THE MORGAN 3 WHEELER

THE MORGAN 3 WHEELER

When did you last regard a journey by motor car as an adventure? The Morgan 3 Wheeler is launched to bring the fun and passion back to personal transport. Lift the safety catch from the "bomb release" starter button, hear the massive twin cylinders detonate and choose your favourite destination.

The iconic design of the Morgan Threewheeler has been updated with 21st Century technology. The powertrain is a 1910cc 'V-twin' fuel injected engine mated to a Mazda 5 speed (and reverse) gearbox. This provides smooth "get in and drive" convenience with the thrill of extreme performance.

Some things have not changed. Why change the shape when the Morgan Threewheeler still holds long distance speed records for one litre cars set in the 1930's? The pronounced aluminium bullet hull and the exposed tubular chassis are accompanied by the aeroplane profile of the car's sides. The shape is of a gentle yet powerful missile at the front leading to a beetle back tail at the rear. From the design viewpoint, the focus was set on making the car as close to an aeroplane as possible, while retaining handy extra space for driver, passenger and a holdall in the rear.

The Morgan 3 Wheeler is designed for one purpose alone, to make driving fun. A leather padded cockpit complete with aircraft instrumentation adds to the sense of flying on the road. The car seems to respond as much to thought as physical input. With an estimated 115 horsepower the motor provides maximum power at minimum revs. When coupled with a weight of less than 500kgs the 21st century Morgan 3 Wheeler provides unrivalled power to weight for it's on the road price. The time is right for Morgan to take a new look at the combination of acceleration, performance and economy. The time is right for Morgan to relaunch the 3 Wheeler.

GRAPHICS PACKS

Checkered winners bonnet

Combat bullet wounds
