TOYOTA

Tacoma

It's the arrival of the FITTEST.

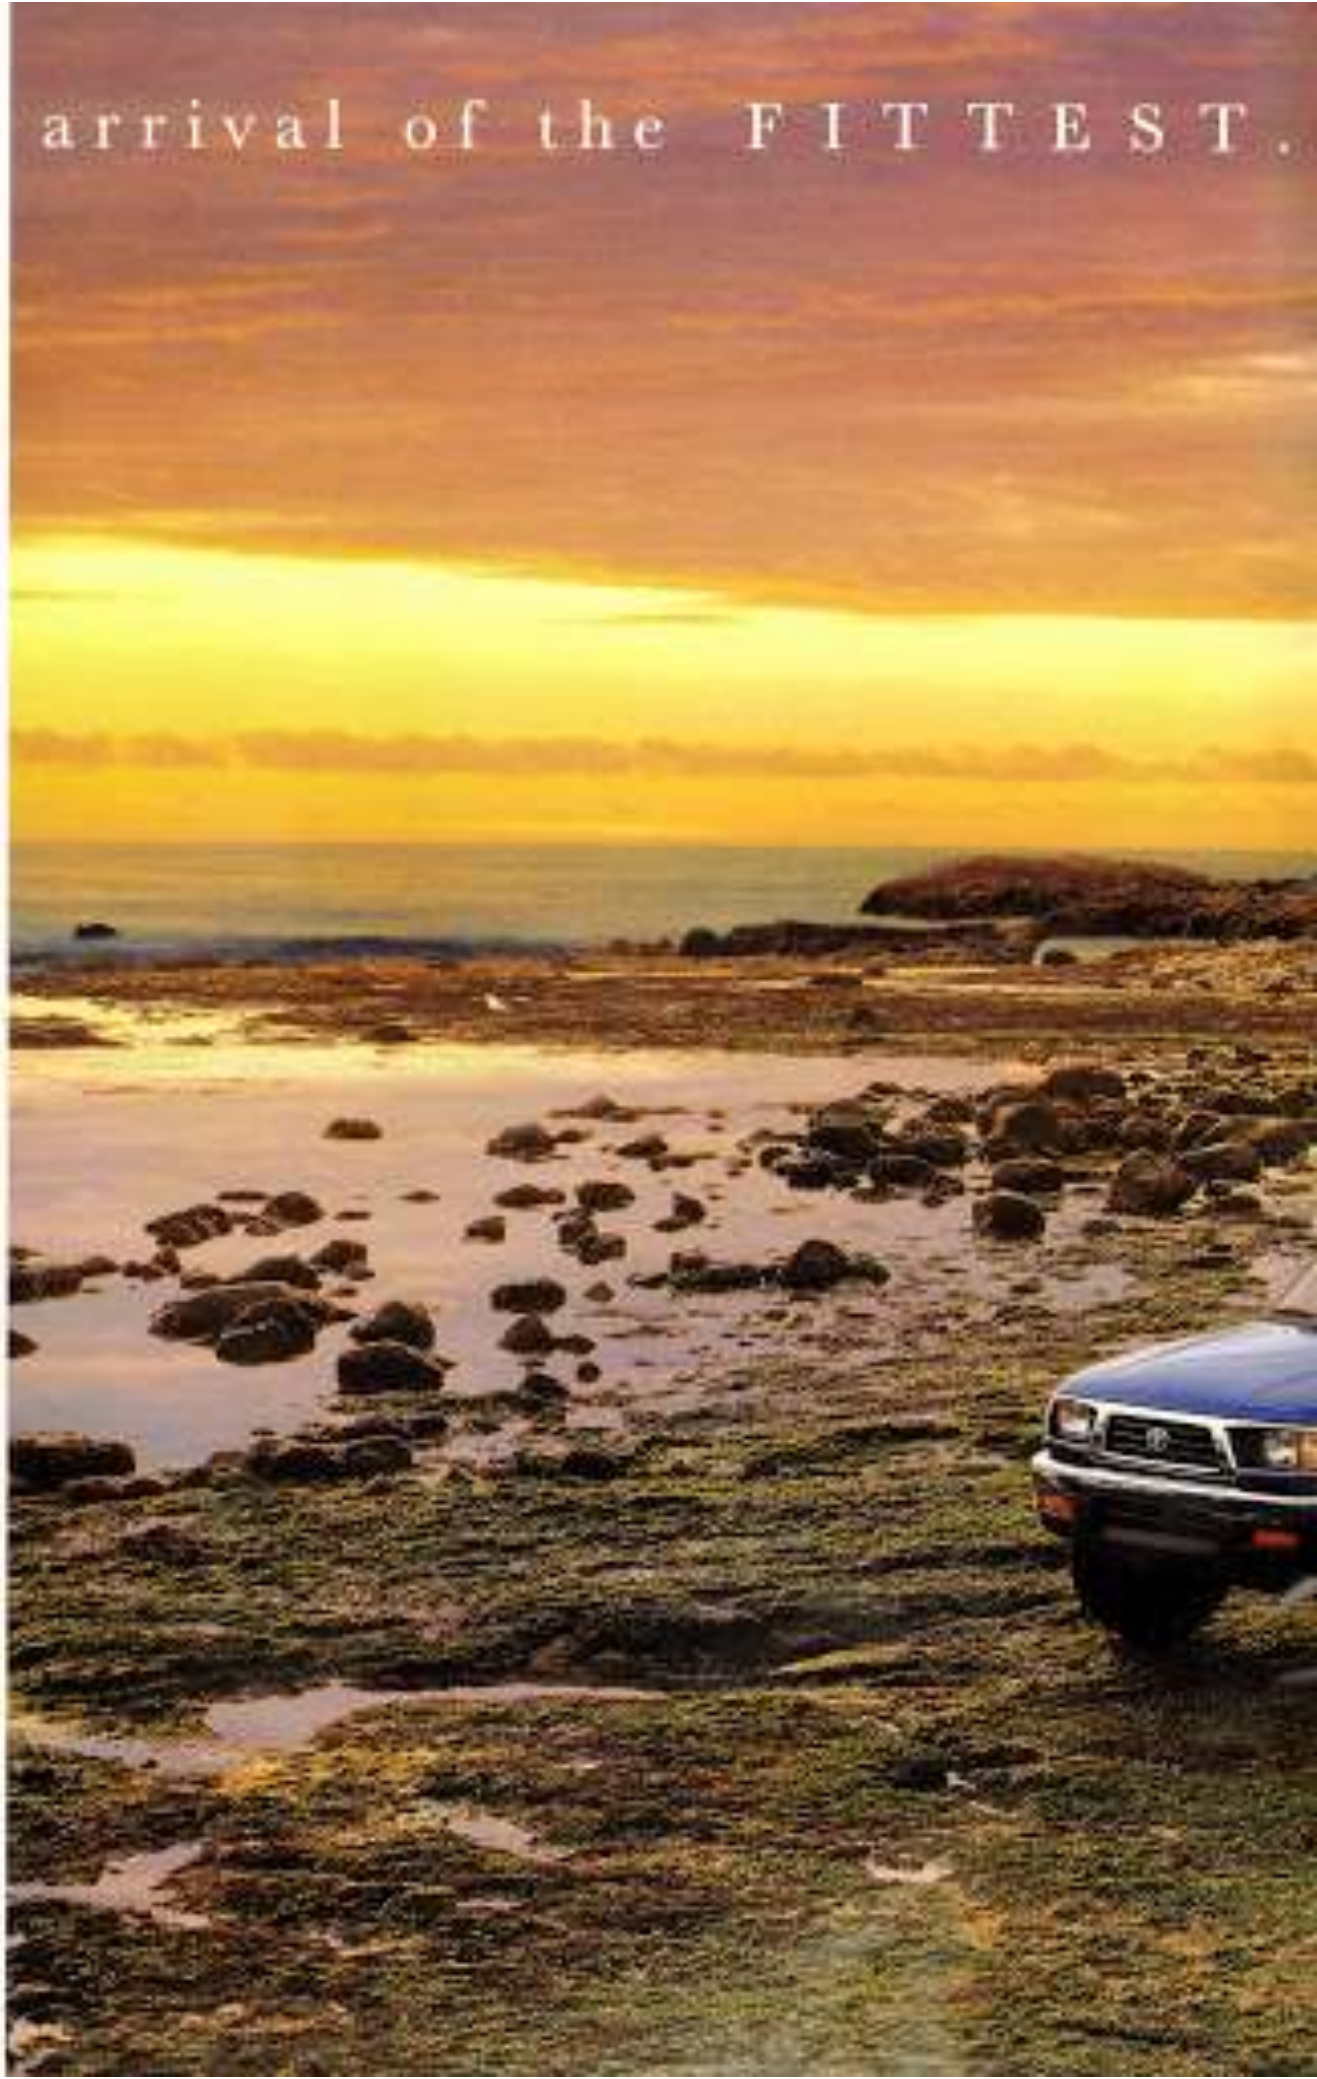

IT'S THE ALL-NEW TACOMA

compact pickup truck, taking Toyota's legendary reputation even further. It's increased power in an entire line of exceptional engines. Like Tacoma's muscular 190-hp V6 with a power-to-weight ratio that provides quickness and strength — up to 3,000 lbs. towing capacity.* It's increased performance. Tacoma's independent coil-spring, double-wishbone suspension is really redefining what it means to "drive like a truck." And it's payload. A hefty 1,640 lbs. for the 4x2 Regular Cab and a substantial 1,870 for 4x4 V6!†

N O W, S T O P for a moment and admire Tacoma's confident presence. Its bold, athletic stance. Notice its rounded shape, conditioned to slice efficiently through the air. With its roomy passenger space, long wide bed and a host of technical innovations, Tacoma has established new territory for the compact truck world. Toyota has been the number-one-selling compact 4x4 in America for 14 years* and counting. Tacoma has arrived!

*See Young & Rubicam Chart on page 110 for details.

It's the heart and

soul of a WINNER.

The powerful Tacoma
30-hp 2.4-liter V6 engine
 features dual overhead
 cams, 4-valves-per-
 cylinder and Toyota's
 Distributorless Direct
 Ignition System. The
 result is high performance
 and lower fuel consump-
 tion* with increased torque
 (220 lbs.) in the vital low-
 and mid-range speeds.

Tacoma's efficient 2.4-liter
4-cylinder engine (4x4 models
 only) puts out a strong 187
 hp @ 5,000 rpm and
 200 lb.-ft. of torque
 @ 4,000 rpm with
 the economical mpg* of
 a 4-cylinder.

Tacoma's rugged 2.7-
liter 4-cylinder engine
 (4x4 models only)
 delivers 150 hp @
 4,000 rpm and 177
 lb.-ft. of torque @
 4,000 rpm through the
 use of sophisticated multi-
 valve design. It has the
 strength, dependability and
 efficiency to safely power 4x4
 work and keep you going.

IT'S A TOYOTA TRADITION.

A superior line of powerful engines with tech-
 nology that offers substantial standard horse-
 power, quiet operation, fuel efficiency* and
 legendary reliability. Consider, for example, the
 3.4-liter four-cam 24-valve V6 electronically fuel-
 injected 3FZ engine that delivers 190 hp at 4,100
 rpm and 229 lb.-ft. of torque at 3,000 rpm. When
 it comes to speed and endurance, you're tapping
 into exceptional power and serious torque
 response, both the result of multi-valve technol-
 ogy and a longer, tuned intake system. Tacoma
 too's 2.7-liter 4-cylinder engine delivers a hefty
 150 hp and 177 lb.-ft. of torque at 4,000 rpm.
 Balance shafts help reduce noise, vibration and
 harshness (NVH). And the 4x4 model's 2.8-liter
 engine is more powerful than some V6s, yet still
 offers the economy of a 4-cylinder.* All Toyota
 engines are built to add strength to the tradition
 of Toyota's renowned durability.

*See EPA ratings. Information on page 10 for details.

TOYOTA'S RESEARCH AND

DEVELOPMENT

is paying off on the toughest proving ground of all—real life. From freeways to mountain trails, Tacoma shows impressive skills. Fully independent coil-spring, double-wishbone suspension helps keep your front wheels in constant contact with the driving surface and improves cornering on- and off-road. Heavy-duty rear leaf springs provide a more comfortable ride and greater handling stability when carrying large loads. Tacoma 4x4 reaches new levels of performance with its high ground clearance of 12.0 inches* and impressive 17 inches of front wheel travel.

TACOMA'S TURNING RADIUS

is considerably tighter than most leading competitive 4x4s, allowing more control when maneuvering out of tight spots. Standard on all Tacomas is high-performance rack-and-pinion steering with precision-

machined gears

to deliver a

more positive

feel, quicker response

and it's a lot more fun

to drive.

COORDINATION.

TOYOTA TECHNOLOGY | 9

Tacoma 4x2 shown. 200 shown in Super Red Steel with optional equipment and two-destination warranty.

It's the making of a CHAMPION.

IT'S THE ENGINEERING behind the metal. Tacoma's tough anti-rust/moist steel frame resists rusting. New high-tensile-strength steel plates are used for all Tacoma outer body panels, balancing lighter weight with resistance to dents. And on the inside, Tacomas are kept more quiet with the use of a dash silencer and asphalt composite sheets that are applied to most of the floor area.

SHIFTING IS EASY with Tacoma's standard 5-speed manual overdrive transmission. Multi-cone synchromesh mechanisms are used to reduce shifting effort and improve durability. And Xtracab SR5 V6 models have an available One-Touch Hi-4 selector that allows you to shift up to 4WD at the touch of a button even while in motion. If you'd rather let Tacoma do the shifting for you, there is a 4-speed electronically controlled automatic overdrive transmission (ECT) available to handle the job. It's the new Toyota Tacoma: bred to be a champion.

● Computer-mapped engine mounting locations help reduce vibration and further improve Toyota's NVH technology.

● Tacoma's front suspension is a fully independent coil-spring double wishbone type with the latest bar and hydraulic shock absorbers (gas-filled on 4x4 V6 models) providing excellent cornering and control on all kinds of roads.

Front Suspension

1 The efficient power-assisted ventilated front disc brakes combine great stopping power with fade resistance. The vented rotors dissipate heat, further

reducing brake fade. The brake pads feature an audible alert indicator as a safety feature designed to let you know it's time to have them checked.

2 "Sandwich"-style asphalt composite and steel shocks are placed between the steel body and chassis panels to help minimize noise and vibration.

3 A push-button clutch start-cancel switch allows you to bypass the clutch and use the low gearing of the starter motor to climb out of tough situations. (Not manual transmission models only.)

4 Tacoma's lower body panels, as well as leading edges of the hood and fenders, are undercoated with a self-strip primer to reduce chipping and peeling.

5 Tacoma's side door impact beams strengthen the door structure and help protect against collisions.

6 The rugged frame has been designed to minimize vibration and weight even as its rigidity has increased.

7 Rear leaf spring suspension with staggered hydraulic shock absorbers (pre-filled on 4x4 V6 models) helps keep steering, ride and ride comfortable. Pads between the leaf spring plates help minimize vibration.

8 Optional 4-wheel Anti-lock Brake System (ABS) uses special wheel speed sensors and a computer to help avoid wheel lockup while providing better steering control during hard braking.

It's having the **BEST** seats

IF THE MEASURE of an interior is the sum of its amenities, Tacoma Xtracab really adds up. Start with generous leg room and abundant cabin height that allow passengers to ride comfortably in front or back. 80/20 fully uple fabric bench seats fit you perfectly, and folding rear seats feature 3-point seatbelts to help ensure a safe arrival. For aerodynamically efficient ventilation, Xtracabs provide tilt-out rear quarter windows. And for a sportier fit, 4x4 Xtracab SR5-V6 models offer freeway adjustable bucket seats.

THERE'S STILL MORE to this inside story. Notice that Tacoma Xtracab features full carpeting for better soundproofing. A dual front cup holder handles your beverages, while dual door map pockets are great for stashing small items. Rear tinted privacy glass helps keep the cab cool, and the optional tilt steering wheel* lets you slide easily into the driver's seat. Tacoma Xtracab doesn't leave much room for improvement.

*Light rail map/pocket light fixture
focus light on your left, your
passenger's or both. Front
passenger can read maps
easily without projecting dis-
tracting light on driver's side.*

*Optional Power Package
includes power windows
and door locks, so it's easy
to keep your environment
the way you want it.*

*Sliding front passenger seat
(4x4 Xtracab SR5 V6 only)
makes getting in and out of
the car jump out easy. Tilt
the front seat up, and
the entire seat slides
forward. The front seat slides
back into position when you
tilt the seat back.*

XTRACAB INTERIOR | 13

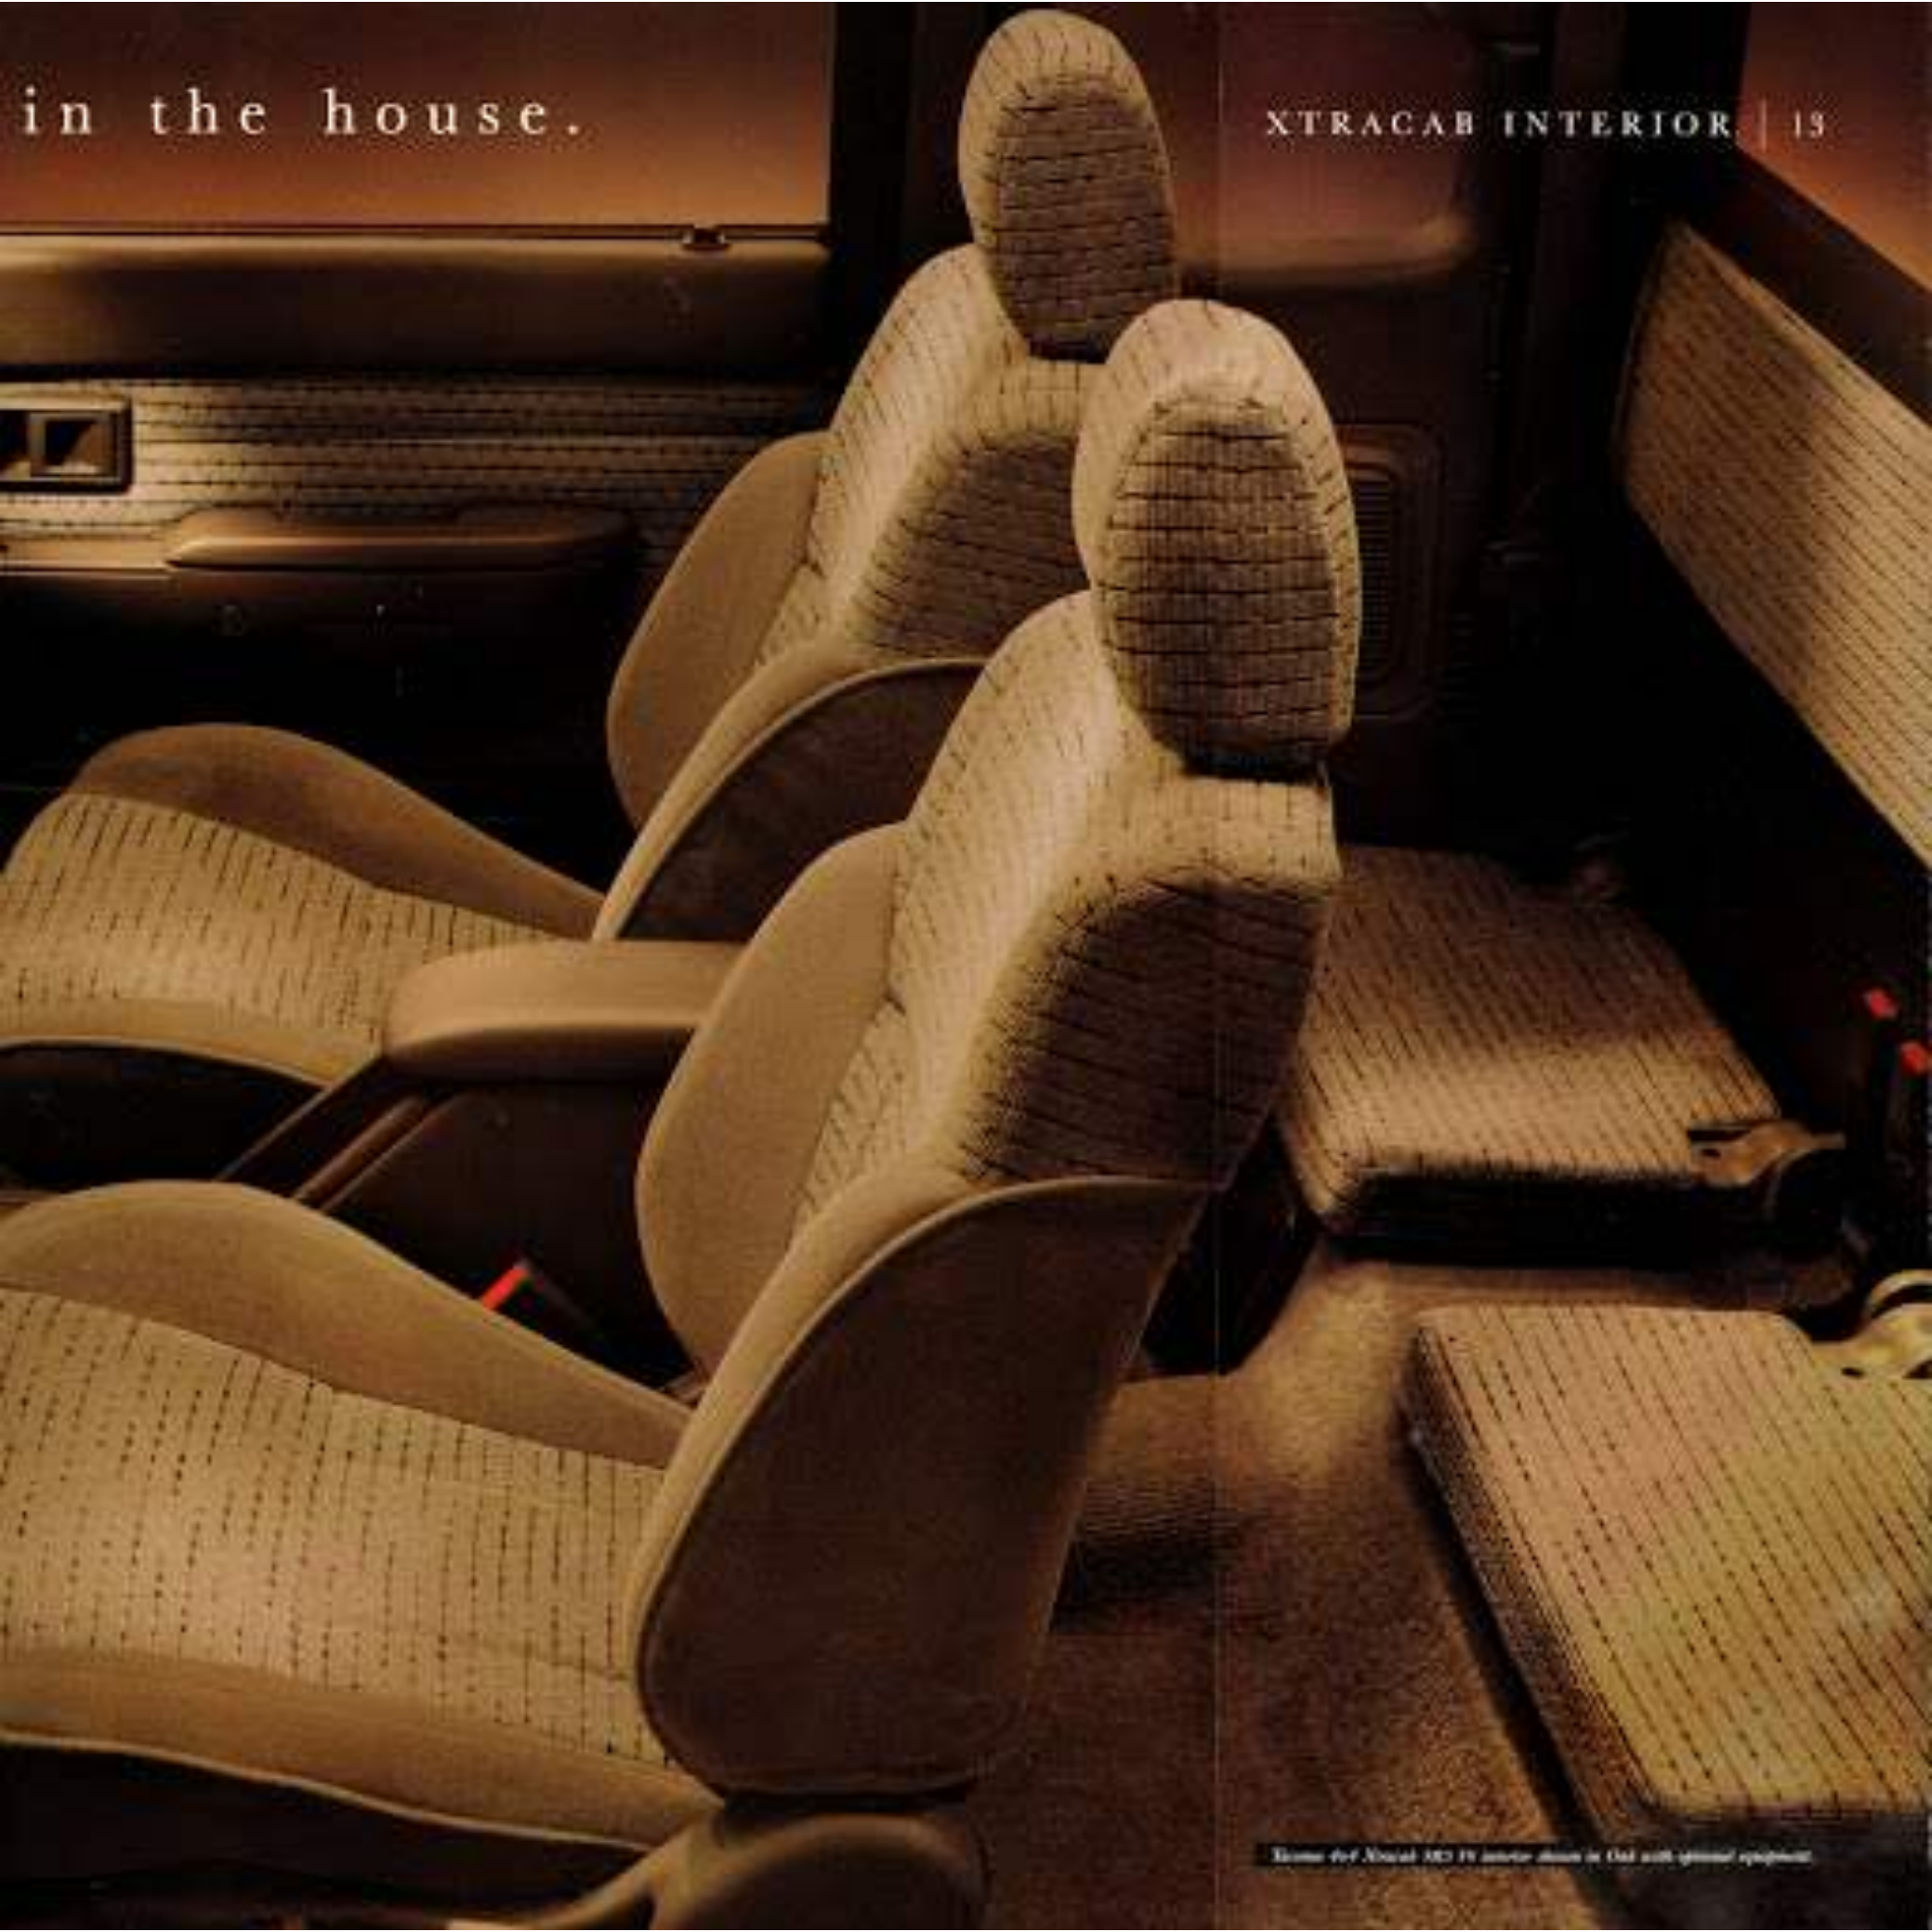

Image for Model 303 IV shown above is for optional equipment.

PREPARED for what lies ahead.

TACOMA'S ACTIVE INTERIOR IS

designed with a clear and concise instrument panel. Engine temperature, speed and fuel level gauges are well positioned, allowing you to gather information at a glance. Then scan the perimeter of the panel for battery, oil pressure, lights, etc. Everything is there, so you can check your engine's status and in-use systems any time. Adjustable front shoulder belt anchors provide a secure fit, and all Tacomas come equipped with a driver-side air bag Supplemental Restrain System (SRS) to help protect the driver from injury during an accident.

ENTERING OR EXITING the cab, Tacoma's convenient driver- and passenger-side assist grips make it easy. They come in handy through curving roads and rough terrain too. And if you want to move to the beat of another drummer, there's no need to lean over. Your optional Deluxe ETR (Electronically-Tuned Radio)/Cassette is just a few effortless inches away. It's all the information and equipment you need, rolling down 6-mph trails or a 65-mph stretch of highway.

Take steering column air bag without interfering with column adjust and wheel getting in and out of your Tacoma seat. (Standard on 4x4 Xtracab SR5 V6, optional on other models.)

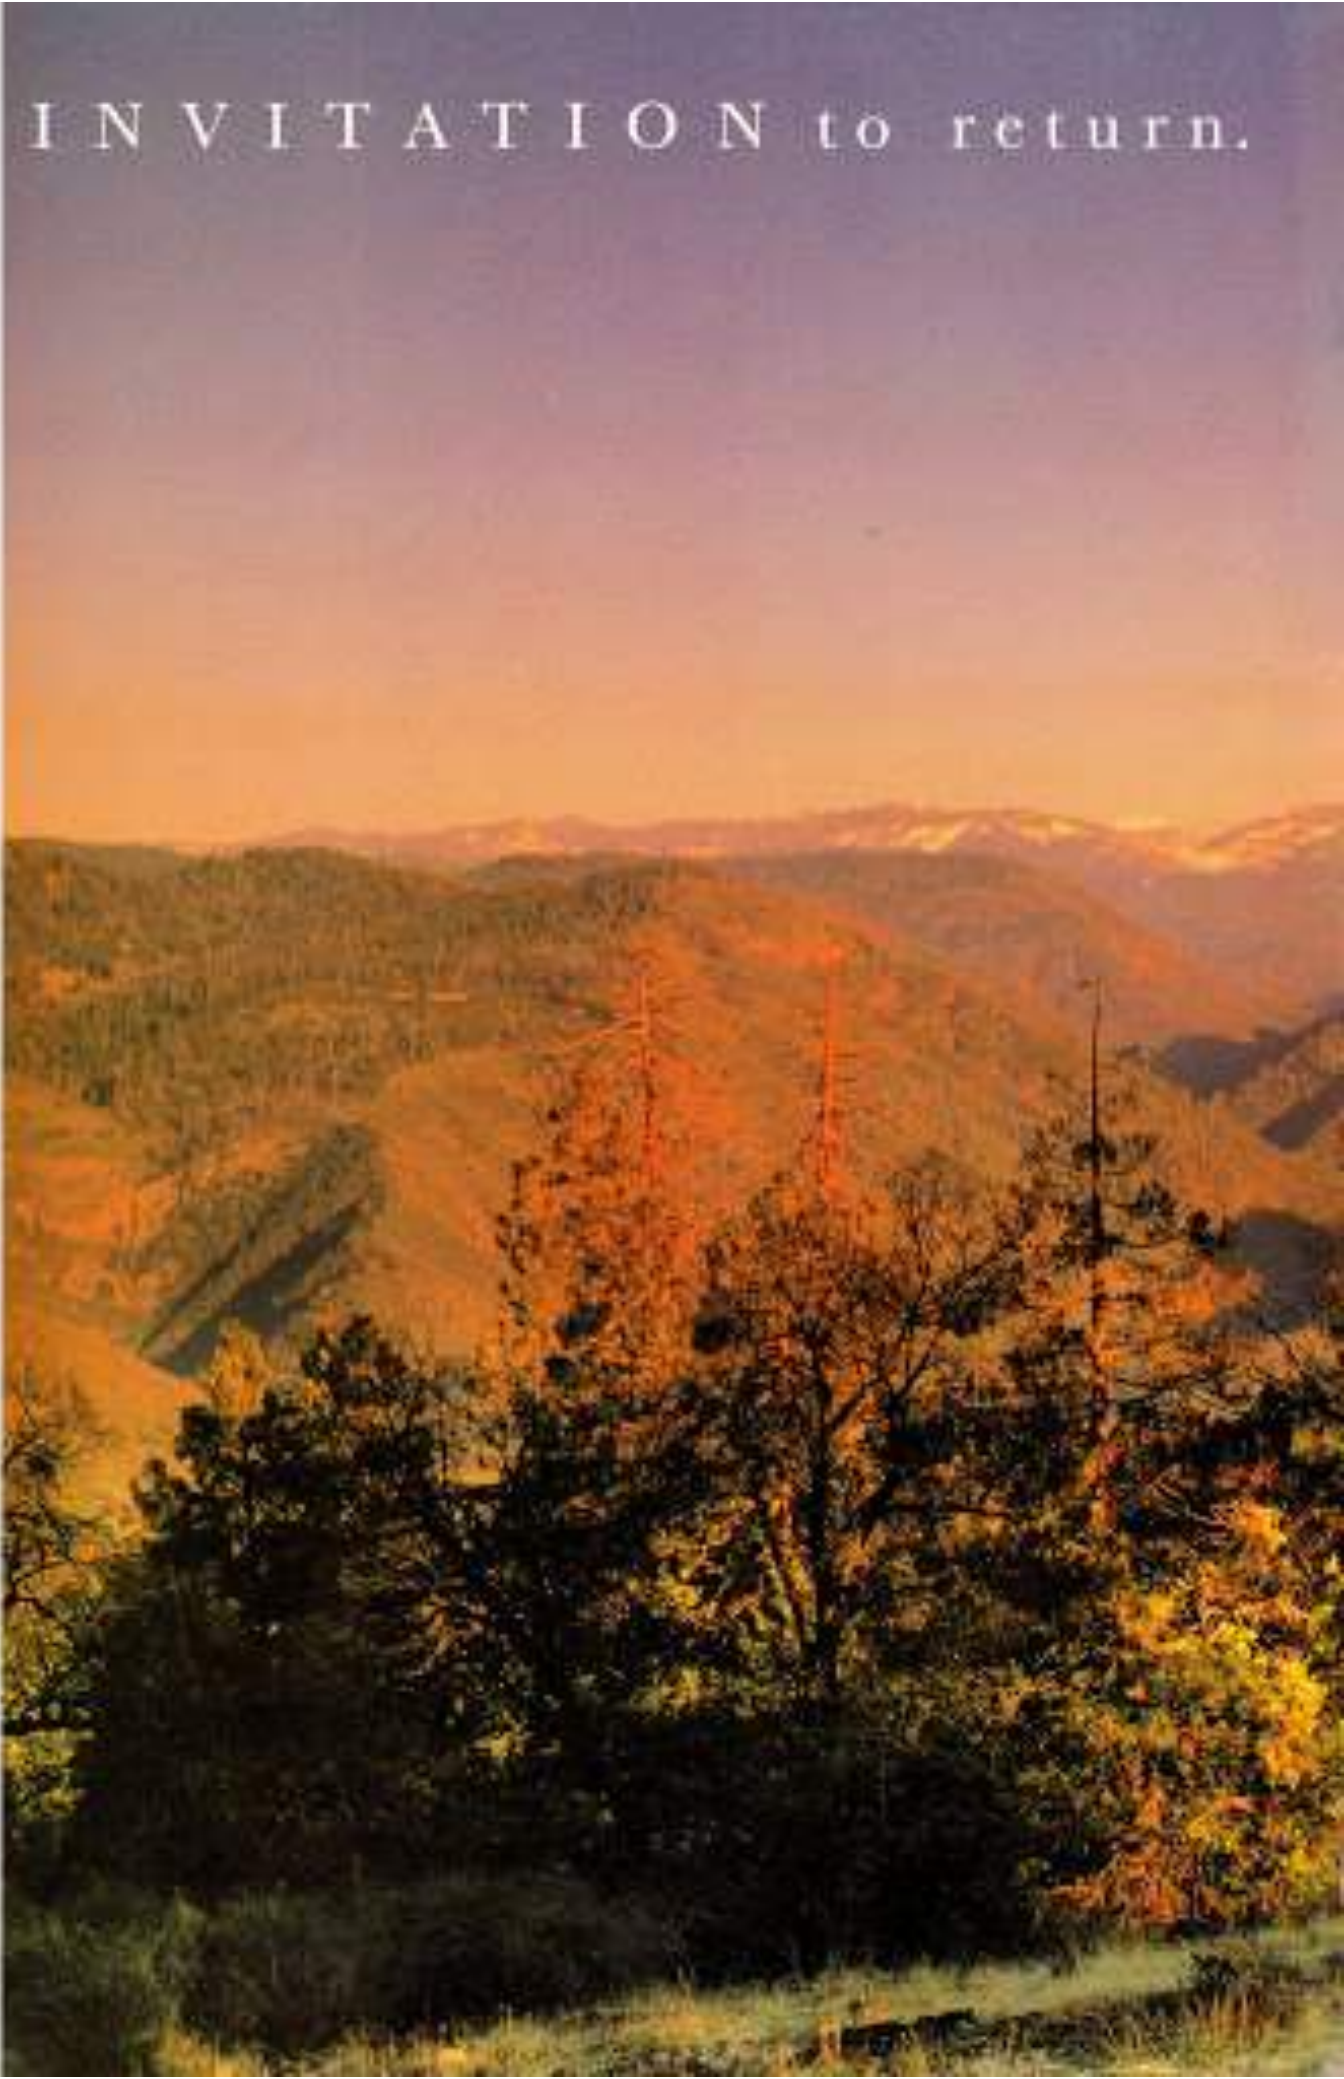

Standard Tacoma driver-side air bag is a Supplemental Restrain System (SRS) designed to inflate in a severe frontal collision. In all other accidents, seatbelts offer primary protection, and the air bag will not inflate. To minimize the risk of severe injury or death in all types of crashes, seatbelts must be worn at all times by all vehicle occupants. Do not sit or place objects close to an air bag. Please read your Owner's Manual.

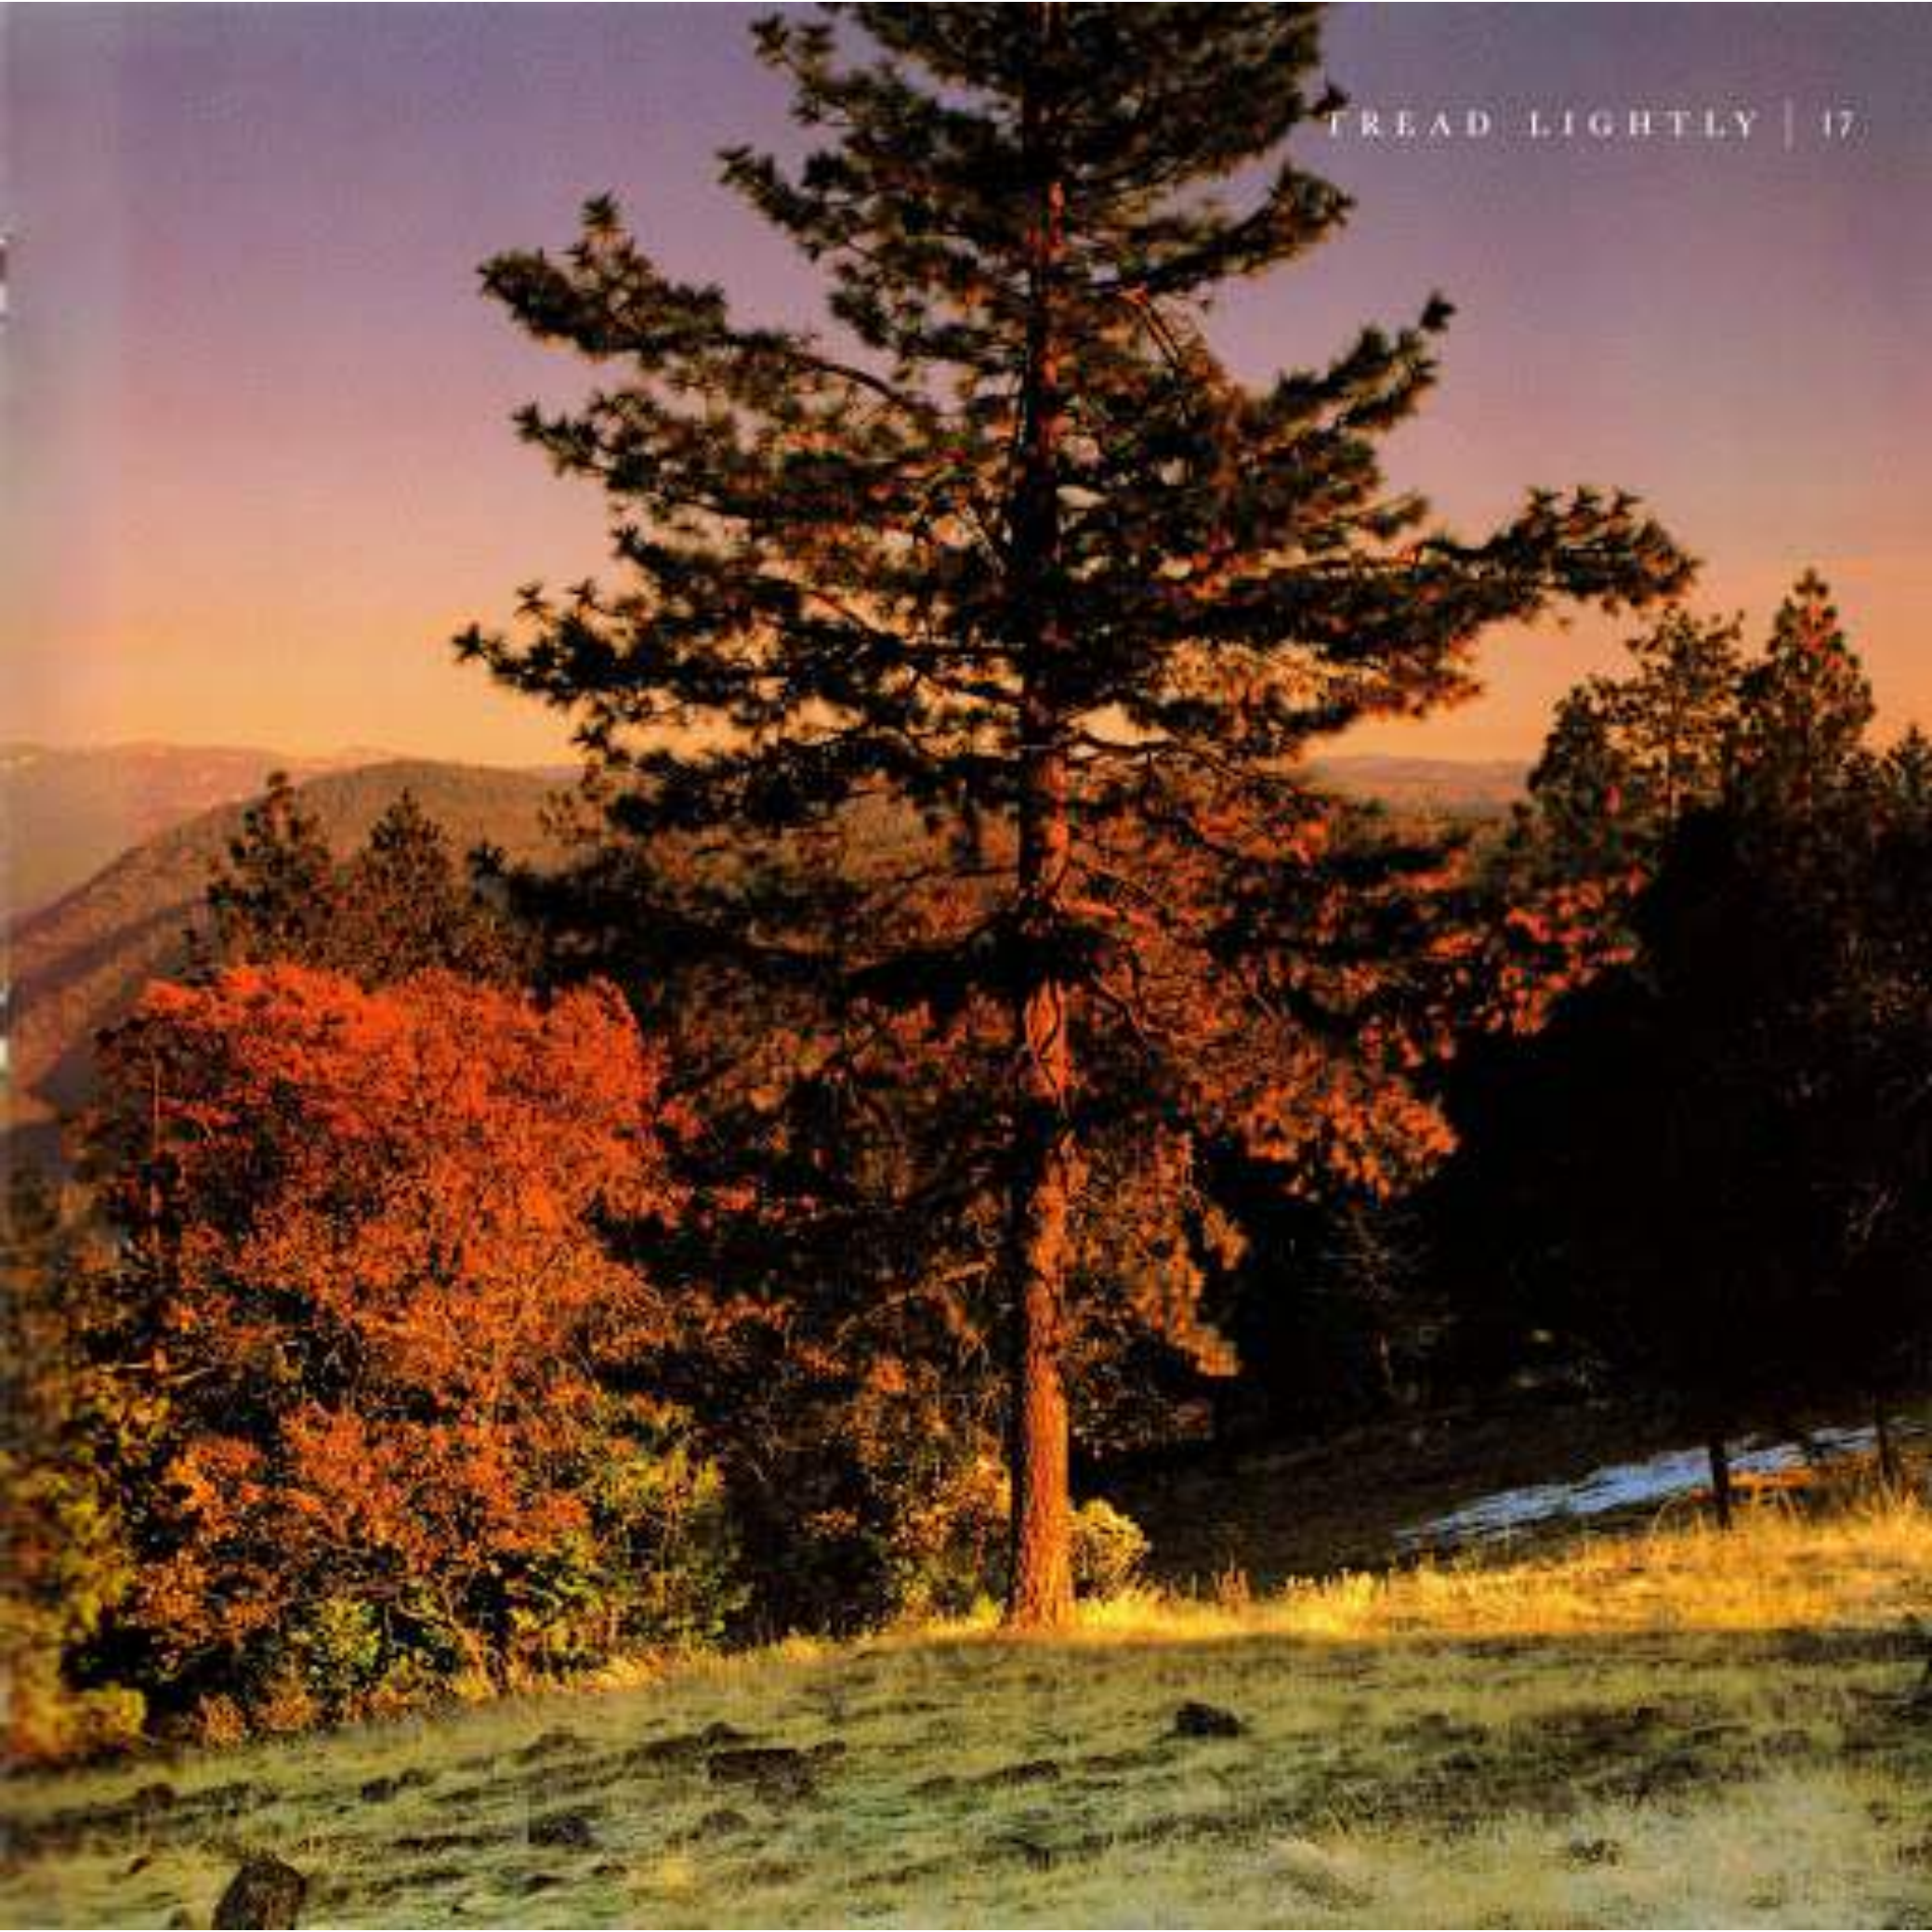

Four poppable cup holder holes offer best fit for many cups, so both driver and front passenger have a handy place for their hot or cold beverages.

It's an INVITATION to return.

W E L C O M E . When you're off the paved road and into the wilderness, act responsibly. Toyota urges that you use your off-highway vehicle with an appreciation of the natural beauty of the land. As an official sponsor and a founding member of the "Bead Lightly™" program, Toyota reminds you, when you go off-road, go easy on the environment by using your common sense and only driving on marked roads and trails.

It's arriving at the TOP.

WHETHER YOU'RE EXPLORING

a remote pine forest or a mountain trail, the Tacoma 4x4 with optional SX Package gets you there in style. Aluminum alloy wheels with 31" x 11.5" or P225/75R15 tires take on the terrain, while gas-filled shocks (standard on V6 models) smooth out the road. Fabric bucket seats with adjustable headrests keep you comfortable, and a sliding rear window lets in plenty of fresh air. The sporty exterior graphics and an AM/FM EIR with 2 speakers are included on your 4x4 SX, and you can equip it with or without the Chrome Package.

FOR THOSE WHO WANT IT ALL, there's the Tacoma 4x4 Xtracab SR5 V6. With most of the above features included, it adds the 190-hp 3.4-liter engine, the SR5 interior trim with 6-way adjustable driver's sport seat and the distinctive SR5 exterior striping, as shown on previous pages. Getting to the top has never been this easy.

4-Wheel Down allows you to change to 4WD simply by shifting the transfer selector knob, even while in motion.

4x4 | SX | 19

Tacoma 4x4 SX shown in Steel Blue Metallic with optional SX Package.

20 | 4 x 2 SX

Tacoma 4x2 shown in Paradise Blue Metallic with optional SX and Chrome Package.

It's having the B E S T equipment.

IT'S OWNING TACOMA. Especially when your 4c2 is equipped with the optional SX Package. Power-assisted steering makes turning a snap. Bucket seats with adjustable headrests let you ride in comfort, and a sliding rear window improves ventilation. An AM/FM CTR with 2 speakers keeps you entertained, while black painted front and rear bumpers dress up your Tacoma. Aluminum alloy wheels and exterior graphics complete your sporty image.

TACOMA'S EFFICIENT 142-hp 2.4-liter 4-cylinder DOHC engine rivals some V6s and still boasts the economy* of a 4-cylinder engine. Stay in charge with the standard 5-speed manual overdrive transmission, or take it easy with an optional 4-speed electronically controlled automatic overdrive transmission (ECT). With this kind of equipment, your 4c2 SX is a truck you'll hang onto.

Optional power-assisted steering is more convenient and opens up more front floor space.

This 4c2 SX (shown above) doesn't wrimp in space or amenities. Along with standard dual-mass, full door bins, dual armrests, roll-over tarping and color-keyed instrument panel, you'll enjoy many bucket seats and a sliding rear window.

It's exercising your OPTIONS.

IT'S ROOM FOR YOU and all of your stuff. Or you and a friend, or two, or three, and all *other* stuff. Xtracab is up to the task with a cab full of elbow room that features a 60/40 split front bench seat with front headrests that adjust to your height. Roomy rear seats give passengers the security of 3-point seatbelts, while a powerful 4-cylinder or V6 powerplant makes everything easy to carry.

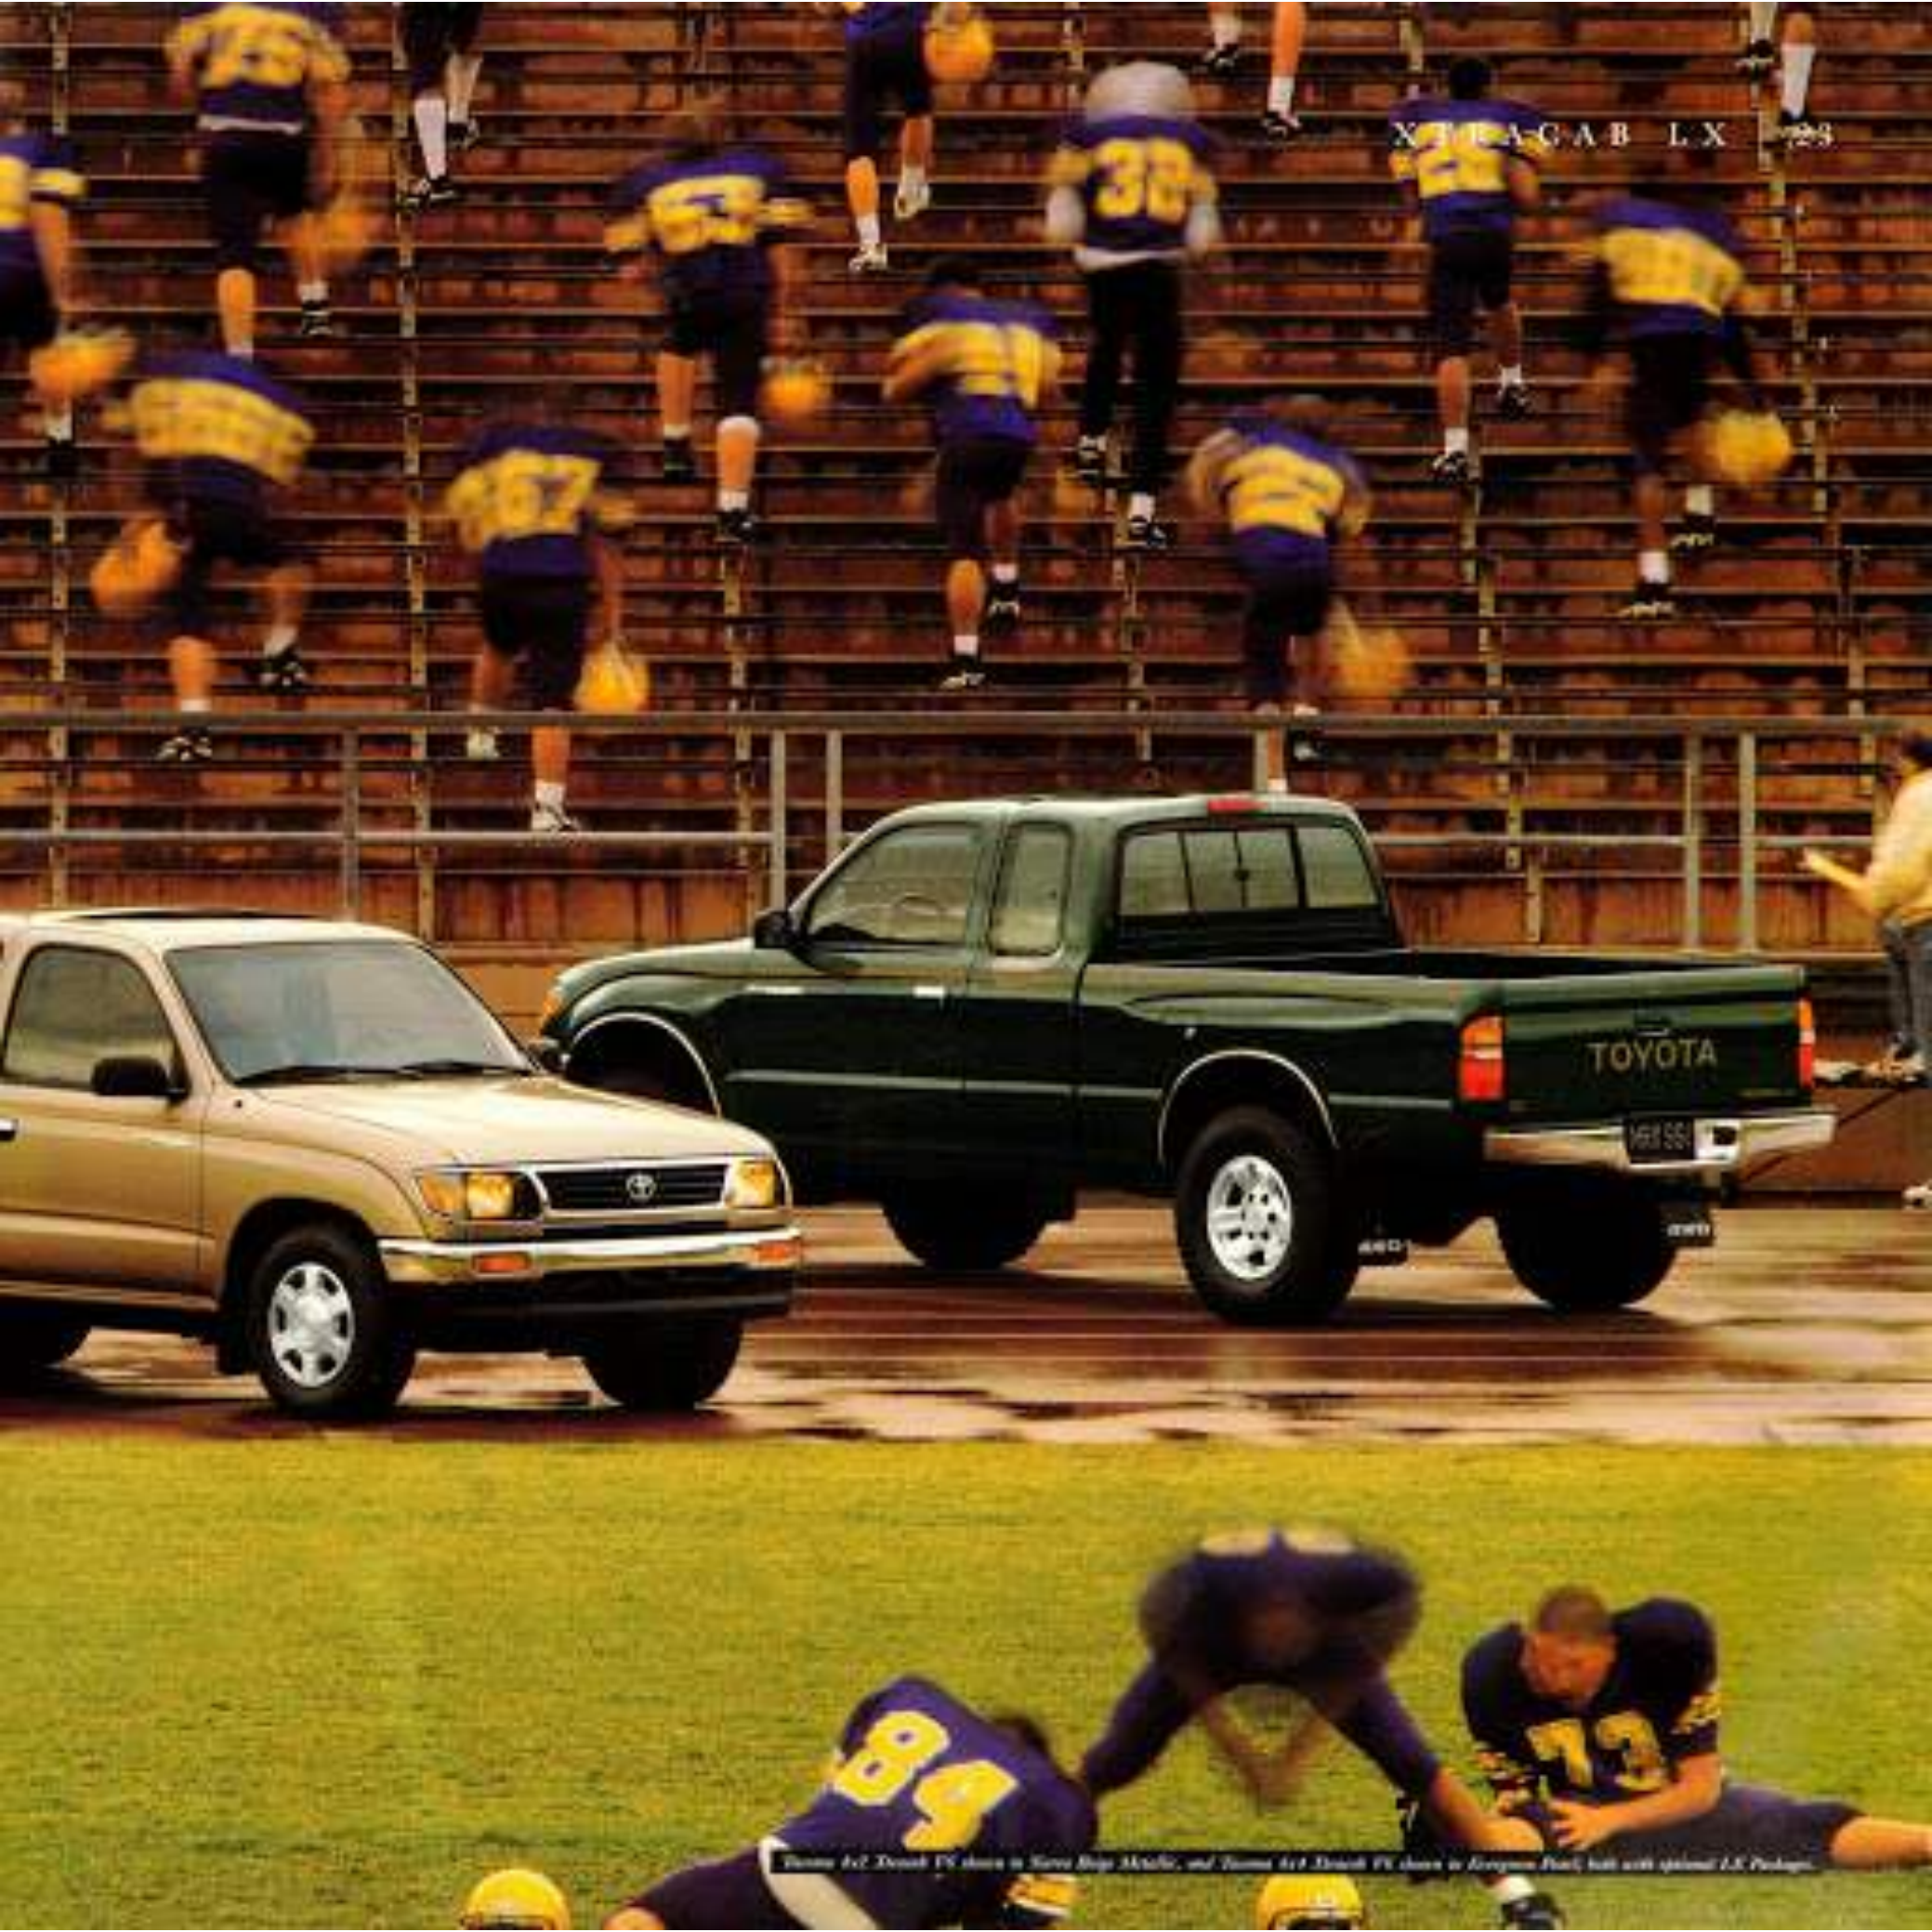

ADD THE OPTIONAL LX PACKAGE, and you'll travel with Chrome front and rear bumpers, grille and trim, sliding rear window to let fresh air in and dual fabric sun visors to block the sun out. Toss in an AM/FM ETB with 2 speakers and sporty exterior stripes, and you'll see why the roomy *cab* of cab Xtracab LX has so many fans.

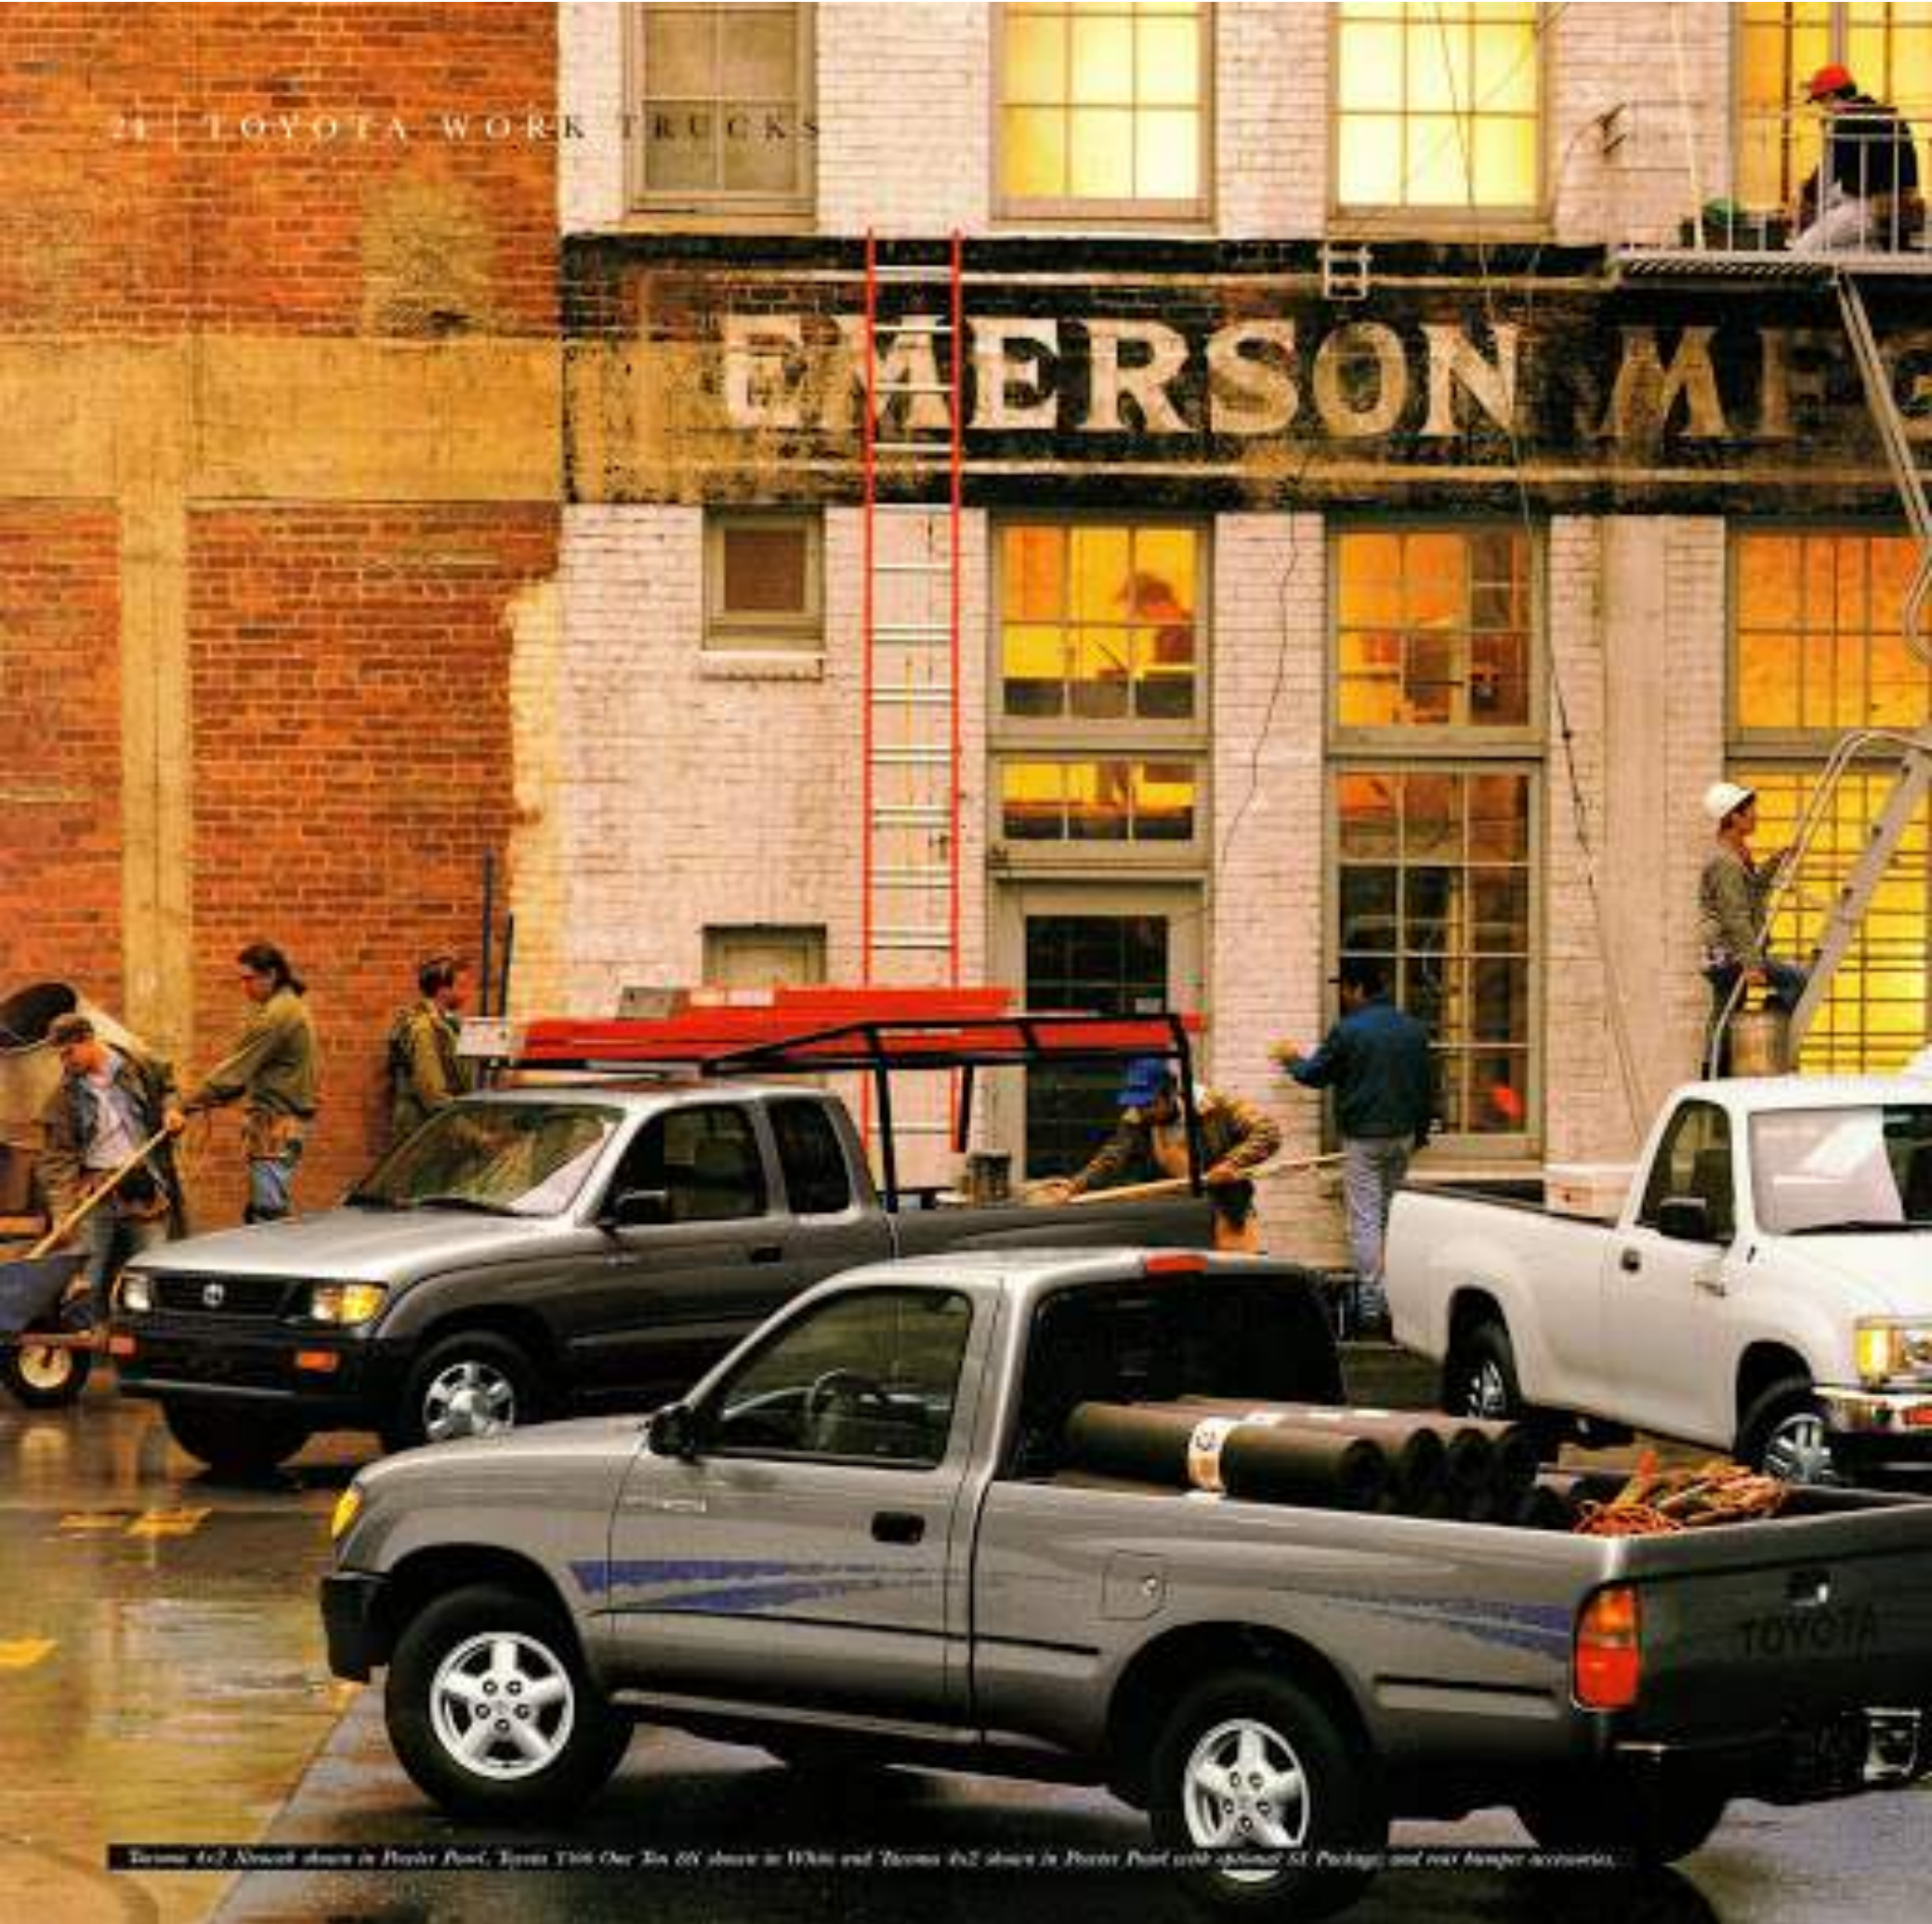

CTC live air conditioning, included in the optional LX Package, helps keep your environment cool and comfortable.

*Every Xtracab LX interior comes with new, gray-tinted privacy glass to help keep the inquiring world outside, while optional power-adjusted steering (standard on 2.4 V6 models) makes wheeling the kids around *Joan* easier.*

24 TOYOTA WORK TRUCKS

It's TEAMWORK.

IT TAKES TOYOTA TEAMWORK to earn the loyalty of our customers. That's why we're always striving to make a quality product that works smart as well as hard. So it's not surprising Toyota has been ranked as the #1 Truck Line in Customer Satisfaction for four years running.* In addition, Toyota T100 was ranked "Best Full-Size Pickup In Initial Quality" by J.D. Power and Associates for the last two years in a row.**

THE RIGHT TRUCK FOR THE RIGHT JOB. You'll find it among Toyota's impressive lineup of compact Tacoma and T100 trucks. Choose the value-packed Tacoma 4x2 with a 2.4-liter 4-cylinder engine boasting V6-like power that's the envy of other 4-cylinder trucks. Got a couple of workers you need to transport? You have plenty of room in Tacoma 4x2 Xtracab, which seats four comfortably. Whether it's a remote job site, or a muddy one, Tacoma 4x4 V6 is up for the job. And when it comes to payload and towing capacity,† Tacoma has the "right stuff." Maybe you're thinking about something bigger. Then consider Toyota T100 One Ton DX with its powerful 190-hp 3.0-liter four-cam 24-valve V6 EFI engine. T100 also comes with responsive rack-and-pinion steering, heavy-duty suspension and larger front and rear brakes for optimal stopping performance. With a Toyota Truck, Toyota quality and reliability are always riding with you.

Tacoma's truck bed puts out 110%, giving you rugged, double-riveted construction that can stand up to bricks, dynamite, heavy equipment and a lot more.*

With Tacoma's handy tie-down hooks, you won't have to worry about finding good places to secure your load.

Tacoma's removable tailgate gives you more to work in when you have lots of loading and unloading to do.

It's F O U R times around the world and

THAT'S 99,666.2 MILES. IF YOU COULD FOLLOW THE EQUATOR. Just a little short of the 100,000 miles many thousands of Toyota Truck owners have racked up. Just ask Robert Barth or Michael G. Coninelli (both pictured right). On Michael's 3579 4x2 Long Bed Deluxe, the number is 133,000 miles (over six times around the world) and climbing; while at last count, the odometer on Robert's 1990 Toyota 4x4 SR5 read an impressive 222,000 miles. (Almost nine times around the world!)

THESE OWNERS AREN'T ALONE. They add their names in the growing ranks of thousands of Toyota Truck owners all over the country who have called to tell us about their 100,000-mile (or more) success stories. And with the miles these Toyota Truck owners are logging every day, it's no wonder an owner like Jerry Calabrese from Annapolis, Maryland, has 192,305 miles on his 1990 Toyota 4x2 Standard Bed and is still counting.* (That's a whole bunch of times around the world... almost 11!) All of which goes to show that when it comes to quality and reliability, our numbers are in your favor.

It's Toyota QUALITY, American-built.

IT'S OUTSTANDING QUALITY.

Proven by how long Toyota Trucks last, Toyota has been selling trucks in the U.S. since 1961 and has more trucks on the road than any other import.*

TACOMA. It's designed for Americans and built by Americans. Today, all Tacomas are being built at New United Motor Manufacturing, Inc., in Fremont, California. Tacoma truck beds and catalytic converters are being manufactured at TABC in Long Beach, California. And every Tacoma has the legendary Toyota attention to detail built in: Toyota and the American worker. It's a quality partnership with a bright future.

AS A COMPANY that's been a part of America for 38 years, Toyota's ultimate goal is your complete satisfaction. To this end, Toyota is devoted to providing you with the best products and services in the automotive industry. When you choose a Toyota vehicle, you have a COMMITMENT that it will live up to the reputation of quality for which Toyota is known. This dedication to you also extends to the way Toyota does business here in AMERICA. That's why Toyota has a total investment of more than \$3 billion in the American market including design centers, testing facilities and manufacturing plants. In fact, many of Toyota Corollas, Camrys, and all-new Avalons and Tacomas sold in the U.S. are built right here. Over 24,000 men and women are employed in the U.S. by Toyota and Toyota dealers. PARTNERSHIPS with hundreds of American suppliers also have had a significant economic impact across the United States.

From Toyota's substantial national investment in the U.S. to local efforts at the dealer level, the Toyota family is working hard to ensure complete SATISFACTION throughout your ownership experience.

Feedlines should be made of all copper, and should be sold using polyethylene to take in the feed end. Having 100% copper feedlines would be a great idea, but it is not a good idea to use a 100% copper feedline.

TOYOTA TOUCH is a philosophy in action. It's our effort to make all your experiences with Toyota

the very best: from the time of your initial contact, during the sale and throughout the entire life of your car;

our focus is your complete satisfaction. And there's no better example of this than the Toyota Touch

LEASE. Through the Toyota Touch Lease, you can drive a new Toyota with the lease term that's

right for you, and still have the option of purchasing the vehicle at lease end. And because Toyota vehicles

have a historically high resale value, monthly payments tend to be low, thereby making a Toyota Touch Lease

even more attractive. The reason for this is **SIMPLE**. When you lease a vehicle, you pay for the

difference between the initial cost of the vehicle and its projected value when your lease period is over (rather

than the entire cost of the vehicle). In other words, you're only paying for what you use. What's more, all new

Toyota vehicles are eligible under the Toyota Touch Lease and, just like a purchase,

your leased vehicle carries a Toyota new-vehicle limited warranty. So, see your par-

ticipating Toyota dealer for details to find out more about how easily a Toyota

Touch Lease can put **YOU** into the Toyota you've always dreamed of driving.
