THE 2021 E-CLASS

Can one automobile be all things to all people? Maybe not, but one car has been coming closer to it for generations — its own, and perhaps even generations of your family, too. Truly innovative, perpetually modern, and equally sporty and elegant, the E-Class also excels at influencing what all cars might someday be. While satisfying its own driver so deeply and extensively, it feels like you're all things to it.

KEY FEATURES

There's only one nameplate in today's market that offers you a choice of sedans, wagons, coupes and cabriolets. And yet it's the leadership every E-Class has in common that makes them like no other car.

LUXURY

08

64-color LED ambient lighting

Heated power front seats with 3-position memory, ventilation* and/or massage*; split folding rear seat

AIRSCARF® and AIRCAP® systems (cabriolets)

KEYLESS-GO® with hands-free trunklid or liftgate

Burmester® surround sound*

A wide range of upholstery and trim options*

PERFORMANCE

09

Inline-4 turbo, inline-6 turbo with EQ Boost Integrated Starter-Generator (ISG), and AMG V8 biturbo engines

Rear-wheel drive, 4MATIC® all-wheel drive, or AMG Performance 4MATIC+ all-wheel drive

18" to 20"* alloy wheels¹

DYNAMIC SELECT drive modes

Selective-damping suspension, AIR BODY CONTROL®, or AMG Sport Suspension based on AIR BODY CONTROL

SAFETY

10

Blind Spot Assist, rearview camera, PRE-SAFE® with PRE-SAFE Sound hearing protection technology

Surround View System and PARKTRONIC with Active Parking Assist*

Intelligent Drive* driver assistance suite, including Active Distance Assist DISTRONIC®, Active Steering Assist, Active Brake Assist w/Cross-Traffic Function, Active Lane Change and Speed Limit Assists, PRE-SAFE® PLUS, Route-based Speed Adaptation

TECHNOLOGY

10

Dual 12.3" digital instrument cluster and central multimedia touchscreen, capacitive steering wheel with Touch Control Buttons, console touchpad*

Apple CarPlay™ and Android Auto

Mercedes-Benz User Experience (MBUX) with "Hey, Mercedes" voice assistant; MBUX gesture control*

Mercedes me connect featuring smartphone app with Remote Start, 4G LTE WiFi,* and more²

TOMORROW, IT'LL STILL BE LIGHTING THE WAY

For more than half a century, the car known now as the E-Class has been setting the pace of progress—not just in the segment it created, but across the entire industry. It's introduced countless innovations in safety, performance and luxury that have gone on to become standards for all cars. It's paired deep character with a wide span of choices: Progressive power, from four, six or eight cylinders. Solo or twin turbos. Two or all wheels driving. Multiple ways to boost torque electrically. And a diverse roster of models: The sedans that redefined luxury with a sporty edge decades ago. The only pillarless coupes in their competitive set. Four-seat, four-

season soft-top cabriolets. And wagons whose leadership has earned them a loyal following. For 2021, the E-Class reaffirms its strongest attribute: continual advancement. There's a new virtual assistant that can respond to your natural voice. New technology to make driving safer, smoother and less stressful. Dramatically fresh styling from grille to taillamps. There's even a new twist on the versatile wagon—pairing all its refinement with a heightened sense of adventure. The E-Class has been inspiring its own driver for generations—and inspiring future generations of other cars—both in the same core way: By being like no other car today.

2021

TOTAL DEVOTION TO HOW IT ALL FEELS

Some people like to work alone, while others thrive on teamwork. The people who create and craft the E-Class do both. It's apparent in every detail, and in the way they come together. Wood trim is finished by hand. Upholstery is impeccably stitched. Satin aluminum switches intrigue your eye, and then they reward your touch. Dash, console and doors create

a flowing sculpture by day, a mood-lifting light show by night—thanks to 64 colors of ambient lighting you can change, pair or even sequence. You can also opt to enjoy heated armrests, or a soothing “hot stone” massage, or surround sound whose speaker grilles please eye and ear alike. In an E-Class, every detail, and their sum, is yours to savor—and then some.

LUXURY HIGHLIGHTS

Heated, ventilated* and massaging* power front seats, each with 3-position memory

64-color LED ambient lighting with multicolor themes and illuminated dash vents

Dual-zone climate control with dust, pollen and odor filters; cabin-air ionizer and fragrance*

Burmester® Surround Sound* or High-End 3D Surround Sound (AMG sedans and coupe)*

KEYLESS-GO® and electronic trunk closer with HANDS-FREE ACCESS, soft-close doors*

MB-Tex, DINAMICA, leather, Nappa leather or *designo* Nappa leather upholstery*

AIRSCARF® neck-level heating (cabriolets)

Power tinted glass sunroof or Panorama roof* (sedans, coupes, wagons), or triple-layer “acoustic” power soft top (cabriolets)

*Optional or not available on some models. Please see back of brochure.

PASSION IN EVERY WAY IT MOVES YOU

What's behind the grille of an E-Class can propel you forward with confidence, even glee. What's behind the Star in that grille runs even deeper. It's a drive to accelerate progress itself—to enhance efficiency, surefootedness and comfort without compromising performance or pleasure. Engines—all turbocharged, some electrified—respond to the times, yet in the

moment. All-wheel drive is available in three forms—all agile, all light in weight, and each tailored to the personality of specific models. Chassis engineering harmonizes comfort and handling: selective damping that can instantly firm up in corners, or adaptive air suspensions. The performance you'll get out of an E-Class feels a lot like the passion that went into it.

PERFORMANCE HIGHLIGHTS

Engine: 255-hp turbo inline-4 (E 350), 362-hp inline-6 turbo w/electric EQ Boost (E 450), AMG-enhanced 429-hp inline-6 turbo w/electric EQ Boost + electric auxiliary compressor (AMG E 53), or handcrafted 603-hp AMG V8 biturbo (AMG E 63 S)

9-speed automatic transmission with shift paddles: 9G-TRONIC, AMG SPEEDSHIFT® TCT (E 53) or AMG SPEEDSHIFT MCT (E 63 S)

DYNAMIC SELECT driving modes, including Comfort, Sport and customizable Individual

Rear-wheel drive, 4MATIC® all-wheel drive, or fully variable AMG Performance 4MATIC+*

18" to 20"* alloy wheels¹

4-wheel multilink suspension with selective damping, AIR BODY CONTROL®, or AMG Sport Suspension based on AIR BODY CONTROL*

*Optional or not available on some models. Please see endnotes at back of brochure.

Mercedes-Benz innovation is more than a preview of what’s next. It also looks out into the future – sometimes mere milliseconds ahead – all to improve the outlook for yours.

21

MORE THAN A TOUCH MORE HUMAN

Artificial intelligence delivers real benefits in an E-Class. Just say “Hey, Mercedes” and talk normally to operate features, like “I’m cold” to turn up the heat, or “I could use a coffee” for the navigation to search. Augmented video* can show your next turn live on-screen, overlaid with guiding graphics. The dual 12.3" displays include reconfigurable instruments and a central touchscreen. Touch controls on the steering wheel and console, plus gesture control,* let you get things done without saying a word. Traditional buttons are more responsive, too: Set the temperature, and the ambient lighting confirms with a red or blue flash. And not only is it all easy to learn, it can also learn your habits and get even smarter over time.

TECHNOLOGY HIGHLIGHTS

- Mercedes-Benz User Experience (MBUX) with natural voice assistant, touchscreen, console touchpad, and steering-wheel Touch Controls
- Dual 12.3" displays: reconfigurable digital instrument cluster, multimedia touchscreen
- MBUX Interior Assistant (gesture control)*
- MB Navigation⁹ w/augmented video* using live imagery of surroundings
- Apple CarPlay™ and Android Auto,¹⁰ multiple USB-C ports¹¹; wireless charging*
- Dashcam*; Head-Up Display*¹²
- LED headlamps and taillamps; LED Intelligent Light System w/Ultra Wide Highbeams*

MORE PERCEPTIVE THAN THE EYE

Even the most attentive human cannot see all directions, all the time. So an E-Class employs a superhuman team of radar, cameras and other sensing technologies. They can watch ahead to help prevent collisions, or take fast action to prepare the restraint systems—and pre-trigger your ears’ natural defenses for loud noises—if a crash is unavoidable. Available systems can park hands-free, or alert you if it’s not ok to open a door after you do. Adapt your cruise speed to posted limits, or slow for toll plazas. Let you change lanes by tapping a turn signal. Help keep you from making a turn when traffic is oncoming. And more. The virtual eyes of an E-Class have your back.

SAFETY HIGHLIGHTS

- Radar-based Active Brake Assist frontal collision mitigation³; Blind Spot Assist⁴
- PRE-SAFE® w/hearing protection technology⁵
- Rearview camera or Surround View System*⁶; PARKTRONIC w/Active Parking Assist*⁷
- Driver Assistance Package,*⁸ including Active Distance Assist DISTRONIC® cruise control; Active Steering Assist; Evasive Steering Assist; Route-based Speed Adaptation; Active Brake Assist w/Cross-Traffic Function; PRE-SAFE PLUS with side* and rear-impact preparation; Active Blind Spot Assist w/Exit Warning; and Active Emergency Stop, Lane Change, Lane Keeping, and Speed Limit Assists

*Optional or not available on some models. Please see endnotes at back of brochure.

OPTION PACKAGES

While all 13 E-Class models are generous with standard features, a carefully curated menu of options and packages lets you tailor the E-Class of your choice into the car of your dreams.

designo EXCLUSIVE LEATHER PACKAGE

designo Macchiato Beige/Saddle Brown Nappa leather upholstery (sedans, wagons, except E 63 S)

designo Macchiato Beige/Titian Red Nappa leather upholstery (coupes, cabriolets)

designo floor mats

SEDAN

It's been 135 years since Karl Benz was granted the patent for his "Motorwagen," or what we now know as the car. Had he stopped there, his name might still be etched in history. But as an engineer, history was not something to mark but to make, over and over. It's why Mercedes-Benz continues to reinvent the automobile, and drive it somewhere new. In the E-Class, the pioneering spirit traces to its very origins—a revolutionary form of luxury that, perhaps for the first time, combined clean styling, sensible size, advanced safety, and a sporty demeanor. Generations of engineers keep taking the E-Class to new forefronts of innovation, and you get to

come along. Features like a virtual voice assistant, 64-color ambient lighting and gesture control* may feel like a ride to tomorrow. But an E-Class wants you to enjoy your ride well into the future. Its appointments are crafted to enthrall yet also endure. Its lines are athletic yet elegant. Its technology is engineered to keep advancing: The cockpit assistant can learn your ways. You can change the ambient lighting to suit your mood, or set one. And if you've never enjoyed options like acoustic glass or a "hot stone" massage in a car before, you'll probably never want to drive without them again. The E-Class aims to make time well spent. By being ahead of it.

WAGON
WAGON
WAGON
WAGON
WAGON

For years, the station wagon was a fixture of the American landscape. Clad in 18 feet of faux wood, it was inexplicably designed as if people bought sheet plywood every weekend. But then came a new kind of wagon: It fit easily in a garage, but could seat seven. Self-leveling suspension paired load-lugging ability and sport-sedan agility. It helped protect its most precious cargo—you—not with cargo-ship dimensions but with advanced safety systems. That game-changer was—and still is—the E-Class Wagon, and it's earned a diverse yet fiercely loyal fan base that's made even vintage examples highly coveted. Alas, as drivers migrated to SUVs, most

wagons have reached the end of their road. But in the new E 450 All-Terrain Wagon, the journey continues—and even gets more exciting—where life's traditional highways end. It's emboldened from its grille to its hands-free liftgate with rugged cladding and wheel-arch flares. Air suspension lets you adjust the ride height. Turbo and electric torque is sent to all four 19" or 20"* wheels. DYNAMIC SELECT adds two off-road programs. A new virtual voice assistant highlights a cabin that can seat seven or take on more cargo than many SUVs. It's also where you'll find the wood trim—it's real, and finished by hand. Because it's an E-Class. On any surface.

Ask someone to define beauty or art, and the best answer you might get is “I know it when I see it.” But often they’re best exemplified by what you can’t see. Case in point: the E-Class Coupe. Freshly restyled for 2021, it captures your attention without screaming for it. Its reshaped grille is still iconic, not comically outsized. Free of clichéd swooshes and slashes, its body feels carved by the wind to hold the road, because it is. In a master-stroke of engineering and styling teamwork, its most artful detail is defined by its invisibility: its pillarless profile, with no framework interrupting its four power-retractable side windows. Even fully closed, you get

to enjoy panoramic vistas no other car in its class offers. A power Panorama roof adds yet another dimension to its airy openness. And yet it offers a Mercedes-Benz level of safety, perhaps because no other automaker has continually built pillarless coupes for 60 years. Its refined 4-seat cabin is yet another ever-advancing tradition. A long wheelbase affords generous rear legroom. Front seat belts retract out of your way for rear-seat entry, then extend on clever arms for easy fastening. Then let the turbo- and electric-boosted inline-6 whisk you away with its seamless torque. How do safety and power unite so beautifully? That’s the art of the E-Class.

E-CLASS CABRIOLET

Wander through a car museum or concours d’elegance and you’re sure to see a number of vintage open-air Mercedes-Benz models on display. Should you study their countless technical and stylistic nuances, a theme will emerge: Every “classic” started life as a highly advanced automobile. The E-Class Cabriolet carries on this tradition, with the aim of becoming the next “modern classic” in its legendary lineage. Its design is freshly emboldened yet timelessly elegant. Its cabin treats four adults to finely crafted wood and leather, groundbreaking innovations and generous room, even in the rear seats. Its engine thrusts the classic inline-6 into a new

age with turbocharging, fully beltless design, and EQ Boost electric assist. The age-defying spirit of its design extends to a season-defying sensibility that makes it a convertible to be enjoyed all year long: Available 4MATIC all-wheel drive. An “acoustic” soft top that offers coupelike comfort, or can vanish beneath a sculpted deck in 20 seconds. A system of automatic draft stops to calm cabin turbulence. And a warm-air virtual scarf in each front seat to extend your top-down driving season. The temptation to save an E-Class Cabriolet until it’s a collectible is great. The enticement of savoring it year-round, for years to come, is greater. Maybe irresistible.

If the battle of performance, efficiency and luxury feels like a triple threat, you're in for a triple treat with the AMG E 53 Sedan, Coupe and Cabriolet. It all starts behind the vertical bars of their AMG grilles: An advanced, beltless reinvention of the inherently balanced inline-6, with three kinds of boost. A twin-scroll turbo helps pump out 429 hp and 384 lb-ft of torque. An EQ Boost Integrated Starter-Generator can add gas-free electric torque of its own, for quicker takeoffs and nearly seamless ECO Start/Stop. And an electric auxiliary compressor hurries up turbo spooling. AMG Performance

4MATIC+ expertly sends torque to all four 19" or 20"* AMG wheels—from a 50/50 balance to 100% rear-drive—based on driving dynamics. AMG DYNAMIC SELECT lets you fine-tune performance settings via a console button or new standard controls on the AMG Performance steering wheel. With five modes—one to set up as you like—you can also dial in the adaptive air suspension. Along with 3-stage damping, it can hunker down at speed to enhance stability and help return up to 29 highway mpg.¹⁶ Agile, innovative and seductive, the AMG E 53 models prove that good things do come in threes.

What the racers of Mercedes-AMG learn on the track finds its way into the streetgoing models through a process some automakers might find unfathomable: Direct involvement. The engineers, technicians and driving champions—more succinctly, the racers—are also hands-on members of the development team for every new AMG vehicle, component and system. Crowning each E 63 S V8 is the signature of the single master who crafted it by hand. Its “hot inside V” twin turbo layout, CAMTRONIC valve lift control, friction-slashing NANOSLIDE® cylinder walls, magnetorheological dynamic engine mounts, and staggering 603 hp output are

all born from competition. So is AMG Performance 4MATIC+, whose variable torque (up to 100% rear-drive) proves that all-wheel drive can improve agility and acceleration. Every element, from its multiclutch 9-speed and freeflow exhaust to its adaptive air suspension, collaborates as a multimode, multitiered orchestra of performance. Their symphony of sensations—physical, audible and euphoric—is on par with exotic sports cars. But it’s delivered to your hands—via a new twin-spoke capacitive steering wheel—in the body of a sumptuous sedan or seductive wagon. That they happen to be two of the fastest cars on the road didn’t just happen.

OWNERSHIP & EXPERIENCE

DAILY COMMUTE OR ROADTRIP, THOUGHTFUL TECHNOLOGY HELPS MAKE ANY JOURNEY A JOY.

Mercedes me connect puts a network of features in your car, on your smartphone, and in the digital world around you.² And all of them collaborate to help keep you on track, on time, and feeling you're on top of your real world.

- You can remote-start your car, locate where it's parked, configure vehicle settings from your phone, and more.
- You can look up destinations on your phone and send them to the MB Navigation system in your car.
- You can offer WiFi to your passengers, and enjoy audio from all over the planet with TuneIn Radio.

Models with Car-to-X Communication can share info on traffic, road hazards and other conditions with each other, via a central reporting base. So you might find out about a tie-up on your route before you get caught up in it.

The map database for your car's MB Navigation system can be updated in your driveway, over the air, up to twice a year—with no need to bring it to the dealership.

WHEREVER YOU DRIVE, THERE'S A TEAM OF SUPPORTIVE PEOPLE LOOKING OUT FOR YOU.

Mercedes-Benz was the first automaker to introduce its own Roadside Assistance Program in the US. For more than 35 years, customers have called on—and counted on—factory-trained experts in times of need.³⁰

- A button in your car can connect you. If an air bag or seat-belt tensioner is activated, your car can place the call on your behalf, and even transmit your location.
- They can send help—usually a trained dealer service technician—to your location, even for a jump-start.
- If you see a warning light, so can the experts, and they can often help diagnose trouble over the phone.

Your Mercedes-Benz dealer is helping make service and maintenance even more convenient, with options such as Express Service, Mobile Service, pickup and delivery, online scheduling, and contactless payment. Your dealer can tell you more about the specific benefits they offer.

YOUR MERCEDES-BENZ EXPERIENCE SHOULD ALWAYS FEEL SPECIAL.

Driving a Mercedes-Benz feels like joining a club, as well as a family. Wherever you go, you're part of a history that started with the first car, and always keeps racing ahead.

- For decades, groundbreaking innovations have protected, entertained and indulged Mercedes-Benz drivers first. While many have gone on to become the standard for all cars, you get to drive the future, today.
- From the AMG Lounge to #MBPhotoPass on Instagram, Mercedes-Benz owners have many ways to connect and interact.

Your car and your dealer are in on it, too.

- *Mercedes me* lets your car communicate its service needs to your preferred dealer.
- Your dealer can reach out to you to book an appointment or offer drive-in service.

COMMITTED TO COMMUNITY

Mercedes-Benz USA is committed to educating and empowering the next generation of diverse leaders.

To help equip them with the tools for success, MBUSA partners with two national organizations that invest in the futures of young people in communities across the country. As a Mercedes-Benz driver, you become a part of this effort to give hundreds of thousands of youth a better life today, and all of us a brighter tomorrow.

Learn more about how Mercedes-Benz USA gives back at [MBUSA.com/community](https://www.mbusa.com/community)

A nationwide network of youth sports programs, Laureus Sport for Good USA is focused on improving the health, education, employment and social cohesion of youth in underserved communities. Since 2012, Laureus USA has helped nearly half a million young people in 150 cities.

To learn more, visit laureususa.com

JOHNNY MAC SOLDIERS FUND

Johnny Mac Soldiers Fund helps honor military service and sacrifice by providing scholarships to veterans and military family members—particularly the children of our nation's fallen and disabled. Since 2014, Johnny Mac has awarded more than \$16 million in scholarships to some 2,000 students.

To learn more, visit johnnymac.org

ENDNOTES

- * Item is optional or not available on some models. See *Build Your Own* in this brochure or visit MBUSA.com for more information.
- 1 Lower-aspect-ratio tires and accompanying wheels provide substantially increased treadwear, increased tire noise and reduced ride comfort. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. These tires are not designed for use on snow and ice. Winter tires mounted on appropriately sized and approved wheels are recommended for driving in those conditions.
- 2 All *Mercedes me* services operate only where cellular and GPS signals are available, which are provided by third parties and not within the control of Mercedes-Benz USA, LLC. *Mercedes me connect assist* services, and 3 years of *Mercedes me connect* services are included at no additional charge with new-vehicle sales and leases at an authorized Mercedes-Benz dealer. Models with MB Navigation also include 3 years of over-the-air map updates (up to twice per year), 3 years of live traffic information provided by HERE Technologies, and a 1-month trial (up to 1GB) of in-vehicle WiFi and streaming audio. Subscriber Agreement is required for service to be active. Some services are only available on select vehicles. Your PIN is required to use certain services. Connection may be limited by cellular signal and other factors. Features may be introduced and updated at varying dates, and may also require a vehicle software update. Some services may be limited or restricted in some areas. Driver is responsible for complying with traffic and other laws. The *Mercedes me connect* Mobile App is compatible with Apple iPhone® models and Android-based phones, and may require a software update. See your dealer or MBUSA.com/mercedesme for details.
- 3 Active Brake Assist may not be sufficient to avoid an accident. It does not react to certain stationary or suddenly moving objects or pedestrians, may not react in certain situations where objects cannot be clearly identified, nor does it recognize or predict the curvature and/or lane layout of the road or every movement of vehicles and pedestrians ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. See Operator's Manual for system operating speeds and additional information and warnings.
- 4 Blind Spot Assist is a warning system only. Blind Spot Assist or Active Blind Spot Assist may not be sufficient to avoid all accidents involving vehicles in your blind spot and does not estimate the speed of approaching vehicles. It must not be used as a substitute for driver awareness and checking of surrounding traffic conditions. See Operator's Manual for system's operating speeds and additional information and warnings.
- 5 PRE-SAFE® closes the side windows when the system's sensors detect side movements that suggest a possible rollover or side impact. Audio/multimedia system must be turned on for PRE-SAFE Sound to operate. PRE-SAFE PLUS cannot prevent a collision, and does not alert the driver of an impending collision or system activation. It does not intervene if vehicle is backing up, and does not apply the brakes if the driver is accelerating or if Active Parking Assist is operating. When PRE-SAFE closes the side windows, a small gap is left near the fully closed position.
- 6 Rearview camera and Surround View System do not audibly notify driver of nearby objects and are not a substitute for actively checking around the vehicle for any obstacles or people. Images displayed may be limited by camera field of view, weather, lighting conditions and the presence of dirt, ice or snow on the cameras.
- 7 Parking assistance systems are not substitutes for driver attention to the immediate surroundings, as well as any people, animals or vehicles in or approaching the vehicle's maneuvering range. System cannot determine if a space is legally available or of a suitable surface for parking. See Operator's Manual for additional information, tips and warnings.
- 8 Even the most advanced safety systems may not be sufficient to avoid an accident. Please refer to more detailed information on specific systems elsewhere in this brochure, at MBUSA.com, and in the vehicle's Operator's Manual. Some systems may be optional.
- 9 While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or visual displays once the vehicle has been stopped in a safe place. Maps do not cover all areas or all routes within an area.
- 10 Apple CarPlay™ is a product of Apple Inc. Android Auto is a product of Google Inc. Device and app providers' terms and privacy statements apply. Requires connected compatible device and data plan. Apps, content and features are selected solely by their providers. Connection to apps and streaming services may be limited by the device's network connection. Data usage is routed through device and subject to fees, charges and restrictions in user's wireless plan. Vehicle's factory audio/information interface may not be used simultaneously with Apple CarPlay or Android Auto. When Apple CarPlay or Android Auto is in use, the steering-wheel voice control button accesses Siri® or Google voice recognition software for voice commands.
- 11 An adapter cable is required to connect a device with an earlier-generation USB port.
- 12 Display may not be visible with certain eyewear, including polarized glasses.
- 13 Stated rates of acceleration are estimated based upon manufacturer's track results and may vary depending on model, environmental and road surface conditions, driving style, elevation and vehicle load.
- 14 Unsecured cargo can become hazardous in a collision. Always secure cargo using the floor-mounted tie-downs.

- 15 See Operator's Manual for E 450 All-Terrain Wagon 3rd-row seating limitations. The 3rd-row seat is not available on AMG E 63 S Wagon. The 3rd-row seat is upholstered in MB-Tex with all upholstery options. Seat is black with some interior colors. Please see your dealer.
- 16 2021 EPA estimated fuel economy (city/highway) is 22/29 mpg for AMG E 53 Sedan, 21/28 mpg for AMG E 53 Coupe, and 21/27 mpg for AMG E 53 Cabriolet. Compare the estimated mpg to the estimated mpg of other vehicles. You may get different mileage depending on how fast you drive, weather conditions and trip length. For other models, please visit fueleconomy.gov or MBUSA.com.
- 17 Driving while drowsy or distracted is dangerous and must be avoided. ATTENTION ASSIST® is a warning system only. ATTENTION ASSIST and Active Lane Keeping Assist may be insufficient to alert a fatigued or distracted driver of lane drift and cannot be relied on to avoid an accident or serious injury. See Operator's Manual for system's operating speeds and additional information and warnings.
- 18 Car-to-X services are activated as part of *Mercedes me connect*. Connected services operate only where cellular and GPS satellite signals are available, which are provided by third parties and not within the control of Mercedes-Benz USA, LLC. See your dealer or MBUSA.com/mercedesme for details.
- 19 The roll bar system is designed to enhance the level of rollover protection compared to a vehicle without one. No system, regardless of how advanced, can eliminate the chance of injury in an accident. Please always wear your seat belt.
- 20 Availability of heated steering wheel or Warmth & Comfort Package may be delayed or require additional options. Please see your dealer or visit MBUSA.com. Option replaces sport steering wheel with a round design on E450 Coupe and Cabriolet.
- 21 The purchase of a new, SiriusXM®-equipped vehicle includes a 6-month introductory subscription to the SiriusXM All Access package. Eligible pre-owned vehicles equipped with SiriusXM will receive a 3-month trial subscription to SiriusXM All Access package. Trial length and service availability may vary by model, model year or trim. If you decide to continue your subscription after your trial, the plan you choose will automatically renew and you will be charged according to your chosen payment method at then-current rates. Fees and taxes apply. To cancel you must call SiriusXM at 1-866-635-2349. See SiriusXM Customer Agreement for complete terms at siriusxm.com. All fees and programming subject to change.
- 22 Wireless charging and NFC pairing available only for devices with compatible technology and size. See Operator's Manual for more information. Devices sold separately.
- 23 Active Distance Assist DISTRONIC® cruise control is not a substitute for active driving involvement. It does not adapt cruising speed in response to stationary objects, nor does it predict the curvature and lane layout of the road ahead or the movement of vehicles ahead. Active Steering Assist requires driver to hold steering wheel and be ready to steer vehicle at any time. It may not recognize lane markings in some lighting, weather and road conditions. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely.
- 24 Active Lane Change Assist is not a substitute for active driving involvement. It estimates but does not predict the curvature and lane layout of the road ahead or the movement of vehicles ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the driving inputs necessary to retain control of the vehicle. System may not detect some objects, obstacles or vehicles in the area into which the vehicle would move. See Operator's Manual for system operating speeds and additional information and warnings.
- 25 Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. Braking effectiveness also depends on proper brake maintenance, and tire and road conditions. See Operator's Manual for system operating speeds and additional information and warnings.
- 26 No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Driver's deliberate steering inputs are required to initiate the system's action, and can override its intervention at any time. See Operator's Manual for system operating speeds and additional information and warnings.
- 27 Driver is responsible for safely slowing and/or stopping vehicle at intersections, and for giving right-of-way to other drivers. System is not a substitute for driver awareness to posted speed limits and other conditions. Driver is responsible for safely operating vehicle in accordance with local traffic laws and driving conditions.
- 28 Requires power rear-window sunshade or Sun Protection Package on sedan and coupe models.
- 29 The carbon-ceramic brakes are designed expressly for high-performance braking. It is a characteristic of their materials and design that brake noise/squeal may result, along with differing brake pedal feel at lower brake temperatures compared to higher operating temperatures.
- 30 Roadside Assistance repairs may involve charges for parts, service and towing. Vehicle must be accessible from main roads. Depending on the circumstance, these services may be provided by an outside provider, courtesy of Mercedes-Benz Roadside Assistance. Restricted roadways, acts of nature and vehicle accessibility may limit our ability to provide services to you. For full details, eligibility requirements, and limitations/exclusions of Sign and Drive services, as well as the Roadside Assistance Program, please see your dealer.
