

2006 PONTIAC **G6**

GMX0523 CSO SURFACE

P245/45R18

G6 is more than a new Pontiac. It is a new way of thinking. Innovation

by innovation, and detail by detail, G6 reshaped old standards to create

a new and more personal definition of performance for the 21st century.

Its design is taut and contemporary, shaped to outlast fickle twists

of style. Its responses are crisp and immediate, but always instinctive

and composed. Its functional systems are technically advanced, tuned

to feel solid and rewarding at first drive. A machine that makes the

refinement formerly exclusive to expensive imports accessible to an

entirely new group of driving enthusiasts.

06

An exclamation point to a powerful idea.

More assertive. More powerful. More advanced. The 2006 Pontiac G6 GTP is more of everything the concept is meant to be. This year, the evolution continues with the heartbreaking style of a new Sport Coupe and the new high-performance GTP series. Rest assured, the attraction is mutual.

G6 GTP COUPE SHOWN IN ELECTRIC BLUE METALLIC. GTP SEDAN SHOWN IN LIQUID SILVER METALLIC.
Some photos shown in this catalog contain optional equipment.

The element of surprise.

To be overtaken by something new is a rare event. This is one of them. Introducing the first-ever G6 GTP Sport Coupe, the latest in a line of emotionally compelling Pontiac coupes. Every line draws you in closer, flowing from one perfect arc to the next. This organic shape flexes over standard flangeless forged 18" alloy five-spoke wheels, set flush to the body sides for an unmistakably powerful presence. The performance is as athletic as its style, with a 240-horsepower 3.9L V6, an interactive, electronically controlled automatic or available 6-speed manual, and the StabiliTrak Sport stability control system. Yet its intentions remain discreet, with simple chrome accents and dual chrome exhaust tips as pleasing to the eyes as they are to the ears.

G6 GTP COUPE SHOWN IN GRANITE METALLIC.

Drawn to the edge of possibility.

A four-door in function; a sports car in practice. That's the G6 GTP Sport Sedan. Stretched over a 112" wheel-base, G6 features the fluid shapes and dramatic angles usually found only in sport coupes. While its interior dimensions give it impeccable credentials for a sedan, its attitude is far from sedate. Proven in the punishing world of Europe's fastest and most challenging roads, its underbody structure resists road inputs with the grace of machines costing several times more. This in turn creates a more balanced platform for the fully independent sport suspension, yielding polished, predictable responses, even when the road has other intentions.

G6 GTP SEDAN SHOWN IN STEALTH GRAY METALLIC.

The first four-door to own the sky.

Nowhere is the G6's refusal to compromise enjoyment for function clearer than with the available Panoramic Roof. The first and only four-panel sliding glass roof in its class, or on the North American continent, its innovative design holds multiple international patents. Significantly larger than

a conventional sunroof, one touch of the switch gives the G6 sedan the feel of open-air freedom. Tinted for comfort and tempered for safety, the scrolling sunshade and four glass panels retract sequentially in a matter of seconds. So you can share the road, and still keep the sky to yourself.

A wide-angle, low-perspective shot of the front interior of a car. The focus is on the tan leather-upholstered seats, which feature horizontal stitching and integrated headrests. The dashboard is a wraparound design with a dark, textured finish. The steering wheel is a three-spoke design. The center console has a gear shifter and handbrake. The car is parked in a city, with tall buildings visible through the windows.

All its seating is preferred.

Every touch point in the G6 is designed to stimulate your senses. The wraparound cockpit and performance seating give the driver the intimate feel of a sports car, while the long wheelbase and gently reclined rear seating help to provide exceptional passenger comfort.

SHOWN WITH AVAILABLE TAUPE LEATHER-APPOINTED SEATS.
Three-spoke steering wheel available starting May 2005.

The driving environment that repays your attention.

Take your seat and the G6 willingly conforms. With a tilt/telescope wheel, adjustable lumbar supports, the optional six-way power driver's seat, and optional power adjustable pedals, the number of potential driving positions is virtually infinite. Under way, G6's refinement is obvious. From the texture of the fabrics and optional leather appointments to the weave of the headliner, every shape is perfected and every surface is tailored to enrich your driving experience. Controls and switches work in precise harmony. Even the sounds are tuned, with advanced insulation strategically placed to minimize unwanted feedback. All the better to enjoy the optional XM Satellite Radio* and 200-watt, eight-speaker AM/FM/CD Monsoon® audio system. XM lets you hit the road without hitting any commercials, featuring 67 channels of 100% commercial-free music included in its over 150 channels of the best in music, news, sports, talk, comedy, XM Instant Traffic & Weather, and more. As if you needed any more reasons to get in and keep driving.

G6 GTP COUPE INTERIOR SHOWN WITH AVAILABLE EBONY LEATHER-APPOINTED SEATS.

*Service fees apply. Available only in the 48 contiguous United States. Visit gm.xmradio.com for details.

Larger. Smarter. Faster. Pick three.

Selecting the ideal powertrain for the G6 is easy. Just drive one. New for 2006 is a 240-horsepower 3.9L V6 with sequential fuel injection, standard and only available in the G6 GTP. Proving the adage “there’s no replacement for displacement,” its specialty is a wide power band, thanks to an advanced variable intake system. Around town, incoming air is routed through a tract tuned for maximum economy and responsiveness. Put your foot down, and a second, larger intake tract opens, while the intake valve timing is changed to an aggressive high-performance profile for a very habit-forming surge of acceleration. This two-for-one technology lets the 3.9L provide 85% of its 240 lb-ft of torque from 1600 rpm to 6000 rpm, and the kick to accelerate from 0 to 60 in 6.6 seconds. GT models feature the 201-horsepower 3.5L V6 and more standard power than Audi A4 or BMW 323i. Also new this year in the G6 is a highly refined 167-horsepower 2.4L Ecotec 16V engine. Its rating of 162 lb-ft of torque is greater than any engine of its power in the class,* for responses that feel anything but standard.

ENGINE	HP @ RPM	TORQUE @ RPM
3.9L V6 Std. GTP	240 @ 6000	241 @ 2800
3.5L V6 Std. GT; Opt. G6 Sedan	201 @ 5600	223 @ 3200
2.4L L4 16V Std. G6 Sedan	167 @ 6300	162 @ 4500

*All class claims based on J.D. Power and Associates 2005 Entry Midsize Car class and latest information available at the time of printing.

For once, transmissions that engage the driver.

There is a difference between riding in a car and truly controlling it. The G6 has a choice of transmissions that define the difference. Standard in both the GT and GTP is an electronic automatic with driver-interactive manual shift mode. On the way to work, it is precise and responsive, automatically adapting to your driving style. On the way home, it is a driver-selectable manual, with tap-up/down shifting that lets you click through the gears with a flick of the wrist. The new 6-speed manual available in the GTP has ratios chosen to extract maximum performance from the engine and maximum enjoyment for the driver. If you've never driven a manual before, one test drive will make you wonder why you waited so long.

Responds at the speed of thought.

G6 suspension and braking systems are designed to keep you ahead of the curves. Even its basic design is oriented to handling and control, using the inherent stability of a wide track and long wheelbase to the driver's advantage. Generously sized four-wheel disc brakes with ABS are standard on GT and GTP, with front rotors vented to resist fade. The suspension is fully independent, with direct-acting stabilizer bars that control body roll and keep each wheel squarely in contact with the road. Ride motion is managed by the G6's robust structure. Built with integral reinforcing brackets and a large magnesium cross beam, G6 resists road-induced bending and twisting as stoically as some of the finest performance machines from abroad. Which makes it right at home on the most challenging roads you can find.

It is impossible to overrate control.

One of the most important things a car can do is help the driver handle demanding situations with added confidence. That is why every G6 model has safety technologies to help the driver instinctively respond to the challenges of the road. The Electronic Traction System (ETS) is standard on G6. It electronically compares vehicle speed to wheel speed, and if it senses a loss of traction, reduces power to restore

grip. In the GT, the Traction Control System (TCS) is standard, adding braking assist for more control. New this year on GTP is StabiliTrak, one of the world's most advanced vehicle dynamic control systems. It constantly measures vehicle forces, and if it senses an impending loss of control, selectively manipulates braking and accelerator inputs to help you — and your G6 — maintain composure.

Travel with your own security detail.

For the rare situation when events are beyond control, G6 is layered with multiple safety systems. It has a robust steel safety cage body structure, with side protection beams, special welded reinforcements, and a stout magnesium cross-bar for exceptional rigidity. Front and rear crush zones are engineered to evenly disperse impact energy, while the hydroformed steel lower engine cradle surrounds the powertrain to minimize passenger compartment intrusion. Safety belt pretensioners and driver/passenger air bags* with smart deployment suppression are standard in all models; upper and lower side air bag restraints, the roof rail air bag, and seat-mounted side air bag to protect the head and upper body are optional.

GT and GTP models offer one-year of OnStar® Safe and SoundSM service. OnStar is a fully integrated in-vehicle system offering an unparalleled combination of safety, security, and convenience features, plus unlimited access to highly trained OnStar Advisors. OnStar also provides access to the added convenience of built-in, Hands-Free Voice-Activated calling.** Your dealer has all the information about subscription plans, services, and prices, or click on onstar.com.

*Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. See the Owner's Manual for more safety information.

**Prepaid calling charges apply. Available in most markets. OnStar voice recognition system may not work with all voices. See back of the catalog and go to onstar.com for more information.

The future is unfolding before you.

There was a time when convertibles lived at the mercy of the weatherman. This was before the first-ever G6 Convertible. Coming in early 2006, it is the first in its class with a fully automatic retractable steel hardtop, and one of the few outside of premium ultra-luxury roadsters. With the flip of a switch, its stunning steel roof folds away to reveal a sleek four-seat roadster. And just as quickly, it banishes the old convertible compromises to history. Click on pontiac.com to receive regular updates and information.

IMPORTANT WORDS ABOUT THE CATALOG We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models, and availability. Specifications, dimensions, measurements, ratings, and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing (April 2005), please check with your Pontiac dealer for complete details. Pontiac reserves the right to lengthen or shorten the model year for any product for any reason, or to start and end model years at different times.

NEW-VEHICLE LIMITED WARRANTY This warranty is for GM vehicles registered in the U.S.A. See your Pontiac dealer for terms and conditions.

Covered for three years/36,000 miles, whichever comes first:

- The complete vehicle
- Tires
- Towing to your nearest Pontiac dealership
- Cosmetic corrosion resulting from defects
- Repairs made to correct any vehicle defect
- No charge for most warranty repairs

Covered for six years/100,000 miles, whichever comes first:

- Rust-through corrosion

CORROSION PROTECTION Pontiac vehicles are designed and built to resist corrosion. All body and sheet metal components are warranted against rust-through corrosion for six years or 100,000 miles, whichever comes first. Application of additional rust-inhibiting materials is not required under the corrosion coverage and none is recommended. See your Pontiac dealer for terms of this limited warranty.

AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New-Vehicle Limited Warranty. The special body company, assembler, equipment installer, or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems, or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials, or workmanship of any alterations by such suppliers.

UPDATED SERVICE INFORMATION Pontiac dealers receive useful service bulletins about Pontiac products. You may purchase them from Helm Incorporated by calling 1-800-551-4123 or by visiting www.helminc.com.

ENGINES Pontiac products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Pontiac products may also be used in other GM makes and models.

ASSEMBLY Pontiac vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries, or suppliers to GM worldwide. We sometimes find it necessary to produce Pontiac vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

ONSTAR OnStar services require vehicle electrical system and wireless service to be available and operating for features to function properly. OnStar relies on existing emergency service providers as well as wireless and satellite technologies and is subject to their limitations. The U.S. Federal Communications Commission (FCC) ruled that wireless carriers will no longer be required to support the analog wireless network after February 16, 2008. As of January 1, 2008, OnStar plans to offer service only through equipment that operates on the digital network, which may require the purchase of a system upgrade. Call 1-888-4ONSTAR (1-888-466-7827), see your OnStar Owner's Guide, or visit onstar.com for system information and details.

A NOTE ABOUT CHILD SAFETY Always use safety belts and proper child restraints, even in vehicles equipped with air bags. Children are safer when properly secured in a rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. See your vehicle Owner's Manual and child safety seat instructions for more information. Pontiac supports the National SAFE KIDS Campaign, a grassroots program dedicated to reducing unintentional childhood injuries.

ENHANCE YOUR OWNERSHIP EXPERIENCE The Owner Center at My GMLink is a free online service that helps you make the most of your vehicle ownership.

- Sign up for e-mail reminders about service visits
- Keep an online history of services performed
- Read your Owner's Manual, warranty, and more online
- Receive only the recall notices that apply to your vehicle
- Watch do-it-yourself videos and much more

Register today at www.mygmlink.com.

For more information on G6, visit pontiac.com or call the Pontiac Customer Assistance Center at 1-800-2 PONTIAC.
