BEHOLD THE MOST POWERFUL LINCOLN YET

Aviator Grand Touring² is engineered to thrill. It brilliantly blends the power of a Twin-Turbocharged 3.0-liter V6 engine with that of a battery-powered electric motor to offer you nearly instantaneous torque. Its exhilarating output is channeled to the road via Adaptive Steering and Intelligent all-wheel drive. And it's easy to charge your Aviator Grand Touring if you wish, using either a Level 1 or Level 2 charging cord. A unique grille design and your preference of 20" or available 21" wheels enhance its stunning elegance. Experience a flowing sense of power in Aviator Grand Touring.

THRIVE WITH LINCOLN DRIVE MODES

Aviator puts the power to adapt right at your fingertips. Simply turn the knob to select a Lincoln Drive Mode, and the system adjusts suspension settings, ride height, steering, shift points and more to help provide a remarkable driving experience. In addition to the 5 main modes, Grand Touring models also feature a "Preserve EV" mode that can save stored energy for use later and help recharge the vehicle up to as much as 75%, as well as a "Pure EV" mode that offers a quiet, all-electric drive well-suited to your shorter trips around town.

TURBOCHARGE YOUR TRAVELS

Treat yourself to one of the most powerful and compelling engines in the Lincoln lineup: the Twin-Turbocharged 3.0-liter V6 that gives Aviator best-in-class standard 400 horsepower and 415 lb.-ft. of torque.¹ This gasoline direct-injected engine is driven by your choice of rear-wheel drive or Intelligent all-wheel drive.² And it's mated to the 10-speed SelectShift[®] automatic transmission, which can adapt in real time, engaging the right gear at the right time to deliver the performance you seek.

ILLUMINATE A NEW PATH

See things in a whole new light with the groundbreaking technology in the Illumination Package. Adaptive Pixel LED Headlamps use Speed Dependent Lighting to provide additional light, and spread it more widely at slower speeds to emphasize the area around and directly in front of the vehicle. Their Adaptive Dynamic Bending can even illuminate an upcoming curve before you steer into it. This enlightening package also includes the illuminated Lincoln Star on the grille.

GLIDE WITH EFFORTLESS GRACE

Imagine if every stretch of road could feel freshly paved. In Aviator, it can, thanks to the advanced technologies in the Dynamic Handling Package. Adaptive Steering helps optimize steering response at all speeds. Adaptive Suspension with Road Preview helps Aviator detect upcoming road irregularities, then carry you comfortably over them. Air Glide Suspension optimizes the vehicle's ride height and spring rates as your load and operating conditions change. With the Dynamic Lower Entry feature activated, the vehicle appears to “kneel” as you approach, graciously lowering by 50 mm to ease your entry. In Deep Conditions mode, it raises 30 mm above normal ride height to improve ground clearance. In Excite mode, it lowers to increase aerodynamics. Quite simply, this system helps Aviator deliver the most gliding ride experience of any vehicle in the Lincoln lineup.
