSE LUX in Aruba.

As one of the world's most premium, capable and versatile SUVs, the Land Rover LR4 is the perfect vehicle for people who enjoy living an active lifestyle to the full.

ROBIN COLGAN

GLOBAL BRAND DIRECTOR – LAND ROVER

At the touch of a switch, Terrain Response system®* reconfigures the Land Rover LR4 engine, transmission, throttle and traction settings for optimum drive-ability. So whether traveling over pavement, grass, gravel or snow, mud and ruts, sand or rocks, the vehicle handles it with consummate ease.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.
Vehicle shown right is HSE LUX in Scotia Grey.

With exceptional ground clearance and short front and rear overhangs, Land Rover LR4 is cleverly proportioned. Together with impressive torque and delivery of power, these attributes help ensure that the vehicle is eminently capable and highly maneuverable on the most demanding terrain.

Vehicle shown is HSE LUX in Scotia Grey.

A photograph of a steep, reddish-brown hillside with visible geological strata. The hillside slopes down from the left towards the right. The sky above is bright blue with wispy white clouds. The foreground shows loose rocks and scree at the base of the slope.

As a vehicle crests a steep hill, there is a moment when the feeling of sudden acceleration can occur, which is why Gradient Acceleration Control* has been incorporated into the standard Hill Descent Control (HDC®) technology. This feature helps reduce the feeling of increased speed and smoothes out the overall effect to make descent feel more assured.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.
Vehicle shown left is HSE LUX in Scotia Grey.

For over 65 years, Land Rover has become renowned for many innovations, one of which is the legendary Command Driving Position*. From here, the driver gets an unparalleled view of the road ahead and greater all round visibility. Hazards can be spotted earlier, parking is made easier and all the key controls are readily at hand.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.
Interior shown right is HSE LUX in Arabica/Almond.

The odd expanse of water shouldn't affect a drive. Chances are it won't in Land Rover LR4. The vehicle has been designed to allow a maximum wading depth of 27.6 inches.*

*These features are not a substitute for driving safely with due care and attention, and will not function under all circumstances, speeds, weather and road conditions. The driver should not assume that these features will correct errors of judgment in driving. Please consult your vehicle's owner's manual or your local authorized Land Rover Retailer for more details.
Vehicle shown left is HSE LUX in Scotia Grey.

With five digital cameras mounted around the vehicle, the optional Surround Camera System* provides a near 360° view. This greatly aids low-speed maneuverability in such situations as parking. By customizing the number of images the camera relays to the Touch-screen, other functions can be utilized. All Round Vision, Junction View, Curb View, Rear View, Tow Assist and Tow Hitch Assist are included in this advanced system.

*These features are not a substitute for driving safely with due care and attention, and will not function under all circumstances, speeds, weather and road conditions. The driver should not assume that these features will correct errors of judgment in driving. Please consult your vehicle's owner's manual or your local authorized Land Rover Retailer for more details.
Vehicle shown left is HSE LUX in Scotia Grey.

Land Rover LR4 goes further. Its capability is born from the first Land Rover vehicle and is renowned across the city, across country and across the globe. Its contemporary design is purposeful, its drive connected and assured. Add class-leading versatility with seven full-size adult seats available and the picture is complete.

Vehicle shown is HSE LUX in Indus Silver.

Automatic headlamps with High Beam Assist and adaptive Xenon headlamps with LED signature**

Is designed to detect vehicle headlamps/tail lights and to dip the high beam until the light source is out of range. The system is able to distinguish between automotive and non-automotive light sources.

Signature LED lights combine practicality with distinctive design. For more relaxed night-time driving, adaptive lighting varies the light cast ahead of the vehicle so that the beams follow the curve of the road.

Air Suspension

Four-corner independent air suspension features variable ride height and electronic cross-linking for a constant level ride height irrespective of load distribution. Ride height can be raised up to 4.9 inches to clear obstacles or lowered by two inches for easy access and loading.

Split Tailgate

Make light work of difficult loads with the Land Rover LR4 two-piece, asymmetric tailgate design. Both upper and lower tailgates are made from resilient lightweight aluminum. The tailgate gives impressive access to the rear of the vehicle and comes into its own when loading large, bulky or heavy objects. The asymmetric portion of the lower tailgate provides a reduced reach-in distance when open and a lower load height when closed.

Adaptive Cruise Control**

The Adaptive Cruise Control (ACC) with Forward Alert system uses radar to scan the road ten times a second. ACC is designed to dynamically match the speed of the vehicle in front of you, settling down behind it and maintaining a constant speed with one of four cruise gap distances set by your preference. Forward Alert is designed to give an audio and visual alarm when you are closing in on a vehicle.

Terrain Response System® and Gradient Release Control**

The Terrain Response System® optimizes the vehicle set-up for virtually all on-road or off-road driving situations, with up to five different settings to suit different terrains such as pavement, grass, gravel or snow, mud and ruts, sand or rocks.

Gradient Release Control is a patented Land Rover system that works with Hill Descent Control (HDC®) across terrains such as rock, gravel and sand for more controlled, confident descents. Works in reverse and first gear.

Parking Aid* / Rear View Camera / Surround Camera System with the T-Junction Camera**

The rear view camera provides a rearward view from the full color Touch-screen and works in conjunction with the rear parking aid.

The surround camera system comprises five digital cameras to provide a near 360° view surrounding the vehicle to aid low-speed maneuvering via the full color Touch-screen. Can be customized to provide a single camera view or multiple images. Functions include: Parking aid – rear view camera, All Round Vision, Junction View. Also includes Tow Assist and Tow Hitch Assist.

*Optional **Rock Crawl not available with single speed transfer gearbox †These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Intelligent Stop/Start

A welcome addition, designed and engineered to help reduce CO₂ emissions and improve fuel economy. The system is automatically engaged when the ignition is turned on and when the engine is no longer required, at traffic lights for example, it will turn itself off. From a standstill, when the vehicle is in Drive, Sport or Reverse, the engine will instantaneously restart when the brake pedal is released.

InControl® Apps™*

Land Rover InControl® Apps™ enables you to use vehicle optimized smartphone apps on the vehicle's Touch-screen. Using the USB port you can enjoy a variety of vehicle optimized apps such as: Contacts, Calendar and Music Player, with more third party vehicle apps being released over time. Your smartphone will also be re-charged while using the feature.

In Car Entertainment**

The Meridian™ Audio System delivers superb acoustics and is noted for its excellent reproduction quality from all sources – radio, CD, iPod® or USB. The optional Meridian Surround Sound System features 17 speakers including a subwoofer for full surround sound.

Rear Seat Entertainment**

The Rear Seat Entertainment package ensures passengers can always be engaged. With two eight-inch screens built into the front headrests, a pair of WhiteFire® digital headphones and a dedicated remote control, passengers can feel truly at home with their choice of film, TV or music.

Compact Smart Key - Keyless Entry/Push Button Start

Once the vehicle has been accessed using the remote transmitter, the device may be stored in a pocket or bag to allow starting without its use. The optional Keyless entry system provides even greater convenience. When within close proximity of the vehicle along with the remote Compact Smart Key, simply open the door, get in and push the Start button.

The Portable Audio Interface

Allows the connection to the in-car entertainment system of an iPod® with full track and search integration. An MP3 player or a mass storage device can also be connected via the USB port.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. **Optional on some derivatives. iPod® is a trademark of Apple Inc., registered in the U.S. and other countries.

Sunroof with Alpine Roof

Even the rearmost passengers enjoy a glass roof in Land Rover LR4. The sunroof tilts and slides electronically and the combined reflective properties of the glass panel and interior sunblinds keep everyone cool and the cabin light and airy.

Hard Disk Drive Navigation*

With prompt access speed, graphics and display, the Hard Disk Drive Navigation (HDD) System stores up to 40GB of data. Navigation mapping can be upgraded via a Land Rover Retailer download.

Additional features available on HDD-equipped vehicles are DVD Audio and MP3 DVD playback with single CD disc player.

Blind-Spot Monitor/Closing Vehicle Sensing* †‡

Using sensors mounted behind the rear bumper, these systems are designed to see what you might miss. When a vehicle enters a blind spot, a warning light will show in the corresponding door mirror.

Closing Vehicle Sensing scans a zone much further behind the vehicle, to help detect vehicles which are closing quickly from behind and which could cause a threat during a lane change maneuver.

Reverse Traffic Detection* †‡

Using radar detectors in the rear of the vehicle, the system is designed to warn you about potential collisions during reversing maneuvers. The system can help detect a vehicle approaching from either side. When a target vehicle with a credible 'time to collision' is detected (a collision within three seconds or less), the system alerts the driver. Three warnings are given: an indicator lights up in the corresponding door mirror, an audible alert is sounded and a warning symbol is displayed on the camera screen.

*Available as part of the Vision Assist Package. †These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Land Rover LR4 offers an exclusive range of options that allow you to personalize your vehicle.

The following pages take you through a logical series of steps to create your ideal Land Rover LR4. You have several choices: from selecting your model to exterior and interior colors before choosing your wheels, finishes and additional options.

Vehicle shown left is HSE LUX in Montalcino Red.

Each model has a choice of engines and distinctive features.

This guide will help you to select your ideal Land Rover LR4. On the following pages you'll see the standard features for each model.

LAND ROVER LR4

- Grille bars in Brunel with Gloss Black surround
- Side fender vents in Brunel
- Oberon door handles
- Body colored wheel arches and rear bumper
- Dark Techno Grey tow eye cover
- Halogen headlamps with daytime running lights (DRL)
- Front fog lamps
- 19 inch ten-spoke 'Style 103' alloy wheels
- Side steps
- Rear park distance control with rear view camera*
- Grained Leather seats
- Sunroof with Alpine Roof and Blind (tilt/slide front glass)
- Meridian™ Audio System (380W) with 11 speakers including subwoofer.

LAND ROVER LR4 HSE

Includes LR4 content as well as:

- Xenon headlamps with LED signature and daytime running lights (DRL) and headlamp powerwash jets
- Heated powerfold exterior mirrors
- 19 inch seven-spoke 'Style 703' alloy wheels
- Hard disk drive navigation system**
- Passive Entry
- Front park distance control with front visual display*
- Seven-seat Comfort Package
- Rear climate control.

LAND ROVER LR4 HSE LUX

Includes HSE content as well as:

- Side fender vents in Atlas
- Body colored door handles
- White Silver tow eye cover
- 19 inch seven split-spoke 'Style 704' alloy wheels
- Interior mood lighting
- Power adjustable steering column
- Front center console with cooled cubby box
- Meridian™ Surround Audio System (825W) with 17 speakers including subwoofer
- Premium Leather Package
- Climate Comfort Package.

(8) Only available with Grand Black Lacquer trim finisher (9) Only available with Straight Grain Walnut trim finisher.

**Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

BLACK DESIGN PACK

Personalizing the exterior

The optional Black Design Package has its own special character. The exterior sports full length Satin Black roof rails and Narvik Black mirror caps and door handles. The Narvik Black grille with bright insert, Black fog lamp bezels, Black 'LAND ROVER' hood and tailgate badging with no engine or derivative badge add to the design to give the vehicle a more contemporary feel. A moulded Anthracite tow eye cover and a choice of 19 inch seven split-spoke Black alloy wheels or 20 inch five split-spoke Black alloy wheels complete the look.

Grille in Narvik Black

Fender vents in Narvik Black

19 inch seven split-spoke Black alloy wheel*
'Style 702'

20 inch five split-spoke Black alloy wheel

Please note: When choosing vehicles fitted with specific wheel and tire combinations or optional wheels and tires, your intended use of the vehicle should be considered. Wheels with larger diameters and lower profile tires may offer certain styling or driving benefits, but may be more vulnerable to damage. Please discuss your requirements with your Land Rover Retailer.

GRAINED LEATHER
Available on LR4 and HSE

WINDSOR LEATHER
Available on HSE LUX

Beautiful materials, flawless execution

The levels of craftsmanship and finish in Land Rover LR4 are without compromise. Sophisticated colorways and a choice of fine leathers help create your ideal space. Whichever you choose, it will be an exemplary expression of your tastes.

TRIM FINISHER CHOICES

It's those final touches that can make the overall effect even more appealing. That's why there's a choice of finishers available including Straight Grain Walnut and Grand Black Lacquer. These apply to each of the four doors and down through the central area of the fascia.

STRAIGHT GRAIN WALNUT

GRAND BLACK LACQUER

INTERIOR SEATS OPTIONS

60:40 five-seats

The standard 60:40 five-seat option features two rows with three comfortable seating positions and full size headrests.

Within all seating configurations all row two outboard seats feature LATCH child seat anchorage points. The flexible seating configurations are demonstrated on page 60.

Seven-seats

With seven full size adult seats, this optional configuration includes the 35:30:35 seat formation allowing for improved access into the third row seats and numerous folding combinations, including the ability to fold and store the second row completely flat.

INTERIOR SEATS OPTIONS

With the capability to transport the driver, six passengers and their luggage with ease, Land Rover LR4 is every vehicle you'll ever need.

The flexible, versatile layout provides a configuration to suit almost every conceivable use – especially as the second and third rows* can be folded independently of each other.

MONDAY: AIRPORT

THURSDAY: FOOTBALL PRACTICE

LAND ROVER APPROVED ACCESSORIES

Land Rover LR4 is so capable and adaptable it can get straight to work across a huge variety of vastly differing terrains, conditions and roles. Even so, some owners want to add their own stamp of individuality by tailoring their Land Rover LR4 to their specific needs with a range of stylish, practical accessories that are tough, versatile and bring an opportunity for personalization to Land Rover LR4. These accessories can be added at any stage during the vehicle's life – not just when it's new. Naturally, Land Rover Approved Accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle.
