

Optional equipment shown.

A Lexus CT is shown from the front-left, parked on a checkered tile floor. The car is dark, and its headlights are on. The background is a modern building with a large, curved, metallic-looking wall. The scene is lit with green light, creating a futuristic or eco-friendly atmosphere. The text "the CT. the black sheep of green." is overlaid on the image.

In ECO mode, the throttle response is modified and climate control is optimized for efficiency. In EV¹ mode, the CT can run on battery power alone for short distances, at low speeds under certain conditions. Because the gasoline engine is not engaged, noise is minimized and emissions are eliminated. Depending on driving conditions, both settings can noticeably reduce fuel consumption.

a car that changes everything.
even the way you hear.

The CT features the world's first automotive speakers constructed with bamboo charcoal-based resin. The innovative design doesn't just make them lighter, it also makes them sound better. With the available 10-speaker system, sound quality is further enhanced with a Class D amplifier that uses 50% less power and is 26% lighter than a conventional one. Specifically tuned to the acoustics of the CT's quiet cabin, it offers exceptional performance at all volume levels.

SPECS

The available Pre-Collision System (PCS)¹² visually and audibly alerts the driver of a potential frontal impact.

The system determines a collision is imminent and proactively retracts the front seatbelts and prepares Brake Assist.¹⁸

If the driver forcibly presses on the brake pedal, Brake Assist¹⁸ provides additional braking force.

If the brake pedal is not pressed, the brakes are automatically applied to help reduce impact speed.

it does more than
make waves,
it uses them.

Utilizing advanced radar technology, an available Dynamic Radar Cruise Control system can help maintain a constant speed or pre-set following distance from a vehicle traveling ahead. And, the CT is the first in its class to offer an available Pre-Collision System (PCS)¹² that's designed to detect potential front collisions and take measures to help reduce impact damage.
