There's A Reason Every Suzuki Wears An "S" On Its Chest.

The first 4-wheel ATV...ever.

Suzuki introduced the QuadRunner in 1983, and it was an overnight sensation with both the press and the public. Praised for its user-friendliness as well as its impressive engineering. Not surprisingly, these characteristics continue to set Suzuki vehicles apart to this very day.

Dominance through superior engineering.

When Suzuki introduced the GSX-R line in 1985, a dynasty was born. GSX-Rs have become the best-selling sportbikes in America and have won an unprecedented 36 AMA Championship racing titles. Durability, superior engineering and a passion for performance have made Suzuki the premier choice for discerning buyers around the world.

Innovation & engineering excellence come naturally.

Suzuki Marine engines are the unprecedented seven-time winners of the coveted National Marine Manufacturers Association Innovation Award, thanks to products like the Suzuki DF300, the world's first 300-hp, 4-stroke outboard motor. A showcase of superior performance, improved fuel economy and reduced environmental impact, the DF300 set a new benchmark for performance in a compact outboard engine.

Quality so good, we guarantee it.

While there are no guarantees in life, Suzuki makes sure there are on the road. That's why all Suzukis are backed by America's #1 Warranty—up to 100,000 miles with a 7-Year Powertrain Limited Warranty. It's fully transferable, has zero deductibles and even offers 24-hour roadside assistance for three years or 36,000 miles. What's more, you'll enjoy the convenience of a courtesy vehicle program, available from participating dealers for up to five days on warranty-covered repairs. So, whatever worries you have in life, your vehicle won't be one of them.

**AMERICA'S #1
WARRANTY**

100,000-Mile / 7-Year Powertrain Limited Warranty, Fully Transferable, No Deductible.

¹Electronic stability control cannot be relied upon to prevent accidents due to abrupt steering, carelessness or dangerous driving techniques. ESP is a registered trademark of Daimler AG. ²An airbag supplements the crash protection offered by seat belts. The driver and all occupants must be properly restrained by wearing seat belts at all times to minimize the risk of severe injury or death in the event of a crash. ³AWD models only. ⁴Not all services available in all areas. Subscription required at extra cost. ⁵The Tire Pressure Monitoring System (TPMS) is not a substitute for regular tire pressure inspections. Tire pressure should be checked at least monthly using a tire pressure gauge. Maintaining the recommended tire pressure can help avoid performance problems, tire damage and premature wear.
