With dual wide-band radar sensors in the taillamps, the available BSM⁸ with Rear Cross-Path Detection⁷ scans blind spots behind the vehicle to help ensure safe maneuvering while automatically sensing and accounting for the length of your trailer.

With available LaneSense[®] Lane Departure Warning Plus,⁹ a forward-facing camera mounted in the vehicle's windshield identifies road lines and determines vehicle position.

AVAILABLE ACC STOP¹⁰ AND FSFCW+¹¹ *WORK WITH LOADED TRAILERS UP TO 37,100 LB⁵*

FULL-SPEED FORWARD COLLISION WARNING PLUS (FSFCW+).¹¹

This system notifies the driver through multiple warnings when the vehicle gets too close to a preceding vehicle. If the driver isn't braking enough, Auto Emergency Braking automatically takes over, dramatically increasing braking when over 31 mph and even coming to a full stop if traveling under 31 mph. FSFCW+¹¹ also works with attached trailers and will engage the trailer brakes. Available.

PARKSENSE[®] FRONT AND REAR PARK ASSIST.¹² Integrated sensors in the front and rear bumper valences use ultrasonic waves to determine the relative distance to objects in front or in back of your pickup. If an obstacle is detected when backing up or moving forward during parking maneuvers, visual and audio signals inform the driver. Available.

ADAPTIVE CRUISE CONTROL WITH STOP (ACC STOP).¹⁰

This system can maintain a driver-selected set distance from vehicles in the lane ahead. When slower traffic is detected, Ram Heavy Duty automatically adjusts its speed all the way down to 0 mph, even with a trailer attached. Available.

Buttons on the mirror adjust brightness for less glare as well as shift the displayed image up and down for customized viewing. The mirror also functions as a normal reflective mirror with the simple flip of a switch.

THE AVAILABLE 360° SURROUND-VIEW CAMERA SYSTEM? Thanks to strategically placed cameras—inside the front grille, in the outside mirrors and in the tailgate handle—you'll see a complete picture of the vehicle surroundings. The result is secure parking, loading/unloading and trailer hookup.

THE AVAILABLE CARGO-VIEW CAMERA? Located in the Center High-Mount Stop Light (CHMSL), this camera displays a high-perspective view of the bed of the vehicle on the center-stack screen. Benefits include a zoom feature and views of the box cargo, aftermarket upfit equipment, or in-box hitch status—like available fifth-wheel or gooseneck applications.

The large image above is the wide-angle view, displayed on the full-color center-stack display. It delivers expansive viewing capability, with enough wiring to handle trailers up to 40 feet. Zoom feature is included. With the available Auxiliary Camera Prep and properly equipped radio, the system can accommodate up to two cameras.
