

THE FIRST-EVER

LC500

LC500

THE DEFINITION OF DEFINING.

The LC 500 represents much more than a cutting-edge, high-performance coupe. It is a powerful expression of everything that is possible when you combine a visionary dream with a unique philosophy and an unforgiving standard. Everything counts. Because everything translates into the feeling you experience behind the wheel down a straight, around a curve or listening to the engine rumble in your driveway. The feeling has to be nothing short of amazing. That's why the LC 500 epitomizes everything Lexus stands for. It reflects our past but, most importantly, it will define our future.

THE DEFINITION OF AWE-INSPIRING PERFORMANCE.

The LC 500 evokes a driving experience so visceral it's almost beyond words. Engineered to awe, the LC 500 is powered by a 471 hp naturally-aspirated, all-aluminum, 5.0-litre V8 engine mated to the first-ever 10-speed, direct-shift automatic transmission capable of accelerating from 0 to 100 km/h in 4.5 seconds flat. Near-perfect 50-50 weight distribution combined with a purpose-built, light-weight, high-tensile steel chassis deliver incredible stability through corners. Intake vents on either side of the aerodynamic body reduce drag while channeling the speeding air current to enhance traction. Every component and innovation in the LC 500 is dedicated to elevating the driving experience. When it comes to creating awe, there can be no compromise.

- ▶ Dual intake vents improve traction, handling and efficiency
- ▶ 32-valve, V8 engine designed to perform at high RPMs
- ▶ 10-speed, direct-shift automatic transmission shift-times rival a dual-clutch
- ▶ Light-weight, high-torsion chassis provides greater rigidity than LFA supercar
- ▶ 0 to 100 km/h in 4.5 seconds

LC 500

EXTERIOR DESIGN

THE DEFINITION OF STUNNING BEAUTY.

The battle between beautiful form and spectacular function is a never-ending struggle. The LC 500 is a shining example of a luxury performance coupe that achieves both. Its distinctive low stance is a direct result of the need to lower the centre of gravity to reduce body-roll in corners. An ingenious use of alloy and carbon fibre means the breathtaking body shape also achieves a near-perfect 50-50 weight distribution necessary for optimal cornering. Unique forged 20" aluminum wheels wear tires made specifically for the LC 500 because standard wheels would compromise either aesthetic or capability. Guided by our L-Finesse design philosophy, triple-layered headlight and tail light configurations provide superior illumination with definitive Lexus style. The list goes on. Stunning design: Meet awe-inspiring performance.

LC 500

INTERIOR DESIGN

THE DEFINITION OF PURE OPULENCE.

Purists will appreciate that the LC 500's cockpit is built, first and foremost, around what is most essential to the performance driver: the road ahead. Stunning, easy-to-read, animated LED instruments minimize distraction. The steering wheel with magnesium-alloy paddle shifters lets you feel and respond to the road instantaneously. The driver's seat is positioned so your hip bone is aligned with the midpoint of the car, helping maintain the near-perfect 50-50 weight distribution and exceptional handling capabilities. No detail is too small. Luxurious materials are hand-crafted in the Japanese Takumi tradition. Supple leather, Alcantara suede and wood trim indulge your senses of touch and sight. All while the LC 500's remarkable performance dotes on your sense of excitement.

LC 500

HYBRID

THE DEFINITION OF ELECTRIFYING HYBRID PERFORMANCE.

Thrilling, inspiring and breathtaking run on many fuels. The LC 500h is a case in point. Capable of accelerating from 0 to 100 km/h in under five seconds, the LC 500h is powered by a 3.5-litre V6 engine with total system output of 354 hp. From a standing start the electric motor instantly provides an abundance of torque and acceleration then seamlessly switches to the naturally-aspirated engine when more horsepower is demanded. The LC 500h offers the agility and visceral driving experience synonymous with its non-hybrid sibling. Which is hardly surprising when you consider that the hybrid drivetrain has been perfected with the same unflinching commitment to performance. Hybrid or gasoline, prepare to be electrified.

THE DEFINITION OF COMPLETELY CONNECTED.

The LC 500 with Lexus Enform vehicle technology makes every journey richer. Intuitive capabilities include Destination Assist that puts a live agent at your beck and call 24/7. Need directions? Seeking restaurant or hotel recommendations? Curious about sights to see? Just ask the agent. For peace of mind, Safety Connect is always by your side with roadside and emergency assistance. Better yet, Enform's App Suite with voice activation hosts a world of information and entertainment options. Why settle for a trip when you can experience a journey?
